Mardi Gras Ball to be held Saturday

The second annual Mardi Gras Ball, featuring student and faculty jazz groups and a local rock band, will be held from 8 p.m. to midnight, Saturday, Feb. 3 at the University of Wisconsin-Stevens Point.

Tickets are available at the College of Fine Arts and Communication box office, Park Ridge Pharmacy, Plover Pharmacy, Graham-Lane Music and Jim Laabs Music. Cost of admission is \$12.50 for the public

and \$10 for students and senior citizens. Proceeds will benefit the music department's scholarship fund.

Performing in the University Center's Program Banquet Room (PBR) will be the Big Band Express, a student group directed by Mike Irish, the John Radd Trio, a faculty ensemble, and the Dixieland All-Stars, featuring faculty members John Radd, Don Greene, Robert Kase, Brian Martz and Robert

Rosen.

The Mid-Americans, a student vocal jazz group directed by Charles Reichl, will appear in a floor show at 10:30 p.m. in the PBR.

A faculty combo, John Radd and Friends, will play for listening in the Heritage Room, and in The Encore, Smile, a local rock band led by Skip Myers, will play for dancing and listening.

Dress will be semi-formal and Mardi Gras masks and

refreshments will be available for purchase.

Reichl calls the ball "a major social event of the spring season." The dance was originated last year to raise money for the jazz program's

European Tour and it was so well received, the department has decided to make it an annual event, Reichl says.

UWSP Graduate exams scheduled

The University of Wisconsin-Stevens Point will offer graduate exams in education on Saturday, March 17 from 8:30 a.m.-12:30 p.m. in Room 210 of the College of Professional Studies. The registration deadline is Monday, Feb. 26.

Students in the following programs may participate in the exams at this time: Master of Science in Education - Elementary Education, Master of Science in Education - General and Early Childhood; Exceptional Educational Needs. Students in the EC: EEN program

wishing to write either their candidacy or comprehensive exams, and students in the MEPD program who have elected the comprehensive exam option and have completed their 12 credit specialization may register for the exams at this time.

Further information and registration materials for the exams may be obtained by contacting the Education Advising Center, Room 470 College of Professional Studies, UW-SP, 346-4400.

UW System directed to cease creating new segregated fees

The state building commission has directed the UW-System to create a policy for providing program revenue for utility system costs at UW campuses that will not create any new segregated fees.

Student leaders have hailed this as a major victory and the first step towards stopping the use of segregated fees to pay for university projects. Segregated fees are monies paid by students that are above and beyond tuition and have no bearing on student financial aid levels. By passing the policy, the building commission also released a utility service project at UW-Whitewater that had been held up until this issue was resolved.

United Council President Jim Smith said that UW-System claimed to support the student position, but did nothing to help lobby the building commission. "If President Shaw had been there side by side with us, we could have stopped the use of any program revenues at all."

"They chose to be silent and left it up to us to stop the segregated fee," Smith added that student leaders will now negotiate with UW System administration to find the revenues to pay for the utility costs. "The bottom line is that we have a state directive that tells the university to quit dumping projects on the backs of student," he said.

Eric Bogerding, United Council

legislative director said that Governor Thompson played a big role in turning the tide in favor of students. "Once the Governor realized that the university was simply trying to implement a backdoor tuition policy, he supported our position to stop using segregated fees as a dumping grounds for projects."

Without the Governor's support, we'd be looking at a new segregated fee next semester," said Bogerding.

United Council's shared governance director Rob McGinnis said that the building commission has made a very clear statement to the university that the policy of using

Continued on page 10

UWSP Health Center fights STDs

Last semester, 12 to 15 percent of visits to the Health Center involved STD testing and treatment.

Sandra Ruston, a registered

nurse at the Student Health Center for the past 13 years said, "The fool proof way to protect yourself from an STD is to abstain from sexual activity.

The next best thing would be to know and talk to your partner about risks, such as their prior sex partners. When people are with new sex partners they should consider condoms, but because of breakage, they can't give 100% protection against pregnancy or STD's. We'd prefer that both people considering sexual activity get tested in the first place because often symptoms of STD's aren't visible until long after the infection occurred, or in many cases don't show up at all."

The most frequent diseases that are reported by UWSP students are genital warts and chlamydia. Genital warts, nationwide, are spread to 3 million people per year. Those 3 million people then, in turn, infect 90% of their new sexual partners. Genital warts can cause cancer. Chlamydia can cause infertility.

The Health Center provides UWSP students with tests for people who suspect that they have a STD or think they may have been exposed to one. Pap smears and urine tests are free. The chlamydia test is \$7.50. A herpes test is \$13. A test for syphilis is \$6.

The Health Center also offers free and anonymous AIDS testing. This is designed to protect those who are being tested for AIDS from being discriminated against in employment, housing, etc...in the future. All antibiotics used to treat STDs are free to students.

"We consider ourselves experts in STD's within the college community. We deal with them everyday. We won't pass judgment on people coming in with STD's. We want people to come in and get help," said Ruston.

To Ruston's knowledge, of

those individuals who were tested for AIDS at the Student Health Center, not one person has ever tested positive for the virus.

Student patrol lowers vandalism

by Steve Schmidt
Contributor

Incidents of vehicle theft and vandalism at UWSP parking lots has decreased since the 86-87 school year. In 1986-87 stolen CB radios and stereos along with broken windows and other forms of vandalism were an intense problem.

The university established a student security organization in the fall of 1988. This organization, consisting of UWSP students who have received security training, is helping to take a bite out of campus crime by patrolling the University area. According to Don Burling, director of Protective Services, the system seems to be working. There was a 36 per-

cent decrease in vandalism and theft during the 88-89 school year. Statistics are not yet available for this school year, but Burling perceives that the incidents of vehicle vandalism/theft have reached a leveling-off point. Burling stressed that parking lot crime cannot entirely be eliminated, but increased security is a vital key to controlling it.

Protective Services meets monthly with the Stevens Point Police Department to discuss campus crime as its deterrent.

Students can also help to reduce parking lot crime. Protective Services asks that you report any suspicious activity or damage or theft to vehicles.

SGA elections in sight

SGA announced this week that nomination papers for the 1990-91 term will be made available on February 5 at 9 a.m. at the Student Government office. The applications are for the positions of President/Vice-President as well as senatorial positions. The applications are to be completed by Feb. 16th.

Mike Roth, Executive Director of Student Government, said "There is more at stake in these elections than most people realize. Not only does SGA set a lot of student policy, but it also spends over \$600,000 a year on student groups such as UAB and the Fine Arts Programs."

UWSP enrollment plan gets feedback

by Greg Lavin
Contributor

In 1986, the Wisconsin University system enacted the Enrollment Management Plan (EMP), a four year plan designed to balance out the enrollment in the UW system to match the resources of each college.

David Eckholm, registrar for UW-Stevens Point was quoted as saying, "The purpose of EMP is to cut total enrollment of the UW system by 7,000 Full Time Equivalent (FTE) students by the end of the 1990 academic school year. This would prevent over crowding at some universities and better utilize the UW-Center program at community colleges, that have not been used to their potential in the past."

Eckholm also said EMP is a three pronged approach dealing with tuition, General Purpose Revenue (GPR), and enrollment. In 1986, Stevens Point started a series of tuition hikes that would be noticeable but not overbearing for the students. Implement plans to gain more GPR dollars from the federal government to compensate for loss of revenue due to smaller enrollment, have also begun.

With the completion of EMP at the end of the spring semester of 1991 there is going to be three by products resulting from the plan. These are better manage-

ment of the university system, the quality of students entering the UW system, and to put pressure on the secondary educational program to better educate today's students.

When asked how the program was working in conjunction with UW-Stevens Point Eckholm said, "After the completion of the 1989 fall semester we have suspended a total of 235 students. This is 2.9% of the total enrollment and the lowest suspension rate since 1978. What makes this figure outstanding is the implementation of the highest academic standard here than ever before."

In the 1986 the student enrollment reached a peak of 9,554 full time students and by 1989 the total number of students has dropped to 8,650; almost a 1000 student drop in three years. Eckholm also said this number is expected to dip below 8,000 by the fall of 1990, which would meet this university's goal set in 1986.

The reduction of enrollment has taken place in three major areas, the first of which was enrollment. Since 1987 the university has limited enrollment of entering freshman to 1,700 students per academic year. The second area is transfer students. Before 1988 the university would allow up to 640 students per year, however in 1988 the University allowed

Student announces candidacy for city council

by Mary Kaye Smith
Features Editor

The Student Government Association's Source Director has announced his candidacy for the aldermanic seat of Stevens Point's 2nd Ward.

Scott Maline, a sophomore accounting major, has decided to run in order, "to improve the relationship between the students and the community."

Maline said, "There is so much resentment against (the) students that it's absurd. They are not respected whatsoever... We pump in almost two million dollars a year into this community, their economy. I think it's unfair for them not to consider the student opinion in some of the decisions they make in city hall."

If elected, Maline says his primary concern would be that of the community. To generate a platform which will address the concerns of his district, he plans to canvas and make random phone surveys. He promises to "represent the student view when the issue comes up."

Although Malines' opponent, Nancy Basch, has resided in Stevens Point longer and has worked for Democratic

campaigns within the city, he feels his experience with SGA will make his candidacy successful. "I know politics," said Maline. "I know how they work... And I can get things done. I did it here for student government... And I can take that to the city level and make it work."

Maline is determined to succeed in the April election. He said, "I'm gonna tough it out."

I'm gonna hang in there...the race isn't always won by the swift but to those who keep on running. I'm gonna pound the pavement until I'm blue in the face, if I have to. I'm gonna get my message across that there is an opportunity there for us to improve relations. There is a door that we have to go through to get there. And that door is electing a student to city council."

Scott Maline and Dan Grosskopf take time out to catch up on current events (Photo by Annie Arnold.)

ROTC is only one of many SGA problems

by Blair Cleary
Editor-in-Chief

Last Tuesday Student Government held a special session to deal with their recently passed ROTC resolution.

This meeting was prompted in part by a meeting here last weekend of the United Council, the state student lobby group. Each University of Wisconsin sends a delegation to the United Council and they, along with the United Council's executive board, come up with policy they try to lobby for on both the state and national level.

Last weekend as the United Council met, they discussed and passed a resolution supporting the action of the UW Madison's faculty in urging the Board of Regents to terminate the Reserve Officer's Training Corps if they haven't stopped discriminating against gays, lesbians, and bisexuals by May of 1993.

A potential snag in the United Council resolution was the fact that six weeks before the UC meeting, the Stevens Point Student Government passed a resolution supporting the opportunities ROTC gave to students,

despite the discrimination, as well as condemning the UW-Madison faculty for trying to get rid of it.

Now suddenly, the week after the United Council meeting, SGA is pulling special sessions to revamp their resolution. Brenda Leahy, SGA president, told me that the reason for this was that the United Council found errors in some of the facts the resolution stated. I asked her what specific facts and it turned out that these "errors" they found were just differences in interpretation of facts.

It seems to me, and I'll admit I'm no great political analyst, that the United Council is just trying to bully a maverick member university back into line with the party. I'll admit I have no "taped proof" or anything like that, but I do find it a strange coincidence that SGA's leadership is trying to get the senate to redo its position on an issue it is in disagreement with the United Council over so soon after a meeting with the United Council.

To be fair, I did ask President Leahy if the United Council had anything to do with the sudden decision to change the resolution and she said that the United

Council only pointed out inaccurate facts and brought no pressure upon them. Other sources in SGA gave other stories but would not confirm or deny anything, which makes me media types all the more suspicious.

In any event, the resolution passed by SGA Tuesday was very similar to the one they passed six weeks ago; with some cosmetic changes.

I think that SGA has more problems than just United Council, though.

A potentially bigger problem is the number of senators that left the senate at winter break

Mounted grizzly donated to museum

(Photo by Lisa Stubler)

A mounted grizzly bear, with a value of at least \$3,000 has been donated to the Museum of Natural History at the University of Wisconsin Stevens Point.

The gift, from Carl "Sonny" Gollon, 1141 N. Wausau Rd., is the focal point of a new museum display about the alpine meadow.

Gollon killed the animal during his "first and last" trip to the Yukon about three years ago. He was part of a three-member hunting party that traveled on horse with a guide more than 20 miles from a remote outpost.

"It was a once in a lifetime experience, but I'd never do it again. It was too tough," recalls the 58-year-old Gollon.

The bear was a 7 1/2-year-old dry sow, and Gollon learned after shooting it that he took aim when the animal was not in a good position to be killed. Bullets, the hunter learned from the guide, do not penetrate a body when such a beast stands upright.

Gollon used a .300 caliber Winchester rifle.

The longtime operator of a bait store here, Gollon has been a hunter since his boyhood and traveled to western states numerous times. In the

Canadian territory, however, he had one of his most successful trips by downing a caribou and moose as well as the bear.

It was an expensive trip.

For the bear alone, his license was \$100, topped by a trophy fee of \$750. The taxidermist's bill was \$500. Then there was the travel cost. The museum's director, Ed Marks said he believes the bear's value easily surpasses \$3,000.

"This is the kind of thing we could never afford to buy," the director explained, adding: "Our donors are very important to our success, but we hope they enjoy being able to come back and see what they have donated and to know people for many years to come will be appreciating it."

Marks has used the grizzly in the museum's first major diorama depicting an alpine meadow in the Rocky Mountains. The background is painted and the foreground includes mounted creatures found in such an environment, including a pocket gopher, lynx, weasel and bear.

Outside the display is an interactive unit in which museum visitors can test their knowledge of life in such a place.

Volunteer positions available

The Student Conservation Association (SCA) will be offering over 1,000 conservation and resource management volunteer positions for high school students, college students and older adults during 1990. Opportunities are available throughout the year.

Individuals selected for SCA programs will contribute from 3-12 weeks of their time to the protection and management of over 200 National Park Service, U.S. Forest Service, U.S. Fish And Wildlife Service, and other federal and state resource agencies across America.

SCA is currently accepting applications for positions to be offered during the 1990 summer/fall season.

Anyone interested in participating or learning more about SCA programs should contact:

ECO-BRIEFS

by Timothy Byers
Staff Writer

What do you think about advertising for four wheel drive and off road vehicles in conservation or environmental magazines such as *Sierra* or *Audubon*? Some readers of these magazines apparently don't think much of it. Over the last couple of years there have been many letters to the editor complaining about ads for such products in those publications. The writers complain about tearing up the landscape and posing the question of ethics over money (from ads). *Audubon* has decided not to accept these ads while *Sierra* explains that many households that subscribe to *Sierra* own such vehicles. It's not the machine, it's the user that destroys they say. Haven't we heard that about gun control?

As citizens we have rights to know about most things. This country's right-to-know laws are good, but you need to know how to use them. Chicago's Citizens for a Better Environment and Lung Association have teamed up to inform citizens about the laws and their rights. They have targeted the heavily-polluted southeast side. At issue is the EPA's company-by-company, state-by-state Toxic Release

Inventory, a document that lists releases of toxic materials by industry into the environment. This document is available from state environmental agencies, EPA regional offices, or from federal depository libraries (UW-SP's is one such).

Brazil's Carnaval is a celebration in the days before Lent. Bright costumes and gaudy floats highlight activities. Last year one of the groups participating used a "Green" theme in their floats. They spotlighted environmental abuses such as illegal animal skin sales, the U.S. Strategic Defense Initiative, and the dangers of radioactive waste. Organizers say they will not turn the event into a protest march, but they do say they have a message, "harmony between technological development and ecological preservation." This year a float honoring Chico Mendes, an assassinated rain forest preservation activist, is planned.

Pathology labs are usually associated with crime fighting. One new lab in Ashland, Oregon is dedicated to fighting crime but not crimes against humans. This lab is run by the U. S. Fish and Wildlife Service and specializes in identifying parts of

animals that may have been killed illegally or smuggled into the country. They have a wide assortment of lab equipment and have amassed a large stock of illegal animal parts. This is testament to the thriving trade in ivory, body parts, and smuggling. Plans are to expand the lab to help with international cases in the near future.

Many people are touting reduced use of chemicals on farms. They cite health risks, more resistant insects, and rising costs for energy and money intensive chemical methods. An alternative is Integrated Pest Management (IPM). IPM uses the natural balances of nature to control harmful pests. Examples are ladybugs or mantises eating leafhoppers or spider mites. Studies show that crop yields can be comparable to chemical farms with reduced risks and higher prices for the premium product. Supporters say IPM is a more finely-tuned and economical method than mass spraying and that it restores natural balances to farmlands.

Gold has always sparked the imagination and fueled ambitious dreams of wealth. In the American west this activity has taken a heavy toll since the days of the Spaniards. Today's threat is

from heap-leach mining. This method extracts gold in concentrations fewer than .03 ounces per ton of rock. The rock is excavated, piled in huge heaps and cyanide solutions are trickled through. The solution precipitates the gold but also leaves a residue of contaminated water in ponds and streams. The massive pits created do not have to be filled in after mining either leaving scars on the land. The proposed Desert Protection Act (S.11 and H.R. 780) aims to protect these lands but time is running out.

Amory Lovins is a man who has made promoting energy efficiency his life's work. When he first began writing and lecturing 20 years ago the idea of conserving energy was not accepted widely. It still isn't officially accepted but many of the things Amory has been telling us are coming to pass. High energy costs and scarcer supplies have forced us to insulate, dial down, and control our energy use. Still, the U.S. burns as much oil as the Exxon Valdez spilled in Alaska, 17 million gallons, every 20 minutes! Lovins says we don't need new plants or bigger technologies, we just need to make them more efficient. As we head into the 90s it becomes more and more imperative to adopt these ideas.

The Anchorage Times is one of the two major daily newspapers in Alaska. It is being sold to Veco International Inc., an oil services company that has contributed to political campaigns and that has promoted oil industry causes. Critics claim that this sale, which will merge the press and oil, two of Alaska's biggest industries, is a blow to reliable public information. Veco says that there will be no change in coverage, but it is hard to not see conflict of interest problems in this case.

Safe water is a commodity that is getting harder and harder to be sure you are receiving. Even where supplies are provided by municipal systems the consumer has to be concerned. To fill the need for clean water in the home no fewer than 400 manufacturers are building products that you can install in the home to purify your water. They will sell more than \$1 billion in merchandise this year. Most of their sales pitches prey on ignorance and fear so be careful. Consult local authorities and have a water test done on your supply before purchasing expensive and complicated systems.

And you think you have had a rough winter? (Photo by Annie Arnold)

A chilling experience

by Mary M. Callender
contributor

Over our Christmas break I took a trip to northern Minnesota to visit a camp where I've spent many summers. I'd never seen it in the winter time, and it offered a whole range of new opportunities. Besides the cross country skiing and snowshoeing, we tried another winter activity that I'd never participated in.

Camp has a great woodburning sauna down at the waterfront. This was a summer activity I often participated in, but we lacked a thawed lake to cool off in this time of year. Little Boy Lake may have been frozen two and a half feet solid, but that didn't stop us from cutting a square hole with about a ten foot perimeter. Chainsaws and long poles helped us to chop through the thickness.

All day long I told myself I would not jump into that hole. I thought my friends were truly insane. 8:30 p.m. on December 29 found me standing beneath a

starry sky in front of a dark wet hole in zero degree weather. It all happened very quickly. I held the hands of two people on either side of me, they said "Go!", dunked me in over my head, and pulled me back onto the ice faster than I could think about it. I raced for the warmth of the sauna.

It's very exhilarating. You think your heart will stop from the shock, but it happens so fast there isn't time. Wearing wool socks is a definite must. They hold the heat in and most of the moisture out. But, their most important function is to keep your feet from sticking to the ice.

Despite the fact that my hair froze, my hand stuck to the metal sauna doorknob, and I cut my shin on the edge of the ice, this is something I will definitely do again. If you enjoy saunas, and ever get the chance to experience this, it's something you don't want to pass up. Make sure you get pictures. People probably won't believe you did something this crazy.

Museum of Natural History receives mineral collection

A new permanent display of minerals is open for public viewing in the University of Wisconsin Stevens Point's Museum of Natural History, thanks to a gift from a collector.

Retired businessman George Haertel, 3500 Main St., is the donor of more than 1,400 mineral specimens from all parts of the United States and several foreign countries.

UWSP geologist Marshall Parry said it is difficult to place a monetary value on the minerals, but estimated their worth in the "thousands of dollars."

"We're dealing with a very respectable private collection," he added.

About 150 of the most spectacular specimens are featured in the newly built and lighted display at the entrance to the museum.

This is the "premier display" for a series of geological exhibits that will eventually be developed here, utilizing the Haertel collection according to Ed Marks, museum director.

"We hope such displays will begin to turn people on to rocks and minerals, which are not always regarded as exciting," Marks observed.

Meanwhile, most of the specimens gathered by Haertel remain in two large oak cabinets that he had built specially for his hobby. Contents have been identified by class such as oxides, carbonates, sulfides, silicates, native elements and so on. Most of the specimens have been mounted on clear plexiglass plates and identified by name, source and chemical class. They fill 33 drawers in the cabinets, which are now maintained by the Department of Geography and Geology.

Parry said the gift, beyond its value for display purposes will

be useful as a reference resource.

It is difficult and expensive, according to Parry, to secure similar specimens from firms that supply such items. Thirty-five specimens were rated by the professor as rare or very rare, including Aikinite from Ontario, which can only be found in museums now.

Haertel began his collection as a boy, during extended trips with his parents. He has continued to be an avid traveler, largely in pursuit of minerals, all of his life.

He succeeded his father in the management of Haertel Monuments here.

"I've always liked the looks of minerals, and I guess that's what always made me interested in them," Haertel observed.

Colorado has been his favorite state to explore for minerals, though he recalls finding more specimens in Montana and Wyoming.

Piles of newly uncovered ore near entrances to mines are productive places to find specimens, and the actual miners can be particularly helpful to collectors, Haertel said.

One of his most memorable outings was in Lander, Wyo., which is noted for large deposits of jade. On that trip, however, he learned that in some places, rockhounds are not always welcome. The person who gave him directions on a place to hunt for jade sent him on a wild-goose chase into a desolate area where he only found a small, worthless piece of the mineral.

Some of his rarest specimens were acquired through trades with a miner, and Haertel recalls always having "good luck" buying specimens from dealers who advertised in rock and mineral magazines.

The collector contends that he has no favorites. But he concedes that some have more interesting histories than others. For example, Haertel is fascinated by the pieces of float copper that he found. A glacier carried these specimens into Wisconsin and gave them a circular shape in the process.

He also likes to call attention to meteorite of nickel and iron from Australia, Muscovite mica from North Carolina, semiprecious stones in the rough, many specimens coated with different kinds of ornate crystals, quartz crystals from Arkansas and pseudomorphous minerals, which have false forms. There are about 25 different kinds of wood in petrified form.

Haertel said he liked the opportunity to put the collection in a place where it would have public use and a permanent home.

He has special connection with UWSP, having spent his freshman year on campus in the 1920s when it was a state normal school. He went on to earn a degree from the University of Minnesota.

State program sets national example

Tom Bashaw, Wastewater Supervisor for the DNR's North Central District, recently spoke in Seattle, Wash., to describe Wisconsin's Compliance Maintenance Program to Region 6 of the Environmental Protection Agency (EPA).

The trip was sponsored by the EPA, which would like to develop a nationwide Compliance Maintenance program similar to Wisconsin's.

The Wisconsin Compliance Maintenance program is simply a concept of maintaining and rebuilding wastewater treatment plants before violations which cause water quality problems occur. Historically, treatment plant upgrading was only undertaken after the old plant was in disrepair and water quality problems were significant.

During the last decade over \$2.5 billion in federal, state, and local money was spent in Wisconsin to upgrade wastewater facilities to achieve the water quality standards established in the 1972 Federal Clean Water Act. Because of this massive construction program, over 90 percent of Wisconsin

municipalities are now in compliance with their discharge permits. The Compliance Maintenance Program is intended to protect that investment and to insure that action is taken before violations of permit limits and water quality degradation occurs.

"The unique thing about Wisconsin's Compliance Maintenance Program is that it was developed not solely by DNR, but by a 19-member technical advisory committee formed after statewide meetings with municipal representatives," said Bashaw. Bashaw was one of two DNR members on the advisory committee which had representation from the League of Municipalities, environmental groups, consulting engineers, municipal officials, the Wisconsin Wastewater Operators Association, the Attorney General's Office, and a Regional Planning Commission. Members of the technical advisory committee from the North Central district included Scott Hager, Rhineland; Joe Gehin, Wausau, representing the Wisconsin Wastewater Works Operators Conference;

George Bauman, former Village Administrator of Plover; and Mike Hess, Laona Sanitary District.

Compliance Maintenance has gained broad acceptance across the state because the overall goal of preventing violations and water quality problems is a goal shared by most residents. Cooperation and support for the program was provided from people in the wastewater field on up to the governor.

In order to insure the success of Compliance Maintenance, a major change had to occur in how municipalities received financial assistance to correct failing wastewater treatment plants. In the past, State and Federal money was available only when the treatment plant had serious violations of its wastewater discharge permit. This did nothing to prevent violations. To aid in the implementation of Compliance Maintenance, the Legislature and governor passed the Clean Water Fund, which financially rewards communities which

Decade Rewind: UW-SP student recalls the '80's

by Aly G. Xiong
Features Contributor

It's hard to imagine how we got along before we had the '80s.

Take the whole area of modern technology (by which I mean "Japan"), which gave us such advances as the cellular telephone, which enables businesspersons to talk while driving badly; and the fax machine, which enables us to send and receive documents and takeout menus faster and less legibly than we would ever have dreamed of before. Admittedly, this is part of the ongoing plot by our foreign competitors to reduce the once mighty American industrial engine to a giant encounter group for obsessive paperfunders, but we can't stop ourselves, because fax machines have gotten so darned cheap you can't afford NOT to have one, you know?

This is also why everybody in the '80s except the actual homeless bought a VCR, a device that has revolutionized our amusement habits by enabling us to enjoy rental movie classics that we might never otherwise have seen, such as "Nightmare of the Revenge of the National Lampoon Police Academy Nerds on Halloween XIV," in the comfort of our own homes, lying on our own sofas, eating our own taco chips and falling asleep after maybe an hour with our own drool dribbling onto our own shirts.

And speaking of video advances, let's not forget the camcorder. Suddenly, if you were a new parent (which was very big in the '80s) it was possible for you to follow your child (who, in the '80s, was named Jason, Jennifer, Justin, Ashley, Derrick or Courtney) all over Disney World carrying a chunk of technology that, thanks to solid state electronics, weighed no more than an ordinary household lawn mower, yet was capable of making videotapes that would give you countless hours of enjoyment if you ever actually watched them. Which of course you never did, because there was never enough time for anything in the '80s.

Ronald Reagan is a name that for some reason springs to mind here, no doubt because he was one of the defining figures of the '80s, along with Mikhail Gorbachev, Donald Trump and Madonna. But Reagan stood above them all. Wisely electing to delegate to underlings the "detail work" such as running the government and remembering exactly what year it was, he chose instead to concentrate on the task of restoring something that had been sorely missing under Jimmy Carter: height.

Which was a quality that was unfortunately beyond the reach of another politically influential '80s figure, Sylvester Stallone, although you definitely had to give him credit for width, and for helping to restore the

nation's self-esteem by using a nuclear-powered crossbow and God knows how many gallons of steroids to finally win the Vietnam War in "Rambo Part Three or Possibly Four."

Speaking of God, religion came back strong in the '80s, especially on television with various leading religious figures raising millions of dollars for the Lord, although it is not clear what the Lord's actual net income was after money was deducted for various evangelical expenses such as studios,

satellite time, salaries, bonuses, houses, cars, additional bonuses, theme parks, motel rooms and of course mascara by the 55-gallon drum.

Speaking of fashion, the '80s saw a shocking increase in "denim abuse" caused by the sharp dressers paying large dollars for jeans that had been attacked repeatedly with dull fashion implements, so that at upscale gatherings you'd see many sectors of leg and butt and

Meatball Radio returns Saturday

by Gina Briesath
Features Contributor

Meatball radio will begin its second semester on 90FM-WWSP this Saturday, Feb. 3, at 6 p.m. This original comedy show is written, produced and performed by the 90 FM staff.

Some of the skits on Meatball Radio are take-offs from television programs, titles include "Twenty-Something", "Meatball Court", "The Angry Chef" and "The No-Balls Sports Network."

"Meatball Radio is... not a messy cream or ointment..."
--Uncle Daddy Marcus

The idea of Meatball Radio came from 90FM disc jockey, Uncle Daddy Marcus, who commented "Meatball Radio is an expressive outlet for these over-achieving radi-youngsters, not a messy cream or ointment."

Meatball Radio has indeed proven to be an outlet and a doo opener for student comedians Bob Holmsen, ex-station manager of 90FM went on to win first place and \$5,000 at the Merit Laugh Off in Milwaukee last November.

Meatball Radio can be heard every Saturday night at 6 p.m. on 90FM WWSP.

Student Norm returns to Pointer

by Brandon Peterson
Graphics, Layout, and Ad Design Editor

On February 8 a new comic strip will be appearing in the Pointer, but not for the first time. Over 16 years ago, a student artist known as Taurus S. first introduced a strip known as "The Student Norm" on October 13th, 1973. The strip and its characters enjoyed a long lasting success in the pages of the Pointer for over two and a half

years, with a total of 52 strips in all.

The strip centered around Norman S. Lump, a junior from Oshboyan, Wisconsin. Norm was a character who was sympathetic as he was a complete sheep, grazing through life hoping not to get his back stepped on. Many other individuals also inhabited Norm's satirical UWSP campus; Roomie, his "perfect" roommate, Riley, the wise-cracking punster freshman, and Buster

the ultimate ladies man.

Taurus S., still living in the Stevens Point area, says that his characters weren't patterned after anyone on campus in particular, and that most of the incidents the characters encountered were from stories overheard at the University Center. He says his cartoons were appealing to people as even though they were simple to him, many people read alot more into them. Taurus S. also did numerous comic books

promoting the university, including one about The Student Norm and two about the popular UWSP mascot, Stevie Pointer. Taurus S. also did other strips for the Pointer, but the Student Norm still remains his favorite.

Currently Taurus S. draws comics professionally for the top two companies in the field, Marvel and DC comics, producers of the characters Spiderman and Batman respectively, as well as numerous

smaller publishers.

The reason for the revival of the Student Norm is two part. One is the fact that people have expressed interest that the Pointer start including a weekly strip, and another is that the character holds special value in that it was the first comic strip ever printed in the Pointer. So look in the Pointer February 8th, and see a bit of UWSP history reborn.

The first episode of the Student Norm by Taurus S. proves some things never change.

James Madison U.

Biased questions on the Scholastic Aptitude Test may limit everything from scholarships to job opportunities for women, a spokesperson for a national test critic group claims.

"Girls do better in high school and college, yet score lower (than men) on the SAT," said Sarah Stockwell of FairTest, a Cambridge, Mass., watchdog group that monitors standardized tests.

The claim comes on the heels of several other complaints about possible gender bias in the SAT, a test which is administered to most college applicants nationwide. However, representatives from Educational Testing Service, the organization which sponsors the SAT, denied the claims and said other studies have shown an absence of bias.

The bias shows up in the number of National Merit Scholarships given to high school seniors each spring, Stockwell said: Semifinalists for the scholarships are chosen solely on the scores of their Preliminary SATs, a shorter, slightly easier version of the SAT.

Of the 15,467 National Merit semifinalists announced this fall, FairTest reported 58 percent were male and 36 percent were female. The remaining students' genders could not be determined from their names.

In college . . . with children

By Stacy Smith

■ University Daily Kansan

U. of Kansas

When U. of Kansas senior David Harger thinks back to the fall finals period of his sophomore year, he can laugh about the C on his transcript which broke his perfect 4.0 grade point average.

The C doesn't bother Harger much when he looks at his 22-month-old daughter, Dene, and remembers the day she was born — the morning before his statistics final.

"It's kind of fun explaining why the C is there," he said. "When I interview for internships and mention it, people are in shock when I tell them. It's kind of an icebreaker."

Harger is one of 2,221 U. of Kansas students with children, 992 of whom are undergraduate students, according to fall '88 records from the office of institutional research and planning.

For the past year, Harger, 21, has been a single parent with joint custody of his daughter. Dene spends two weeks with him and then the next two weeks with her mother.

Although balancing the roles of student and parent are not easy, Harger has done both while maintaining a GPA above 3.5 in accounting and economics. He plans to attend law school after he graduates in the spring.

"It's really hard, because you've got a baby that stays up until 9 or 10 at night and you can't do homework," he said.

Study: Many seniors lack basic knowledge

By Janice Simon

■ The Cameron Collegian

Cameron U.

and Wendy Bounds

■ The Daily Tar Heel

U. of North Carolina

One out of four college seniors surveyed in a recent Gallup Poll could not name the century in which Christopher Columbus landed in the New World.

The survey, commissioned by the National Endowment for the Humanities, provides dismaying evidence that students are not learning much of what an educated person should know, according to an NEH spokesman.

The results also said that 58 percent of the seniors surveyed didn't know Shakespeare wrote "The Tempest," and 55 percent couldn't identify the Magna Carta. Twenty-three percent said Karl Marx's phrase, "From each according to his ability, to each according to his need," is part of the U.S. Constitution.

"The survey results prove colleges need to revise their curricula so that undergrads get a broad education," said NEH chairwoman Lynne Cheney.

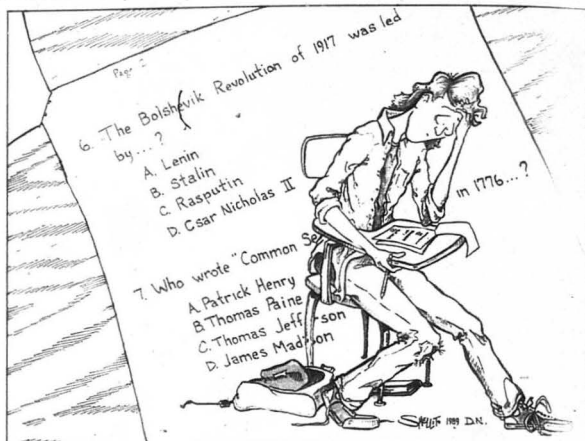

Cheney also released a NEH report urging that all students be required to take 50 credit hours of humanities courses to graduate.

According to the report, "Students who approach the end of their college years without knowing the basic landmarks of history and thought are unlikely to have reflected on their meaning. A required course of studies — a core of learning — can ensure that students have opportunities to know the literature, philosophy, institutions and art of our own and other cultures."

The survey tested 696 college seniors from 67 universities across the United States. The test consisted of 87 questions on a variety of concepts and landmarks NEH felt are common knowledge. Seventy-one percent of those surveyed came from public schools and 29 percent from private institutions. Ninety-three percent of the students were non-humanities majors.

According to the NEH report, more than one-third of the 87 questions were originally designed so high school 17-year-olds could answer a majority of them. Five questions also came from the U.S. Immigration and Naturalization Service test administered to prospective American citizens.

If the test results were graded, 55 percent of the students would have received a grade of F and another 20 percent a D. Only 11 percent would have received an A or B grade.

BRIAN SHELLITO, DAILY NEBRASKAN, U. OF NEBRASKA

However, 64 percent of the seniors surveyed knew the Emancipation Proclamation issued by President Abraham Lincoln abolished slavery in the Union. Eighty-four percent knew Sen. Joseph R. McCarthy and the controversy surrounding him focused on "investigations of individuals suspected of Communist activities."

The validity of the test and NEH's policy recommendations have been questioned by some educators and students. "I'm not sure even if the students are taught these facts, that they will remember them," said Richard White, dean of arts and sciences at Trinity College. "I might have trouble with some of those questions myself."

Thomas Goldstein, executive director of the American Association of University Students, a group representing college student governments, said, "The test itself is circumspect. Do I have to know these things to be a good citizen?"

Cheney's report suggests a strict core curriculum concentrating in five main areas: cultures and civilizations, foreign language, mathematics, natural sciences, and social sciences. Colleges adopting the program would require specific courses for freshmen, sophomores and some juniors.

Cheney recommended the classes be taught in small classes by a school's most distinguished faculty.

SAT

Continued from page 1

The bias may stem from questions on the SAT, particularly those using examples that are familiar to only one group, Stockwell said.

For example, a question on the SAT might ask students to compare "mercenary: soldier" to other pairs and find a pair with the same relationship. Because men may be more comfortable than women with a question about soldiers, that question favors men by 16 percent, according to FairTest.

Statistics released by the College Board indicate that the average combined SAT score achieved by women in 1988 was 875. The total average for both

sexes combined was 934. A combined score of 1,600 is perfect.

"There are score differences between men and women on the SAT," said Nancy Burton, program director for the admissions testing program of ETS. However, she said the differences do not stem from a bias in test questions but rather from the different educations men and women receive.

Men tend to take science and math classes, she said, and women take liberal arts classes.

Burton also said each SAT question is checked for bias five times before it becomes part of one of the nine new SATs created each year.

A representative of the College Board, the group that sponsors the SAT, also said many questions that may seem

biased — because of the examples they use — are not biased at all.

In questions on ratio, for example, men and women score equally well on a question that involved a cooking recipe and a question on jogging.

To examine the difference in men's and women's scores, ETS and Rutgers U. are conducting a study of the SAT to determine if the test accurately predicts academic potential. However, Ray Nicosia, manager of media relations for ETS, said the test is not a direct response to concerns about gender difference in SAT scores.

The SAT is always being looked at for a variety of different reasons, and ETS does work with a variety of college and universities on these studies," he said. "These studies are ongoing."

Student sanctioned

A U. of Mississippi student suspected of plagiarizing information from Seventeen magazine for an article that appeared in *The Daily Mississippian* and the October 1988 *U. The National College Newspaper* has received unspecified sanctions from the university.

The Administrative Discipline Committee sanctioned the student after a blue-ribbon committee of professional journalists and others determined that portions of her article were plagiarized, said Assistant Vice Chancellor for Student Affairs Jerry Lee Westbrook.

FBI releases crime data; schools question accuracy

By Jeff Perrine

■ The Daily Lobo

U. of New Mexico

If recent FBI reports are accurate, the U. of New Mexico is the most dangerous place to attend college and Michigan's Macomb Community College is the safest. But police from both schools question the report's accuracy, and the FBI admits that only a small percentage of schools nationwide provided information for the report.

At the U. of New Mexico, 53 violent crimes were reported to the FBI for 1988,

the highest number nationwide. But according to UNM Police Chief Barry Cox, the actual number of violent crimes at UNM should have been 20. A campus police staff member sent in the wrong data, said Cox, who has sent a letter to the Justice Department asking for a correction. "They were counting simple assaults, not aggravated assaults," he said. Aggravated assaults, but not simple assaults, are classified as violent crimes.

Macomb Community College, located in Detroit's suburbs, reported only one

Brought to you by:
SMITH CORONA

ILLINOIS

Armed unrobbery . . . Joseph Mulcahey, a first-year law student at the U. of Illinois, was arrested and put in jail overnight after trying to withdraw \$15 from his bank account. Mulcahey said he unknowingly used a withdrawal slip that had a holdup note written on it. The note said, "Give me \$10,000, I have a gun." Fifteen minutes later, about 10 police officers arrested Mulcahey for attempted armed robbery. They handcuffed, fingerprinted and photographed him, and transferred him to the county jail where he spent the night. He was released the next day after bank security officers reviewed a tape of the "holdup," checked Mulcahey's background and determined the incident was a hoax and Mulcahey was innocent. ■ Julie M. Anthony, *The Daily Northwestern*, Northwestern U.

INDIANA

Student receives 20-year drug sentence . . . A Northwestern U. junior was sentenced to 20 years in prison for dealing cocaine this fall. The student was charged with two counts of conspiracy to deal cocaine and one count of dealing more than three grams of cocaine. Defense lawyers pointed out his previously clean police record, but Judge William MaHanna sentenced him to a total of 60 years in prison, 20 years for each of the three counts. However, because of his age and background, he will be allowed to serve the sentences concurrently. MaHanna said, "One thing to learn from this is that the penalty for such crimes is severe." The student is appealing the sentence. ■ Rob Swanson, *Purdue Exponent*, Purdue U.

KANSAS

A secure way home . . . The U. of Kansas offers inebriated or vulnerable students a way home through a taxi service, Secure Cab. The ride is free with a student I.D. and is available from 11

p.m. to 2:30 a.m. seven days a week. On-campus calls receive priority, said KU Student Coordinator Charles Bryan. Bryan said the group takes precautions to avoid abuse of the program. He said students are asked for an I.D. number and drop-off address to avoid abuse. "The purpose of Secure Cab is to give people who are in trouble a ride home," he said. "We're there when they had one beer too many or their friends left them at a bar or they are on campus and think someone is following them. People still need to be responsible for their own transportation." ■ Beth Behrens, *The University Daily Kansan*, U. of Kansas

KENTUCKY

Who ordered the pizza? . . . U. of Kentucky business students standing in the add-drop line received a surprise when free pizzas and sodas were delivered. College of Business Alumni Affairs Director Ralph Brown ordered lunch for about 200 students after he realized how slowly the line was moving. "While it wasn't our fault, it was our responsibility to take care of the students," he said. Senior Tracy Harris, who waited in line four hours, said, "I thought it was really considerate of them to bring food and drinks to us. Sometimes campus feels so big, and it made you feel like someone was thinking about you." ■ Cynthia Lewis, *Kentucky Kernel*, U. of Kentucky

NORTH CAROLINA

Milk crate misdemeanor . . . As of last month, North Carolina students and residents using plastic crates for storage or furniture may be fined \$300 and/or sentenced to six months in jail. The unauthorized possession of plastic milk crates from North Carolina dairies was made illegal after the Carolina/Virginia Dairy Products Association realized the two states lose nearly 1 million crates each year at a cost of about \$2 million. Executive Director Barbara Short said the association launched a publicity campaign encouraging students to return the crates to groceries and dairies, guaranteeing amnesty through Dec. 1. ■ Julie Gammill, *The Daily Tar Heel*, U. of North Carolina, Chapel Hill

PENNSYLVANIA

Police thwart planned flag burning . . . Political protest took the form of symbolic art last November at Carnegie Mellon U. when an art student Jessica Caplan's performance art flag burning ceremony was stopped. Caplan planned to hang kerosene-soaked flags from 8 countries, including the U.S., soil them, wash them and burn them together in a metal basin. The ashes would have been placed together in a hollow model of the earth. Assistant Dean of Student Affairs Ron Campana had campus police stop the protest for safety reasons. Caplan said politics were the issue. I did discuss in depth with (Facility Safety Analyst for the university) Bob Anderegg what I was going to do. We discussed my burning pieces of 100 percent cotton soaked in an accelerant; he said he'd supply the extinguishers and that it was a "go," she said. "The only thing I left out was what patterns were on the material." ■ Farron W. Levy, *The Daily Tartan*, Carnegie Mellon U.

To get 12 cassettes for a penny!

plus shipping and handling

...just join our music club now. It's your best guide to today's best music—and a great deal, too! To get any 12 cassettes from your favorite artists, just fill in and mail the application together with your check or money order for \$186 as payment (that's 1¢ for your first 12 selections, plus \$186 to cover shipping and handling). In exchange, you simply agree to buy 8 more cassettes (at regular Club prices) in the next three years—and you may cancel membership anytime after doing so.

How the Club operates: Every four weeks (13 times a year) you'll receive the Club's music magazine, which describes the Selection of the Month for each musical interest...plus hundreds of alternates from every field of music. In addition, up to six times a year you may receive offers of Special Selections, usually at a discount off regular Club prices, for a total of up to 19 buying opportunities.

If you wish to receive the Selection of the Month or the Special Selection, you need do nothing—it will be shipped automatically. If you prefer an alternate selection, or none at all, simply fill in the response card always provided and mail it by the date specified. You will always have at least 10 days to make your decision. If you ever receive any Selection without having had at least 10 days to decide, you may return it at our expense.

The cassettes you order during your membership will be billed at regular Club prices, which currently are \$7.98 to \$9.98—plus shipping and handling. (Multi-unit sets, special and classical selections may be somewhat higher.) And if you continue as a member after completing your enrollment agreement, you'll be eligible for our generous "buy one—get one free" money-saving bonus plan!

10-Day Risk-Free Trial: We'll send details of the Club's operation with your introductory shipment. If you are not satisfied for any reason whatsoever, just return everything within 10 days for a full refund and you will have no further obligation. So act now!

Order your first selection now at a big discount—and get 2 extra cassettes FREE! You may also choose your first selection right now—we'll give it to you for up to 60% off regular Club prices—only \$3.98. Enclose payment now and you'll receive it with your 12 introductory cassettes. This discount purchase immediately reduces your membership obligation—you then need buy just 7 more selections (instead of 8) in the next three years. What's more, this discount purchase also entitles you to still 2 more cassettes as a bonus, FREE. Just check the box in the application and fill in the numbers of your first selection and the 2 free bonus cassettes you want now.

*Selections with two numbers count as two selections—write each number in a separate box.

IF YOU PREFER CDs, JOIN THE CLUB NOW—AND YOU MAY

TAKE ANY 8 COMPACT DISCS FOR 1¢

plus shipping and handling

If you now have a CD Player, or are planning to get one, you will surely prefer to take CDs from the Club at this time. As an introduction, you are entitled to any 8 CDs for only one penny, plus shipping and handling. And you'll have no problem in finding 8 CDs you really want, because all of the selections offered here are now available on Compact Discs.

To get your 8 CDs, simply fill in and mail this application, and we'll bill you only 1¢, plus shipping and handling. In exchange, you agree to buy just six CDs within the next three years, at regular Club prices (which currently are \$12.98-\$15.98, plus shipping and handling)—and you may then cancel your membership at any time after buying six CDs.

Half-Price Bonus Plan: if you decide to continue as a member after fulfilling your membership obligation, you'll be eligible for our money-saving bonus plan. It lets you buy one CD at half price for each CD you

buy at regular Club prices. And you'll enjoy this 50% off saving for as long as you remain a member.

Otherwise, the Club works in the same manner as previously outlined, so be sure to read the "How the Club Operates" and "10-Day Free Trial" information on the other side. Remember—your risk absolutely nothing by mailing this application today!

Extra Bonus Offer: as a special offer to new members, take one additional CD right now for only \$6.95. This discount purchase entitles you to choose an extra CD as a bonus FREE. And you'll receive your discounted CD and your bonus CD with your 8 introductory selections—that's 10 CDs in all!

COMMENT AND OPINION

THE NATIONAL COLLEGE NEWSPAPER

By presenting a wide range of opinions and ideas reprinted from hundreds of campus newspapers, we hope to enhance the quality of campus life as we inform, entertain and engage the national student body. We acknowledge the commitment of student journalists across the nation, supported by their media advisers and journalism professors, to report the activities, issues and concerns of their fellow students.

Tuition, toilet paper rub student the wrong way

By Chris Rice
■ The Parthenon
Marshall U.

I was out of toilet paper.

Like many native West Virginians, I have to watch every penny. So I have to pass by the popular name brands and reach for the one in my price range — Sandy Wipe.

However, when I recently returned to the local supermarket I was shocked to learn that my old brand had been replaced. Now stocked high on the shelf in its place was New Sandy Wipe Plus, "Now with larger sheets!"

But after studying the competition, I soon realized no matter how I felt about the price increase I would still be buying Sandy Wipe. Not because I am pleased with the new larger sheets, but rather because the price is right. It rubs me raw, but I really don't have a choice.

I was out of high school.

Like many native West Virginians, I have to watch every penny. I had to pass by the big name universities and go to the one in my price range — Marshall U. However, when I received my bill for last fall semester I learned that the old tuition rate had been changed. The big black numbers on the white page demanded, "\$743.50!"

Sure the price had gone up before, but this was a \$127.50 increase. But after studying the competition I soon realized

no matter how I felt about the rising tuition I would still attend Marshall U. Not because I'm particularly pleased with the product, but rather because the price is right. Do I get what I pay for? It rubs me raw that I really don't have a choice.

I compare being out of toilet paper and being out of high school because in both cases you end up with a load in your hands.

The maker of New Sandy Wipe Plus had me, the customer, in mind when they raised their price. It may cost more, but I'm getting longer sheets.

But Marshall U. did not have the customer in mind. It did nothing to improve its product. What part of my \$127.50 is going to product improvements? Not a penny.

Some proponents of the tuition increase suggest the university can attract more and better professors by offering higher salaries. But by the time the state gets around to creating and filling these new positions, I'll be gone. Why should I pay for an improvement I may never see?

It doesn't bother me to pay for the university's plastic surgery. The price here is still right. What does bother me is that unlike Sandy Wipe there is no "new" or "plus" to the product. The only thing that will be different is the amount of money employees will be collecting each payday.

It's like paying for a nose job while cancer eats away inside your body.

LETTERS TO THE EDITOR

Boycotts don't help

To The Editor:

It's wonderful that there are many students concerned enough about apartheid to want to do something about it ("Students protest Coke sales," November 1989), but boycotting companies for business relations with South Africa is not the right way to go about it.

These companies give jobs to thousands of South Africans. Thus, not only do these blacks have the chance of pulling out of the vicious cycle of poverty, but it offers them a chance to move up on the ladder, so that they might be able to work

against apartheid from the inside.

Over the past decade the lives of thousands of blacks have turned for the worse after the multinational corporations began pulling out. The actions only caused further deterioration of the economic situation in South Africa.

The very nature of the articles tended to incite other students to join this boycott, much to the woe of the anti-apartheid cause. I am an idealist, too, but when the actions taken by idealists defeat their intent because of ignorance, I draw the line.

Ngeng Hia Phua, freshman
Carnegie Mellon U.

Life on campus mirrors events in 'real world'

By Carolyn Karr
■ The Chronicle
Duke U.

Duke U. students often call their campus the "Gothic Wonderland," a four-year bubble that reality cannot puncture. Only in this land can students buy food, photocopies and school sweat pants with "points." And only here can a student run down the hall with a fistful of quarters to put his towels in the dryer and prepare for safe sex, all in one trip.

But many day-to-day events at college serve as a comprehensive prep course for the future. For example, the "new and improved" course registration booklets teach us we will not always get what we want in life, let alone the classes we may need. Registration also reminds us that you cannot always predict what you will be doing in life.

The class rank affords students another valuable lesson in educational survival. Certainly, people who work hard should be rewarded — with good grades in college and promotions later in life. Unfortunately, a person disappointed with his GPA may feel his hard work is not always rewarded.

In addition, the campus bus system provides students with a valuable tool to keep in their life-long survival kits. Although infrequent or late buses often inspire profanity, the bus service actually simulates real-life scenarios.

In order to get ahead in life, you must push your way to the top. So it goes with getting a seat on a campus bus. As children learn early in life to wait until it's their turn, many students apply this knowledge at the campus bus stops.

Students complain frequently about waiting in line for the bus, as well as for any other Duke service. Through every part of the day, we wait in lines. We wait for nachos at the snack bar. We wait for hours to get into basketball games. We wait for an available computer at the library. And at crowded parties, we even wait to relieve ourselves.

After four years of training, Duke is teaching its final lesson: good things come to those who wait... and wait.

**STUDENT
OPINION POLL**

Should pre-game prayer be broadcast at sporting events of public colleges and universities?

(See related story on page 1)

Responses to November U. Poll

In November, we asked readers if they thought date rape should be made a campus offense, punishable by the student court. Students were evenly split as to whether they favored (51%) or opposed (49%) this measure. It is not known how this relates to students' thoughts on dealing with date rape in the courts outside of their school.

LIFE AND ART

Saturday cartoons regress

By Frank Plemons
■ The University Daily
Texas Tech U.

While clicking across Saturday morning TV programming recently, I discovered the entertainment quality of Saturday morning cartoons has regressed during the last 10 to 15 years. If I were a kid, I'd certainly prefer the adventures of "The Superfriends" to those of "The Smurfs." The polymorphic powers of the Wonder Twins always gave me the excitement I wanted to see.

Plus, Saturday morning cartoons lack the creativity of the good ol' days. The current "Alf" cartoon is taken from the prime-time series, and the cartoon "Beetlejuice" was built on the hype of the movie of the same name, as was the "Real Ghostbusters."

Those copied cartoons are no match for such greats as "George of the Jungle (Watch out for that tree!)," "Josie and the Pussycats," "Scooby-Doo" and the greatest superhero cartoon of all time, "Mighty Heroes." Although there probably were fewer than 10 episodes of "Mighty Heroes," with the likes of Tornado-Man, Diaper-Man and Cuckoo-Man, the entertainment value was unbeatable.

Saturday's non-animated shows are not much better than the cartoons. "Pee Wee's Play House" cannot compare to "Land of the Lost," "Sigmund and the Sea Monster" and "Dr. Shrinker."

Weekday afternoon cartoons are just as bad. What adventure cartoon would you rather watch: "G.I. Joe" with such moronic characters as wrestler/anti-terrorist command Sgt. Slaughter or demon on wheels "Speed Racer" with the ne'er-do-well team of Sprite and Chim'chim? Has there ever been a cartoon hero like the "mysterious" Racer X, the older brother and guardian of the unknown Speed?

It's easier to get caught up in the memories of the cartoons of yesteryear than to accept the new ones. So I opted for re-runs of wildlife programs instead of the depressingly unentertaining cartoons.

"The Complete Book of Beer Drinking Games" showcases student favorites.

Page 11

Playboy visits spark controversy

By Marc Weiszer

■ The Diamondback
U. of Maryland

U. of Maryland student Kathie Slack was curious about posing for Playboy magazine, but she never wanted to do it nude.

"If I can wear clothes, I'll do it," she said. "I'm not going to do anything drastic. I'm not posing nude."

The senior English major was one of the many students from the Atlantic Coast Conference who interviewed during the fall for Playboy's ACC pictorial scheduled to be released in April.

The interviews sparked protests and petitions at most of the schools where Playboy photographers interviewed. Students and administrators were primarily concerned with the use of their university's name in the pictorial, but others protested the exploitation and degradation of women that they feel Playboy promotes.

"Playboy makes enormous profits selling these images of women," said Minnie Pratt, a U. of Maryland women's studies lecturer. "Playboy only perpetuates the idea that women can be bought and used as sex objects."

For the last 14 years, Playboy has featured college women from Division I con-

ferences to coincide with football season. The magazine also scheduled college pictorials to coincide with basketball season. Last fall, Playboy featured students from the Southeastern Conference, where similar protests accompanied Playboy's visits.

But the protests didn't deter ACC or SEC women from interviewing. Nor did it discourage Playboy Photographer David Chan, who is used to the controversy that accompanies his campus visits. "There is nothing new about protests," he said. "A student has a right to be upset about certain things — this minority has a right to say what they want, just as Playboy has the right to come to the campus. It's great — it just shows freedom of expression."

Students who were interested in posing for the pictorial first interviewed with Chan and posed fully clothed for Polaroid snapshots. Chan then invited only a select few students back for extended photo sessions. "We want the typical coed, the girl next door," Chan said. "The women shouldn't feel that they have to be able to compare to a centerfold. If they're a little bit heavy, we can work with it."

"I know I'm the luckiest guy in the world, being able to photograph the most beautiful women in the world," he said.

During the extended photo sessions the women could pose nude, semi-nude or fully clothed. Students receive \$500 for appearing nude, \$250 for appearing semi-nude and \$100 for appearing clothed.

A Wake Forest U. student who posed fully clothed said the Playboy staff put her under no pressure to pose nude or in erotic positions. "The people at Playboy weren't the people everyone made them out to be. They leave it entirely up to you."

After completing sessions at all the ACC schools, Chan chooses about four women from each school to be in the pictorial.

Campus women's rights activists feel Playboy's presence on campuses hurts their movement. Melea Lemon Bryan, a member of North Carolina State U.'s Women's Resource Coalition, said "We are trying to promote a better atmosphere for women on campus — treating us as sex objects will destroy everything we have done to increase our status as serious students."

Shawn Lees, *The Diamondback*, U. of Maryland; Andrew Liepins, *Jeanie Taft*, *Technician*, North Carolina State U.; and Ryan McQueeny, *Jennie Vaughn*, *Old Gold and Black*, Wake Forest U.; contributed to this story.

ANTONIO HANSEN, THE DAILY OCCLEGGIAN, OKLAHOMA STATE U.

'Just get up and go' is the slogan of many students who road trip.

On the road again

By Juleigh Sewell

■ The Auburn Plainsman
Auburn U.

Several good friends, a car with a full tank of gas, a road map, some good tapes and an adventurous spirit — these are the basic ingredients which, when combined correctly, yield the solution to the ho-hum weekend.

On a slow weekend, Auburn U. students invariably ask themselves and

their friends, "What can we do this weekend?" A road trip is one answer that is popular on many college campuses.

"It allows you to get away from everyday life. It lets you take advantage of being young," said Brooks Wooten, a senior political science major.

Last year before fall term started, Wooten and his roommates, Scott Turnquist and Tripp Haston, a senior pre-law student, took a weekend road

Dorm residents listen to 'hot' bedtime stories

By Gina Kinslow

■ College Heights Herald
Western Kentucky U.

Tammy Thompson crawled beneath the covers of her bed while she waited for someone to come to her room, tuck her in and read her a bedtime story.

No, Tammy isn't a 4-year-old waiting for her father. The Western Kentucky U. sophomore is actually waiting for freshman Greg Schmidt.

Schmidt was one of 11 Western Kentucky U. dorm residents who brought cookies, milk and bedtime stories to about 25 residents of a female residence hall.

The women could choose a "cold" or "hot" bedtime story. Greg Vincent, a resident assistant who co-organized the event, said all the "hot" stories came from "quality magazines," such as *Penthouse* or *Penthouse Forum*. Tina Howlett, also a resident assistant who planned the event, said none of the women picked "cold" stories.

Thompson said she liked her story. "It was kind of perverted, but it was cute," she said.

All the women in Thompson's room said they wouldn't mind tucking the men in, although the risks for freshman Brooke Spear might outweigh the benefits. "I'd probably die of embarrassment from reading the story," Spear said.

See TRIP, Page 11

The B-52's: A band that just happened

By Denise M. Reagan
■ The Independent Florida Alligator
U. of Florida

The B-52's are a rock band in the great tradition of fun and "so what." They didn't plan to be The B-52's. It just happened that way. And it's turned out better than a real job.

That's how Kate Pierson, Fred Schneider, Keith Strickland and Cindy Wilson put it.

"We just sort of came out like a blue streak of spontaneous combustion," said singer/keyboardist Kate Pierson in a recent phone interview.

The beauty of The B-52's is they just sort of fell into their rather envious position. One day they started jamming together, then writing songs, then a gig at a Valentine's Day party, then New York City clubs and the rest is history.

History meant "Rock Lobster," a favorite party request that quickly moved from the grooves of an independently released single to a full-length, self-titled, wildly-popular, major-label record. History meant a second album, *Wild Planet*, selling even more copies. History meant four more albums with varying degrees of critical acclaim and popular acceptance.

Yet one event scars their history. Guitarist Ricky Wilson died of an AIDS-related illness in 1985, just before the release of *Bouncing Off the Satellites*, which was dedicated to Ricky. After that, no one was sure The B-52's would come back.

"After Ricky died, it seemed like maybe we'd stop," Kate says. "We didn't know what was going to happen. We were just playing it by ear. Then we started writing together again and it really became a healing process to write together and be creative again."

Every once in a while on MTV, the song "Summer of Love," from the last album with Ricky Wilson, filters through a Beatles-esque scene as celebrities smile above a simple message: "Be Alive." It's The B-52's contribution to the American Foundation for AIDS Research's awareness-raising campaign called Art Against AIDS.

MUSIC

DESIGN BY DENISE M. REAGAN, THE INDEPENDENT FLORIDA ALLIGATOR, U. OF FLORIDA

The funky style of The B-52's has endured and endeared for more than 10 years.

Cosmic Thing, the band's latest album, may have been one of 1989's best. The songs are rural and reminiscent of lazy Georgia afternoons, flowing with images of utopian idealism and a lush environment.

"Some writers move to the South and write about New York, and some writers move to New York and write about the South," Kate says. "We didn't really plan it or pore over our old albums and say, 'How can we make this like before?'"

What it sounded like before was the best house party you ever attended. Thumping, gyrating, hopping, squirming, rocking. "When we recorded the first album, that was the whole concept," Kate says. They stuck with that patented sound on *Cosmic Thing* even with production wizards Don Was and Nile

Rodgers, who Kate says were good about not branding the music with superfluous effects.

They don't need them, just the best of disco: the beat and the clothes. The B-52's are aptly named for the infamous bouffant hairdo that put Athens, Ga. — and the band — on the map. Kate agrees the music is what's important, but they still dress as wild as ever — because they want to, not because they have to.

"I really love wearing party clothes and dance clothes on stage," she says.

Those clothes used to place The B-52's among the fringe element, but record sales indicate a broadening audience. "I think we appealed to people who felt kind of weird," Kate says.

"But now I think everyone feels like an outsider."

Teacher rocks students with history course

By Elizabeth Graddy
■ The Red and Black
U. of Georgia

The instructor stands at the piano and fingers the chords to "In the Still of the Night."

Five young men in the second row rumble the bass line, "Yeh-up...yuh-yep...yeh-hup...yuh-yup..."

About 10 young women scattered around the classroom sway and purse their lips, doo-wopping. "Shoo-shoo, shoo be doo ... shoo-shoo, shoo be doo ... shoo-shoo, shoo be doo wop, wop, wop ..."

Bill Ramal, a part-time lecturer at the U. of Georgia Music School, points at a young man near the front. "You look like a falsetto," Ramal says.

Of course he is. And without further ado, he breaks into the first line of the song. "In the stiiiilll ... of the niight ... hold me darlin' ... hold me tiightt ..."

In the hallway, passers-by peep into the room where Ramal teaches Music 418: History and Analysis of Rock Music. "And that," Ramal says, "is doo-wop. See how easy it is? Well, that's it for today."

An older woman at the back of the room interrupts. "Elvis!" she calls out. "Talk about Elvis."

He clears his throat and smooths his thinning, dark hair back with a ringed index finger. "Elvis was a truck driver who made a record for his mama, sold a lot of copies, became a big star, got fat, took dope and died. Any questions?"

Not everyone agrees with Ramal's views — especially Elvis fans — but you can't escape the fact that he knows rock 'n' roll.

Ramal, who attended the Juilliard School of Music and earned a doctorate in music education from Columbia U., began his music career in the 1950s, playing the saxophone in New Jersey nightclubs while still in high school. "I was really good," he tells his classes. "I was making a lot of money — it'd be about \$2,000 a week now." He winks. "And dope was really cheap then."

See CLASS, Page 11

Derogatory song lyrics creeping into music industry

By Gregory Roth
■ The Daily Collegian
Pennsylvania State U.

Derogatory song lyrics aimed at women, homosexuals and various ethnic groups suggest a trend toward tolerance of racism in popular music.

Guns N' Roses created controversy with its song "One in a Million" on *GNR Lies*. The song includes the lyrics: "Immigrants and faggots/They make no sense to me/They come to our country/And think they'll do as they please/Like starting some mini-Iran or spread some fucking disease." The song goes on to put down "niggers" and mock their "gold chains."

Guns N' Roses lead singer Axl Rose, in a recent Rolling Stone interview, said it is his constitutional right to say what he wants. He also said the lyrics are good for society because they create a more open atmosphere.

But Rochelle Louderback, president of Yachad, a Jewish student organization at Pennsylvania State U., said "his message is very closed-minded and I don't see

ANALYSIS

how that could create more openness."

On the other side of the color line, Public Enemy's liaison to the black community, Professor Griff, said in an interview with *The Washington Times* that "Jews are wicked. And we can prove this." He said Jews are responsible for "the majority of wickedness that goes on across the globe."

Another rap group, Heavy D and the Boyz, takes shots at homosexuals on its recent album *Big Tyme*. The album climbed to No. 1 on the black music charts while promising in its lyrics that if you listen to the album, "you'll be as happy as a faggot in jail."

There are still far more non-racist and non-homophobic songs in pop music, but these examples are at the vanguard of what looks like a new trend.

Norman Eric Bigelow, public relations officer for Pennsylvania State U.'s Black Caucus, said the evolution toward open racism has been gradual. "After April 4, 1968, it was no longer acceptable to be overtly racist,"

MEL MARCELO, THE UCSD GUARDIAN, U. OF CALIFORNIA, SAN DIEGO

Ballroom dance's grace attracts many students

By Laura Baker
■ The UCSD Guardian
U. of California, San Diego

"One, two, three. One, two, three," my partner hisses through clenched teeth, a grim, determined look on his face. "One, two, three, one, two ..."

Then he starts to smile and relaxes the vice-like grip he has on my hand. He's stopped thinking the rhythm and begun to simply feel it.

We whirl around the dance floor, secure in each other's arms, moving together effortlessly like Ginger Rogers and Fred Astaire. Alright, maybe I'm getting carried away. Actually, it's a Monday night and we're both in jeans and tennis shoes. Although he's still counting, we are dancing and it's wonderful.

If you'd ask me what my favorite class was last winter, I would have told you ballroom dance. Taught through U. of California, San Diego's physical education department, the classes are popular and fill quickly.

In fact, ballroom dance is making something of a comeback in the United States. An article in *The Smithsonian's* April 1989 issue states the membership of the U.S. Amateur Ballroom Dancers Association, which has chapters in 24 states, has doubled in the last five years. And more than 10,000 student dancers nationwide are involved in the Ballroom Dance Society.

"I would much rather go out with a man that I know is going to hold me in his arms and we're going to dance together," said Andrea Marshall, who helped establish a Ballroom Dance Society chapter at the U. of Kentucky.

For many, the appeal of ballroom dance is in the pleasure of moving with someone. Daniel Garnett, who also helped establish UK's Ballroom Dance Society said, "It's more romantic to be able to hold somebody and dance with them than it is to go out and jump up and down," he said.

But I admit nostalgia has a lot to do with it as well. Although he was scornful

of the era, F. Scott Fitzgerald has instilled in me a longing to dance away under the stars. Marshall Stern's description of Sunday nights at the Savoy Dance Hall in Harlem in "Jazz Dance" makes me yearn for a similar creative outlet. I listen to old Duke Ellington records and dance out in front of the mirror, my bathroom robe a ball gown.

There are more practical reasons for the increased interest in ballroom dance than my own nostalgia.

"An entire generation grew up in the rock era, starting in the '60s and '70s, and they never ever danced together," said Larry Schulz, co-owner of a local dance center. "Now that they're at an age where they find themselves in professional situations — company functions, galas, balls — that require a certain sophistication. You can't just get up and disco all night."

Regina Swift, Kentucky Kernel, U. of Kentucky contributed to this report.

Lyrics

Continued from page 9

he said. "But people forget — things change and go back to the way they were."

Penn: State administrative fellow Terrell Jones agreed. "Prejudice is reinforced in children from five different areas: parents, siblings, peers, formal institutions and the mass media."

The mass media, of course, includes the record industry. "The record companies need to have some type of program for addressing these issues with their artists," Bigelow said.

Louderback also feels the message can have an affect on listeners. "People who don't know that much about Jews and then hear these negative things could be influenced to believe they are true," she said.

Bigelow, Jones and Louderback all agree freedom of speech is of great importance, but they also feel prejudiced statements should not be viewed as acceptable. "There's taking license, but there's also a responsibility," Smith said.

SOUNDBITES

Queen Latifah

All Hail the Queen

In Muslim, her name means "delicate." But what's in a name? At the young age of 22, Queen Latifah demonstrates an authority and vengefulness some rap artists never acquire. *All Hail The Queen*, her debut album, displays a profound cultural awareness, a wide spectrum of musical influence and killer samples and dance grooves. The album opens with an incredible hip-hop number called "Dance for Me," which is also her first single from the album. Her style is aggressive, tough and upfront. And she can sing as well. Quite a few of the songs on the album showcase her formidable pipes, especially the reggae-influenced tunes that are Latifah's personal favorites. If you've never tried rap before, this is a good place to start. ■ Daniel Washco, *The Daily Northwestern*, Northwestern U.

Camouflage

Methods of Silence

On their newest album, the West German-based synth-pop band Camouflage keeps the same digital dance sound that has made them so popular. The album's first single, "Love is a Shield," is a new digital mix of the emotionally-textured dance tune. Other songs that really grab attention are the psychedelic sounding "One Fine Day," "A Picture of Life," a study of the AIDS epidemic, and a remake of the 1980 New Music hit "On Islands." The lyrics to "Les Reus" are sung in French. *Methods of Silence* is a much smoother sounding album than its predecessor and is outstanding on a lyrical scale. Those of you who love the Depeche Mode sound should buy this album; you won't be disappointed. ■ Ricky Swain, *The Daily Helmsman*, Memphis State U.

'Beer Swigger's Bible' a must for college life

By Seana Fit

■ The Daily Nexus

U. of California, Santa Barbara

"The Complete Book of Beer Drinking Games" by Andy Griscom, Ben Rand and Scott Johnston is the best collection of recreational drinking rules around. Best of all, it comes with a custom barf bag.

This "Beer Swigger's Bible" contains all the usual games near and dear to every college student's heart: "Quarters," "Bullshit," "Boat Racing" and "Beer Softball."

The games are ranked according to the amounts of alcohol consumed. "A boot factor of 1" describes the lowest potential for tossing cookies, while a boot factor of '5' warns of an almost assured heave."

One Boot Factor Five game "Boot-a-Bout" is brilliant for its simplicity and deadly for players. This game was custom-made for any gnarly drinkin' joint. A pitcher of beer is passed around the group, each player drinking as much as he desires.

The beauty is the game's only rule: "The player who drank just before the player who finishes the pitcher must buy the next pitcher." Before you think that this sounds boring, consider the amount of beer you would be willing to drink to ensure that the person before you has to purchase the next round.

"The Complete Book of Beer Drinking Games" is a worthwhile investment for anyone who believes the sole purpose of college is to drink and have fun.

Authors Ben Rand, Andy Griscom and Scott Johnston spout beer at each other.

Class

Continued from page 9

Dope is very important to all great musicians, he explains. "Look at Jimi Hendrix, the Doors. Look at the Beatles." He raises his eyebrows and throws a sideways grin at his students who are never sure when they're being had.

In 12 short weeks, the students cover rock 'n' roll's milestones, from its birth in rhythm and blues to the newer progressive rock. Most of the course is devoted to the legendary acts — Chuck Berry, Little Richard, Jimi Hendrix, Bob Dylan and, of course, the Beatles.

Debra Bailey, a senior journalism major, said she likes Ramal because "he doesn't take himself too seriously but you still learn everything you could possibly want to know."

Trip

Continued from page 8

trip to Toronto, Canada.

"We were sitting at Burger King talking about where we could go," Haston said. "When we said Canada it was like a magical word. Everyone's eyes lit up, and we said 'Yeah, let's go to Canada.'"

"We basically went because of boredom. We were waiting for classes to start, and we had to do something," Wooten said. "We were looking for something big."

On a long road trip, rules are bound to emerge. Wooten said they agreed to split any speeding tickets acquired on the trip.

"The guy in the back could sleep. The guy riding shotgun had to stay awake to keep the driver company and the driver couldn't drink," Wooten said. "The whole way up there, we kept looking at each other saying 'Can you believe we're going to Canada?'"

The feeling of disbelief is one that Ford Stokes, a senior marketing major, knows well. Last fall, he and two friends drove to Atlantic City, N.J.

Pure chance led them to their destination. They decided on Atlantic City by flipping a penny on an atlas, Stokes said. "It landed on Atlantic City and we were gone about 10 minutes later."

Despite penny pinching, the students lost \$300 gambling at Trump Plaza. "We came so close to having only \$6 to our names," Stokes said, "but we won it back."

All of our road-trippers agreed that the best aspect of their trip was having no deadline. "We made it a point to stop every time we wanted to," Wooten said.

YOU GET A LOT MORE THAN MONEY FOR COLLEGE SERVING PART-TIME IN THE ARMY RESERVE.

Joining the Army Reserve is one of the smartest ways to help pay your way through college. In fact, you can earn over \$18,000 through the Montgomery GI Bill and your Reserve pay during a standard enlistment. And, if you have or obtain a federally insured student loan, you may qualify for a government program that will help repay up to \$20,000 of it for you.

But you get a lot more than just money in the Army Reserve. You get hands on training in one of over 250 skills... skills like modern health care techniques, engineering, foreign languages, criminology and many others.

You get the pride and confidence that come with

tackling a tough job and doing it well. And service with the Army Reserve can help you develop the maturity and self-discipline it takes to succeed in college and in life.

You also get the satisfaction of knowing you're helping to keep America strong.

Besides completing Basic and Advanced Individual Training, you'll usually serve just one weekend a month in a nearby Army Reserve unit, plus two weeks of Annual Training. Find out more. See your Army Reserve recruiter or call 1-800-USA-ARMY.

BE ALL YOU CAN BE.

MEMOREX®

MARKETING AWARD

In recognition of outstanding students in marketing, Memorex presents a **\$1,000 Marketing Scholarship**. To be eligible, the applicant must have:

- Minimum 3.2 GPA
- Potential to excel in all aspects of marketing
- Financial need

Memtek employees and their families are ineligible for this award.

TOYOTA

Scholarship Award

Will be presented to a student who demonstrates outstanding academic excellence in any recognized field of study. The \$1,000 Award will be used to further the excellence achieved in the student's undergraduate career.

REQUIREMENTS

- 1) A minimum 3.2 GPA
- 2) A combination of excellence in the classroom, co-curricular and extra-curricular activities.
- 3) Financial need

Toyota employees and their family members are not eligible.

In search of excellence
Oldsmobile offers a

\$1,000 LIBERAL ARTS SCHOLARSHIP

to an outstanding
student who meets the
following criteria:

- Minimum 3.2 GPA
- Outstanding academic record and potential for excellence outside the classroom
- Financial need

GM, Oldsmobile employees
and their family members are
not eligible for this
scholarship.

ACHIEVEMENT AWARD

A \$1,000 Scholarship

will be presented to a student enrolled in the Army ROTC program who excels in the classroom and as a member of the ARMY team.

Requirements:

- Minimum GPA: 3.2 cumulative
- Enrolled in Army ROTC program
- Participation in student activities
- Demonstrated record of community service
- Not open to students currently holding an Army ROTC scholarship

Deadline: March 31, 1990. Use application form on opposite page.

ANHEUSER-BUSCH COMPANIES
present a

Humanities Scholarship

in the amount of \$1,000 to an outstanding student in the Humanities. To be eligible, the student must have a minimum 3.2 grade point average, demonstrate outstanding achievement in the classroom and field studies, and show financial need.

Anheuser-Busch employees and their families are ineligible for this award.

SOCIAL SCIENCES
SCHOLARSHIP

presented
by

Miller
Genuine Draft

A \$1,000 scholarship is available to an outstanding student who demonstrates exceptional ability in any of the social sciences.

The award is available to students meeting the following criteria:

- Minimum 3.2 Grade Point Average
- Exceptional academic record
- Financial Need
- Potential for leadership in your field

Employees of Miller Brewing Company and their families are not eligible for this award.

THE U.S. MARINE CORPS PROUDLY OFFERS A

\$1,000 SCHOLARSHIP

REQUIREMENTS:

- MUST BE A MEMBER OF THE PLATOON LEADERS CLASS, NROTC-MARINE OPTION, OR MECEP
- MINIMUM GPA: 3.0 CUMULATIVE
- DEMONSTRATED RECORD OF COMMUNITY SERVICE
- OPEN TO AFRICAN AMERICAN OR HISPANIC APPLICANTS

Leaders
Award**

U. Foundation • Undergraduate Scholarships

Excellence, achievement and leadership. These are the watchwords of the U. Foundation, a non-profit arm of The American Collegiate Network.

The Foundation is proud to join with distinguished corporate sponsors to provide scholarships for top-flight students in a variety of fields.

Announcements of this year's scholarships appear on the preceding three pages. Each carries a \$1,000 cash award and is designed to help an outstanding student—current freshman, sophomore or junior—continue his or her education.

Specific qualifications and criteria are listed in the individual announcements. In general, the scholarships favor stu-

dents demonstrating excellence in academic and extra-curricular activities who have genuine financial need.

Except for scholarships designed specifically to aid minority or handicapped students, the awards will be made without regard to race, gender, color or creed.

Applications with supporting docu-

ments must reach the Foundation by March 31, 1990. Use the application form below.

Winners will be chosen by the Foundation's Board of Trustees, and will be informed by May 31, 1990. The winners will also be announced in the September 1990 issue of *U. The National College Newspaper*.

THE NATIONAL COLLEGE
NEWSPAPER

SPECIAL REPORT

Report by
Jacki Hampton
U. Editor

This is the second in a series of special reports directed by U. editors.

After reading college papers from all over the country, the editors found that students were interested in the increasing number of career opportunities open to liberal arts majors. Other topics addressed in this report include first-job relocation and interview techniques.

Future special report topics planned include campus crime and gay rights.

The Game of Life

Liberal arts majors make gains in the job race

Almost half of the Fortune 1,000 companies that recruit on campuses seek out liberal arts majors, according to a survey conducted at Boston U.

And liberal arts majors may be the best-prepared to undertake the jobs of the future, suggests Lawrence H. Smith, career planning and placement director at the U. of Oregon.

"I am put off by this notion that so many new jobs are being created that future jobs will require totally new skills," Smith said. "Unfortunately, some students react to this information by resigning themselves to a confused state. Why learn, choose a major, do much of anything, because the jobs that will be available in two to five years, we don't even know the titles of."

"Bank. People get paid, companies earn money, agencies get funded because they do two fundamental things — they produce a product or service and they sell it. Future jobs may use new tools, but the skills required to use new tools can be learned. What remains very stable are the characteristics of people."

Smith says majors such as history, literature, anthropology and political science will best prepare students to face these jobs because they provide insights into human behavior.

On-campus recruiting

Employers seem to agree with Smith. The private sector is hiring liberal arts students, long-recognized for their communication and interactive skills, at the highest rate since computers came on the scene in the 1970s. Even fields traditionally dominated by business graduates, such as finance, banking and insurance, are opening to these students. Thirty-six percent of the graduates hired into these fields in 1987 were liberal arts majors, according to the 1987-88 Collegiate Employment Institute Newsletter.

"The biggest problem for liberal arts majors is that they start off with a negative attitude," said Arizona State U. Career Services Director Jean Eisel. "They come into the interviews assuming we have nothing for them because no one asks specifically for a sociology major or a psychology major."

Eisel said these assumptions are false.

"More and more employers are willing to look at liberal arts majors." Thirty-six percent of the companies recruiting 1990 ASU graduates are looking for non-technical majors, as opposed to about 25 percent five years ago, she said. Employers are looking for students to fill positions in sales, retailing, publishing, editorial, customer service and management trainee programs, Eisel said.

Smith describes these entry-level positions as "window jobs," providing windows into other areas of the organization.

Barbara Koplin, career services director at Marquette U., said she has watched liberal arts graduates move through the ranks in advertising, public relations and insurance sales. "One young lady with a liberal arts degree has become tremendously successful in a manufacturing company in a rather technical area," she said.

Who's being hired?

Like Eisel, Glenda F. Lentz, director of career development services at U. of South Florida, sees employers coming to campus that "never would have come five years ago."

"They used to use a hit-or-miss method, with newspaper ads, etc. But they weren't getting the caliber of people they needed to promote within the company," she said. Recently, employers such as Kraft Food have shown an increased interest in liberal arts majors at USF, Lentz said. "They need people who have the background to move into management. They're looking for people with an eye to train them for the future. Liberal arts majors have that broad background they're looking for."

Roy Chapman, manager of college relations for JCPenney, said, "We really recruit on an individual basis, regardless of what piece of canvas is hanging on the wall. If a student displays leadership and enthusiasm, they'll fit well into our management program."

Chapman said JCPenney consistently looks to liberal arts majors to provide these attributes. "They've always had great opportunities with us — our last chairman of the board was a music major," he said.

Other skills that liberal arts majors offer, according to Lentz, are the ability to think critically, do analysis and make judgements, and communicate. "Companies also are looking for the ability to write a persuasive letter or to make a persuasive presentation."

Eisel said some personal qualities can be equally important. "At a lot of schools, liberal arts majors tend to be the campus leaders, and companies are looking for that leadership," she said.

What can undergraduates do?

Koplin said liberal arts students must develop these desired skills. "They need to get involved in extracurricular activities, but in a meaningful way — either by holding offices or taking charge of a project and seeing it all the way through."

"They need to find ways to demonstrate the qualities that employers are looking for," Koplin said. "Liberal arts majors are normally hired because it's perceived that they have better interactive skills with people. They can even demonstrate those through a part-time job. I've known employers to be impressed with a student who was bartending . . . or waitressing, because it shows they can deal with people in adverse situations."

Koplin also urges students to gain experience in their field. "I would tell all liberal arts majors to get exposure to the field they're interested in through an internship, to get some real meaningful work experience under their belt."

Lentz added, "I think it behooves liberal arts majors to get some technology training in their background. There are many liberal arts majors who end up on the management track and then they need it. That's just the way of life today."

She said creative thinking also wins points with employers. "Liberal arts majors are in many respects more flexible," she said. "They're more willing to be creative in getting the job done than a student who's spent four years studying for that job specifically."

TOM CASSELL, THE DAILY ILLINOIS, U. OF ILLINOIS

Interviews

The \$24,000 Question

A job interview is a two-way process. Recruiters expect candidates to ask intelligent questions. According to Victor R. Lindquist, Northwestern U.'s director of placement and author of the *Northwestern Lindquist-Endicott Report*, appropriate questions show interest in the particular employer and an awareness of how you can fill their needs. Questions should not be so basic that the interviewer thinks you have not researched the company. Some good questions include:

- How will I be evaluated and promoted?
- Describe my typical first-year assignments.
- Tell me about your initial and future training programs.
- What are the company's plans for growth?
- Is the company financially sound?
- What are the company's strengths and weaknesses?
- Is it company policy to promote from within? Tell me the work history of your top management.
- What are your expectations for me as a new hire?
- Why do you enjoy working for your firm?
- How would you describe your corporation's personality and management style?

Source: *The Northwestern Lindquist-Endicott Report*

KATHY HAVEMAN, THE BATTALION, TEXAS A&M U.

Some not-so-trivial pursuits

In her latest book, *Going to Work*, Lisa Birnbach presents research on 50 companies in 11 cities, exploring their hiring and promotion practices, benefits, salaries, and work environments. Through interviews with employees and descriptions of each city, Birnbach gives readers a real-life picture of each firm.

Some of her unusual findings include:

Best perk: Each employee of Apple Computer in Silicon Valley, Calif., gets to select any computer to

work with at home. After a year, it's his to keep.

Most fun dress policy: At Levi Strauss & Co. headquarters in San Francisco, employees wear jeans to work.

Most unusual recruitment inducement: Dayton Hudson in Minneapolis gives watches to all their MBA recruits.

Most generous vacation policy: Covington & Burling in Washington, D.C., gives four weeks leave to all employees, plus unlimited sick days.

ECONOMIC OUTLOOK

Population	Top-ranked city
more than 1 million	Nassau/Suffolk, N.Y.
250,000 - 1 million	Oklahoma City, Okla.
100,000 - 250,000	Lafayette, La.
less than 100,000	Midland, Texas

Based on salaries and cost-of-living.

TRANSPORTATION

Population	Top-ranked city
more than 1 million	Denver, Colo.
250,000 - 1 million	Las Vegas, Nev.
100,000 - 250,000	Anchorage, Alaska
less than 100,000	Midland, Texas

Based on commuting time, availability of mass transit and train transport, and service to area by air.

ARTS

Population	Top-ranked city
more than 1 million	New York, N.Y.
250,000 - 1 million	New Haven, Conn.
100,000 - 250,000	Lincoln, Neb.
less than 100,000	Lawrence, Kan.

Based on the number of museums, colleges, symphonies, theaters, dance companies and public libraries.

Career Moves

Employers, counselors offer advice to students considering relocation

When Ty Eggemeyer graduated from the U. of Virginia's business school last May, he was offered a job in Boston paying more than \$55,000.

He turned it down.

Instead, Eggemeyer accepted a lower-paying position in Dallas with the consulting firm McKinsey & Co. Inc. "The Boston firm would have had to pay me 50 percent more for me to have a standard of living comparable to what I have in Dallas," he explained.

But salary wasn't the only factor Eggemeyer considered. "It's a quality of life issue as much as anything else," he said. "I chose Dallas over Boston because it's easier to commute in and out of the city, it's easier to get to and from the airport, and the weather's warm."

"I'm perfectly satisfied with my decision. I think the key is to be happy wherever you go. You have to consider the quality of schools, the proximity of family and a number of things besides the money."

Unfortunately, many students do not follow Eggemeyer's example when considering a relocation, said Glenda F. Lentz, director of the U. of South Florida's career development services.

"So many people who come out of school are so influenced by money because they've spent four years just putting out money," she said. "They get their degree and go into the job search with the attitude, 'I have the ticket, now who will take me there for the best price?'"

"They need to say, 'I have prepared

myself for a job, and I know these are the types of jobs I will be happy with, and they must be in the Southeast region,' etc. That is the most logical approach to a job search, but so many students don't do that. That's why we have so many people changing jobs so early."

Lentz said students need to perform a self-assessment, which will reveal what qualities in a prospective job and city are most important to them.

"Then, just as they've researched the culture of the company they've chosen, I'd advise them to research the culture of the area they're planning to move to," she said.

Job relocation services throughout the country can help students conduct this

research. Pam Bisbo, manager of the Relocation Connection in Sacramento, Calif., said her counselors present newcomers with information on communities, recreation, utilities, taxes, commuting, shopping, living costs and spouse employment.

"We basically try to ease them into their new community," she said. Bisbo encourages students to consider factors they may take for granted in their hometown before moving.

"Recreational activities are an important consideration for new hires especially, because they're usually younger. For example, if they like camping, they should find out how far a drive it would be to get away for the weekend."

Alan Dias, president of PRM Bound Relocation Services in Glendale, Calif., said another important issue is assistance for the trailing partner. He said graduates should consider the availability of job opportunities for their spouse before they move.

He also said students should look for help with the physical part of the move, since many companies have contracts with moving lines.

Often companies offer complete relocation packages to new hires, he said. For example, Citicorp Diners Club Inc. in Denver, Colo., pays for the relocation of household goods and automobiles, and storage for 30 days.

In addition, said Human Resources Manager Gretchen Ragland, Citicorp pays for 30 days temporary lodging and other expenses, including meals and laundry. The company also pays graduates \$1,000 up front for miscellaneous expenses.

Ragland said one perk Citicorp provides is a tax person to do the new hire's taxes the first year. Other than that, she said, "I would think this is an equivalent package to what most major companies offer."

Dias also recommended taking advantage of resources such as the *Bound* publications, a series of reference books in 15 different major metropolitan areas across the country that describe communities, housing and rental costs, and other aspects of the areas.

SPECIAL REPORT

Relocation

Continued from page 17

Study is another source designed to help graduates with the relocation decision. Thomas P. Thompson, director of research for the study, rated 329 locations on nine quality-of-life factors, including the arts, climate, crime, economic outlook, education, health care, housing and transportation. Cities were grouped and judged by population size.

Thompson also assigned each city a composite rank. According to his study, the best places to live include: New York City (greater than 1 million population), Albany/Schenectady/Troy, N.Y. (250,000 - 1 million), Lafayette, La. (100,000 - 250,000) and Midland, Texas (under

100,000).

Studies like Thompson's may become more important as greater numbers of students decide to move to take jobs. Colette Dollarhide, U. of Nevada, Reno, career planning and placement coordinator, estimated that between 40 and 60 percent of UNR's 1989 graduates relocated out of state.

James Henry, assistant director at the U. of Kansas placement center, cited even larger numbers. "It appears that the vast majority of students who report positions have relocated for the first job. Approximately 70 to 80 percent of last year's graduates who reported accepting positions took them outside the local metropolitan area," he said.

Lentz said, "Students limit themselves by not relocating. That's why self-assessment is so very important. I tell students 'Know thyself, because you may limit

your possibilities, but if the possibility is in Minneapolis and that's not an area where you're going to be happy, it doesn't matter."

"A student needs to ask himself what he values most in life. If he can honestly say it's his family, then he probably shouldn't move. But if he says, 'This is an opportunity I never expected and a great opportunity for growth. I've never lived anywhere else, here's a chance to experience a new culture, a new city, a new climate,' then he should consider it."

Ragland recalled one student Citicorp relocated who made the decision based on religious preference. A Mormon, he attended an Eastern school, but found the Denver office attractive because of its proximity to Utah.

Arizona State U. Career Services Director Jean Eisel encourages students to find out about the city by taking all

the visits their potential employer offers. In addition, she advises students to get in touch with the city's chamber of commerce and subscribe to the Sunday newspaper.

"I also encourage students to contact the alumni association if they don't know anyone in the area. It helps them to have a base and know there are some people who have had similar experiences," Eisel said.

Alumni can help with apartment-searching as well, and Eisel recommends tapping into the available-housing listings at a nearby university.

"It's so important that students look into these things before they move," Eisel said. "Studies show that in a year and a half, 50 percent of people leave their first position. If they don't properly evaluate themselves and the position, that's what will happen."

CIA ON CAMPUS

A successful protest . . . Central Intelligence Agency representatives cut short a recruiting visit at Temple U. after about 35 student protesters disrupted their meeting. Students from various organizations entered the room where representatives were interviewing prospective employees, and began chanting anti-CIA slogans into a bullhorn. The representatives left quickly, walking down eight flights of steps rather than taking the elevator. University officials, who thanked the protesters for keeping the demonstration peaceful, said they would meet to decide if the CIA would be allowed to return to campus. ■ Ellen Cohen, *The Temple News*, Temple U.

A private meeting . . . Representatives from the CIA in November met behind closed doors with about 45 U. of Washington students to discuss employment opportunities. The visit was the CIA's first after a self-imposed one-year absence from the campus spurred by large protests in 1987. The protests were led by Students Against U.S. Involvement in El Salvador. "The CIA is a legitimate potential employer," said Peter Eddy, personnel representative for the CIA. "The student applicants appear to be excellent candidates for the positions we are looking for." Students emerging from the meeting refused comment. ■ Karl Braun, *The Daily*, U. of Washington

Sit-in . . . Members of the U. of Pennsylvania's Progressive Student Alliance in November staged a sit-in protest against CIA recruiting on campus. Group members performed a skit ridiculing the CIA near the campus building where recruiters were interviewing students. Alliance member Walt Tunnessen said, "Our university condones terrorist activities by allowing the Central Intelligence Agency on this campus." University officials would not let Alliance members in to see the recruiters despite requests. ■ Amy Silverman, *The Daily Pennsylvanian*, U. of Pennsylvania

The Possibilities Are Infinite!...

Career Opportunities with Tandy Corporation/Radio Shack

The leader in consumer electronics technology offers careers in sales, marketing and retail management. Radio Shack has been bringing affordable high-technology products from the drawing board to the marketplace since 1921. Today we have more than 7,000 outlets nationwide and corporate net sales for fiscal 1989 exceeded \$4.2 billion. We design and manufacture many of the products we sell. The widely acclaimed Tandy® computer line, along with Radio Shack's other advanced-technology products and brand names, are

examples of our leadership in consumer electronics. Tandy's continued growth creates new sales and sales management career positions which lead to future advancement opportunities. Radio Shack is currently seeking sales-oriented and goal-motivated people desiring a challenging opportunity to participate in one of today's most dynamic companies. If you're looking for this type of career opportunity and think you can measure up to the best, we may have the key to your future. Write to us today for application information!

Resume: Hype or reality?

By Greg Stone

■ The Daily Pennsylvanian
U. of Pennsylvania

I guess we are all a little embarrassed by selling ourselves on resumes. It seems so uncomfortable and so necessary. We try to both stand out and fit in. We estimate what the tribunal of job-granters want, and then mold our experiences into a limited number of multi-syllabic words in an attempt to satisfy them.

Exaggeration tempts all but the most principled. The pressure is intense, and some of the criteria seem relatively innocuous. Who would ever know whether you were president of the Finance Club. (According to Career Planning and Placement at the U. of Pennsylvania, 13 seniors claimed that post last year.)

Why do we submit ourselves to this inane procedure? Why do we embrace the matching resume, cover letter and envelope as a reincarnation of the holy trinity?

I suppose it's because we're insecure. We are awed by the power of The Firms. We so desperately need the job, money and acceptance that we'll do whatever it takes.

Problems arise, however, when the resume links our lives and our marketability. Our personas become formatted, typeset and stock white.

I'd bet that over three-quarters of the readership has participated in an activity because of its appearance on an 8 1/2 X 11 sheet of paper. I still tend to view my achievements in terms of paper value as well as personal satisfaction. But I do know that hollow feeling of volunteering without being interested. Many of us do.

Making a difference is more important than titles. I see that that is what our society and our own securities dictate, but do you really want to work for someone who hires sheets of paper and not people?

PAWNING: A quick fix for cash crunch

By Dana Albrecht

■ College Heights Herald
Western Kentucky U.

When Maurice Mitchell needed cash quickly last quarter, he went to a pawnshop.

The Western Kentucky U. student came into the E-Z Money Pawn Shop one day last fall and handed some gold necklaces to Sandra Mills, whose husband, Edgar, owns the shop.

After looking them over, Mills wrote a description of the necklaces and put them in a small brown envelope. Then she handed Mitchell a receipt and some cash. Mitchell said it was his second trip to the shop in the last six months.

"I come here when I'm in trouble, like when I write a bad check or have a money shortage," Mitchell said, adding he planned to get the necklaces back and repay the loan by Saturday.

Some people find pawnshops a quick alternative for fast cash. Instead of signing papers and waiting days to get a bank loan approved, people go into a pawnshop, put an item up for collateral and leave with cash in hand.

The process for pawning is easy. People bring an item in to pawn; the pawnbroker determines the item's value and loans that amount. People have up to 30 days to repay the loan and get their items back. Or, they can pay a small storage fee for every 30 days that their belongings

JOSEPH A. GARCIA, COLLEGE HEIGHTS HERALD, WESTERN KENTUCKY U.

Instruments are among some of the unclaimed merchandise for sale at E-Z Money Pawn shop.

are in the shop until they can pay back the loan.

People who come to pawnshops have "run out of money before the next check," said the owner of the West Gate Pawn

Shop Charles Throneberry.

The manager of the Bowling Green Pawn Shop, B.J. Richardson, said many students come in needing money for textbooks, tuition or emergencies.

Pawnshops are crammed with items that were pawned and never taken back or bought from other shops and wholesalers. Their sales bring in money to loan.

Pawnshops have been in America since around the early 1800s but weren't recognized by state laws until the late 1800s. In Kentucky, pawnbrokers must record a detailed description of items pawned and submit the report to the police.

Although it varies from state to state, they also need a license, Throneberry said, and they can't charge more than 22.5 percent interest on loans.

Because of their work in jail bonds, pawnbrokers have traditionally had a seedy image, said Lowell Hughes, owner of the Bowling Green Pawn Shop.

Pawnbrokers said they hope the image of pawnshops is changing.

But, "pawnshops are the thing," Hughes added, indicating that some shops are franchising.

Pawnshops can be good businesses depending upon the economic situation, L&S Pawn Owner Larry Yeckering said. "The economy has to go up and down like a yo-yo for pawnshops to work," he said.

Pipe dreams come true for loft makers

By Sonya Goodwin

■ The Lumberjack
Northern Arizona U.

"The whole idea was to make a lightweight loft that could be easily shipped and could be carried in a nylon hockey bag," said Steve Schulte, one of two Northern Arizona U. students who

has challenged the traditional concept of lofts.

Schulte and John Hurry have designed a loft made of polyvinyl chloride pipe that is easy to assemble, lightweight and durable.

Hurry said they want to call their creation "E-Z Loft" and choose to market women because "most guys want to build

their own lofts."

Schulte said it takes five minutes to put the loft together and fits in almost any car.

Constructed of 3-inch white PVC pipe, their first model stands 5 feet, 6 inches high, weighs about 35 pounds and can

Making millions for the fun of it

By Roy R. Reynolds

■ The Shorthorn
U. of Texas, Arlington

Clay Jett, dressed in a pinstripe suit, sits on his desk in the Finance Society office talking intently on the phone.

Jett, a 22-year-old business major at the U. of Texas, Arlington, looks like a typical stock market investor.

But the stocks he trades are not so typical.

Jett, president of the Finance Society, heads a group of students that will participate in the second annual AT&T Collegiate Investment Challenge.

The Challenge is probably the quickest way to turn \$49.95 into \$500,000.

For a \$49.95 fee, any college student gets a

game packet that includes a portfolio, a list of stocks and \$500,000 of play money to invest in regularly traded stocks on the New York Stock Exchange.

"Last year we were one of the six schools to put three players in the top 100," Jett said. "I think we can do better this year."

Student Rich Hahn increased his 500K by about 30 percent last year.

"I got in the top 10 percent of the country last year, and I think this year I can do a lot better," he said. "I've got another year of experience under my belt."

After investing the \$500,000 from last November until Feb. 28, 1990, the player with the most fake money gets a trip for two to the Bahamas and \$25,000. In addition to the top prize, there is a \$10,000 prize for second; \$7,500 for third.

Japanese blame 'pampered' MBAs for trend away from manufacturing

By Norihiko Shirouau

■ Stanford Daily
Stanford U.

Japanese business leaders suspect that the theoretical management style learned in U.S. management masters programs may not be particularly valuable and that their U.S. counterparts wrongly pamper employees who have earned MBAs.

These Japanese leaders are blaming American business schools for triggering and reinforcing a U.S. trend away from manufacturing. This trend, they say, will aggravate trade imbalances between the two countries by not creating enough consumer products to sell to Japan.

Sony Corp. Chairman Akio Morita is perhaps the most blunt critic. He blames American business schools for "the decline of the U.S. economy," saying that these schools have "deprived American manufacturers of international competitiveness."

Graduate School of Business officials at Stanford U. disagree. They said that singling out American business schools for the decline in international competitiveness by U.S. manufacturers is unfair.

Associate Dean for Academic Affairs at Stanford's Business School Charles Bonini argues that business schools are aimed at teaching people how to work within the framework of today's business conditions.

"Business schools are somewhat market responsive," he says. "To some extent we produce products that the market wants. And to the extent American industry was not interested in people with manufacturing interests and skills, we responded to that."

At Honda Motor Co., MBA-holders are a rarity. Honda has traditionally been run by hands-on managers.

"Still, we do believe hands-on experience should form the core of managers' skills throughout their ranks," says former Honda Managing Director and head of North American operations Tetsuo Chino. Chino says Honda does not indulge in theory or speculations and does not "really see anything special about an MBA education."

Bonini, on the other hand, says that the business school tries to balance theory with practicality. "We do try to give people theoretical foundations. But the primary aim is to be practical and useful in the framework of today's business reality," he says.

Most Japanese manufacturers say they prefer managers with hands-on experience to run their operations.

Many Japanese leaders claim that MBA managers seem obsessed with quick results and personal achievement, while Japanese philosophy emphasizes long-term perspectives and teamwork.

Top manufacturing industry executives say doors are opened as wide, but not wider, for MBA-degree holders.

Chances are anyone coming into a Japanese company will be sent to a sales outlet or to an assembly plant. The twist to their assurance is that, unlike at many U.S. companies, an MBA degree doesn't put employees in the corporate fast lane.

1990. Your year in Europe.

Complete your education with a semester or a year in Europe while fulfilling university requirements.

Live in a dynamic seaside or mountain setting in Spain or France, or in one of Italy's most exciting economic centers.

A project of seven universities

Loft

Continued from page 19

be dismantled into eight to 10 sections shorter than five feet in length.

Hurry said the lofts will sell for about \$150 to \$200 each, and that they have applied for a patent.

Hurry said they will begin marketing them by raffling one off during spring semester registration.

He said a student who buys the loft as a freshman will still have it as a senior, and the lofts can be stored anywhere, even outside, while they're not in use.

Hurry said they have some good ideas to put to use in the future, including accessories like shelves, or colored lofts, or maybe even clear PVC pipe with neon lights running through it.

COLUMN

NCAA has \$1 billion problem

By Clint Riley
■ The Eastern Progress
Eastern Kentucky U.

CBS bought each person in the United States a front row seat to the NCAA Division I basketball tournament for the next seven years, at a price of \$1 billion. The NCAA received a windfall of cash, but with it comes a shower of problems.

Not as if the NCAA doesn't have enough problems already plastered across sports pages nationwide. It creates most of the stories itself while trying to clean up the mess created when the Supreme Court ruled that colleges could bid for television rights for themselves, thus creating big money college athletics.

But the deal cut with CBS allowed the NCAA to get in on the big money once again, an action that will have NCAA Executive Director Dick Schultz and his cohorts mopping up the slop for the rest of their undetermined careers. Just how big a mess they have to clean up will be determined once they decide what to do with the money.

The seven-year deal dwarfs the previous three-year \$166 million contract with CBS by almost threefold. The \$166 million contract was 72 percent more than the contract before it.

These monetary increases have led to increased cheating in college basketball and other sports. The reason? Greed.

Everybody wants a piece of the huge tournament revenue pie. However, it is divided into a few large slices for a select few who can grab them. This breeds the attitude, "Do anything to get a recruit which will give a basketball program the edge needed to rake in the tournament funds that could put a school's entire athletic program in the black." The system needs revision.

Eastern Kentucky U. Athletic Director Donald Combs said he hopes the NCAA will divide the money up among the 214 Division I basketball schools and "quit making that big payoff to one school."

Otherwise, it will just become further inducement to cheat.

Baseball coaches debate timing of season openers

By David Hardee
■ The Auburn Plainsman
Auburn U.

College baseball coaches from the Midwest and Southeast say their teams are at a disadvantage when competing with the Sun Belt schools, and they are fighting to move the season to warmer months.

Kentucky coach Keith Madison is one of the leaders in the fight to postpone the start of the season and continue it through the summer. "Why should teams from colder climates have to cram 60 games into a nine-week schedule and travel the entire first half of the season, while teams in the Sun Belt play their first 25 at home and use the weather as the primary recruiting tool against Northern teams?" Madison asked in an interview with Collegiate Baseball.

Before Wichita State U. won last season's national championship, teams from Arizona, California, Florida and Texas swept the Division I national title 22 years in a row. Madison and other coaches claim that pattern is a direct result of scheduling difficulties for Northern schools caused by the weather.

"It is time for the majority to stand

up and speak out for what is best for our athletes, our programs and college baseball," Madison said.

The proposed season includes 120 games, played April through September.

Southeastern Conference Associate Commissioner John Guthrie supports the season-opener delay. "It's just too cold to be playing in early spring, at the Northern schools in particular."

"I think this format could be put into effect by 1991 if the right people wanted it. The one big drawback is that the coaches are not united," Guthrie said.

Arizona State Coach Jim Brock and Texas A&M Coach Mark Johnson are among those opposed to the change, based on several arguments.

First, an extended season would leave players unable to participate in summer leagues.

Auburn pitcher Adam Shore said, "It would hurt the summer leagues, and those are crucial to a player's development."

Bo Carter, director of media relations for the Southwest Conference, said coaches have run into resistance by summer leagues that use amateur players, including the Cape Cod League and the Alaskan League.

Second, baseball players not on full scholarships may need to work during

Video helps students learn to detect testicular cancer

By David King
■ The Eastern Progress
Eastern Kentucky U.

Two Eastern Kentucky U. professors recently completed a video designed to help male students detect testicular cancer during its early stages.

Testicular cancer is the third-leading killer of males between the ages of 16 and 34. One out of every 500 men will develop the disease during his lifetime.

Dr. Robert Brubaker and Dr. Larry C. Bobbert filmed the video to instruct students on performing testicular self-examinations. The Kentucky American Cancer Society recently began showing the video throughout the state, and the American Cancer Society is considering

the film for national distribution.

Dr. W.R. Allen, a urologist at Pattie A. Clay Hospital, said self-exams are important because early detection increases the odds of successfully treating the disease.

"This type of cancer is a very virile disease," Allen said. "It used to kill everyone we found it in if it had already spread at the time of diagnosis. But in the last 20 years, there has been no other branch of medicine that has made more progress than this one."

Allen said he has known or treated several patients who found lumps but put off doing anything about it. By the time they came back six to nine months later, the cancer had spread and it was too late to do anything about it, he said.

Allen said one reason some men delay

seeking treatment is that they believe only painful lumps are dangerous. Actually, he said, painful lumps are almost always due to inflammation, while the non-irritating lumps can be serious.

He said the cancer starts inside the substance of the testicle, therefore, the tumor will not be palpable until it has already grown to the size of a peanut.

The self-exam is a simple process, Allen said, and can be performed in a few seconds while in the shower or before or after going to the bathroom. He said, however, that before males perform the test they should become familiar with their anatomy. He said there are some extra structures in the scrotum men are not used to feeling that they may confuse with a foreign growth.

Team handball gains popularity in U.S.

By Diane Lantto
■ The North Wind
Northern Michigan U.

Twelve players leap and run across a large court.

They check each other and sometimes roll to the floor as they try to bomb a cantaloupe-sized ball past a goalie in a mini soccer-style net.

A fast-paced court game with elements of basketball, softball, volleyball and water polo, team handball ranks as the second most popular team sport worldwide, according to the U.S. Team Handball Federation.

"It's a good sport for people with no niche," said Mary Phyl

Dwight, Northern Michigan U.'s team handball coach. The former Olympic team member was involved in a number of the sports team handball is based on, including basketball. But at 5 feet, 7 inches tall, she said she didn't have the speed and aggressiveness to make up for her lack of height.

However, she found her court skills and strong softball throwing arm made her a good team handball player.

The sport is just beginning to take off in the United States despite its popularity in other countries. The International Handball Federation has 4.2 million members in 88 countries.

Twenty-five men and women practice together as NMU's handball club, but compete separately against teams from across the country.

NMU's club members have been nurturing the sport at the grass roots level — the Marquette area public schools are the only ones in the United States Dwight knows of that have permanent team handball mark-

ings on gym floors.

The average final score in team handball is in the low 20s. Most of the action occurs near a six-meter semicircle surrounding the goal.

Only the goalie may stand inside the circle while in possession of the ball, but players do have air rights. Like acrobats, they leap into the air over the circle to shoot the ball, which must be released before they land.

Players can dribble the ball across the court, but it's essentially a fast passing game with a zone defense.

"There are no time outs, and the referee rarely handles the ball," Dwight said. "There's no room to argue with the referee, because the game would go on without you."

SPECIAL TO U.

Baseball

Continued from page 22

the summer.

Some coaches, including Brock, also said they have a problem playing when the student body is gone for the summer. "I don't think you should have any kind of college athletics while school is not in session," Brock said. "It just doesn't make much sense."

Finally, some coaches and administrators are not convinced the extended season would create additional revenue, as the proposal intends. The additional travel and boarding costs would outweigh the turnstile gains, they say. "I think it would price a lot of schools right out of baseball," Brock said.

But Baseball America Editor Allan Simpson said an extended college season would allow pro scouts more time to look at players.

He said the extended season is the next logical step for college baseball. "There are real limitations with 60 games," he said. "Baseball is now the No. 3 college sport. If it ever wants to make realistic gains and gain acceptance nationwide, it is going to have to be played in the summer."

NCAA

Continued from page 22

But Schultz believes with some work this contract is a blessing to the NCAA, and not just from a money standpoint.

"We plan to challenge the membership to come up with creative ways to distribute these funds," he said. "We want to eliminate the comment about the \$400,000 free throw."

Hopefully he means it, and won't let the "big" schools bully the NCAA into letting them reap all the rewards, using the argument that they've kept college athletics running with their names.

Reward schools who make it into the 64-team tournament, but place a cap on the amount of money to be divided up between tournament teams, he said.

The rest of the money generated should be distributed on an equal level to the rest of the NCAA institutions, except for those schools on probation.

Install bonus programs for schools who graduate their athletes on a high ratio based on real figures.

If the NCAA does this or something similar, they will need only ankle boots instead of hip boots to clean up. Because whenever money is involved, there always will be some mess to clean up.

TOYOTA FINANCING

YOUR COLLEGE DEGREE HAS JUST OPENED ANOTHER DOOR.

No money down.*

If you're a four-year college graduate, grad student, or a senior, you're eligible for Toyota's special student finance program.

The plan lets you apply up to six months before, or up to a year after you earn your degree. You don't even need a proven credit history to qualify, and you can take up to 90 days** to begin your payments.

So what'll it be? The all-new value-rich Celica ST, or any other Toyota car or truck?

We've got your choice.

With your degree at hand you've proven you can do something good for yourself. Now, let Toyota do something good for you.

Call 1-800-5-COLLEGE for an informative brochure and the location of your nearest dealer.

"Toyota, I love what you do for me."

*No down payment required provided the borrower's income is not more than the manufacturer's suggested retail price of the vehicle plus factory-installed options and equipment and dealer fees. Finance charges shown above are estimates. For your participating Toyota dealer for full details. Financing available to qualified buyers through Toyota Motor Credit Corporation. **90-day payment option not available on vehicles with a selling price of less than \$10,000 in New Jersey. ©1990 Toyota Motor Sales, U.S.A., Inc.

THE 2 in 1 SECURITY FLASHLIGHT

The Ultimate Self Protection Device for Non-Violent People

Unique!

We consider the Security Flashlight the safest and best security device on the market today. It is both a flashlight and a Security Device

Safe!

The active ingredient is Capsicum Gas containing Ultraviolet dye. It is obtained from South American Leguminous Plants. It's safe & effective.

Effective!

The Capsicum Gas was developed to stop your assailant for up to 20 minutes. But, what's even more important is that the UV dye will remain on the assailant's skin for up to 72 hours. This makes it very easy for positive identification under police UV light.

The Unbeatable Features of this Exclusive Security Flashlight

- Fits in purse or pocket
- One shot stops your assailant
- Fast, effective and easy to use
- 10-12 shots per gas cartridge
- Gas causes no permanent injury
- 2-year Guarantee on cartridge

Special Offer: Order Now (within 30 days) to get The Security Flashlight for only \$19.95, plus we will send you a FREE Mystery Gift. Also, Buy 3 and Get 1 Free! Send Check or Money Order to: SUPERIOR ELECTRONICS, 1469, Summe Drive, Suite 1A, Cincinnati, OH 45231, or call 1-800-635-0901

If you have anorexia or bulimia, you've got our respect.

We know that sounds strange. But over and over again, we hear about other programs that treat individuals with anorexia and bulimia, as though they were children. Forcing them to eat. Taking away personal possessions. Denying them freedom.

At The Renfrew Center, we respect the people who stay here. And that respect is the basis for one of the most innovative, progressive and comprehensive eating disorder

programs in the country. Where people actively participate everyday in their treatment. Planning menus. Setting goals. And working with an expert medical and psychological staff to help gain back their self-respect.

The Renfrew Center, the first residential treatment facility exclusively for women with anorexia and bulimia, is located on 27 secluded acres and accepts most major insurance policies. JCAHO approved.

Children

Continued from page 1

Harger's day usually begins at 6 a.m. and ends at about 1 or 2 a.m., he said.

"I do OK. I think I'm a good father. I'd get married and divorced again just so I could have Dene," Harger said money is the biggest problem he faces on a regular basis.

"I'm broke now. I'm always broke," he said. "I have just enough money to get tuition and the rent paid."

Harger said dating has been a problem because he is always up front with women about his daughter. "They usually don't want to have anything to do with me, and I don't blame them," he said.

Senior Jana Gregory is also a single parent. Gregory, 21, married her freshman year, had her son the summer

before her sophomore year and was divorced her junior year. She now shares custody of her two-year-old son, Ryan, and does her part to raise him while attending school.

Gregory, who is majoring in business communications, has been able to maintain a 3.5 GPA since she had her son. She has received several academic scholarships and a Pell grant, which help her finance her education and living expenses.

Gregory said many people stereotype college students with children as being destitute. "They just don't think I look like a mother," she said. "I just ask them, 'What does a mother look like?'"

Although parenthood has eliminated some academic and social opportunities she has few regrets. "If I had it to do it all over again, I'd wait to get married. But I wouldn't trade Ryan for anything."

U. of Kansas senior Jana Gregory plays with her son Ryan in their front yard.

Prayer

Continued from page 1

The ruling stems from a successful suit filed in 1986 by a Georgia high school student who opposed pre-game prayer. After a series of court rulings declaring the prayer unconstitutional, the U.S. Supreme Court declined to review the case and let the decision go into effect in January 1989.

The U. of Georgia briefly defied the court when UGA President Charles Knapp allowed prayer to be broadcast at the university's season-opening football game, asserting that the ruling only applied to high schools.

"We are going to go ahead with the prayer," Knapp said before the game. "It has become a tradition that is important to the fans."

Knapp quickly backed down after the Georgia state attorney general notified him that the ACLU was preparing a lawsuit, and the university would lose a court battle over the issue.

Georgia was the only one of four affected Southeastern Conference schools to broadcast prayer at the time of the ruling. The U. of Florida and Auburn U. discontinued the prayers this year, and Alabama has not broadcast a pre-game prayer in the last three years.

Neal Callahan of the Red and Black, U. of Georgia contributed to this report.

Crime

Continued from page 2

violent crime that year, the fewest for an institution with at least 20,000 students.

However, only 262 colleges and universities nationwide contributed data for the FBI's annual campus crime report.

"You have to consider that probably 10 percent of all colleges contribute," said Chris Waskaiewicz, an FBI crime report writer.

"You can't make a comparison between colleges. We discourage anything like that."

A correction in New Mexico's data would leave the U. of Medicine and Dentistry in Newark, N.J. at No. 1 in violent crime with 51.

The remaining four most violent campuses, according to the report, are the U. of California, Berkeley with 50 reports of violent crime, Michigan State U. with 46 and Northeastern U. of Massachusetts and the U. of Washington tied with 37.

START YOUR CLIMB TO CAREER SUCCESS THIS SUMMER.

Apply now for six weeks of Army ROTC leadership training. With pay, without obligation.

You'll develop the discipline, confidence, and decisiveness it takes to succeed in any career. And you'll qualify to earn Army officer credentials while you're completing your college studies.

SPRING

Polish prof gives first hand view

Professor Strozewski, a guest professor from Poland teaching in Stevens Point this semester, says he is glad to see the end of Communist rule in Poland as well as other Eastern European nations.

Strozewski will be teaching Philosophy 395: Topics in Intellectual History and also a course that can be taken for credit in Philosophy 395; History 291/391; or Political Science 490; Recent Developments in Poland and Eastern Europe.

Strozewski is currently the Dean of History and Philosophy at Jagellonian University in Krakow Poland. He did some of his studying at Catholic University in Lublin at the time when the present Pope John Paul II was head of the philosophy department there and has taught at a Catholic university in Washington D.C. Strozewski, a respected member of the Polish philosophic community, an avid pianist, speaks many languages fluently including Russian and English.

sian and English.

Strozewski offers students first hand insights and experiences to understand the recent changes that swept Eastern Europe.

"When you talk with someone who's lived through the changes, it seems more real, more believable," remarked one student.

Many members of the Polish community in this area have sat in on one of Strozewski's lectures. They were interested to

find out how everyday life is for the Polish since the reforms have taken place there. Many of the listeners have lived in Poland in the past, have relatives there or have visited Poland recently.

According to Richard Feldman, head of the Philosophy department here at Stevens Point, a few seats are still available in Strozewski's class and all who are interested are welcome to come and listen to his classes.

Fees from page 1

segregated fees for projects is no longer acceptable. "Segregated fees are not supposed to be a slush fund for students, the legislature and certainly not for the UW administration."

The new policy will be developed by the university and students and will be brought to the Board of Regents at a future meeting.

The Building Commission directs UW-System Administration to create a policy providing for program revenue funding of utility system capital costs that does not include as a means of generating that revenue, any new segregated fee.

SGA

From page 3

due to graduation, conflicting schedules, or whatever.

After break, the senate had but 21 members out of a total 30 seats. Efforts were made through the normal means to recruit new senators. Lots of applications went out. Due to any number of reasons only a few came back for the actual interviews. As of this Thursday the senate is still at least three members short and there are no more applicants for those seats.

At the special Tuesday meeting the senate almost couldn't start the meeting because it could not get enough senators to have a quorum, which is one half of the total number of senators plus one.

I won't give you a long speech on how bad it is that our student body can't even muster 30 people to sit on senate even though our senate is one of the most powerful student senates in the nation, giving out over \$600,000 to student groups.

All I can say is when you point the finger of shame at SGA, remember that there are three fingers on that same hand pointing back at you.

RESERVE OFFICERS' TRAINING CORPS

CASH IN ON GOOD GRADES.

Treehaven to offer weekend courses

Six weekend courses focusing on the flora and fauna of northern Wisconsin will be offered during March, April and May at the Treehaven Field Station between Tomahawk and Rhinelander.

Most of them can be taken with or without academic credit from the University of Wisconsin-Stevens Point's College of Natural Resources, which operates the field station. Participants will be invited to stay in station housing facilities.

In addition to weekend offerings, Treehaven will offer an Elderhostel entitled "Field Study of Northern Birds," May 6-11 and repeated May 13-18 for senior citizens.

Also, a series of Wednesday evening sessions on Family Nature Study will be offered June 6, 13, and 20.

The schedule of weekend courses:

"Attracting Backyard Wildlife," March 2 and 3, registration fee of \$25 and room and board for \$29.25.

"Project Wild/Aquatic Wild Workshop," March 9 and 10 registration fee of \$15 and room and board \$29.24.

"Birds of Prey" March 30 and April 1, registration fee of \$40 and room and board \$50.

"Environmental Education for Secondary Teachers," April 27 to 29, registration fee is undergraduate or graduate tuition charges only and room and board \$50.

"Foundations of Natural History," May 11-13 registration fee of \$40 and room and board \$50.

"Trees of Wisconsin," April 18-20, registration fee of \$40 and room and board, \$50.

For more info, or to register call Treehaven at 715-453-4106.

Press here for a great data processing career.

The right time. The right place. State Farm is hiring.

If you're a senior with a data processing, computer science or math background, there may be a very special career opportunity waiting for you in one of the largest corporate data processing facilities in the country.

There are actuarial and auditing jobs open, too.

Blue Chip. Green light. State Farm is one of America's leading insurance companies. Through innovative marketing and a proud service tradition it has become the nation's leading auto and homeowner's insurer, and one of the top life insurance companies in the country.

You'll receive expert training. You'll work on state-of-the-art

data processing equipment. You'll go as far and as fast as you can.

You couldn't have a more solid base to build a career on.

Contact your campus Placement Director about State Farm today.

Or write Ron Prewitt, Assistant Director, Home Office Personnel Relations, One State Farm Plaza, Bloomington, Illinois 61701.

SPORTS

Parker looking for intensity Matmen control conference foes

by Kevin Crary
Sports Editor

Bob Parker is looking for a great finish to the 1989-90 men's basketball season...and he needs intensity in order to find it.

"Everybody needs to be intense," said Parker, "the players, the coaches, and even the fans need to be intense in order for us to have a good finish this season."

The Pointers began the second half of the WSUC schedule with a 89-86 come-from-behind road win over Whitewater on Tuesday night, marking the second time this season Point beat the defending NCAA Division III champs. Point also beat visiting Stout 82-69 and lost to division leading Platteville 77-66 this past week.

"Right now we are playing very good ball," said Parker. "And we will continue to get better as long as our intensity level increases. We played a

very good ball club in Whitewater and beat them on their own court...and we played very tough against Platteville despite losing by eleven points." The Pointer efforts have left Parker with high expectations for the remaining WSUC schedule.

"We're looking to finish at least third in the conference," stated Parker. "We have tremendous leadership in (co-captains) Scott Anderson and Chas Pronschinske and our underclassmen have made a big difference in where we are at this point. We need to continue to play the way we have been and we need a little outside help in order to finish strong."

The outside help Parker is referring to is the crowd. The Pointers will be playing a tough River Falls team this Friday, and in order to revenge their previous 92-84 loss to the Falcons, the Pointers are going to need some support.

"We are looking for some help

from the fans to make it tough on the River Falls team," said Parker. "The reason why it is so tough to win on the road in the WSUC is because of the home fans...When you're at home there's nothing better than a loud and rowdy crowd."

"The game against River Falls this weekend is the biggest game of the season for us. We need a high level of intensity from everyone in order to come out of this one with a win."

The Pointers will also host Superior on Saturday before traveling to Stout on Tuesday.

The UW-Stevens Point athletic department has announced that 100 general admission tickets for the Feb. 16 men's basketball game at Eau Claire are available. Tickets can be reserved by calling 346-3888 or by stopping by room 126 in the Quandt Fieldhouse. Cost is \$4 per ticket.

by Merritt Nenneman
Sports Writer

UW-Platteville was in town on Jan. 23 to engage the Pointer matmen for Residence Hall Day wrestling.

The Pointers set the tone of the meet, attacking their opponents and taking charge of their individual matches. The Pointers only allowed two scores by Platteville for the night, with Tim McMillan stalling Bob Berceau in a 2-2 tie, and Scott Koenigs defeated Dave Carlson 4-0. Other than those two matches, the Pointer domination was complete, with the final score reading UW-SP 33, UW-P 5.

Coach Marty Loy was pleased with the performances of Brian Dobrinski (126) in his 10-8 defeat of one of Platteville's best wrestlers, Earl Ruckdashel, and freshman Steve Neville with a pin in his first ever collegiate match at 190.

"All the hard work we put in over break seemed to have paid off tonight," said Loy. "It would be nice to keep our winning ways going."

The Pointer wrestlers were in Menomonie to battle UW-Stout on Monday, Jan. 29. Coming off their defeat of UW-Platteville, the Pointers were pumped and ready to meet Stout, which they showed in a crushing 42-7 victory. The Point squad attacked early, and kept the pressure on Stout, not even allowing any points by Stout until the 177 lb match. Stout won two matches on the evening, but as Coach Loy admits, the Pointers outmatched the Menomonie team, and it showed in the score.

Mark Friday, February 9, on your calendars because at 7p.m. you will have a chance to help set a record.

It is the Pointer wrestling team's final home match, in fact, their final match before Conference, and has been designated Kids and Team Night. It is also the night that the Pointers hope to set the NCAA record for attendance, but this requires the support of the students of UWSP. Every person counts, so come see the Pointers meet the Warhawks Friday, Feb. 9, at 7 pm.

Point skaters split with Superior, NCHA unbeaten string halted

by Steve Rebne
Sports Writer

The UWSP hockey team suffered its first conference loss of the season when they split a weekend series with UW-Superior Friday and Saturday at Wessman Arena.

The Pointers captured a 5-1 victory Friday night before dropping a 7-2 decision on Saturday.

Saturday's 7-2 upset marked the Pointers' first loss in 19 NCHA games, dating back to Feb. 4, 1989 and their largest margin of defeat since an 8-1 shallocking by Bemidji State on Feb. 28, 1988.

"Our scores weren't indicative of the games that we played," stated head coach Mark Mazoleni. "I honestly felt better about my team after Saturday night's loss than I did after Friday, even though the score doesn't indicate it."

The Pointers outshot their opponents by a margin of 44-21 in Saturday's contest but were unable to shake Superior junior netminder Brett Klowowski for more than two goals.

"They probably had six good scoring opportunities, not including the open net goals, and were able to score on five of them," claimed Coach Mazoleni. "While we put 44 shots

on their net, but came away with only two goals.

"It was just one of those nights for us but you have to give Klowowski and Superior alot of credit."

Stevens Point grabbed a 5-1 victory Friday evening behind the efforts of junior goaltender Kevin Marion, who stopped 32 of 33 shots on goal.

"I was very unhappy with our performance and work ethic after Friday's game," said Mazoleni. "Fortunately, Kevin had an outstanding game, which was really the key factor in the victory."

Paul Caulfield, Craig Porazinski, Jeff Marshall, Tim Hale and Mike Racz each scored one goal to lead the Pointer offensive attack.

The weekend series split leaves Superior at 6-12-1 in the NCHA

and 7-14-1 overall while the Pointers, the nation's top-ranked Division III team, moves to 15-1-2 in the conference and 18-2-2 overall.

Stevens Point (32 pts) maintains its first place position in the NCHA in front of second place Bemidji State (21 pts), followed by Eau Claire and Mankato State (20 pts), River Falls (19 pts), Superior (15 pts) and St. Scholastica (3 pts).

Stevens Point can clinch their third consecutive regular season title with a sweep over UW-River Falls this weekend. Face-off is set for 7:35pm on Friday and Saturday at K.B. Willett Arena.

Intramurals gets students involved

by Ron Wirtz
Contributor

Often students have trouble finding ways to become an active social member on the university campus. Everyone knows a few people, but where can the student meet new people outside the classroom in a non-bar setting?

Intramurals presents one possibility to this question. Though it isn't a cure-all, it allows many people to come together to enjoy something that most of us have at least some interest in -- sports.

In a recent interview with Rick Menting, an intramural supervisor, he stated that there were many advantages and benefits which intramurals had to offer.

"Intramurals offers a wide variety of benefits for the student--meet new people, you get good exercise, and you are able to take advantage of the facilities here on campus." Not everyone wishes for an extremely competitive atmosphere, but Menting adds, "that most are satisfied with competition levels."

Having many different activities to choose from (e.g. basketball, badminton, innertube water polo) most people are able to find something compatible with their own individual com-

petitiveness. Menting commented that in general, "activities which were coed tended to be more relaxed, and not as intense as activities which had all male or all female teams." As a footnote, however, he noted that, "everyone's intense during playoffs."

Intramurals also offers programs for those not athletically inclined yet still desiring some exercise. Their aerobics program is very popular with students and offers both a low impact workout for beginners as well as a high impact workout for those who desire more strenuous activity.

Though intramurals may not be for everyone, it offers obvious advantages which can help the student become more involved within the campus.

Pointers open track season

The UW-Stevens Point track teams kicked off the 1990 indoor season last week at the UW-Stout Invitational. The women's team finished second (83 points) behind St. Thomas (120). The men ended up in third place (66) behind Whitewater (138) and Eau Claire (147.5).

"This was an excellent meet and gave our young people the chance to see what it is going to take to compete in the WSUC and at the college level," said coach Rick Witt. "All of the teams who were at the meet have had at least one meet previous and some of them had

been in two, so we were a little behind in our training as compared to the other schools."

First place finishers for the men were: Mike Cummings, pole vault (14-6); Kim Lasecki, 5000 M (15:20.95); Dean Bryan, 400 M (50.72); Chris Larsen, 200 M hurdles (25.99).

Rod Garcia captured Point's lone second place finish in the 1500 M (4:01.19), and Scott Johnson was third in the 800 M (2:00.19).

Top women finishers were: Amy Voigt, 400 M (1:00.28); Beth Weiland, 600 M (1:43.61);

Beth Mears, shot put (43-6); Be-

ckie Sherwood, 300 M (43.88).

Second place finishers were Weiland in the 1000 M (3:10.53), Sara Salaj in the long jump and Sue Collar in the high jump. Sarah Bonnemann finished third in the triple jump.

Intramural Notes

The entry deadline for "Director's League" Intramural basketball is Friday, Feb. 2, at 12 noon. Entry fee is \$50.

A singles racquetball tournament will be held this weekend. Entry deadline is 12 noon on Friday, Feb. 2. Games will begin on Saturday at 11 a.m. and will continue on Sunday if needed.

Floor hockey and intertube water polo will be cancelled this semester due to the construction of the new complex.

Tae Kwon Do club sponsors self defense class

by Eric Meyer
Contributor

The UWSP Tae Kwon Do Club is sponsoring an eight week self defense class from February 28-April 25.

The class will meet Wednesday evenings (excluding April 4th) from 6-8 p.m. in the Berg Gym, and is open to anyone 10 years of age or older.

The club is requesting that each participant make a \$20 contribution to the Wisconsin River Lions Club. This money will be used by the Lions Club to help handicapped people.

Thieu Nguyen, Plover, a third degree Black Belt who is the instructor for the group, will be leading the class and will be as-

sisted by his Black Belt students. Nguyen has taught Tae Kwon Do for six years in the

Stevens Point area and has spent several weeks of the past two summers in Los Angeles teaching self defense to members of the Los Angeles Guardian Angels.

According to Nguyen, the purpose of the course is to increase the effectiveness of class participants when facing an unavoidable confrontation with an

attacker. "We're going to cover knife defense, self defense techniques for women, how to handle bar situations, everything. I think people will enjoy it."

People who have questions or who would like to enroll in the class should contact Nguyen at 341-5224 before February 20.

Lady Pointers dominate Titans

by Jeremy Schabow
Sports Writer

Awesome...
Powerful...
No competition...

These are just a few of the words to describe the characteristics of the Lady Pointers Women's basketball team's

smashing success on January 23, as they plowed over Oshkosh without even giving them a chance. The final score stood at 71-43. A win was greatly needed for the team and head coach Shirley Egner along with the lady athletes, seemed nothing less than ecstatic.

"This time we were the ones who smoked their little behinds! We held UW-Oshkosh 12 in the first half and took them right out of the game. It definitely was a total team effort - just about everybody scored and that's terrific. A dynamic and superb performance really came through from a lot of the players. I am proud of all of them. They deserved it," said Egner.

Three of the outstanding individuals that made ultimate key contributions were Amy Felauer, Tricia Fekete and Kate Peterson. Felauer took control of 17 points and 15 rebounds, Fekete earned 23 points and Peterson hit a big three-point basket as Oshkosh was making a run at the team. Many of the other women picked up the slack and did a beautiful job.

"The only improvement we could have made," said Egner, "was the fact that we only shot 63% from the free throw line. We are better than that and should show it."

A main component to the reason why Point defeated Oshkosh with such enormous strength, is because of the team's strategy. The players followed out directly and efficiently what had to be done and the result produced an overwhelming win. When the Lady Pointers played Oshkosh a couple weeks ago, it had been their worst loss that season with the opponents scoring 16 more points. This game proved what they were made of when the difference was 28 points.

"It really was a huge win for us. Everyone had a smile from ear to ear," said Egner.

The top spot in the conference is now held by Eau Claire and second place is anyone's game. Along with UWSP, Whitewater, Platteville, Oshkosh, and River Falls are the other competitors.

The Lady Pointers next games are against UW-Stout and Superior on February 1 and February 2.

Point swimmers erupt at Coe Invite

by Tom Woyte
Sports Writer

The Coe College Swimming Invitational, held in Cedar Rapids, Iowa, was perhaps THE sporting event of the weekend (well it blew away stupor bowl XXIV on the old adrenaline scale, anyway.) And for the UW-Stevens Point swim teams, it was indeed a meet to remember.

Paul Kramer set the stage for a jammin' weekend with a classic duet/dual air jam on the bulkhead between pool and diving well. Kramer battled it out with a Minnesota swimmer to the tune of Van Halen. Based on the reliable applause whistle scream scale, the unanimous recipient of the '90 Coe College Air Jam Title was UWSP's very own Paul Kramer-breaststroke/air-jam aficionado. The tune was "Eruption," a word that pretty much sums up this weekend, from pre-meet presentation to swim competition that ensued.

The Lady Pointers, affectionately known as the UWSP Angelfish, plunged into the nine team Invitational with a National Qualifying (NQ) 800 yard freestyle relay. Tiffany Hubbard, Anne Watson, Debby Haddler, and Ann Benson swam to an 8:27.9 clocking. Nino Pisciotta, Dave Martorano, Sam Siegel, and Juan Cabrera followed suit with a 7:16 NQ time in the men's race.

Hubbard swamped the competition in the 200 Individual Medley (IM) with a 2:16.3. Pisciotta (1:58.95) and Cabrera (1:59.18) both came through with season best NQ times. In the 200 breaststroke, Watson's NQ 2:40.5 brought a smile, as did Matt Boyce's 2:15.33. UWSP was out front in the backstroke events with Pisciotta's winning NQ time of 2:00.63 in the 200, Tim

Lehman's 2:13.2, and Hubbard's 1:04.28 in the 100.

The 200 free relay team of Kevin Parham, Tom Woyte, Martorano, and Cabrera splashed to a winning time of 1:28.50. Kathy Fuller, Caroline McCormack, Benson, and Hubbard touched in a NQ 1:48.6. Parham swam to a victory in the 50 freestyle (22.11).

Later that day...it was lights out (TOTAL blackout no less) at the Coe pool before the finals of the women's 200 freestyle. A brief, reflective silence was shattered by a snappy cheer from Mankato State's out of a dark corner of the pool deck came the chant: "WHO FOR GOT THEIR BILL!" Five minutes later the lights flickered on and there appeared, like a dream before the crowd a shimmering pool...and another booming cheer from Mankato's corner: "We wanted a BUD light!"

According to head coach Red Blair, the incident had little dimming effect on his swimmer's performances: "There were some touches of brilliance (parody the pun) and there were

some mediocre swims." So the day saw a few ILLUMinating swims, you could say out of some "dark horses"? Right.

A couple of those brilliant swims came from John Pearson, who Blair thought "would not be in the running for a spot on our Conference team." With a 5:16.1 500 free, 19.39 mile and 1:56.1 split on the 800 free relay, Pearson earned his conference nomination. Anne Watson sparked some surprising swims to earn herself a conference nomination in the 500 (5:31.1), 200 breast (2:40.3), and 200 free (2:06.3).

Other outstanding swims turned in by the men includes Keith Marks (58.8 butterfly), Siegel (49.54 100 free), Martorano in the freestyle relays the 200 and 400 medley relay team of Pisciotta, Boyce, Cabrera, and Parham (1:39.2 3:34.6 NQ times), Lehmann, Jeff Davis, Jerry Curtin, and Martorano (1:45.84 Medley Relay), Cabrera in the 400 I.M. (4:17.0) and 200 butterfly (1:53.5).

from page 13

John Below gutted it out in the distance events (18:15, 5:11-500 yard, mile), as did Sam Siegel, and Bill Jetzer (double 5:04.2 and 18:13) while many a swimmer and spectator napped, lunched, or counted laps from the comfort of poolside chairs.

Additional highlights for the women include: 400 freestyle relay of Benson, Hadler, McCormack, and Hubbard in a NQ time of 3:57.9, Benson (59.7 100 free, Kim DeCoster and Pam Gifford in the distance Hubbard in the 100 fly (1:02.4) and 200 free (2:02.8), Kelly Horn in the backstroke, Fuller (27.7 50 free), and McCormack and Fullmer (1:01.6 and 1:02.0 100 free).

UWSP divers Scott Thoma and Jay Stevens took the stage in the one and three meter diving events. These divers were in top form as they jump-spin-twist-drop-ripped into the water for the panel of diving judges. Sixth and seventh place awards went to Stevens and Thoma, respectively, while Thoma rose to 4th on the 3 meter board.

"We swam pretty darn good! The women had their best meet and times are coming down, especially with the distance people. The sprinters need more rest but we are on track for a great end of the year."

"Our men could have scored more points by pre-placing them evenly in their events. But (1st place) Milwaukee swam really well and I'm not sure we could have beaten them even

with a different line-up." It was an important meet, Blair said, because it showed him how some of our swimmers respond to a couple days rest.

"I had to find out about some men in certain events to see who will make our conference team," Blair added, "there will be some tough decisions to make, but no matter who is on

the conference squad, everyone will go to the Conference championships... we work as a team and every swimmer has contributed to the success of this team. A few strong individuals won't win a championship for us, but a strong team will. And you can bet that come February 22, the strength of the UWSP Pointers will be the cause of

some sweaty palms at the La-Crosse pool.

"We have nothing to lose," Blair said, "Eau Claire has everything to lose; and we're going after the conference title!"

The Pointer men invite you to attend the Dogfish dual with the UW-Madison JV squad Friday, February 2 at 4:30 pm.
