VOLUME 32 NO. 20
Legal limitations on the press

"The editor who lives in constant fear of a damage suit, the copy editor who sifts libel in every story and thereby tries to make the safe safer and the reporter who thinks it is cute to refer to an in-flight council member as a slob have no place on a newspaper. The first procrastinates and vandalizes, the second makes the copy vulgar, and the third lends the publisher in court." -

The art of editing by Basket, Sissors, and Brooks, Fourth Edition

The press can use its immense freedom vigorously. Only when it abuses its freedom does it face punishment.

With this issue of The Pointer it is not intended to abuse our freedom.

We need no license to establish a press and start publishing. Nor must we submit copy to any censor, other than editorial judgement, before or after publication. We can criticize the university and its officials severly and have no fear that the doors to the newspaper will be padlocked. In our system, no government — federal, state, county or municipal — can be libelled. The newspaper is a public utility. It can reject or accept any story, advertisement, picture or letter it wishes.

We do not have to beg or bribe officials to get a quota of newsprint. The newspaper is not totally dependent on student government officials. We do not face total threat of withdrawal of the government's privileges should we disagree with its policies.

Courts generally cannot exercise prior restraint to prevent publication of information, although one lower court did in the Pentagon Papers case.

The articles printed or commented on provide no "actual malice." Many of the topics printed in The Pointer have been published by UWSP students. Many, until now, have not been published for fear of offense. In this issue we will "Give the people what they want." Reporters and contributors were given the choice promised a censor and the government's privileges tally dependent. We have reported, portrayed or commented on anyone or anything that became worthy. We have reported, portrayed or commented on anyone or anything that became worthy. We have even reported events which are not worthy of portrayal.

Many of the topics printed in this issue are written by UWSP students. Many, until now, have not been published for fear of offense. In this issue we will "Give the people what they want." Reporters and contributors were given the choice to write on any topic, in any words, with the guarantee that they would not be censored. The ideas in this issue reflect the ideas of the majority of the UWSP student population. The ideas by no mean reflect the ideals of the editor. I promised a censor free issue and the people received a censor free issue.

The articles printed or commented on provide no "actual malice." This does not imply that in future issues I will not keep constant vigil to preserve and extend our freedoms. I constantly wrestle with the problem of what constitutes obscenity. As Editor in chief, I am that person who is to decide what is obscene. I must admit that I have gone against my judgement and have been swayed by the views of others as to what is (or is not) obscene or offensive.

There are many on our campus who would like this paper to contain completely unencumbered viewpoints, language, and photographs. Many of these people feel that I belong back in 18th-century England and the Court of Star Chamber where any criticism of the realm was promptly punished.

I would like to make clear that what some people don't realize is that the freedom to read, to listen and to view is their right, not the special privilege of any commercial enterprise.

You may read the entirety of The Pointer if you wish, but be forewarned, some of you will find this issue completely offensive, tasteless and rude. Others will find nothing to be the least offensive.

MY mother will not be receiving a copy.
A non-censorship article

TO THE EDITOR:

The March 5 Pointer editorial on censorship seemed to sug­gest that censorship is caused "by religious passion." This unique feature of the political Right, yet in America, we have evidence to the contrary. It has been the political Left which has spearheaded the campaign to censor Christianity in Amer­ican public schools.

In 1986, Paul C. Vitz, profes­ sor of psychology at New York University, examined textbooks used by 6% of America's elemen­tary schools to determine if America's religious history and her­itage was accurately pre­sented in the schools. His find­ings showed a "ludicrous" bias to­ward any primary religious text about typical contemporary Amer­i­can religious life. Moreover, the study suggested that there was "a psychological mo­tive behind the obvious censor­ship of religion present in these books. Those responsible for these books appear to have a deep-seated fear of any form of contemporary Christiani­ty. This fear could have led the authors to deny and repress the importance of this kind of relig­i­on in American life." In re­sponse to the Vitz study, De­biding, one of the nation's top­est textbook publishers, said that "The allegation that there is censorship in textbooks is true." They added that the reason religion had been censored was that the pub­lishers wanted to "avoid con­tro­versy." If not, they might have met any controversy with the political Left, only with the po­litical Left. As a result, students are denied knowledge of the enormous role of Christianity in the founding and development of America, and are instead given a censored history of their nation.

This censorship of Christiani­ty, however, goes even further than the textbooks. For exam­ple, students are not taught the true meaning of the phrase "We the People..." which is that this phrase is a reference to the One who is the True God, the God who created the world and is the only God we are to worship. The phrase "We the People..." is not a reference to the United States government or any other political entity.

TO THE EDITOR:

I would like to comment on the recent article entitled "Naked for Jesus," written by Dean Overacker, Contributor to the Pointer, in the Thursday, March 3, 1989 edition.

It seems as though the "upstanding citizens" men­tioned in the article have really stayed from the Truth in their efforts to drive far from our homes. The article states that "numerous small communities held massive clothes burning purges, to stand proud and naked in the workplace, at social events and, most impor­tantly, in their homes." It's as though these same people were truly attempting to get "one layer closer to the Lord," they wouldn't be burning clothes. The same Lord which they speak of is the One who sinned Adam and Eve with clothes of (animal) skins and clothed them, after they had sinned in the Garden of Eden. Even though they had done something wicked, He had compassion for them (Genesis 3:21). Their efforts are the same as the people attempting to reach God by building the Tower of Babel (Genesis 11). Unfortu­nately, their efforts will be nearly the same as those builders, they only get further away. Jesus Christ said, "I am the way and the truth and the life. No one comes to the Father except through me."

Sincerely yours,
Mark Robinson

Your vote does matter

Special to the Pointer: Imagine, if you will, the United States government dis­solving and being overturned by a rule, calix, merciless and barbaric tyrant. (Perhaps like one of your "upstanding citizens"). Then imagine being sworn into eternal servitude, torture, plague and the like. You have no rights. No privileges. No freedom. Eternal damnation. Sound ridiculous? Look around you. Your own government is not too far from the truth in some na­tions.

Now back to reality. There are many reasons to vote. Here are some:
- Take responsibility for the government
- It is a privilege
- It is your right
- It is your obligation as a citizen
- You need to voice your opin­ion and be heard
- You can have an impact on society
- Because SGA controls your money
- Because SGA has the power to accomplish things campus­wide, statewide, or federally
- To get personal satisfaction
- Because apathy isn’t "loving"
- It is something to do during your lunch break
- It only takes one minute
- Because your vote does matter

Any objections to this? If so, please let me know.

TO THE EDITOR:

Naked for Jesus

Your vote does matter

Any objections to this?
- "My girlfriend can't vote, but she should see her book.
- "Leak my hairy asshole...."
- Seven dirty words: Shit, Piss, Cunt, Fuck, Cock-a-hocker, Mother-fucker, Tit
- "Corn hole my butt big boy
- "Give me liberty or give me death
- "What's the last thing sorrento

Words of hatred

by Tony Banacek

One might recall George Carlin's infamous monologue about words that we cannot say. The point is, certain words were considered so offensive that in and of themselves, they were never to be broadcast in the United States.

It's understandable how these words could be found offensive by an unsuspecting audience. But they're just dirty words. They're used in anger, or as insults, or they could be used as verbal punctuation by someone who feels the need to add shock value.

But none of these words real
tly conjure up strong images of hatred and violence like some others do. Consider for a moment the word "nigger." "Nigger" is a word, once shamingly commonplace, with no redeeming social value. There was only one purpose in using the word, and that was to hurt and put down an entire minority. Without exception, the word's use expressed and promoted conscious hatred of a people in the meanest form available.

In the past 20 years, we've come a long way in eliminating this cause of offense in American culture. Words like nigger, kike and gook have diminished in use. But is there a word with the same sting as nigger that has never gone out of style? In fact, it may be more popular on the UWSP campus today than ever.

Yacht Club and Hometown Cafe go up in smoke

by Amy Lardinois

Firefighters battled an early morning blaze on the Public Square last Thursday, March 2, but emerged unsuccessful. Destroyed in the fire which began at 4:31 a.m. were two downtown Stevens Point businesses, the Upper Wisconsin River Yacht Club and the Hometown Cafe (formerly the Dawk House). An adjacent business Jim's Bar & Shop suffered smoke and water damage but no structural damage.

Although the cause of the blaze still remains unknown, firefighters believe it began in the kitchen area at the rear of the restaurant. Firefighters had the fire contained but were then forced to pull back due to safety hazards; the power had to be shut off to avoid electrical discharge.

According to Stevens Point Fire Chief Peter Unger, firefighters called WPS at 5:11 a.m. The power was disconnected at about 4:11 a.m., said Unger. WPS said wires had to be cut at the scene and acknowledged that had not been for the delay the fire most likely would have never reached the Yacht Club.

While blaming the word "faggot" is short-sighted and overly simplistic, the word has caused a great deal of suffering to a minority group on campus.

What is your attitude? What is in a word? Are you a faggot, nigger, kike, gook, callous, nib or mis? Words can have power or they can spread love and understanding. What kind of person are you?
Hyun Kim, Comm. professor, admires American culture and its freedom of the press.

Hyun Kim, associate professor of communication, is a journalist turned educator from Seoul National University. He taught at the University of Illinois for the past 14 years. Kim teaches news reporting, media law, research methods, and intercultural communication. He says he has taught many other courses such as graduate research, introduction to mass communication, seminars on press freedom, and media history.

A native of South Korea who received a law degree from Seoul National University, he has a Ph.D. in journalism from Southern Illinois University-Carbondale where he was a faculty research associate upon completion of his doctoral program. He worked as reporter and later as a foreign editor for a newspaper and a wire service. He says he doesn't regret leaving the editor's position because the press in South Korea was under the strict control of the authoritarian government.

Kim admires American culture and the First Amendment rights including freedom of the press. "As working journalist for 19 years in Seoul, the capital city of South Korea, I experienced various forms of visible and invisible restraints on the press, and I know the fundamental differences between free press and shackled press," said Kim.

"There are only a dozen or more countries in the world that allow genuine free press, and I was truly amazed at the magnitude of the freedom of speech and of the press when I came to this country," Kim said that some substantial changes are taking place recently in many countries that used to deny free press, but the changes are coming slowly because the leaders of those authoritarian countries fear the power of free press. He believes that the recent positive changes are largely thanks to the proliferation of American ideals of press freedom and human rights.

Kim said that journalists in authoritarian countries are considered troublemakers in the society as they expose government corruptions, wrongdoings, and bureaucratic errors, and this often leads to extreme adversarial relationships between the government and the press. The concept of the mass media as fourth branch of the government is non-existent in those countries."

Press freedom in other countries is a subject he has researched for many years. He is also interested in media content analysis and intercultural communication for his research.

Recently, he presented a paper, "Unification Fever: A Comparative Analysis of U.S. and South Korean Newspapers in the Final Student Movement," at the annual conference of the Korean American University Professors Association. He chairs the association's social sciences division. He was president of the Korean American Communication Association last year.

FREE SCHOLARSHIP INFORMATION FOR STUDENTS WHO NEED MONEY FOR COLLEGE

Every Student is Eligible for Some Type of Financial Aid Regardless of Grades or Parental Income. We have a data bank of over 200,000 listings of scholarships, fellowships, grants, and loans, representing over $10 billion in private sector funding.

- Many scholarships are given to students based on their academic interest, career plans, family heritage and place of residence.
- There's money available for students who have been newspaper carriers, grocery clerks, dishwasher, non-professionals.
- Results GUARANTEED.

Loretta R. Webster has been appointed the new vice chancellor for the advancement of cultural diversity.

Loretta R. Webster has had many years of experience in the social services field and in Indian affairs. She is the new associate vice chancellor for the advancement of cultural diversity at UWSP.

Webster of Marshall was appointed by Acting Chancellor Howard Thorey and Acting Vice Chancellor James Schwier after a search and screen committee considered 65 applicants from throughout the country.

A recent UW Law School graduate, Webster was accepted to the state and federal bar in January. While at UW-Madison, she headed the Indigenous Law Students Association, the Native American students organization, in addition to serving on policy advisory committee to the Multicultural Law Journal and the Legal Education Opportunity Program.

Obtaining a graduate degree had been a lifelong goal for Webster. She earned a bachelor's degree in biology from Ripon College in 1959 and worked in the social services field for many years in addition to raising five children. She entered law school in 1986 and finished in 3½ years.

Webster's past experiences include directing the Positive Indian Development Center in Green Bay, a program which trained advocates to set up domestic abuse prevention efforts in the community. She has been as administrator for the Oneida Tribe and has served in administrative roles for several other Native American organizations, including the Americans for Indian Opportunity based in Washington, D.C. She also has been a national welfare rights organizer and a community relations planner in Milwaukee. In addition, she has been a recipient of the Wisconsin Indian Women's Recognition Award and the Wisconsin Minority Coalition's Achievement Award.

At UWSP, she will lead a high priority effort to recruit and retain minority students, faculty and staff. Webster says she sees the potential for aggressively seeking out minority high school students to attend the university and for facilitating employment opportunities for UWSP graduates with agencies such as the DNR. She says she has found UWSP to be a "nice, friendly campus" with many support services already in place for minorities. Students "need to know" those programs are available to them, Webster contends. In regard to faculty and staff recruitment, she envision herself as a resource person who will help fill positions with "people of culture," a term she often uses to describe members of minority groups.

She says she hopes to be able to increase the sensitivity and understanding of cultural differences on campus and in the state.

Get a job: career seminar

Amy Lardinois
News Editor

Are you undecided about your major, graduating from college, or just confused about careers? Then you're in luck. A two session, one weekend workshop on changing careers, creative job hunting, and the "What Color is Your Parachute?" method of career decision-making will be held on April 7 and 8 at UWSP, room 102 of the Science Building. It will be led by David Swanson, a nationally-known workshop leader on career topics.

The workshop will meet on April 7 (Friday evening) from 6:30 to 9:30 p.m. and on Saturday, April 8, from 8:30 a.m. to 6:30 p.m. Participants will attend both days. The workshop is open to adults and students 18 and over. The fee is $48.00 for students and $60.00 for the general public and includes all handouts and materials.

It will cover such pertinent topics as how to: job hunt effectively, avoid rejection, market yourself successfully, and decide what you want to do regardless of your background, experience, or credentials.

Although the workshop will touch on resumes, it deals mainly with new and creative job hunting methods which will give you an advantage over others. You'll learn the right ways to make career decisions. Most importantly, you'll learn how to find a job!

Friday night activities focus on the job market and career decisions. On Saturday morning, you'll discover how to effectively market your skills, focus on your ideal job, and prioritize your job factors. The seminar concludes on Saturday afternoon with tips on successful interviewing and marketing yourself to employers. This last part of the workshop will be followed by a question-and-answer period.

Swanson is a member of the national "What Color is Your Parachute?" lecture team and has led career change and job hunting workshops throughout the U.S. and Canada. He has been nominated as 

"Lecturer of the Year" for 1989 by the National Association of Campus Activit

ies.

ASA update

GOOD NEWS! The meeting Thu., March 1, showed a marked increase in attendance. While the attendance, with the Fresh Air resolution, not for the resolution itself, but because an issue of this magnitude should involve the entire student body.

On a lighter note, the ASA is proud to announce that we are sponsoring a Logo Contest. All entries will be judged, and three will be chosen. A first place winner will get a white and black on a piece of paper not more than 8.5 x 11 inches. Grand prize is 10 dollars, plus the bragging rights to be the creator of the logo for a worthwhile organization.

Get cabin fever? Can't afford a dip in the ocean this spring break? Dying to put on your bathing suit and have a great time? We've got the answer for you. More information to follow soon.

The next ASA meeting will be held Monday, March 13, at 5:30 p.m. in the Non-Trad. Office. BE THERE!

This Springbreak don't get caught south without...

The Original Panama Jack.

Romeo and Juliet:  A Shakespearean Delight

by Kathy Philipp

Once again the students and faculty members of UWSP's University Theatre productions have confronted themselves with the recent performance of William Shakespeare's "Romeo and Juliet". Directed by Thomas F. Neve of the theatre arts faculty, the production opened in Jenkins Theatre on Friday, Feb. 24 and continued on February 25 and March 2 and 4 and 5.

The performance captured the essence of Shakespearean times, but remained contemporarily with its mild sexual overtones and subtle use of humor. The characters were vibrant and real and succeeded in bringing life to Shakespeare's romantic tragedy.

The play's set, designed by Stephen Sherwin, used muted colors to capture the tragic mood. The classic platform and upper and lower level divisions was similar to Shakespeare's original stage. The costumes, designed by Deborah Lotafe, displayed the colors and richness of Italian Renaissance. The Montagues were bedecked in blues and greens and the Capulets were adorned in reds and yellows.

Appearing in the leading roles were Paul Nyglo as Romeo and Jana Mansell as Juliet. The scenes between the two studied with the sexual tension and passion of first love. That, along with humor, made for a truly 'dynamic duo'.

Todd Stickle as Mercutio was a virtual bundle of energy, exploding in the riveting fight scene with Tybalt. His humor kept an attentive audience on their toes.

Theresa Genich, as the nurse to Juliet, also had her role and received, in turn, a great deal of laughter from the audience. The messenger Peter, played by Scott Langlais, was striking in his own with his clever antics.

Other principal players included: John Schults as Capulet, Jim Newman as Servillio, Chuck Allen as Tybalt; Neil Roberts as Friar Lawrence, and the Lady Capulet.

The performance included five fight scenes with excellent displays of swordsmanship, a beautiful party scene and dance piece choreographed by Sue Mussler.

This was not the "Old English" performance of "Romeo and Juliet" in the original Shakespearean English. Nor was it the classic dressy night at the back of dark dinners. It was real people with real problems. This was Shakespeare come alive.

It was sure to catch University Theatre Productions performance of "Dimestage", coming to Jenkins Theatre in April.

Gateway to the Pineries

by Jennifer Hacker

Imagine Bruiser's as the office of the Piner's Country Club. It's hard to believe, but many years ago as a fact. Many other historical facts can be found in "Gateway to the Pineries," a recently released book describing various historical happenings and landmarks of Stevens Point.

This book gives an overview of the history of Stevens Point. It deals mainly with buildings of the downtown area. It tells of "last buildings" that were torn down for modern developments. It describes former uses of the buildings on the square, and tells of other former uses of the buildings on the square, and tells of the other town landmarks such as Nelson Hall, which was built between 1855 and 1857. The book is adorned with pictures of a few of the buildings to 1855 and as recent as 1888.

The book was written by Tom Brown, an architect and 15-year resident of Stevens Point. He is originally from Englewood, N.J., and attended college for architecture at Washington D.C. Brown became interested in writing this book after attending the Historical Preservation/Design Review Commission meetings following the development of the downtown mall. He was hired by the city last year to write this book on Stevens Point.

The book costs $2.50 and is available in the University of Wisconsin Bookstore, Inc., at the UWSP Professor Book Center, the Continued on page 21

QUOTE: I feel that there is a need to combat the issue of unintended pregnancy. "I'm not really sexually active" and "Ma-Ma" seem uncomfortable. Or would you consider an abortion?

For some people, they would love having a child, while most college students would be terri ed on an unintended pregnancy. Many students are increasing their sexual freedom, creating an increase in pregnancy rates. The simple use of a contraceptive can combat the issue of unintended pregnancy. "I don't really sexually active" and "I didn't think I'd have sex," are two major reasons given for non-use of contraceptives among college students. This attitude reflects a tendency to deny ones sexuality. Denial for contraceptive usage warrant attention in our sexually active society. Using a condom is an alternative to this dilemma.

Condom sales have increased dramatically in recent years. This is due in part to the AIDS epidemic. Why then are males and females still refusing to use this simple form of birth control.

Two common complaints about "rubbers" are that they diminish sensation and interfere with spontaneity. In intercourse, losing sensation and spontaneity would be less than welcomed. Many couples learn to creatively integrate condom use into their sexual activity. This can be quite enhancing.

Two benefits of condoms are the ease of usage and the fact that no prescription is necessary. The use of condoms allows increased male participation in birth control. This takes some of the responsibility of contraception off the female. Males, however, can and do purchase condoms. The notion that males only purchase them should be dispelled. Condoms have no side effects and help protect against sexually transmitted diseases, including herpes and AIDS. These are reason enough to use a "rubber."

Jazz abroad sharing America's treasure

by Karen Finnegan
Features Contributor

On September 10, 1987, the United States Congress proclaimed jazz as a national treasure. On March 7, 1988, Governor Tommy Thompson proclaimed the directors and members of the UW-Stevens Point jazz ensembles as Musical Ambassadors of Goodwill during their 1989 tour to Germany, Austria, and Switzerland. The members of Jazz Band One and the Mid-Americans are eagerly preparing for their trip during which they will share America's only original musical art form.

The tour will be a cultural experience for the groups. They will visit the historical cities of Kassel, Munich, Vienna Gras, and Salzburg, the birthplace of Mozart. The tour will also be a musical performance experience. The twenty-piece band and the twelve-member vocal group will be performing concerts and conducting workshops throughout the tour.

"We want to give something that is truly American to the people in Europe," says Mike Irish, the director of Jazz Studies at the university, "no matter how well someone from Europe may embrace American Jazz, the music is different when it comes from the country of its origin."

The concerts in Europe will be performed by some of the best jazz musicians in Wisconsin. At the 21st Annual UW-Eau Claire Jazz Festival, UW-Stevens Point ensembles placed 1st and 3rd in the large ensemble division, 1st and 2nd in the small combo division, and 1st and 2nd in the vocal jazz group division.

During their tour the groups want to introduce new music that is being played in America, but they also want to help the European jazz musicians develop techniques that are used in American Jazz. Irish, who went to Europe in 1980, says, "When European jazz musicians find out that you are an American musician it's a real treat for them. They want to know what's going on in American Jazz, what is being played, and what the new arrangements are." This is because new jazz music isn't available in Europe until two to three years after it is printed in the U.S.

Charles Reichl, the director of Vocal Jazz Studies, notices the same delay in the availability of vocal jazz music in Europe. Says Reichl, "So much of the repertoire of vocal jazz music is manuscript. Certain pieces won't be published (in Europe) because they are either too difficult or enough copies aren't sold and then the publishing companies lose money."

The tour will be a musical exchange between America and Europe, also both sides will benefit from the trip. "Europeans are very serious about music," says Irish, "and in some ways they are more sophisticated listeners than Americans. This is because of their musical heritage; the symphonic tradition, the chamber tradition, and the opera. Their appreciation for jazz and their attentiveness will make the concerts exciting for our performers."

The UWSP jazz ensembles are scheduled to leave for Europe on May 23, 1989. To help raise money for the trip they are having a raffle ticket sale. The grand prize is a 1989 Honda CRX automobile. The tickets are $2 each or six for $10 and may be purchased from the Big Band One members, the Mid-Americans, and from Stevens Point area businesses.

Future fundraisers, both in April, include a benefit ball and the 5th Annual Tribute to the Big Bands concert which will be at the Stevens Point Holiday Inn. All concert proceeds will go toward the European trip.
Pointers finish first in NCHA

The Pointer men's hockey team finished first in the NCHA this past weekend when they won the first game on Friday against Bemidji State and tied on Saturday. On Friday the Pointers pounded the Beavers in a 5-0 victory. Paul Caufield put one in the upper right-hand corner of the net on a power play, assisted by Tim Coghlin and Todd Chin. The second goal was scored by Haid Barradana while the Pointers were short-handed at 11:48 in the second period, assisted by Pat McPartlin.

Berceau crowned national champion

CLEVELAND, OH—Bob Berceau became the first UW-Stevens Point wrestler ever to take home a national championship, as he battled through the 134 pound weight class in the NCAA Division III National Meet in Cleveland, Ohio this past weekend.

Berceau headed into the tournament seeded fifth and opened up with a match against Paul Coats of Olivet (MI). Berceau disposed of Coats 3-2 and moved onto the next round to face Joe Helfert out of Oconto (NY). Helfert turned out to be an easy victory, as the first year transfer from Northern Michigan took him apart with a pin fall at 5:48.

After crushing the John Carroll University (OH) wrestler, Stan Rhodes, by a 12 count, Berceau headed into the semi-final match versus the returning national champion John Beatty of Augustsburg (MN) who had beaten him in the regional by 13. Not holding a thing back, Berceau wrestled to a 7-2 lead in regulation, before turning back the number one seed Beatty in overtime.

The final match presented another challenge for Berceau, in the form of unsseeded Chris Cuf-tari from Trenton State College (NJ). Berceau pulled ahead to 5-0 after one period, but as the Pointers looked to knock him out of the tournament Berceau managed to shut them out regardless of the disadvantage.

Berceau racked up a total of 16-10 on the penalty box while the Pointers had a few more with 30-34 for their mistakes. Saturday's game ended in a 3-2 tie, putting the Pointers in the lead for the weekend having won Friday's game. Scott Kruenger scored at 17:36 in the first on an assist by Tim Co- munier and Peter Supple. Shawn Whelcher put one in at 18:13, to end the first period 5-0 in favor of the Pointers.

The Beavers took advantage of the Pointers' penalties scoring at 1:46 in the second on a power play, and at 0:18, also on a power play. Remaining in first place na- tionally, the Pointers continue to hold home ice advantage over Eastern Shore this weekend on 7:30 both Friday and Saturday.

By Kevin Crazy

You can summarize the end of the Pointers' season in one minute.

The UWSP men's basketball team finished 12-7 in the final NCHA and took the points in the Thursday against the Reed. The Pointers then went on to win by 11-9 in the 5th period by coach, held by Pat Nigl, on a goal with 3:55 left.

In the second half, the Pointers went up by a much more comfortable 5-4 lead, which proved to be too much, however, in the end, Berceau was crowned national champion.

By Sam Siegel

Stevens Point swimmers and divers performed exceptionally well in their meet in the 13th annual meet held in Brown Deer. They brought home more than 10 All-Americans and five Academic All-Americans.

On the first day of competition, both 300 relay medleys placed in the top 18 of the competition. This brought All-American honors to Tom Calzada, Jan Gelvicks, Anne Watson and Alan Benson. For the men, Andy Connelly, Paul Kramer, Dave Martorano and Kevin Parham received All-American certificates as well.

Freeman, Jamie Weigl placed 13th in the 100 breaststroke and 15th in the 200 breaststroke.

As a team, the Pointers placed a respectable 11th place in the nation. Winning the team title was Illinois, followed by Delaware Valley who had three national champions, and Augustsburg finished third.

Berceau, with the NCAA III crown in hand, and a 20-7 record, now will head into the NCAA Division I National Championships in two weeks in Oklahoma City, OK.

Close ending for Men's B.B.

If you have the tendency to fun times
Tracksters disappointed with sixth place finish

EAU CLAIRE—What UWSP head coach Rick Witt feared most came true at the WISC Indoor Meet here last weekend. With 39 of 36 athletes participating in their first conference meet, Witt succumbed to a sixth place finish.

Oshkosh ended the 10-year reign of LaCrosse, nipping the Indians 140.5 to 137. Eau Claire finished third at 105.3, followed by Stout, 87.5; Whitewater, 74.5; STEVENS POINT, 44; Platteville, 16; Superior, 6 and River Falls, 4.

Witt said the worst scenario took place for this team.

"Unfortunately, a great number of our athletes performed like it was their first meet. But I am confident that our people named about the commitment and intensity it takes to compete as one of the best in the WIRC," said Witt.

The top four for the Pointers was Scott Patza, who qualified for nationals with a 6.1-2 effort in the high jump. He tied for second place. Garrick Williams also added the runner-up finish in the 300 meter dash in 36.45.

A third place was notched by Joel Skarda in the 800 meters in 1:54.67, while fourths were captured by Rod Garcia, 8:44.56 in the 3000 meters, Scott Johnson, 2:34.38 in the 1000 meters, and Tim Olson, 4:00.63 in the 1500 meters.

Other scorers were Rich Schommer, fifth in the 600 meters in 1:12.60; Kurt Lepak, fifth in the 1000 meters in 3:24.40, the 4x400 relay team of John Cep­ na, Eric Spangenberg, Markte and Williams in 3:28.72; Tim Westphal, fifth in the pentathlon with 296 points, and Steve Alli­ son, sixth in the 800 meters in 1:54.64.

Witt said that bad breaks plagued his key performers.

"Three of our men who we thought had a good chance to win met disaster," he said. "Steve (Allison) was ill and was just not capable of running the way he wanted. Brad (Hoon­ slet) had the best time in the prelims in the 200 hurdles but was disqualified for supposedly failing to clear his trail log (film later proved incorrect but was not admissible), and Garrick (Williams) thought there was a false start in his heat of the 800 meters and was left in the blocks and failed to qualify. He did come back, how­ ever, and was a terror in the 300, setting a school record (3:45) as well as running extremely well in the relays."Witt was pleased with the efforts of several others.

"Scott (Patz) was just super in the high jump with a national qualifying effort. Rod (Garcia) was high in the 3000 and 1500 and the middle distance people did a good job of picking up the slack when Allison went down the track," Witt said.

"I am confident that our people learned about the commitment and intensity it takes to compete as one of the best in the WIRC," said Witt.

Tracksters disappointed with sixth place finish

Bob Sanders, better than Hanz and Franz

He's no girly man!

Eau Clair hosted the Fourth Annual College Body Building Championships last Saturday.

Senior Bob Sanders was the only UWSP student to participate in the competition. Sanders finished the competition with a sec­ ond place in his weight division.

Sanders began his body building career three years ago. He has practiced since then and has now qualified for the Championships. This is his first competitive challenge.

Sanders was pleased with his performance in the competition. "I had a good time. I felt pretty satisfied placing as well as I did in my first competition."

When asked how he became involved in weight lifting Sanders said "I've always kind of liked it. When you start seeing results, you just want to keep doing it a little more, and little more!"

Sanders plans to continue his competitive career but finds it difficult to concentrate seriously on both school and training. "Dieting is hard when going to school. Sometimes, I just can't resist the 'carb-depletion.' You get light headed sometimes."

Joe Todd, also a student from UWSP, assisted Bob in his training throughout the past month. "I really have to thank Joe, he really helped me out a lot," said Sanders of his friend and training partner. "We just put in about 20 hours a day."

Enger leads Pointers to fourth place finish

The Pointers improved their placement one spot last weekend in the NCAA Division III indoor championships in Bloomington, Ind. The Pointers finished fourth in the team standings with 87 points, one point ahead of Winona State.

Sherwood's double in the mile and 3000 meters was the high point of the Pointers' showing. Sherwood captured the mile title in 3:59.99 and the 1000 meter run in 2:31.72. Sherwood added a trio of events in the relay, where Sherwood also placed in the 4x800 relay in 8:25.23.

Todd lost the 4000 meter title to the Wisconsin-La Crosse team.

Continued on page 24
You may know this man as a mild-mannered stud who has tormented women from San Diego, California, to Bar Harbor, Maine, but now it's time for the best of the story.

He began his athletic career just as you see in Old Style commercials in the heartland of America in a small town called Premont, Wisconsin. Throwing rotten apples at the side of the silo helped him gain his ability to become the first freshman in his conference to be named first team all-conference in baseball, followed by three more years as an All-State player.

He not only accomplished this task as a spring sports standout, but managed to run a 3:19 mile in the state track meet after his baseball season was over.

He was named MVP and captain of the football team in Premont and received All-State recognition from his sophomore year on, along with receiving the honorary Dick Gmina Memorial Award for breaking the 1,000-yard mark his senior year as a strong side tackle.

In the winter he traveled to Green Bay after school every day throughout his high school career to play for the Green Bay East-Prefble hockey team because his school didn't have organized hockey. It was there that he managed to receive All-State recognition for his seven-game hat-trick streak, which to this day remains in the record books.

Along with his outstanding athletic career, he had a 3.72 grade point average and was an undergraduate, graduating at the head of his class.

He later went on (six years later) to receive his doctorate in industrial psychology. He entered the workforce at age 35 before an unfortunate twist of fate set him back one hundred fold.

One night after putting in his standard 13-hour day, he went down to the parking ramp, where his limo awaited him. It was there that he slipped under the vehicle, being run over and popping his head like a large pimple.

He was barely alive, but thanks to modern science, they were able to rebuild his skull, not to the point it once was, but to a satisfactory state. To this day, you may notice that his hair never gets longer than three-quarters of an inch. He is very self-conscious of this and claims he has a friend frequently cut it—but we know the truth.

His IQ has greatly reduced, but just as a blind man gains incredible sensitivity in other senses, his body has enlarged his capacity in other areas.

He once was a stud as an athlete and a scholar, but now he is simply a stud. Dan Liedtke, not the man he once was, but so much more.

Energy--We cope without it?

By Timothy Byers

Outdoors Writer

Last weekend's snowstorm was a good one! It was lucky we had it on a Friday because our driveway wasn't fully shoveled until Sunday night. Some time on Saturday while the car was yet to emerge, I thought to myself, "What happens when the easy energy is gone?"

The reason I thought of that is because once the car was dug out, it was fairly easy to get from place to place. The inside of the car was warm and snug and as long as you kept moving it was all right. The snow and winds blew, but what matter?

One Disaster To Another

By Todd Stoebel

What a wild and crazy winter we have had. Besides our weather, something seems pretty weird as well. The summer was very hot and full of natural disasters. Hurricane Gilbert ripped Jamaica right off the map and then slammed into Mexico. These are just a few examples of last summer's disasters. It seems like the same things happened last year the summer and it is no surprise that the U.S. this winter. January was quite warm with little precipitation but February was terribly cold. Coldness struck the entire U.S. this winter. Now we are finally getting some snow. Even southern California and northern Florida have seen snowflakes falling from the sky.

Looking for a few good trees

By Timothy A. Bishop

Outdoors Editor

You are there around camp just about every day. From tree to tree they pass, stopping only briefly to ponder the growth which is before them. Is this some strange dance of students out of control and destined to wander from tree to plant to plant, just following some unknown and usually unlearned leader?

The official story is that these students are in a class, a forestry class which is studying the different types of trees which grow in the area, but there has to be some more. Lacking any other means of explaining this phenomenon, we thought we'd pass along the streets and walkways of UWSP to see if anyone else could provide some insight to the situation.

According to one student, a hike around campus heard that there is really a group of people who died on campus a few years ago. Their ghosts have been condemned to eternity just passing through the area to the next. I guess those spirits just get along with a few saplings.

An art major had another explanation. "They've got a man in their house. They're a man, it's quite simple," he said. "They've got a man in their house. They're trying to get the thing out where the nearest party is. I mean, it's like this guy never stops partying." He had yet another explanation. "What these people are is a bunch of dead people. They're not living, they don't know what season it is," he said. The professor was pleased and clapped as a clear message was given. "I'm too busy to answer questions like this! Can't you see that I am on my way to class right now?"

That same student gave the exact same answer four hours later and two days later.

Another student, a history major, tried to help find the reason. "To find out what is behind this unusual behavior, one has to look at what has taken place in the past. You can't explain anything without looking at the events which led up to it if you want to be successful in the future."

A political science student refuted the classwork and said, "Anything he said he might be held against him in the senate race in 2004.

A math student tried to work the problem out on their calculator battery failed and there was not a pencil sharpened near by.

A student dressed in military style camouflaged clothing said, "These people are just getting ready for the Russian invasion. They are looking for a good place to set up a tree stand to shoot those communist rods from."

According to a friend, "They are people who have always wanted, but weren't smart enough or just couldn't afford it. So they lay around the university all day in a group so that people will think that they are really students. I guess it's the books they are carrying, because some people actually believe they are here to learn."

A natural resources student said, "The problem was going on, but, added, "Do you know what these people are doing in the field next to Quaker Park with that bunch of kids?"

walk instead. Another example of human activities lies within the type of container you buy your food in. I'm referring to Styrofoam. Most packaging, coffee and fast-food containers are all made out of Styrofoam. Yet, Styrofoam contains very destructive chemicals. One chemical, chlorofluorocarbons (CFCs), is the leading cause of ozone depletion. The ozone layer is our great protector of the sun's ultraviolet rays. People like yourself have to stop buying Styrofoam containers. Once we destroy the ozone layer, life on earth might just thrived up like a raisin.

These are a couple examples illustrating how humans can contribute to the Greenhouse Effect and ozone depletion. What is worse though is these processes and others such as acid rain and smog are feeding on entire other. Each process helps another causing disasters to occur more often. What concerns them (scientists) most is that the poorly understood linkages among pollutants in the atmosphere may produce catastrophic effects that are greater than the sum of the parts. SAMMY
SAMMY'S SYMPTOMS

* Hurts when he dances
* Hurts bad when he does high kicks
* Hurts when he squats,
* Hurts when he runs
* Hurts in general

I HAD SAMMY'S LOVE CHILD

I had been married to Bill like an icy wind. When Sam
for seven wonderfull years, went into "the candy man"
he was a loving man but it
all fell apart after that
night we saw Sammy at the-
Sands in Vegas.

PERFECT FORM
Sammy was in perfect form, his songs ripped through me
firmly, squirming in my chair, while
my husband looked on. I knew I had
to have this man they call Sammy.

THE STENCH

Sammy peeled my drenched panties
down to about knee level, when all
at once, he shot up, exclaiming-
loudly; "Jeze.00000h sweetheart,
..Jezus...the STENCH...GA...
that's AWFUL.../oo00000h, Ow, ouc..."

Because of his sudden lunge to
escape the smell, his hip went out
and Sammy collapsed, smashing his
big head into mine with a
hollow "klunk." He rolled
moaning...I knew what I had to do
I spent the next 3 to 4 hours
gently massaging Sammy's hip.

The championship included 20 men and nine women from all colleges in the UW System. All competitors were tested prior to competition for the use of steroids, and other drug related to body building.

The body building championship was a two part competition. The first part was a pre-judging of all contestants. Each participant performed before the judges. This was closed to the public.

The second part of the competition consisted of a final public performance.

Each contestant was required to perform three different rounds of posing. The first being a relaxed round in which the judges view the contestant front, back and profile. The second round is a mandatory pose in which the judges call out required poses. The third and final round is a free pose which includes required poses combined with personal interpretation set to the contestants choice of music. Sanders said that during the final round it is crucial that a good cross section of poses is given to the judges.

As a general view of competitive weight training Sanders said, "it's pretty fun!"

Wildlife Society tags Schmeekle Reserve deer

By Jeff Kleman

Contributor

Wildlife majors Doug Stephens and Bob Sanders, along with faculty advisor Dr. Roy Anderson, are heading up the student chapter of the Wildlife Society's deer studies in Schmeekle Reserve.

The purpose of the project is to trap white-tailed deer and tag them with radio collars or ear tags. The devices will enable the Wildlife Society members to monitor the daily and seasonal movement patterns of the deer as they travel in and around Schmeekle Reserve.

This would add to the over-browsing problem in the reserve. According to last year's figures, Schmeekle Reserve is estimated to have 57 deer per square mile. (However, the reserve is not a square mile.)

The most deer Stephens has encountered was 26, seen while shanting. Many things may be studied," commented Stephens, who has been involved for two years. "The pattern movement of the deer is being recorded.

Further precautions are also taken to maintain a high safety level for the deer. For example, if the temperature drops below zero, the trapping is called off because additional stress would be put on the animal. Also, the deer's legs are restrained and head covered to keep it calm. The trappers try to work as quickly as possible and only maintain contact with the deer for 10 to 15 minutes.

No drugs are used on the deer to sedate them at any time during the capture.

"We're not removing them, simply studying them," explained Stephens. "Some people have vandalized the traps. Today one trap had its suspending ropes cut and the triggering mechanism was stolen. People just aren't aware of what's going on, maybe they think we're harming the animals."

The Wildlife Society encountered a similar scene at the ROTC tower, where the antenna was tagged by unruly students.

The project has presently been taking place for three to half years.

"Many things may be studied," commented Stephens, who has been involved for two years. "The pattern movement of the deer is being recorded.

The tagging ends in March due to does having their fawns.

School "Tagging takes place from November to March, twice a week or until the tags and collars have been depleted.

The tagging ends in March due to does having their fawns.

The society is equipped with two collars and one ear tag, but next year will possess three of each.

Then the tagging ends in March due to does having their fawns.

Further precautions are also taken to maintain a high safety level for the deer. For example, if the temperature drops below zero, the trapping is called off because additional stress would be put on the animal. Also, the deer's legs are restrained and head covered to keep it calm. The trappers try to work as quickly as possible and only maintain contact with the deer for 10 to 15 minutes.

No drugs are used on the deer to sedate them at any time during the capture.

Richard and Rita

Knowles

We are very interested in adopting a child — not for our needs and desires, but also to love (and be loved in return) and devote our lives to an extra special someone for whom we have yearned so long.

We are 34 and 38 years old, respectively. Have been married for eight years. We have spent the last 3½ years undergoing extensive infertility testing.

We have experienced the good and the bad things in life and are willing to share our love with a child.

We're financially stable and are homeowners. Our neighborhood is comprised of retired couples and young couples and families. We have a very cute kitten named Simon.

We have both attended college. We work during the week which allows us time in the evenings and weekends to enjoy our hobbies and interest.

We enjoy golfing, camping, cross-country skiing and working with our own hands, either building or crafting or building scale models.

We both come from close-knit families. They have been very supportive in our quest to adopt a child. They are very happy and excited that we want to adopt a child.

Our friends are an important part of our lives. We enjoy being with them and sharing our ideas and thoughts on life in general.

It is difficult to relay our thoughts and feelings adequately on paper. We know that God blessed us and will continue to bless us in fulfilling our dream to be parents.

For more information call 341-2865.

Last couple wishes to adopt infant through independent adoption. Personal inquiries can be made through our attorney, J. Benack, (41) 662-4111.

The Honor Society of Phi Kappa Phi will hold a meeting on March 8 at 4 p.m. in room 106 CCC for the purpose of electing officers. Members are urged to attend.

Sociology — Anthrop Club — John Grieb will speak on Career in Sociology. Wed., March 15 in the CCC 220 at 4 p.m.

Catch the STP Van for a free ride home. It stops at 9:00 and 11:30 p.m. in Parking Lot G, 9:00 and 11:30 in front of Berg and at 9:00 and 11:00 in front of LRC. Provided by WRC and Protective Services.

Do you like folk music? Well, Gribbon will play on Thursday, March 9 at 7:00 in the Lounge of Nelson Hall. Cost is $1.50/student and $3.00/non-student. Sponsored by the Women's Resource Center as part of Women's History Month. For more information call 341-1478.

The UW-Stevens Point hockey team makes its second straight appearance to the NCAA National Tournament as they host UW-Eau Claire this weekend.

University radio, WWSP-96FM will broadcast both games live—Friday, March 10 and Saturday, March 11 starting at 7:15 p.m. The Pointers and the Bluesplo are expected to host live on WWSP-96FM this weekend.

The deadline for submitting Professional Education Program applications for Semester II, 1988-89 is March 13. Pre-registration for Center Programs and Student Teaching Education courses will take place in Room 407 COP and April 15-17 at 9:00-11:30 AM and 1:00-4:00 PM. Questions in connection with this should be directed to Education Advising, Room 407 COP.

Vote Leathy and Topsoeven for upcoming SGA election.

BEY BEY!! HOW WOULD YOU LIKE TO GO ANYWHERE IN THE U.S. FOR SPRING BREAK, BY WAY OF GREYHOUND, AND PAY ONLY $99 ROUND TRIP? LET GREYHOUND TAKE YOU THERE!! FOR MORE INFO, CALL THE UC MATERIALS CENTER AT X228. ONE-WAY TICKETS ARE ONLY $44.30 — CALL NOW!!

The Stevens Point Softball Association is accepting applications for softball uniforms, score keepers, volleyball officials and concessionaires. Applications should be 18 and willing to work evenings and some weekends. You don't have to be experienced, we will train you.

Join us for a summer of fun and excitement at one of Wisconsin's premier softball and volleyball facilities...and get paid for the experience. If you are interested, pick up an application at the Stevens Pond Recreational Department, 340 Sims Avenue or write to: DOSA, P.O. Box 663, Stevens Point, WI 54481. Do yourself a favor...apply. Application deadline is March 26, 1989.

Summer housing — single rooms, across street from campus. $200 for full summer including utilities and furnishings — 341-3605.

Fall housing — single room, will share apartment with 3 other males. Fully insured and very economical utilities — 341-3805.

Roommate(s) needed — 1 or 2 males to share Village apt. — call Brian or Marci 354-0657.

Leather bomber jacket and keys at 1500 College. Any information contact 366-6421. Reward offered & no questions asked!

Summer Employment

Cafeteria positions, cashiers, serve for cafeteria, bar, wheeling, cafeteria, pricing, include during lunch, breakfast, cafeteria, wages, cafeteria, position. Wisconsin Lions Camp is an equal opportunity employer which offers on-the-job training and experience to persons interested in a career in the field of working with blind, deaf and mentally retarded children. On campus interviews Monday, March 13th. For more information contact: Wisconsin Lions Camp, 1201 Civic Dr., Stevens Point, WI 54482.

The UW-Stevens Point swimming team will continue to swim in the swimming pool in the Campus Center for the last two weeks of March. It is expected that the team will have its last dual meet of the season this weekend. The meet will be against the University of Wisconsin-Eau Claire. The meet is expected to begin at 7:00 p.m. and will be completed by 9:00 p.m.
