

Trivia contest spans the country University hosts world's largest trivia event

by Molly Bernas
News Editor

The University of Wisconsin - Stevens Point (UWSP) student-run radio station, 90FM WWSP, was once again the host of the world's largest trivia showdown.

According to "The Oz", Jim Oliva, a coordinator of the annual event, 370 teams and more than 9,000 people from coast to coast participated in "Earth games are easy," the theme of the 1990 edition.

The contest, in its 21st year, ran for 54 straight hours, beginning on Friday at 6 p.m. and ending at midnight on Sunday. This year a trivia parade led off the festivities on Friday afternoon. "There's no other trivia contest like it anywhere," said Oliva.

Close to 100 volunteers join the staff of 90FM to help with the phones, computers, and announcing the game. The contest contained over 400 questions asked over the air in between the tradition sounds of golden oldies. The university television station, SVO cable channel 29, also followed the teams and provided live coverage from the 90FM studio.

The team who called themselves "Network" won the contest for the seventh year in row. The team is led by Don Chesboro, a legal researcher at Harvard University, and Thom Aylesworth, a high school English teacher. Second place went to "Triviasaurus Rex CNOF at TKE," a group comprised of students and graduates of the UWSP. Other top finishers were: "Astro Wolfpack", "Ted Cassidy's lurking in the subway", "Mutated Members", "Good Night Irene", "That thermometer's not for your mouth", "Hester's Harem", and "Hunt for Red Buttons".

The winning teams received trivia trophies.

90FM station manager Jennifer Bugni, a senior majoring in communication, supervised the event along with James Haney, a communication professor and faculty advisor to the station. Trivia is an enlightening experience. Anyone who stays up for 54 hours to play trivia, or to work the contest itself, definitely has to be dedicated or simply crazy," said Bugni.

Next year's contest has been set for April 19-21.

"What TV series called a pool a cement pond?" Volunteers at 90FM calculated the results, and manned the phone lines for 54 hours.

From left hand corner: Mayor Scott Schultz, Mary Verzal, Gary Meyers, Brian Loveland, Pam Miller, Captain Ecology (Shane Totten), and Tom Weaver.

Conference held for SE Asian students

by Aly Ge Xiong
Contributor

"Leaders are at their very best when they are creating reality" and "there is a need for more Southeast Asian students as well as leaders at Stevens Point." That was the message given to over 40 Southeast Asian students by Chancellor Keith Sanders this past weekend.

The students were gathered together for the first-ever Southeast Asian Educational Conference organized by UWSP's Southeast Asian American connection Club (SEAAC) and sponsored by the Cultural Diversity Program and Chancellor Sanders. The conference, in the University Center's room 125/125A, from 10 a.m. to 4:30 p.m., was held as an opportunity to address the need to bring minority students to UWSP, which lies in the heart of the whitest Congressional district in the United States.

It's other emphasized purpose was to promote opportunity, educational goals and achievements. "Our conference is

being held to provide opportunities and encourage Southeast Asian students with college potential to go on to higher education," said SEAAC President Shane Tawar.

The conference also gave the staff of SEAAC a chance to put their leadership skills to use.

"America has more resources and therefore better opportunities to go as far as you can... you can get a doctor's degree if you wanted to," said the conference's keynote speaker Williams Jona Xiong of Madison, who is an active educator and counselor. Xiong stressed the differences between the educational process of the United States and Southeast Asian countries (such as Cambodia, Laos, Vietnam, etc.), the importance of higher education, and the need for more Asian college students in Stevens Point and elsewhere. "Although we have successful businessmen in the business world, there are so few because many don't have the necessary skills and therefore fail," explained Xiong.

Xiong stated that the conference and his presentation is titled "College: The Key to Success" because "college is a place to learn some necessary skills and attitudes for building a meaningful life." He reiterated and concluded that college is very important in this society and urged everyone there to consider higher learning.

Other concerned speakers at the conference were: Associate Vice Chancellor for the Advancement of Cultural Diversity Loretta Webster, Admissions/High School Relations Counselor Scott West, Financial Aid counselor Paul Watson, and Executive Director for Student Development John Jury.

An evening dance with Oriental and American Music in the University Center's Encore concluded the conference.

The staff and members at SEAAC (a Southeast Asian support group) would like to take this space to express their appreciation to Chancellor

Model UN session held on campus

A liaison officer of the United Nations discussed the world refugee problem Sunday night at the University of Wisconsin-Stevens Point.

G.S. Romero-Perez, a citizen of Colombia who is an official for the U.N. Commission for Refugees, spoke to a receptive University Center.

Romero-Perez's commission has received two Nobel Prizes for its work in serving 15 million homeless people of the world.

He was on campus for the Minnesota-Wisconsin Model United Nations that was attended by about 250 students and faculty members from 20 universities, colleges and high schools in the two states.

The UW-SP Department of Political Science hosted the event.

The participating students formed delegations to represent countries of the world and debated current issues at those places just as actual delegates do in real U.N. meetings.

The Model U.N. opened Sunday afternoon with a brief talk

by UW-SP Chancellor Keith Sanders. Sessions continued through the evening program by the guest Chancellor Keith Sanders. Sessions continued through the evening program by the guest speaker.

This is the third time in 15 years that UW-SP has hosted a such a gathering under the auspices of the campus Model U.N. student organization.

NEWS

Students win photo awards

Two UWSP students, Sara Herman and Larry Mishkar, were recognized and awarded for their excellence in photography at the Wisconsin News Photographers Association (WNPA).

Herman took third-place honors in sports photography. She is a returning UWSP student currently working for Warner Halverson. Mishkar took first and second place in the category of Portrait Personality.

He is a part-time student and freelance photographer with Becher Communications and Associated Press. He also holds an internship at the Post Cresent in Appleton.

The WAPA convention, an annual event, was held at the Sheraton Hotel in Racine on March 30-31. Professionals from varied fields of visual communications gathered to judge work presented by students and professionals.

Speakers shared motivating

words about how to visually capture news events. Topics also discussed were editor preferences and legal aspects of photo journalism.

A demonstration was given on the electronic darkroom, the new wave in photo technology.

Madison will be the location of next year's WAPA convention. All who are interested in photojournalism and other areas of visual communications are invited to attend.

Larry Mishkar and Sara Herman took home WNPA awards

Volunteers organizing for annual Hunger Cleanup

For the third year, University of Wisconsin-Stevens Point students will do their part in helping the less privileged of the Stevens Point area at the annual Hunger Cleanup on Saturday April 21.

Hunger Cleanup is a work-a-thon in which students raise money through donations from campus and area residents for each hour of community work completed. Volunteers will

wash school buses, clean Iverson and Buckholt Parks, paint at the new Goodwill store and do yardwork for area householders.

Proceeds will go to the Portage County Operation Bootstrap, an organization that helps people in need of food and emergency funds, and to other groups supporting the nation's and world's neediest people.

Last year, 100 people worked to earn more than \$900. This

year 150 people are registered and are expected to raise \$1,500. Students from Stevens Point Area High School and Pacelli are also expected to send out teams this year, which could push profits above that mark.

Anyone wishing to donate money or participate in the cleanup effort may contact the UWSP Association for Community Tasks office at 346-2260.

Goodbye bathtub; hello health Enhancement facility

by Tom Woyte
Sports Writer

As you approach the immense gray door leading to the pool, a familiar burning sensation penetrates your nostrils. The powerful chemical odor finds its way to your eye watering mechanism located mid-temple. A salty river flows from eyes to cheeks, but is quickly transformed into a dry river bed.

You flash back to an "away" meet in high school: Your team is sniffing their way through strange hallways like a pack of hounds trailing the scent of the game. The pool area proves no match for your keen snouts for chlorine vapor.

The UWSP pool awaits. You grasp the cold metallic handle

and pull it toward you. A hot rush of air engulfs you, like an enormous, unseen hand, it invades the cool dry air of your hallway space. A flash of white dots appears, spinning into a snowy blur against a backdrop of darkness.

Regaining control, you peel your right shoulder from the sticky tile wall and scan the room for a place to quietly pass out. A dark green wooden bench catches your eye and you head toward it.

Your squeaky "Nikes" go to work on the damp floor, sending a high C-sharp into the caverns of your oratory anatomy. The mind piercing pitch comes in harmony with an obnoxious "Gurgleschlurp!" of rust stained drains filtering the day's

treasures. Clumps of hair, snot, and band-aids float like bogs in the current toward the three-inch pool side falls.

With a "snap, crackle pop" of trade-in knees, your buns touch down; the landing pad, unfortunately, was in need of a good squeezing. In the split-IT! of a second, the cold reality of your judgemental error seeps efficiently through 50/50 polyester cotton fibers to warm under fibers.

A chill runs from tail bone to center skull, about where it's all glued together (as evidenced by the soft spot on babies' heads). You turn your attention to the rippling green-blue water; a mesmerizing shade which

Wisconsin: the fatted calf

by Blair Cleary
Editor-in-Chief

A recent study stated something to the effect that the state of Wisconsin had the highest percentage of obese people in the United States.

There is no way a small paper like the Pointer can confirm or deny this. It would seem however, according to other sources, that the citizens of Wisconsin are fatheads, or perhaps fatted calves.

Jack Norman in the Milwaukee Journal from last week Sunday stated that Wisconsin was going to have to pay roughly 3.5 billion dollars to help bail out the savings and loans in sun belt states such as California, Texas and Florida. This comes out to about \$3,000 for an average family of four.

Of this total fund for savings and loan bailout, some \$325 billion according to congressional auditors, Wisconsin will get a tiny amount in the tens of millions of dollars. This is hardly a "fair share" of the pie.

In addition to this, David Obey, our congressman,

reported on a battle he was engaged in with others in congress over payments for a new federal clean air bill. The amendment Obey was fighting against would have resulted in Wisconsin "paying twice for cleanup." Once as a result of our state cleaning itself up years ago, and once to cost-share the cleanup efforts of states that didn't see fit to clean up their acts until the government forced them to do so such as Ohio, Indiana, and Illinois. The fate of this amendment is still in the air but Obey thinks there is a "good chance" it will not pass. I wish I were as optimistic.

The Milwaukee Journal listed a group of things Wisconsin could do if we were allowed to to keep the money we were sending out to the sun belt states. The list included financing \$5,000 home mortgages, a 5% cut in state income tax, increased health insurance for the uninsured, and even a new stadium in Milwaukee.

I guess it's more important that we bail out the sun belt states than help ourselves out here in Wisconsin. These are, by the way, the same sun belt states that, when the "snow belt"

states such as Wisconsin were in an economic depression a decade ago, offered us no economic help. While their economies were booming they drove around with bumper stickers that said "Let them freeze in the dark" referring to states such as Wisconsin.

So it falls again on to the shoulders of Wisconsin, a place that gets less federal aid than almost any other state in the union to prop up the deadbeats. Wisconsinites will grumble but will pay their share twice like good soldiers. Its all for the good of the country.

Three things about this can really bug a person though. First of all, why did the federal government let those idiot states like Texas get into these problems in the first place? Secondly, where were our boys, the Wisconsin congressional and senatorial troop while we were being sheared like sheep? Thirdly, why do we put up with being called "fat" and "cheeseheads" by these people we bail out time and time again?

In any event, congressional elections are coming up this November. (Yes, it's been two

years already!) This may be a good issue for you the voter to consider when you choose a candidate. Think about it.

You're smart enough to write about Alice Walker's use of African storytelling traditions. And you're still smoking?

POINTER

Letters to the editor will be accepted only if they are typed, signed, and under 300 words in length. Names will be withheld from publication only if appropriate reason is given. The Pointer reserves the right to edit letters if necessary and to refuse to print letters not suitable for publication. All correspondence should be addressed to The Editor, Pointer, 104 Communications Arts Center, UWSP, Stevens Point, WI, 54481. Written permission is required for the reprint of all materials presented in the Pointer.

The Pointer (USPS-098240) is a second class publication published 29 times on Thursdays during the school year by the University of Wisconsin-Stevens Point and the UW system Board of Regents. The Pointer is free to all tuition paying students. Non-student subscription price is \$10 per academic year. Second class postage is paid at Stevens Point Wisconsin.

POSTMASTER: Send address change to Pointer, 104 Communications Arts Center, Stevens Point, WI, 54481.

The Pointer is written and edited by the Pointer staff which is comprised of UWSP students who are solely responsible for the editorial content and policy.

Hunger overlooked in Portage County

Dear Editor:

What images does the word hunger conjure up? Do you see a small, barely clothed child staring into a camera while flies land on his face? What about a side of hunger closer to home, right here in Portage County? A side often overlooked in the face of the enormity of the international problem, but a problem nonetheless.

Hunger Cleanup is the country's largest student run volunteer event to help the poor. The Hunger Cleanup program not only supports international programs, but also local ones. In fact, 50 percent of the contributions remain on a local

level. Operation Bootstrap receives the money and uses it to aid people in need of food and emergency funds.

On April 21, you can help. For three hours, the Hunger Cleanup volunteers will be performing jobs such as cleaning community parks, washing buses, etc.. There are a wide variety of jobs available. The volunteer gets friends, relatives or anyone to sponsor them for their time. Last year, 100 volunteers raised over \$900. This year, the goals have been set higher due to expanding involvement that includes area high schools. The Hunger

Cleanup hopes to raise \$1,500 with 150 volunteers, but your help is needed. If you cannot help on April 21, then try this, stop by the Hunger Cleanup booth in the UC Concourse next week and drop off a quarter. That is all, one quarter. If only 25 percent of the students would do this, over \$500 would be raised to help fight this problem. If you are interested in becoming a volunteer or want more information, contact the ACT office at 346-2260. Remember you can make a difference.

Tim Heindl

Dolphins and tuna

Dear Editor:

This coming weekend there's a holiday. Of course there is Easter on Sunday, but there is another sort of holiday on Saturday; it's National Dolphin Day. This day has been set aside to recognize one of our intelligent and beautiful animals, the dolphin.

The eastern spinner species of dolphin is declining in population numbers due to the commercial tuna industry. The dolphin pods frequently swim above schools of yellowfin tuna pointing out the location of tuna for fishermen.

In the process of catching tuna with purse-seine and large ocean drift nets, the dolphins are caught and die. Dolphins are also harassed by helicopters, speedboats and underwater explosives.

At the present time, no brand of canned tuna is known to be prepared by using 100% dolphin safe methods. However, there is hope. House Resolution Bill 2926 proposes that labels be placed on canned tuna to alert the consumer of the fishing methods used to catch the tuna.

You can help the dolphins by writing to your senators in support of this bill and boycotting canned tuna.

Judy Armstrong

Dear Editor:

Busting underage university students for consuming alcoholic beverages at parties is a relatively new activity for law enforcement departments across the state. It sprouted from the increase of the legal drinking age to 21 and has grown to cause more conflict on UW-campuses than any other controversial topic.

We've heard it all before - if you're old enough to go to war at 18-years-old, then you should be able to have a beer.

Nonetheless, the legal drinking age is 21, and it seems like there is nothing we, as college students, can do to change it.

What is really frustrating is that this unfair law is commonly enforced in an unjust manner.

A good example of this is the Phi Sig party that was inter-

rupted by the Stevens Point Police officers last February 3. It was an incident that brought about some questionable behavior on the part of the officers.

Among several other occurrences of that Saturday evening, one involving the release of underage students who had been ticketed for drinking, created a sense of skepticism which could not be ignored. I spoke with Chief of Police, Robert Kreisa, over the telephone early the next week following the bust.

What I learned was that underage individuals who recorded less than .03 were released from the party because of the limited accuracy of the Breathalyzer. This troubled me intensely because I know someone who had attended the gathering, was fined for

registering .06, and then was immediately given a ride in a patrol vehicle to her own car. She was released from the patrol vehicle and then told by the officer that she could leave the party.

No big deal right? Wrong. If the Breathalyzer could be .03 inaccurate this would suggest that the girl referred to, could have actually had a blood alcohol up to .09. This is only .01 away from the legal limit of intoxication in Wisconsin (which is presently .10) Yet, the student was left to leave in her car.

Immediately, this struck me as a contradiction to busting underage drinkers for the purpose of deterring alcohol related automobile accidents. I asked Kreisa if this was legitimate and common procedure for a police officer. He refused to answer but said that Portage County

patrols were in the area and that possibly a county officer had done this. The girl is positive that it was a city officer that gave her the ride.

Whoever gave her a ride, whether it was the Stevens Point Police Department or the County Sheriff Department, someone is in the wrong.

I see absolutely no purpose in fining underage drinkers if they are going to be aided in killing themselves or others who could be involved in an accident as a result of this kind of behavior by our so called "responsible" law enforcement agencies.

This just goes to show, if you are underage and going to drink, you are at risk of being fined, through the enforcement of drinking laws that are protecting nobody.

It's vandalism not v.d.

Dear Editor:

On most UW campuses, students are more concerned about contracting a venereal disease than having their vehicles vandalized. Certainly, this is not the case at UWSP.

In fact, I have been unfortunate enough to have my vehicle vandalized on at least five occasions in the three years I've attended this university.

Nonetheless, our responsible campus security folks are always there to comfort us and dramatize their concern on our behalf. It is obvious, they have mastered the art of negligence.

I don't ask much from the establishment I have chosen to pour my life savings into. All I want is a good education and some responsible behavior on the part of our security program.

Fortunately, I was able to convince my parents to lend me the money to purchase a dependable pickup truck. It is the only vehicle I own and can depend on to get me from point A to point B without a costly

breakdown. Therefore, I cherish my truck and expect it to remain in the condition that it was when I brought it from home or until I smash it up myself.

Unfortunately, UWSP campus security does not regard my logic as important or beneficial to them. Their attitude is, "What the hell, we don't have to pay for the damage." They are correct; by state law they are not required to fork over the cash to replace intentionally destroyed parts, but they could try harder to prevent vandalism. Our campus security are blind to the fact that their occupations are supposed to be a service to the students. We pay their incomes through our tuition fees. This means that they owe us. We don't owe them.

I would not be griping about the incompetence of campus security if I were victimized once or even twice, but now it is getting ridiculous and costly to replace and fix the items which have been tampered with. Quite

frankly, my vehicle has metamorphosed into a sewer product as a result of the laziness practiced by those mentally inferior individuals in the lower level of the George Stein Building.

I have heard of all campus security's advisements and excuses. Their number one excuse is that the university does not have adequate funds to purchase more patrol cars. This excuse irks me the most, not because it's an outright lie, but because I don't understand how more vehicles would help decrease vandalism when the officers do not use the cars they already possess. It's the truth. Travel past the George Stein building sometime. If the patrol cars are parked right outside, you can be sure the officers are busy smoking cigarettes, drinking coffee or just engaging in general b.s., not to mention that the boss, Don Burling, must have returned home for the day.

Their most widely used advisement is to have your in-

surance company cover the cost of repairs. That's fine and dandy if you can afford full coverage and the increase on your insurance after claiming vandalism damage for the fifth time in three years.

But wait a minute, my all-time favorite screw up - when I was actually accused of vandalizing my own vehicle. No kidding, I was making an assessment of damage done to my truck the previous evening in lot J, when I was approached and accused of vandalism by a campus security officer.

Campus security is a joke. It would probably be cheaper to hire a P.I. to watch your vehicle every night than it is to park in an unprotected campus lot right now. So forget the condoms and all that garbage about safe sex, and purchase an automobile security system. You know, the type that helps defend against authentic vandals and not the owner of the vehicle.

Steve Schmidt

Sanders, Associate Vice Chancellor Webster, Sue Clark Kubley, Maria Coppinger, the Student Government Association, and many more for their valuable time and needed support.

This poem was read by the Master of Ceremonies Aly Xiong during the "Personal Experience Panel" and is dedicated to the conference by his long distance friend Young Ju Jhun.

A Generation In-Between

Torn between two, which are one in the same

With only my culture and nation to blame

Listen to your heart or follow

Whichever you chose, in-between you will find

Torn between two, the future and the past

Not the memories but the feelings that last

Images you see, but pain you can feel

Inside and internal, the hurt that can't heal

Torn between two, the wars that clash peace

Difference, confusion and choice that won't cease

Reflections of soul and reflections of thought

A trap within time, within reason you're caught

Torn between two, society and belief

Thoughts of betrayal, your innermost thief

Tipping the scales, both wanting more

Pulling each way in a great Tug-o-War

The question you ask me is which to abide
Wouldn't it be easier just not to decide

Listen to what you've heard and see what you've seen
But all you will find is the Generation In-Between.

Attention Pointer Editor-in-Chief applicants,
Interviews for the position will be held this Tuesday at 2:30 pm. Call the Pointer for information if there are any questions. Dress nicely and expect to be grilled with lots of questions.

Walleye bag limits set on designated spearing lakes

Spring and summer daily walleye bag limits of three, four and five have been set for all Northern Wisconsin lakes, according to Department of Natural Resources Secretary C.D. "Buzz" Besadny.

The decision for a three and in some cases four daily bag limit for hook and line angling in the ceded territory directly affects the 178 lakes named for spearing by the Chippewa Indians this year.

Besadny's decision means that 172 lakes will have daily bag limits of three; six lakes will have a four-walleye bag limit and the remaining 683 walleye lakes in the treaty territory (those not to be speared) will have a daily limit of five walleye.

"This decision should reassure all who plan summer vacations and recreation in Northern Wisconsin that they can look forward to a walleye fishing season with optimism and enthusiasm," Besadny said.

"The Chippewa Indians have commendably, voluntarily limited the number of walleye they want the opportunity to take," he continued. "Right now, we are confident that the restraint shown by the Chippewa will insure their objective

of at least a three walleye daily bag limit for non-Indian anglers is met, at least for now."

At the same time, Besadny cautioned that fishing regulations may be reassessed later this year on 41 of the lakes named by the tribes, depending upon the number fish taken by spearing and projected open water fishing.

When the Chippewa announced on March 15 that they would take no more than 54 percent of the total allowable catch on the majority of the lakes, their intent was to insure no lake in the North would have any walleye bag limit less than three a day, Besadny explained.

However, Besadny said that the announced Chippewa quotas affect lakes in different ways, primarily because of different types of fish population surveys; so the state could not be absolutely certain that the three daily bag limit—if carried throughout the normal open water season—would adequately protect the resource.

When final spearing harvest numbers are calculated in late spring or early summer by Great Lakes Indian Fish and Wildlife Commission biologists, Besadny said DNR biologists would review limits and seasons on the

41 lakes and depending on the calculated safe harvest level, the department could consider other actions, including curtailing hook and line fishing starting as early as November.

There are a number of reasons why the 41 were listed, Besadny said, but the main one is that there is a chance that documented and projected harvests could reduce the remaining number of fish to the point where some season shift would be necessary to protect the resource.

Besadny characterized the department's decisions as "good news for northern residents and the tourism industry. But there should be no doubt that the state has the obligation as confirmed by the federal court."

Last year the Chippewa named 254 lakes for spearing, compared to the 178 this year. About 16,000 walleye were taken by the Chippewa in 1989.

There are an estimated 1.6 million walleye in the 861 lakes in the ceded territory covered by the treaties, roughly the northern third of Wisconsin. About 670,000 walleye are taken by hook and line anglers in Wisconsin each year.

Last year, reduced bag limits were set on the 254 lakes where

harvests were claimed by the Chippewa for spring and fall spearing and gill netting. Some adjustments were made later in the season because tribes speared only 114 of the lakes they originally named.

The lakes where potential season shortening or reduction to a less than three walleye bag limit exist by county include: Ashland County, English and Gordon Lakes; Bayfield County, Bony, Diamond, Jackson, Owen, Long, Middle Eau Claire, Namekagon, Pike Lake Chain and Upper Eau Claire lakes; Douglas County, Amnicon, Minnuesing, Nebagamon, Lower Eau Claire and Upper St. Croix lakes; Forest County, Butternut, Franklin and Metonga lakes; Iron County, Pine and Trude lakes and Turtle-Flambeau Flowage; Oneida County, Clear, Crescent, Pelican and Two Sisters Lakes and Willow Flowage; Price County, Pike and Round lakes; Sawyer County, Nelson Lake and Vilas County, Ballard, Big Arbor Vitae, Big Muskellunge, Big Sand, Harris, Kentucky, Laura, Little St. Germain, Long, Trout and White Sand lakes.

Earth Week rally April 19

by Lisa Rosenmeier
Contributor

Students and members of the community are invited to begin their celebration of Earth Week with a rally and candlelight vigil sponsored by Alliance for a Sustainable Earth.

The rally will be held Thursday, April 19, from 7-9 p.m. in the UWSP Sundial (in case of rain, meet in Michelson Concert Hall in the Fine Arts Center).

It will begin with short speeches by the CNR's Dean Alan Haney, Mayor Scott Schultz, Earth Firster Hank Bruse, and UWSP faculty Robert Miller, Christine Thomas, Joseph Passineau and J. Baird Callicott. Musical entertainment (audience participation required) by Captain Ecology, that infamous superhero promoter and protector of environmental wellness, will follow.

A candlelight vigil for the Earth will begin at approximately 8:30 p.m. for which students are encouraged to bring candles and prayers or offerings to give.

The event is free of charge to all who will those two hours to think of their place on their home planet.

ECO-BRIEFS

by Timothy Byers
Staff Writer

Have any of you been to Wal-Mart lately? They seem to be leading the way in the new, corporate move to environmental consciousness. In the clothing section in particular there are many shirts and accessories with Earth Day and Earth Week logos. The coming celebration the week of April 19 to 27 seems to have snowballed across the country and the Wal-Mart reaction is to be commended. They also have posters in the store that speak of their commitment to selling green products.

Another company that is to be commended is Earth Care Paper Inc. They are a company that sells recycled paper. If you ever wondered where your old paper went after you put it in the recycling bin this catalog is the place to look. Post cards, Christmas cards, blank cards, computer paper, note pads, calendars, they're all here. Earth Care Paper Inc. can be reached at P.O. Box 3335, Madison, WI 53704, (608) 256-5522.

Fort Howard has often been maligned as a polluter of Green Bay and the Fox Valley, but they too are joining the green parade. Their newest product is 100% recycled toilet paper. Retailers were not so sure the public was ready for this

product but 7 weeks of sales have eased their concerns. Sales have been strong of Green Forest tissue and paper towels and expansion throughout the midwest is expected this spring.

Other business news is that money managers are betting heavily on the environmental services sector. A portfolio manager of a major fund says that "Cleaning up our polluted planet will be the growth industry of the 90s." Investments for such companies are alternative energy firms, environmental groups, pollution control, recycling, and water technologies. The thrust behind this new investment is the hundreds of billions of dollars pouring into brand-new industries as government cleanup money is distributed.

Electric vans may be in our future if Johnson Controls Inc. has its way. The small Colorado based firm wants to put 10,000 electric-powered fleet vans on the road. The company says the vans will be more reliable than past electric vehicle efforts and couldn't come at a better time. With the new Clean Air Act passed last week Johnson says the climate is excellent for alternative energy vehicles. California utilities are underwriting the vehicles and hope to prove their worth in smoggy southern California.

While the Exxon Valdez oil spill was a terrible environmental disaster, an even greater oil spill hazard may be happening right on our own streets. Unrecycled car oil is a major polluter of local waterways. The Izaak Walton League says unrecycled car oil is just as deadly as large tanker spills especially when the oil is poured down street drains or washed off coated driveways. The League also says that consumers purchase and waste many times more oil each year than the 11 million gallons spilled in Alaska last year.

The Izaak Walton League (IWL) also has a new guide out to help citizens in their local efforts. A Citizen's Guide to Clean Water is available free from the IWL at 1401 Wilson Blvd., Level B, Arlington, VA 22209. The guide says that citizen volunteers play a vital role in the fight to protect America's water resources. State and federal agencies do not have the resources to patrol and control all waterways and the IWL wants citizens to know how to use the Clean Water Act to ensure their water is swimmable and drinkable.

There is another side to preservation besides saving natural areas. Groups such as

the Nature Conservancy try to buy and preserve critical habitat. The National Park Service is in charge of many national, natural treasures. Now the Park Service mission is expanding to historic buildings as well. Structures such as grain elevators, historic bridges, post office buildings, and even breweries are ending up in industrial heritage parks. While the Park Service is interested in these buildings it is up to local governments to provide the initial funding and impetus.

European storks are facing some tough odds this year. Not only are their northern nesting points endangered, they face peril all along their migration route. Last spring only 15 came back to Denmark compared to 4,000 breeding pairs a century ago. The birds fly 7,500 miles to South Africa and encounter drought, human expansion, and hunting along the way. Chemical fertilizers and wetlands draining have also affected their numbers. Some ornithologists feel the birds will disappear by the year 2000.

Earth Day Update

Stevens Point

Carry yourself away on a string of melodies with "Earth Tunes." Environmentalist Educators and Naturalist Association will be hosting the event April 20 at 11:30 - 4 on the campus sundial.

Wisconsin

Germantown's High School is planning an "Earth Day Run/ Walk" which will raise funds for various environmental organizations.

Around the Globe

In Minnesota government agencies and businesses will compete for the highest percentage of their employees to use mass transit on Earth Day.

CWES to house state WAEF office

The Wisconsin Association for Environmental Education (WAEF) has announced a new state office to be at the Central Wisconsin Environmental Station on the shores of Sunset Lake.

Directors of the organization inspected the facility and formulated plans and goals for 1990 at a recent meeting there.

WAEF is a voluntary organization comprised of teachers, naturalists and other natural resources, conservation and youth agency professionals who are interested in providing "environmental awareness and responsible action through formal and nonformal education."

The office will serve as a coordination point for state activities for WAEF members. Activities such as newsletter preparation, membership record maintenance, correspondence and conference registration will be handled there. The facility will also act as a point of reference for networking information regarding environmental education around the state for the organization. The mailing address of the office is Amherst Junction.

The University of Wisconsin-Stevens Point operates the station.

WAEF began in the early 1970s, and was first initiated by the Department of Public Instruction. Though it maintains a close affiliation with the DPI in regard to environmental education in public schools, its membership has expanded to include

individuals outside the traditional classroom setting and its activities are aimed at a broad range of interests regarding education about the environment, according to its president, Randy Champeau, a UWSP professor.

The organization hosts a variety of conferences and workshops held at various locations around the state and makes awards and presentations to teachers and schools in recognition of their efforts to promote environmental education.

Joe Passineau, director of the Central Wisconsin Environmental Station, said the establishment of the association's office at his facility fulfilled part of the station's mission.

"This new partnership complements well the station's effort to serve the region and state through its many on-site programs and outreach activities in environmental education," Passineau said.

Earth week films in the Encore from 12-1pm

April 16 - Waste connects consumer habits, from the individual to the multinational, with our waste problems.

April 17 - Wheat today what tomorrow? By the end of this decade, 35% of the world's once productive farmland will have been turned into desert. David Bellamy investigates the disaster facing dryland farming in Western Australia.

April 18 - America's water crisis Walter Kronkite explains the threat posed by non-point source pollution, runoff that contributes to 80% of our water contamination. **From sea to shining sea** is a Greenpeace documentary about a small town's effort to protest a pipeline discharging chemical waste into the ocean.

April 19 - The global brain Presents the idea of the Earth as an integrated self-regulating living organism and considers what function the human race may be playing in this planetary system.

April 20 - Whalesong documents the Vancouver Symphony's pool-side performance for the whales at the Vancouver Aquarium.

April 23 - For Earth's sake: the life and times of David Brower. David Brower is this year's keynote speaker for Earth Week, he is the prime example that one person can make a difference.

April 24 - The Lorax What do Once-ler, truffula trees, thneed, super-axe-hatcher, swamee-swans, and bar-ba-loots all have in common? They are characters in this Dr. Seuss classic that discuss pollution and greed along with offering some hope.

Wisconsin outdoor report

Anglers should find some good walleye and steelhead fishing in Wisconsin rivers this weekend.

The recent warming trend has produced some nice catches of walleyes on the Wisconsin River around Wisconsin Rapids; this condition should continue until the spawning run is over. Walleye fishing has been improving on the Brule River backwater, Bad Water Flowage and the Menominee River in Florence County. Grant County anglers have

been getting walleye, sauger and northern on the Mississippi River below lock and dam 11. Good walleye fishing is also reported on the Chippewa River in the Eau Claire area. Remember, there is now a 15-inch size limit on walleye statewide.

On the Fox River in Brown County, anglers are fishing mainly for walleye. The dam has been the most productive spot for people with boats. Perch are providing action on Duck Creek and on the Suamico River.

In Kewaunee County, stream fishing is focused on the Kewaunee river. DNR shocking crews have found a lot of steelhead in the river's deep pockets. Water levels are low. Most fish are located below the DNR fish facility at Bremmer Park. Some nice catches of brown trout are being taken off Door County's Bailey's Harbor in Jacksonport on rapids of different colors.

Good catches of perch are Continued on page 11

Indian affairs: ignorance breeds conflict

by Bob Amann
Contributor

The issue of Indian affairs touches the lives of many students on campus, everything from the College of Natural Resources to history. Many students grew up in the North and may even come from families in which their own businesses have been affected by the relations between whites and Native Americans.

Stand Webster, of the Wisconsin Indian Resource Council said that the key to solving conflicts between whites and Indians is through education.

Webster has an office near the 'time tunnel' that connects the University Center with the Park Registration Building. His office is not affiliated with the university but does act as a liaison. Webster coordinates requests for speakers and other resources to help promote better

understanding between whites and Indians.

"Education is the responsibility of the person seeking it," claims Webster. "There are a lot of misconceptions and ignorance about the tribal nations and the treaties." This causes fears and stereotypes.

Webster feels that reducing tensions between the white population and the Indian population is through dialogue, and by disseminating information to those who take the time to become informed. Webster understands the preconceived notions that whites have about Indians and the role that they play in contemporary society.

Even the word 'Indian' itself is a misnomer. Webster says the preferred word for Indians is Native American. This helps to remind everyone of who was here first. Webster says the Native Americans made room for the white man, sometimes peacefully and sometimes under pressure.

Kate Anderson, who works

in the library, recently completed a thesis in treaty rights by using the library's archives on Indian affairs. Anderson spent much time doing research and came away with some realistic impressions.

"The treaty issue and the concept of sovereignty is a complex one and it takes a lot of understanding," says Anderson. "There is a lot of material on this subject in the library and anyone interested can do some thorough research."

Adding to the problem may be inaccurate information coming from the media. Webster charges the media with distortion in reporting on events surrounding the treaty issues, citing, among other things, the fact that peaceful protests receive little or no coverage while the most vocal protestors get all the attention.

AIDS hits American colleges

by Greg Lavin
Contributor

"In the next 10 years, we will be in a hand-holding situation, either as an AIDS patient or supporter," said Dr. Richard Keeling, M.D. at a recent American College Health Association Conference.

The HIV/AIDS conference dealt with the rising rate of infection of the deadly disease on America's college campuses. Keeling revealed startling statistics leading to the spread of AIDS, such as, "By the age of 19, two-thirds of women and 80% of men have had heterosexual vaginal intercourse. Also, surveys have shown that 80% of all college students are sexually active and that of those college students, only about half of them used a condom during their last intercourse."

Keeling commented that the reason students didn't use a condom was that they had no sense of personal risk. He also went on to say the highest risk group for the AIDS virus is people between the ages of 15-30 years old. This accounts for 85% of all college population.

The HIV/AIDS epidemic has segmented into three major trends. These are the homosexual/bisexual males, intravenous drug users and the heterosexual population. Reported cases among the homosexual/bisexual males is on the decline, while the heterosexual population and intravenous drug users are on the rise. Among total new cases, the three fastest growing AIDS population are teens, women, and infants. With this information Keeling concluded, "The face of AIDS is changing rapidly."

Keeling also explained why efforts to educate students about how to communicate with sexual partners have failed. "Students are given information about responsibility but developmentally they are unable to." He also commented that 47% of

Sinead O'Connor: nothing compares 2 her

by Jon Alft
Contributor

Chrysalis/Ensign Records has released the second album from the Irish-born Sinead O'Connor, one of the music industry's most visually interesting artists. O'Connor's physical appearance - shaved head and punk rock clothing - definitely proves you can not judge a book by its cover. There is power to this album, but it does not come from hard-edged music, the power is in what has been written and the way O'Connor vocally interprets the songwriting.

I would like to clear the point that the first single "Nothing

Compares 2 U" is not a love song. Although the title itself makes for great flattery, the song is filled with pain and loss, as is the entire album. The emotions put forth by O'Connor are so strongly played that they feel like they are exclusively hers.

O'Connor is in her early 20s and has a view on life that many of us at that age do. She seems to be speaking for herself but she shows emotions we all may have felt. As for "Nothing Compares 2 U," I feel that unless you have met with these emotions, you will not get the full effect of the song.

The theme of the album is summed up at the very beginning

when O'Connor recited the prayer, "God grant me the serenity to accept the things I cannot change, the courage to change the things I can and the wisdom to know the difference."

Every song is a different chapter of O'Connor's search for serenity, courage and wisdom. She seems to be able to come to terms with her problems and situations by putting them out in the open.

As for the music of the album, O'Connor has a lusty, yet innocent voice. Her vocal range redefines beauty as it soothes and pleases the ear. The only song that does not feel en-

tirely personal becomes a political statement. "Black Boys on Mopeds" is a song which takes a dig at Margaret Thatcher and her contradictory domestic and foreign policies.

Most of the songs are soft and flowing like "Nothing Compares 2 U" with the exception of "I Am Stretched on Your Grave," a song full of integrity and dedication, that has a neat rap-like beat to the music, and "Jump in the River" which kicks off with a gunshot and is definitely faster paced than the rest of the album.

The album closes with the

S & S review "Opportunity Knocks"

by Terry Speers and
Dennis Skrzyzkowski

This week, Point's finest theaters bring us "Opportunity Knocks," a clever comedy starring Dana Carvey of "Saturday Night Live" fame (Does Church Lady ring a bell?). His motion picture debut finds him teamed up with Todd Graff (Dominick and Eugene, the Abyss) who helps him pull off cons and scams both simple and outrageous.

Carvey, grabbing every opportunity, (thus the title) cons his way from rags to riches, but when he makes the mistake of falling in love with one of his victims, he begins to question the business he's in.

Look out, this time it's not Saturday Night Live...by T.S.

Although "Opportunity Knocks" was devilishly clever

and, at times very funny (even hilarious), it takes so much time to set up each joke that you almost forget you are watching a comedy. There are lots of scenes that make you wonder: "how's he going to get out of this one," but the basic plot is fairly predictable. Carvey is the centerpiece around which the film revolves and almost all of the laughs are attributed solely to him (making the film seem like an hour-and-forty-five minute-long Saturday Night Live skit). Unfortunately, despite its assets, "Opportunity Knocks" is nearly a mediocre comedy, giving it a rating of five.

A movie starring Dana Carvey? Well isn't that special!...by D.S.

The one thing I'm always afraid of when I see a movie featuring a well-known comedian, is that

the comedian will try to do a two-hour standup routine and throw in some action and expensive props. Unfortunately, Dana Carvey has a few such scenes which put him in the spotlight, and I felt they could have been left out (or as one character might say: "They weren't prudent at this juncture, not good for the economy.")

I felt that Carvey played the part of the novice con artist very well and made the character believable. The supporting cast did a nice job and gave the movie a good balance of characters. The movie had some funny spots and some tense moments as you saw Carvey's character try and get himself out of some sticky situations.

Gangsters, expensive homes and amour, this movie covered it all and did a pretty good job, so on a scale of 1 to 10 (10 being best), I give "Opportunity Knocks" a 5 1/2.

FASHION — POINT —

by Susan Stadler
Contributor

Costume jewelry is a great way to update your wardrobe inexpensively. But a classic, quality piece of jewelry is worth the investment. As with clothing, price does not always reflect quality. This is why it is important to know the difference between standard levels of quality in jewelry. The most prevalent metals in jewelry are gold, silver and platinum. These precious metals come in different forms which determine their value and durability. Gems are available in varying forms which may differ in value and durability.

Gold in its pure form is 24 karat. In this form, gold is very soft. Since it is so soft in its pure

form, it is mixed with other metals to strengthen it. The color of the gold is determined by the metal it is mixed with. Gold can be yellow, white (mixed with nickel), green and red. Some jewelry is shown with mixes of different colored gold.

Eighteen-karat is 18 parts of gold and six parts of another metal. This gold is high quality. Since there is still a large amount of gold in this composition, it is not durable enough for daily wear. If worn daily, it will wear down quickly. Fourteen-karat gold is 14 parts gold and 10 parts another metal. It still wears down but is much more durable for daily wear than 18k. Fourteen karat is often used in wedding rings and is richer in color than 10k, which is the

Mid-Americans named outstanding

In its first year of participation in a seven-state jazz festival, the University of Wisconsin-Stevens Point Mid-Americans vocal ensemble was chosen as the outstanding group.

Under the direction of Chuck Reichl, the ensemble performed at the 10th annual Gold Company Invitational Jazz Festival,

held at Western Michigan University, Kalamazoo, Mich., on March 24. It was chosen number one among 26 groups.

Vocal jazz specialists critique each performance at the non-competitive festival, said Reichl. Participants included groups from Michigan, Wisconsin, Illinois, Indiana, Ohio, Iowa and Florida.

Mid-Americans members include students Marilyn Dorshorst, Rudolph; Dale Groshek, Rosholt; Steve Scheller, Waupaca; Dan Berard, Rothschild; Steve Dwyer, Wausau; Toni Sherry, Cornell; Tonya Johnson, Wautoma; Colleen Timler, Fond du Lac; John Saecker, Markesan; Alex Swanson, Pittsville; and Paul Keene, Wabeno.

Fashion

from page 9

lowest in solid gold. This is the best selection for daily use. It still has the look of gold but is much more durable.

Sterling silver is another choice for jewelry. Sterling silver is almost pure silver: 92.5 parts silver and 7.5 parts copper for strength.

Different countries may have different markings for their silver, which are similar to sterling: 900/1000.

Gold-filled jewelry is gold formed around another metal. This is not plating because the gold becomes a part of the inner metal. The gold will not peel away from the inner metal.

Vermaille is considered a precious metal but contains a lighter gold content than gold-filled. Vermaille is sterling silver with an overlay of gold. This gives the look of gold without being 14 or 18k. Vermaille, gold-filled and sterling silver should all be ap-

proximately the same prices.

Platinum is another precious metal. This is more expensive than gold and much more durable. Platinum is often used in crown jewels. It is similar to white gold but is not as shiny.

All of these metals will make a quality piece of jewelry. Electroplated jewelry does not. This process uses the least amount of gold. A minute layer of 18k or 24k gold is attached electrically to a base metal. This type of plating is often seen in TV jewelry offers. It is not durable and often peels off the base metal.

If you will be buying jewelry with gemstones, make sure you know if they are natural or synthetic. Synthetic stones are the same chemical composition as natural stones. They are also often more durable than natural stones. Imitation stones are usually a piece of colored glass. The quality of stones is sometimes difficult to notice but the setting can make a difference. An electroplated setting will make any gem cheaper looking.

So when choosing a quality piece of jewelry make sure you know what type of metal and stone you are purchasing so you are getting the quality you pay for.

AIDS

agrees with Webster.

"Reporters tend to view their news stories as two sided issues and often attempt to balance those view points," says Irwin. "This is one of those issues that was not balanced to begin with, and the media has had some problems in reporting it."

The treaties that were signed are still in effect and cannot be changed any more than treaties between the United States and any other nation. Irwin believes that the debate on just exactly where Wisconsin jurisdiction starts and ends will be an interesting one affecting everything from spear fishing to gambling.

Unfortunately, the United States government has been notorious for renegeing on deals. This raises the question, are these treaties worth the paper they're printed on, and what do they say?

Video conference scheduled for Thursday

A video conference about renowned photographers Arnold Newman and Andreas Heumann is scheduled for 7 p.m. Thursday, April 12, at the University of Wisconsin-Stevens Point.

The College of Fine Arts and Communication and the Department of Art and Design are sponsoring this Kodak video conference, to be held in Room A206 of the Fine Arts Center. The event is open to the public without charge.

The video, a tape from a Kodak teleconference series, describes the life of Newman, who has spent 50 years of his life photographing people and places. It also features Heumann, who tries to bring an element of humanity into all his photographs.

Report

From page 7

reported at Red Arrow Park in Marinette and near the mouth of the Oconto River. Suckers are running up to the dam at Stiles. Rainbow trout and walleye are being caught at the Stiles dam on heavy spinners. A few nice-sized walleyes are being taken on the Wolf River.

In the southeast, steelhead fishing on Racine County's Root River is excellent. The Chambers Creek strain of steelhead are at peak spawning right now. Best baits have been spawn sacs and chartreuse and orange glow bugs. Fair numbers of brown trout and steelhead have been taken off the mouth of the Pike River in Kenosha County.

At the Port Washington harbor, anglers report very good action on brook trout, but most have been sub-legal size. There's good steelhead fishing on the Sheboygan River and on Manitowoc County's Branch and West Twin rivers.

In the Nicolet National Forest, wardens have reported a lot of ATV activity along pipeline trails. There are no ATV trails in the forest, and operation of all-terrain vehicles there is prohibited.

Wildlife watchers in Wisconsin are noting more signs of springtime. North America's southernmost timber wolves are beginning to den, and wolf pups will be born a month from now. Bald eagles are beginning to lay their eggs, and osprey, which must have open water to forage for live fish, are beginning to arrive in the northwoods. The very first loons of the season are showing up on northern rivers; others still migrating northward can be seen waiting it out on southern Wisconsin lakes and ponds.

Happy Easter!!

SPORTS

Pitching turns Pointer baseball around

by Kevin Crary
Sports Editor

The UW-Stevens Point men's baseball team, after losing a number of close games in their spring trip to Florida, were looking for a way to turn things around...they found it in their pitching.

Point swept doubleheaders from Milwaukee on Saturday (9-2, 14-12), Parkside on Sunday (5-4, 15-11), and St. Norbert on Tuesday (10-1, 2-1), boosting their overall record to 8-7-1.

"We play according to our pitching," said first year head coach Mike Ruechel. "With this team, good pitching brings about good hitting and defense."

The Pointers are relying on pitchers Rob Wolff and Dave Twaroski as their "one-two" punch, and have a tremendous supporting cast in Kory Krueger, Chris Combs, Steve Kramer, and Scott Eckholm, respectively.

"We can usually depend on seven solid innings from Wolff and Twaroski," said Ruechel. "With the other four, we just go with who's ever hot."

In game one against Milwaukee, Wolff allowed just three hits while striking out two in his complete game effort. The two runs were unearned. Rightfielder Rick Wagner had three hits and scored two runs to lead the Pointers.

"Wolff was in control of the game from his first pitch until his last pitch," said Ruechel. "He kept Milwaukee hitters off balance and confused the entire game."

In game two, it was Kramer

posting the win after pitching 3 2/3 innings of relief. Kramer allowed two hits, walked two, and fanned six batters. Combs started and allowed five earned runs on six hits in two innings before being relieved by Eckholm, and Dennis Aupperle.

Catcher Scott Pritchard had three hits and two runs batted in for the Pointers, while courtesy runner Tim Kohl scored four runs.

Twaroski kept things rolling against Parkside on Sunday by allowing just three earned runs on eight hits, while striking out four in seven innings.

And in game two it was Krueger, Eckholm, and Combs combining efforts to finish the sweep of Parkside. Eckholm was the winning pitcher.

First baseman Dave Schuett led all Pointer hitters by going five for seven, including two homeruns in game two, while scoring five runs. Schuett also had four RBIs for the series.

On Tuesday, Kramer, Krueger, and Kerry Braun held St. Norbert to just one run in game one, with Kramer recording the win.

And it was Twaroski coming on in 2 2/3 relief innings of starter Eckholm (2 innings), Kurt Rhyner (2), Combs (1), and Wolff (1/3), to record a 2-1 extra inning win in game two.

The performance given by the Pointers this week has given them a seven game winning streak dating back to the last game of their spring trip against Carson Newman -- a game which Ruechel sees as another reason for their recent success.

"The last game of our spring trip really turned things around for us," he said. "We told our players that Carson Newman

Rob Wolff

was better than most of the teams we were going to face this year. And ever since then, our team has realized that we can win, no matter who we play.

"Everyone is hitting the ball and getting the hits when we need them. Instead of one or two superstars carrying us, like most teams have, we rely on the whole team to carry us."

Ruechel does admit, however, that even he is a little surprised about the way his team is playing in the early going, especially for a team made up of mostly underclassmen.

"Coming into the season, I knew we'd win our share of games, but I wasn't figuring on this many this early on. I am very happy with where we are. People are not expecting us to win and the conference teams are expecting us to be weak this year and that's all to our advantage."

Point will host Eau Claire Tuesday, April 17 (Memorial Field in Plover) before opening conference play at home against Platteville next Friday, April 20. (University Field near Hyer Hall).

Lady Pointers missing timely hits

by Kevin Crary
Sports Editor

The Stevens Point women's softball team is finding out just how hard it is starting at the top. The Lady Pointers, loaded with talent and experience, are struggling to put things together, compiling a 9-9 record for a season filled with high hopes and expectations.

"When you're the team to beat everybody gets up for you," said head coach Nancy Page. "In our last couple of games we have been sitting back and waiting until the later innings to get

going, and by then, it's almost too late."

The Lady Pointers split their series with two-time defending conference champs Whitewater on Saturday, and with Oshkosh on Tuesday, before getting swept by non-conference foe St. Norbert on Wednesday.

While pitching continues to remain consistent, it's the hitting that has caused most of the Lady Pointers' problems.

"We are still getting good pitching efforts from Steph (Sobieck) and Ellen (Paul),"

Bryan leads Point runners in Coldman

Mike Schultz clears the bar at the Eastbay "Coldman" Invitational. (Photo by Lisa Stubler)

by Hal Jordan
Sports Writer

This past weekend the Pointer men's and women's track teams hosted the illustrious Eastbay "Coldman" Invitational, in which the weather didn't let anybody down...it was cold. The brave teams that showed were Eau Claire, Stout, St. Norbert, Duluth, Parkside and Winona.

Performances were excellent for the day, as the men scored points in every event with the exception of the 110 meter high hurdles.

Dean Bryan had four outstanding performances for the day with a pair of first place finishes in the 400m and the 4X400m relay, and a pair of second places in the 200m and the 4X100m relay. When asked how the meet went, Bryan replied, "It was totally awesome."

Other first place performances for the men were Dave "Alfalfa" Rupp in the triple jump and Kim Laseck in the 10,000m.

As for the Lady Pointers, there were some bright spots on this cool day. Beth Mears threw to a first place in the shot put and Beth Wieland held off the competition in winning the 1,500m.

Second place finishers were Jason Franzen (3,000m steeplechase), Colin Albrecht (1,500m), Scott Johnson (800m), Chris Larsen (400m hurdles), Kevin Schedlbauer (high jump), and the women's 4X100m relay.

Third place finishes were turned in by Lisa Wnuk (100m high hurdles), Amy Voigt (400m), Jason Ryf (10,000m), John Ceplina (800m), Dave Woyak (400m hurdles), Steve Slaby (triple jump), Josh Newman (shot put), and Dan Harris (javelin).

The event was also the Pointer

Alumni meet and "Bo" Ellis did a fine job of getting many former Pointers back to compete, but did anybody see Randy Gleason?

Goodbye bathtub

From page 2

matches the soft tile backdrop.... "Gurrschluurp And you're back to your damp 'Fruit of the Looms.'"

You stand to scratch your bench warmer's itch, glancing around the pool to make sure no one is monitoring your movements... A giant comes clomping through the door wearing 'Wranglers' and dangerously sharp cowboy boots. Clutched in his arms is a load of clipboard-stopwatch-microphone-pencils. With a "click-clomp, click-clomp," coach unloads his cargo and heads back out for another load.

To your right, you notice three strings of red and white lane markers. Judging by the successional layers of dust and mildew, you guesstimate that they date back to the early 60s.

You turn around to face the far end of the pool where the words HOME OF THE DOGFISH stand out in foot-tall yellow lettering. The questions begin popping into your head...

"How many swimmers and divers have practiced in this pool? How many students have learned to swim-diver-kayak-play water polo and even save lives here? How many races were swum here and where are the record setters now? "How often do they think back on these 'glory days'? How many are still swimming? And in his 30 years of coaching, did Red ever find out 'bout THEIR kick board wars..."

Across from you there is an old black and white photo of a young man in his early 20s. Printed beneath his picture are the words "William M. Gelwicks Memorial Pool" Bill Gelwicks was the Uncle of Janet and Kevin, both swimmers for UW-Stevens Point. Gelwicks swam for Red back when he first coached swimming (a time, we are told, when "Red" was still Red).

The Stevens Point pool would not last forever. Its time had to come eventually. Over Spring Break, they pulled the plug and drained the life out of our treasured bathtub. Now our water playground resembles a sand dune. The cement will be poured, a few weight benches spaced out on a nice carpeted floor...over this spot where history was made.

The record boards and team photos will be moved out to collect dust in some closet until they can be displayed for

another 30 years in the new facility. Maybe the swimmer painting on the upstairs wall will remain.

We can rest assured the rich sense of history and tradition of the Stevens Point teams will carry on--the power of the UWSP Pointer Dogfish and Angelfish will keep strengthening on their rise to the top.

Many of us swam and played and lived in this pool in our college years. We will never forget the 6 a.m. practices, the dreaded walks across the frozen tundra, washing the sleep out of us with a chilling plunge. And how can we forget those chaotic meets in the Conference's infamous engineering monstrosity; from the ventilation system (not) and great deck space (nadda again) to the custom built, wooden blocks of the 60s and slip sidin' sheet metal blocks of today.

As you turn to leave the pool room, the most powerful sight in the pool area grabs your attention. You glance up at the American Flag. Your heart pounds hard against your ribs. As you stare into the stars and stripes, you feel the rush of adrenaline flowing through your body. In your mind, a chorus of grade schoolers recite "The Pledge of Allegiance." A color slide show flashes up on the wall next to the flag with a photo for every pool and every place where swimming has taken you. The soundtrack--"The Star Spangled Banner."

A lump rises up in your throat as the song comes to an end and you step toward the pool door. You realize how important these last few minutes have been; how important the memories of your swimming times are to you and will always be. You can relive those times not only in your memory but in the stories you share with friends and family of your life in swimming. There are records to be broken, questions to be answered and dreams to fulfill.

A few questions may be left unanswered, but one thing is certain--the memories of the good times in this pool and UW-Stevens Point will not be forgotten. And the spirit of this place and all those who are a part of it will live on for a long time.

So let's celebrate those good times in the old pool and welcome the new....Good bye BATHTUB, the Health Enhancement Facility is finally here!

Ruggers bounce back, whip Platteville

by Matt Murphy
Sports Writer

the season.

The Stevens Point Rugby Football Club, coming off a disappointing effort at the hands of Oshkosh two weeks ago, tallied their first win of the spring season as they rolled past UW-Platteville, 22-8.

Point put their first possession to good use, as outside center Jay "Mutt" Seifelt scored on a pass from "Big" John McQuestion to give his team the early lead. From there, the first half remained fairly tight, yet the Black and Blood kept their opponent's back against the wall for most of the first forty minutes.

Platteville did manage to score a try midway through the opening period to tie things up, but that's the closest they would come as team captain Tim "shifty hips" Fedenko put Point up for good scoring his first try of

After a conversion by Todd "Hammer" Frederickson, the good guys went into the second half leading 10-4.

Point, lead by first year coach Mike Williams, ran away with the match in the second period tallying scores by Frederickson,

rookie winger Dave Madison, and, oh, an unidentified leaping gnome, who was so fast, is believed to still be running with the ball somewhere in Portage County, BEWARE!!

The Black and Blood, who will face an experienced Rugby Club, Saturday, April 14, in Milwaukee, improved its record to 1-1.

From page 12

said Page. "And even though we are hitting the ball fairly well, we just can't seem to get the hits at the right times."

In game two of their meeting with Oshkosh, the Lady Pointers had runners on second and third with one out in the seventh but were unable to get a run across the plate. Point lost the game 3-2 after being down by three going into the inning.

And in game one against St. Norbert, Point had runners on second and third with two out in the eighth inning but could not get the runners home, dropping a 4-3 decision.

"It's definitely frustrating," said Page. "We are hitting the ball hard, but we're hitting it right at the (opponent's) fielders."

Point, hitting .291 as a team before Wednesday's contest, is lead by Wendy Renk (.385), followed by Kelly Anklaam (.333), Tina Peters (.316), Heidi Singer (.314), Lisa Mortensen (.313), Becky Lundberg and Tammy Kuester (.311), and Denise Starke (.308).

Point will host Eau Claire on Tuesday and Platteville on Wednesday next week. Both meetings are scheduled to begin at 3 p.m.
