Student user fees proposed for Health Center

by Maria Hendrickson
Staff Writer

Increased user fees may become necessary for students using the UWSP Health Center.

Unlike most health services, UWSP currently offers health care for the price of a single annual fee rather than various user fees.

"In September we had a 33 percent increase in student use despite an enrollment decline," said the director of UWSP's Health Center, Dr. Bill Hettler. Hettler says studies are currently being done to find out why there doesn't seem to be any correlation between enrollment numbers and student use.

If usage continues to escalate and enrollment continues to decline or remains static, the health center revenue must be either increased or the services cut.

One campus issue: "Our campus (health service) is the most comprehensive after large scale. More student money will be put toward clerical costs rather than directly into health care."

Hettler stressed the importance of student input and stated, "We're here to serve the students. All those interested are encouraged to attend the Student Health Advisory Committee's next meeting on Dec. 6 at noon in the Health Center lobby.

There are minimal user fees already charged for long-term medication usage such as those to treat diabetes, epilepsy, and acne. The health center expects the annual fee of every student would cover the total cost.

Birth control pills also require a minimal fee, but according to Dr. Hettler the medication is offered at such a reduced price that the birth control pill alone will save UWSP students over $100,000 a year. The examination and consultation is covered by the annual fee.

The first analysis of an abnormal pap test is also currently covered by the service fee. According to Hettler, this analysis could be an indication of a serious problem which could cost as much as $300 to run. If a comparable user fee were required for services such as these, every student would need individual health insurance policies to cover the cost.

If Health Services were decreased on campus to cover the 'escalating cost, students would be forced to seek health care in the private sector. The health center estimates that UWSP's annual service fee would only cover an initial visit, one lab test, and a follow-up visit at most private clinics.

Tire burning offered as fuel alternative

by Amanda Scott
Contributor

An old car ends up in the junkyard but its tires may end up at UWSP. According to Paul Koziar, Department of Natural Resources (DNR) manager of the Tire Cleanup Program, there are over 20 million tires stock-piled in Wisconsin.

Trying to get rid of the tires is a big problem," said Koziar. "In fact, starting in 1995, landfills of tires will be banned. Our options are limited."

The UWSP Boiler Plant will be testing to see if tire chips can be burned with coal for the safest environmental waste of tires.

The idea of using tires as fuel originated in Madison, and test burns were proposed for UWSP, UW-Whitewater and several other state facilities. University officials here have not taken an official position on the proposal.

A public forum on the issue was held Tuesday night, Nov. 27. Four specialists from state agencies made presentations. Besides Koziar, Mark Harder, environmental engineer in the permit section of DNR Bureau of Air Pollution Control; Joe Ancel, environmental engineer for the Wisconsin Rapids office of DNR; and Craig Weiss, acting director of the Bureau of Engineering and Energy Management for the Department of Administration were present.

Burning of tire chips combined with coal is a new approach, initiated in 1985. Manitowoc Public Utility, Wisconsin Power and Light Company, and Consolidated Papers in Whiting, have all had success in using this new energy source.

Weiss, said, "It is cheaper to burn tires rather than coal. To burn coal, the state has to purchase oil from Kentucky or Tennessee. Not as much waste is needed to burn tires. So the state saves tax dollars and we also save landfill." Weiss said, "Right now, we're just testing the plant," said Weiss. "Testing will begin as soon as possible, and will end in May."

The debate over what to do with the vacant space around the Center continues. Dr. Herbert Brush, forestry professor, has drawn up five landscaping options for the one and a third acre.

His plans range from one extreme, 104 available parking spaces, to the other extreme, strictly landscaping with handicap and service vehicle parking only.

According to Brush, advocates of increased parking want to attract patrons for the Center from the surrounding community. Parking in close proximity to the facilities may increase the available space.

The debate "we've received from students supports this," said Schoenfeld. "By no means is the decision limited to our choice," commented Schoenfeld. The University Affairs Committee consisting of faculty, students, and staff has yet to arrive at a decision. The Faculty Senate's choice is pending also.

"The Chancellor will make the final decision sometime after the first of the year," said Schoenfeld.

Brush noted, "The final decision may take awhile, but hopefully we can begin planting in the spring."
Freshman assaulted by Jodi Ott

News Editor

An 18-year-old female resident of Burroughs Hall was assaul ted Friday, Nov. 17, as she was walking on the sidewalk to the north of the Library (before the College of Natural Resource building and south of the Science building).

The UWSP student had left a party at approximately 10:30 p.m. and was walking alone when a man approached her from the back. The assailant grabbed from around the back and had a hold on her neck. He began to punch her in the face. He probably hit me about 15 times in the face, enough times that my eyes were swollen shut the next day," said the victim.

She felt that he was not after her money or sexually assaul ting her. "He just grabbed me and started beating me up. I didn't say anything, maybe because I didn't know who I was," she said.

She said that she remembers hearing people in the background when the man threw her down on the ground and ran away. She went back to her hall and called the Stevens Point Police. The police have contacted UWSP Protective Services and they, in turn, have contacted her.

The girl is about 5'5" and describes her attacker as a few inches taller. Since he was behind her, that is all she can recall.

"I wish that people would stress more the necessity of safety and not walking alone. I use the buddy system now," said the student.

She also attributes part of the assault to being in a poorly lit area but considers it to have been stupid to be alone and going away from the main sidewalk.

"I don't know what is happening but I'm the third girl from Burroughs Hall that something has happened to," she said.

A female freshman Burroughs Hall resident reported being assaulted in Parking Lot 1 around 2 a.m. on Sept. 29. She said she was attacked by two men in black masks that knew her by name.

On Wednesday, Nov. 7, a female freshman Burroughs Hall resident was assaulted in Parking Lot P by one man wearing a ski mask. He had mentioned her ex-boyfriend's name to her.

Workshop for the birds

"Don't throw that away, it's for the birds," a workshop on feeding birders, will be held Saturday at the Allouez Field Station, 2540 Pickerel Creek Rd., Tomahawk.

The session, from 1 to 3 p.m., will include conduction of bird feeders from recyclable materials. Participants are asked to bring recyclable containers such as pie plates, soda bottles, milk cartons, coffee cans. There will be discussions on how to feed birds and how to attract them to backyards.

To pre-register for the workshop, which costs $1.50 per person, contact Treehaven by calling (715) 453-1106.

Notice

Yes, we do know what the new enhancement center looks like, and we apologize to the HFERA offices for not having the proper photo on the Nov. 15th issue front page for the improper date. Those responsible have been sacked.

NEWS

SGA Calendar update

At the Nov. 15 meeting:
• Brian DeCooch, College of Natural Resources, was approved as senator.
• The S.H.A.P.E.R. organization was approved as a new UWSP student organization.
• Senate approved option five for green space, which allows for a significant amount of university property to be allotted as greenspace and the available parking spaces marked for handicapped usage only.

Funding:
• Women's Resource Center was awarded $594 in additional funding at Senate on Nov. 8. This money was not requested by the Center and was allocated out of the extra amount unused during the revision process.
• This act prompted the Wildlife Society to address the matter with a petition presented to the senate. Voting on reconsidering the allocation has been postponed until Nov. 29 in order to give senators and other organizations to become more informed of the situation.

• United Brothers and Sisters were given $83 for travel expenses to a conference in Madison.
• UWSP Intramurals was awarded $59,453 for the continuation and maintenance of the university intramural program for the fiscal year 1994.

Corps Resolution:
• Passed by senate, this amended resolution states that SGA supports ROTC except in its view on discrimination based on sexual orientation.

• While supporting the UWSP ROTC program and its vocational opportunities for students, the SGA Legislative Affairs Committee will begin a letter writing/phone campaign to the U.S. Congress voicing opposition to the discriminating policy taken by the Department of Defense concerning sexual orientation.

This week the SGA senate will meet on Thursday, Nov. 29, at 7:15 p.m. in the Wright Lounge.

The agenda includes:
• "In the Name of Students" is up for its second reading and upon passage will recommend to the facilities naming committee to dedicate the multipurpose room of the Health Enhancement Center to the students of UWSP in recognition of their contributions to the facility.

Up for finance approval:
• Psychology Club was recommended to be zero funded for travel expenses to a conference.
• The Performing Arts Series is up for approval for its 1991-92 annual budget.

Mid-Americans, a vocal jazz group, is up for funding of $500 for travel to a vocal jazz festival.

Future SGA Sponsored Programs:
• Don't Stay a Victim, Report Sexual Assault! is up for its second reading and upon passage will recommend to the facilities naming committee to dedicate the multipurpose room of the Health Enhancement Center to the students of UWSP in recognition of their contributions to the facility.

THE BIG PICTURE

• John Major won England's race to succeed Margaret Thatcher as new Prime Minister. Major, who was a high school dropout, was a high ranking official in the English government. He was supported by Thatcher, who helped him in his previous political climb.

Thatcher backed out of a bid for re-election after polls came out showing that she faced a humbling defeat. Thatcher's popularity had been declining due to dissatisfaction over tax policies and high inflation in England.

• In Poland's first popular election, Lech Walesa led all candidates with 40% of the vote, followed by Stanislaw Tymiński, 23%. The current Prime Minister Tadeusz Mazowiecki, 18%. Because no candidate won a majority of the votes, Walesa and Tymiński will have a run-off election on Dec. 9.

Stanislaw is a self-made millionaire who returned to Poland last year after being in Canada for 21 years. Walesa is reportedly going to Mazowiecki backers asking for their support. Mazowiecki is also planning to resign as prime minister in the face of his defeat.

• New evidence has been found in the case that convicted Oklahoma resident Mark Petersen, on Nov. 29 of sexually assaulting Sarah, a woman reportedly possessing 46 personal items.

A letter by Sheila Car-michael, former Winnebago County welfare program coordinator, alleged that Gerald Reeves, a key witness to the prosecution, had a sexual relationship with Sarah for about a year. Petersen's defense attorney Mary Lou Robinson is confident this will change the verdict "because I think it (the case) is pregnant with error."

• Because of a softened economy, nervous retailers, and conservative consumers, it is being predicted that many stores are downsizing inventories and cutting prices early in the Christmas shopping season.

Shoppers are encouraged to shop early because many stores will have low inventories by the second week in December as merchants prepare for what they believe will be the worst retail Christmas for them in years.

• Junk bond king Michael Milken was sentenced to 10 years in prison and ordered to pay more than $600 million in fines for his role in the largest Wall Street scandal in history. The pioneer financier used high yield junk bonds to raise billions of dollars, but also helped many hostile corporate takeovere that characterized the 1980s. After the fines imposed on Milken, his estimated net worth is still $700 million. He is eligible for parole in three years.

• The federal government has already run a $31.5 billion deficit for the first month of the fiscal year which started in October. This increase is largely due to the build-up in the Persian Gulf, and enforces the belief that Milken's deficit will surpass last year's red ink, even after the lengthy budget, compromise negotiations.

• Jan. 1 is now being eyed as the US deadline for Iraq to get out of Kuwait. The US is seeking a United Nations resolution which would give them the authority to use force after this date.

The US also received a big boost when five permanent members of the UN Security Council (China, Soviet Union, United Kingdom, France, and the US) agreed Monday to draft a resolution authorizing the use of "all necessary means" to force Iraq out of Kuwait after this deadline.

It has been confirmed that Japanese business giant Matsushita Electric Industrial Co. will buy entertainment giant MCA Inc., which includes Universal Studios, for $6.6 billion.

• While hunting near Spor on, WI, a 14-year-old boy was accidentally shot in the neck by a companion. Unbelievably, he split the bullet out and is expected to be fine.

I've always wondered how influential role models can be, and what they play in the development of kids and young adults. By today's standards I hope it isn't much. It seems people used to have good role models to follow. Politicians, athletes, actors, the clergy—there seemed to be more of a sense of integrity among these people than the people filling these roles today. A quick gander at some of the big names that frequently used to fill that frequent our attention you own, Bush, Dice Clay, than life figures—people who country. The whole budget new age, or inclination Computing Services sits at focal point of my life. Since I live in Stevens Point year around, I am rather aware of when services on campus are offered on weekends or during vacation times. It has occurred to me more than once, that everything seems to shut down for the weekend.

Why is this? More to the point, why do all the computer labs close on Friday evening at 4:00 p.m.? Countless times I have been sitting in the lab intentently working away to be kicked out for closing. Over break periods hours are cut back dramatically. Maybe the $4.00 an hour salary of one lab assistant is a serious financial hardship.

It seems to me that there are enough students on this campus to warrant keeping at least one lab open for a few more hours on Friday and Saturday evenings. As best I can tell, labs are always partially full at closing time on Friday and Saturday. I remember several years ago

People need to start looking for good examples on the personal level, closer to home, instead of on the societal level.

Buddy Holly's, and Jimmy Stewart's of our nation. Are there any out there? Potentially I think there are. However, the people that could qualify have grown up in a materialistic, selfish world, and have become products of this prevalent "me" generation.

Look at former junk bond king Michael Milken. In one year alone, he made $550 million. However, he made this money through hostile corporate takeovers, financially ruining thousands of people from the assembly lines to the executive offices. He had a brillian business mind. He used it for greed and excess.

Look at Buster Douglas, who stunned the sporting world by pulling off one of the biggest upsets in sports history by knock­ out Mike Tyson. A true underdog had won. God be praised. Maybe things in the sporting world weren't so terrible after all.

Computer viruses make students sick

by Eric Meyer
Copy Editor

I consider myself to fit the mold of the traditional apathetic college student. For almost four years now, I've walked the halls of UWSP, letting every little ruffle my feathers to any significant degree. I simply do not have the time, energy, or inclination to make waves or to get involved. But over since my arrival at UWSP, something has been bothering me. Unfortunately, Academic Computing Services sits at focal point of my life. Since I live in Stevens Point year around, I am rather aware of when services on campus are offered on weekends or during vacation times. It has occurred to me more than once, that everything seems to shut down for the weekend.

Why is this? More to the point, why do all the computer labs close on Friday evening at 4:00 p.m.? Countless times I have been sitting in the lab intentently working away to be kicked out for closing. Over break periods hours are cut back dramatically. Maybe the $4.00 an hour salary of one lab assistant is a serious financial hardship.

It seems to me that there are enough students on this campus to warrant keeping at least one lab open for a few more hours on Friday and Saturday evenings. As best I can tell, labs are always partially full at closing time on Friday and Saturday. I remember several years ago

when all of the labs were open during the day on weekends. Now it is like pulling teeth to figure out what labs will be open during the day and then none of them are open in the evening. Even if they are open, frequently all the doors to the buildings are locked. I can't win! I wanted to get my facts straight before I wrote this letter so I went to the LRC computing lab to get a copy of the hours for the semester. Unfortunately the lab assistant, for whatever reason, was unable to provide me with one. I guess I can't blame them. If I offered a service with such bankers hours I wouldn't open state hours either.

I would also like to know before I arrive at the lab when there is a class there. Include this in a schedule of hours if you ever put one out please.

Why is it that so many computers and printers are broken on campus? I get a good chuckle at the opening of the new lab in the LRC recently. I walked into the undersized lab of Regents. The Printer is free to all tuition paying students. Not students who's time is to price is $10 per academic year. Second Class Postage is paid at Stevens Point, WI.

POSTMASTER: Send change of address to Pointer, 104 Gym, UWS, Stevens Point, WI, 54481. The Pointer is written and edited by the Pointer Staff which is comprised of UWSP students who are solely responsible for its editorial content and policy.

ACID RAIN
Wisconsin paper mills and utilities reduced sulfur dioxide an average of 40 percent during the last decade in part due to requirements authorized by a 1986 Wisconsin acid rain control law. The law was developed in response to research the state conducted in the 1980s. Studies showed that 1,050 of the state's 15,000 natural lakes were sensitive to acid rain, and that Wisconsin sources emitted half of the pollutants contributing to acid rain falling here.

Getting sulfur dioxide out of Wisconsin's air has benefited public health. At Wisconsin's Long Lake, the difference in the number of tadpoles in 1989 and 1991 was significant, Theiler said. "But we're glad to see that Wisconsin's lead on protecting the ozone layer was adopted nationally."

TOXIC AIR POLLUTANTS WILL GET ATTENTION
Wisconsin acted ahead of the federal government in 1988 to limit the emissions of toxic air pollutants, Theiler said. Toxic air pollutants can poison living organisms at certain levels.

Peter Bolovici, DNR's Bureau of Air Management director, said he prefers the federal Clean Air Act, which gives states more flexibility in deciding how to meet federal requirements. Wisconsin's new Clean Air Act was passed in March 1990; the federal Clean Air Act was signed into law in 1970. The federal Clean Air Act required states to develop air quality management plans to cut pollutant emissions. Wisconsin's plan was approved by the U.S. Environmental Protection Agency in January 1991.

"We also have some new problems to tackle, including air pollution that is a global impact," Besadny said. "Our nation, with all states working together, must strive to protect the Earth's atmosphere not just for ourselves, but for people and natural resources worldwide.

The revised Clean Air Act now targets U.S. contributions to global air quality concerns such as acid rain and depletion of the upper atmosphere's ozone layer. Wisconsin laws already address these problems, said Don Thiel, director of the department's Bureau of Air Management.

The federal government took some cues from leaders like Wisconsin to extend important pollution controls nationally," Thiel said.

Here's a closer look at how Wisconsin air pollution regulations stand compared to new federal requirements:

The revised Clean Air Act now targets U.S. contributions to global air quality concerns such as acid rain and depletion of the upper atmosphere's ozone layer. Wisconsin laws already address these problems, said Don Thiel, director of the department's Bureau of Air Management.

The federal government took some cues from leaders like Wisconsin to extend important pollution controls nationally," Thiel said.

Here's a closer look at how Wisconsin air pollution regulations stand compared to new federal requirements:
Museum of Natural History furnishes new attraction

A large exhibit depicting a woodland scene of the past has been installed at UWSP's Museum of Natural History. "Central Wisconsin 200 Years Ago" was designed and built by Ed Marks, the museum's curator of education, and his students. The exhibit of numerous plant and animal species, including timber wolves, fishing a turkey, is accompanied by a 20-minute videotape, "Wolf Pack."

Viewers may sit in chairs adjacent to the display and watch the film about a family of wolves, produced by the National Film Board of Canada. Surrounding the seating area are mounts of deer, caribou, moose and bison, which were the prey of the free-ranging wolves before their natural habitat was destroyed.

Serving as scientific advisors to the project, were Charles White, and Robert Freckmann, of the biology faculty. Because of the faculty's modest budget, specimens already available in the museum's collection are often used for new displays. "We build exhibits around what we already have," Mark says.

"We wanted to illustrate that, two hundred years ago, wolves ranged throughout the United States, but now they are an endangered species. This is not just a 'wolf exhibit;' however, it is the authentic depiction of an ecosystem and how it has been changed over time."

The longer one looks at the display, the more animals one sees. It contains such specimens as deer, martien, bobcat, squirrel, ruffed grouse, turtle and snakes, plus numerous trees, flowers, mosses and grasses. Hundreds of hours were devoted to the construction of this scene of "old-growth forest." It took Marks more than two weeks just to paint the backdrop.

He believes it is important for everyone to realize how the destruction of forest habitat has affected everyone. Humankind must look at the "big picture" when making environmental decisions.

Wisconsin fishing

If you love wild land and clean-flowing streams, Wisconsin is a great place to live. But did you know a lot of these special places you love to visit only exist because of work your local fisheries manager does? Fisheries workers do more than set nets and count and squeeze fish to spawn them. They buy land along streams and spring ponds to protect entire watersheds and they work to acquire access for sport fishermen and hunters.

They build parking lots, plant trees, and plan and construct fishing piers for people with disabilities. They build fences and Mile crossing, working with farmers to keep livestock out of the rivers.

I'm not talking about tiny parcels of land here. Max Johnson, the fisheries manager in Antigo, has six major parcels of land on five streams, and spring ponds that total 1,500 acres, including the famous Wolf River. He's spent 25 years protecting the water in these counties and he knows every twist and turn in dozens of different trout streams.

Max and 18 other area fisheries managers like him throughout the state, take great pride in those lands that have been preserved through purchase.

They get satisfaction in seeing a family picking blackberries in the woods.

CLEAN & GREEN

by Paul C. Easton

Outdoor Writer

Most people do not see their laundry as having an impact on the environment. It is simply a chore which needs to be done. For example, there are not many anglers who see a relationship between their catch and how they do their laundry, but there is.

Phosphates found in detergents have been raising havoc on our lakes and streams for decades. Phosphates are used in laundry detergents to soften water and to keep dirt from being redeposited on clothes. The problem with them is that when they eventually make their way into a lake or stream they over fertilize the water, causing an "algal bloom." As the algae dies and decays, the bacteria which breaks it down uses up large amounts of oxygen.

Depleted of oxygen, the lake or stream can no longer support all of its plant and animal life and the ecological balance is disrupted.

Ultimately the lake may support so little life that it is classified as being "dead." Legislation was passed in the '60s limiting phosphates in detergents to protect our water resources; however, because of the sheer volume of cleaners used by Americans, we still have phosphorus from detergents being emptied into our lakes and streams.

If you fish, swim, or drink water you are obligated to help keep our water resources clean, for your own health if nothing else. Try to avoid detergents that contain phosphates.

doses or exposure periods, or cause harm through chemical reactions.

The new Clean Air Act regulates 189 toxic air pollutants, mostly from large emitters, which discharge 10 tons a year or more of a specific contaminant or 25 tons a year of combined contaminants.

Wisconsin's regulations cover small as well as large emitters. "We're uncertain at this time how the federal law will affect state regulations, but it's positive that Congress and the President recognized the importance of reducing toxic air pollutants," Theiler said.

OZONE CLEANUP EFFORTS WILL BE REDOUBL ED IN SOUTH-EAST WISCONSIN

Wisconsin has the latest version of the nation's clean air law will have a "significant impact on southeast Wisconsin," where ground-level ozone problems have persisted for years.

Ground-level ozone is produced when volatile organic compounds and nitrogen oxides react in sunlight, forming an invisible gas that is harmful to breathe. The following action likely will be taken in southeast Wisconsin over the next decade to reduce ozone.

"Volatile organic compound emissions must be reduced three percent a year starting in 1991. Reductions will come from a variety of sources, including automobiles, industries and commercial sources.

*Most gasoline stations in the region will need to install special vapor recovery devices to recycle gas fumes when vehicles are refueled.

*The region's vehicle emissions program may have to be expanded into Sheboygan, Walworth, Manitowoc, and Kenosha counties.

*Criteria pollutants must be decreased more than 10 percent a year through 1994 and 1995.

*More cleanup actions will be assigned based on those contributions. The $72 million study will be completed in 1991.

Clean from page 7

containing phosphates. They are usually listed as phosphates in the form of phosphates."

Although most liquid detergents do not contain phosphates, they are usually packaged in plastic containers which are not recycled and they are rather expensive. A simple and inexpensive alternative is to make your own. GREENPEACE suggests the following recipe:

Add 1/3 C (80 J) washing soda (sodium carbonate) to water and mix. Add clothes. Add 1 1/2 C (375ml) of soap. If the water is hard, add 1/4 C (50 ml) soda or 1/4 C (50 ml) vinegar during the 1st rinse.

When doing your laundry always try to wash with a full load to get the most out of the energy used. Use a warm water wash and cold water rinse to save more energy (90 percent of the energy used in washing clothes is used to heat water); temperature doesn't affect cleaning.

I hope that the above suggestions help you become a better member of the biotic community. If you have any questions or comments please drop them off at the Police Office. Until next week, stay clean and green.

Fishing from page 7

berries along a public fishery area, while in the background a fly fisherman standing hip-deep in grueling clear water, catches a beautifully spotted native brook trout.

Fisheries managers take special pride in protecting spring ponds and springs. They know the best protection for these special spots is to keep them for public fishing areas. This ensures that their cold, oxygen-bearing waters will never be dammed or misused, and that they will continue to be the life-blood of the trout stocks they become.

Please remember that your fishing license dollars do far more than raise fish for stocking. Fisheries management means more than just fish -- it means protecting the land and habitat around the water too.

**UWSP English class publishes book**

"Portage County Shadows" highlights community legends

A book on the "neglected" side of life in this community during the past 150 years goes on sale Nov. 23.

The 107-page paperback is entitled "Portage County Shadows" and is the work of an English class at UWSP.

The editor, Janet Menzel Jurgella, 1965 Main St., proposed development of the publication, then compiled the manuscript based on stories by seven area writers.

The book is a "shaky" side of the county according to Jurgella, who describes most of the material as "lighted and humorous.

The authors and their submissions:

- Wendell Nelson, who spot-lighted Amelia Berg, nemesis of local law enforcement officials at the turn of the century in her role as a "Madame Extravagant.

- Janis Ishower, who created the "Duet," about an intense relationship between the Wisconsin River and a river pilot.

- George Rodgers, who penned three pieces: "Strong's Ambition," about the land speculator, Moses Strong, for whom a major Stevens Point street is named even though he once bribed the state legislature; "The Law of Honor," about killings here in the 1880's as the result of a love triangle; and "Hardly A Shadow," about Alex Wallace, the civic gadfly.

- Virgil "Pete" Peters, who provided "The Bootleg Connection," about the raid near here of one of the state's largest stills; "The Robbery That Wasn't," about game warden Frank Horberg's reaction to the closing of his bank "Wings;" and "Heavy Mettle" of the "Too Young to Die,"

- Roy Menzel, who introduced a Plover man who murdered a project manager, depicting "Portage County Shadows" will be particularly useful.

- Eight hundred copies are being printed and are to be sold at $7.95 apiece in area bookstores.

Each year's class strives to have all of the copies sold by the end of December, and the goal is usually achieved.

Dieterich says his students make "an enormous investment of time and effort" in their publishing projects but many have capitalized on it in the job market after graduation.

Jurgella told, "The nearest part of the class is how everyone works closely together. She adds it is almost impossible to separate the process of publishing a book the students don't encounter.

Each class is organized as a company with Dieterich as chief executive officer. A vote is taken by members of the class to select the manuscript to be published. This year the choices were between Jurgella's project and two children's books.

The organizational chart for the forthcoming edition, which includes Pauli W. Pape of Algoma as president; Jennifer Evers, group corporate secretary; Paul Kramer, Nelsenville, editor in chief.

**SELF HELP craft sale to benefit needy**

Program of the Menominee Central committee that sells handcrafted items made by needy craftpersons in developing, less-developed areas of the world, more than 40 percent of the retail cost goes directly back to the country of origin.

These craft sale provides employment and income for skilled workers in less-developed nations.

The Alliance is a 20-member student organization which provides understanding and fellowship to foster public awareness of global economic and cultural concerns.

Program coordinator is Kathryn Reniewicki, 2525 Simonis Ave., Stevens Point, who manages the craft sale.

**Dance troupe to visit campus**

Members of the Kanopy Dance Theatre perform at UWSP.

The Kanopy Dance Theatre of Madison will serve a week-long residency beginning Dec. 3 at UWSP, including a public performance at 8 p.m. on Dec. 6 at the College of Fine Arts Center, 500 W. Main St. Admission to the 8 p.m. concert in Jenkins Theatre, Fine Arts Center, is $9 for the public, $7 for senior citizens, and $4 for students. Tickets are available at the College of Fine Arts and Communication box offices (346-4100).

In addition, a special free public performance/demonstration will be held in Jenkins at 4 p.m. Monday, Dec. 3. Members of the company will dance "Variations" by Pulitzer Prize-winning composer John Harbo.

For the Dec. 4 concert, Laura Hehman of Sterling, Ill. and Lisa Moebly of Brookfield, May graduates of UWSP and members of the company, will perform a duet called "Friends;" it is a celebration of trust in friendship, danced and spoken music of Iowa City guitarist and songwriter David Moore. Moebly also will perform with R.E. frost in her solo," set to a popular Bette Midler hit song.

Also, master classes with the company's founder and choreographer, Christine Stevens-Jezewski, and dancer Michael Turner are scheduled at 11 a.m. on Dec. 3, at 3 p.m. on Dec. 4, and at 6 p.m. on Dec. 5. A former student of Erick Hawkins, Jezewski has been recognized for her daring, innovative choreography.

Two days of outreach activities, including lecture/demonstrations and continued on page 13

WHAM
FASHION POINT
by Alphonse Chung

Well, readers, today you will have to make a hasty decision on what to wear and how to look when you head out the door and into the stores. The first stretch of the first month and the approaching month of December is definitely in the making, but for many who will be graduating, the preparation of the all important first job interview will take priority. However, the anxiety of deciding what you should wear when you take that all important step into the business community.

For men, the main consideration is the beginning a new wardrobe is budgetary, and involves taking stock of what you already have and matching these clothes with your career goals.

Spending several hundreds on new clothes is hardly the answer, but investing in a well tailored suit in the latest style, is worth considering. Take advantage of the current reduced prices in suits in the department stores, and prepare to pay between $175-$350 for the suit. In fact, a good suit in wool or wool blend is perhaps the most important item in a working man's wardrobe.

Colleagues colors like a medium grey, navy, black or brown are your best bets. The staple white shirt should be included along with some pastels or pin striped, and of course, matching ties (depending on personal choice) to complement the shirt and suit.

For women, the same general rule for men is applicable when it comes to choosing a suit. However, women in business have an added advantage which is accessories and they are able to play with more colors and textures.

In basic, invest in tasteful pieces to work around that houndstooth or plain wool suit. Remember that gold buttons on suits or blouses are accessories by themselves which accent an outfit. A matching pair of classic gold or silver earrings and necklace will definitely enhance and flatter a suit and blouse combination.

Opt for pins in usual designs to perk up that not-so-new jacket that you are planning to pay between $175-$350 for the suit. In fact, a good suit in wool or wool blend is perhaps the most important item in a working man's wardrobe.

Summer colors are very limited, and yet classic and stylish.

Finally, don't overlook details like shoes, which should look presentable, polished, and at the same time, comfortable. Socks and nylon should be coordinated and maintained.

Hair for both genders must be well shaven and clean, trimmed with the aid of a mirror and their manicure consistently. It is important to remember that the clothes you wear can enhance your image and confidence; never allow the clothes you wear to detract from your abilities.

Sexual assault workshop offered

Rape 101, Self Defense classes. These educational programs are on the increase on college campuses around the nation. This semester, UWSP once again joins the growing number of universities educating students about the topic of sexual assault. A workshop designed to inform students on the issue of campus sexual assault will be presented Thursday, Dec. 6, 1990 in the Mitchell Room of the University Center. Topics of discussion will include the services available for victims of sexual assault as well as the university's responsibility in these situations.

AIDS awareness day scheduled

The College of Fine Arts will be observing a "Day Without Art" this weekend.

On December 1, the Department of Art and Design and Players, of the Theatre and Dance Department, will join thousands of other art organizations across the country who have decided to create a pay tribute to artists who have died of AIDS as well as to educate the community about the disease.

While the national event has been scheduled for Saturday in order to coincide with the World Health Organization's third annual AIDS Day, the Fine Arts Department will begin their observance this Thursday. The university will be hosting all of the student display cases in the Department of Art and Design to symbolically remind the community of the works of art which will never be created due to the high number of AIDS-related losses in the art world.

Works of art created by UWSP students and faculty in the Wisconsin '90 show running in the Eida Carlston gallery will also be covered. To find out more about the event, you can stop by the covered displays.

On Friday Players tentative plans to show two education videos about the disease. One planned film is a documentary focusing on the patchwork quilt project to honor AIDS patients who have died. The other film will be a product of "Good Evening," Admission Free. For more information about the event, you can contact the Theatre and Dance Department at 3429.

The Department hopes the event will generate enthusiasm for a planned campus-wide community AIDS awareness day this spring.

Go Gos disappoint, Red Kross delights

by Maura Manning

On Monday November 26 the Go Gos played at the Holiday Inn in Stevens Point. The band was ever present, yet the show was not with the somewhat sedate band but rather with their opening act, Red Kross.

Red Kross is a Los Angeles band that has been together for over 11 years. Their experience in the field was evident from their very first song. As they continued through the song, they dealt with the largely indifferent, if not hostile audience. Red Kross has a very strong sound and is not a band that any audience can sit back and relax to. Their stage presence was to say the least assaultive.

The Go Gos, however, was another story. They gave a very energetic performance as they played to the enjoyment of the crowd. Their stage presence was worth the price of admission alone. However, the crowd was not as responsive as they should have been. Many members of the audience appeared to be underwhelmed by the Go Gos.

The Go Gos' set list included several well known songs such as "Teen Angel" and "Head Over Heels." Their set also included several numbers that were not as well known, such as "West Side Story." The band continued playing with a great deal of enthusiasm and brought the crowd to their feet at the end of the show.

Red Kross played their distinct and unique sound. Their sound is very much like the band's lead singer, Cyndi Lauper. Their stage presence is very similar to Cyndi Lauper's as well. The Go Gos' performance was more of a musical performance while Red Kross' performance was more of a visual performance.

The Go Gos' performance was much more enjoyable than Red Kross'. Their performance was more than just a musical performance. It was a visual performance as well. The Go Gos' performance was more entertaining than Red Kross', but Red Kross' performance was more memorable.

If it doesn't move, decorate it.
**Work out for a good cause**

The holidays... Eating and shopping and eating and shopping and eating and hustle and bustle and... Take a break to time out, get yourself in shape, and take in the real holiday spirit by helping out those in need.

On Wednesday, December 5, the UWSP Intramural Aerobic Team will be conducting a fund raiser for CAP Services of Portage County. The event will revolve around the many aerobic classes which are offered daily at the university.

Normally all classes are offered at no cost, but for this special day, we will require all participants to donate $1.00 for each class attended. All collected money will be contributed directly to CAP Services. They will use the funds to help build a new domestic violence shelter here in Stevens Point.

For any group or individual who wishes to donate - a special fund has been established at the American Bank, Division street. Donation checks may be made payable to CAP Services of Portage County.

Everyone in the university community, as well as "guests" are encouraged to participate. Get in the holiday spirit... Work out to help out!!

**Discussion to focus on German reunification**

Drastic changes in Europe especially the reunification of Germany have sparked interest among Europeans and Americans alike.

The reunification has had, and will continue to have, a great impact on all of Europe, not just Germany. This impact, social or economic, will eventually hit the United States as well.

The UWSP German Club invites all interested students and faculty to attend the open panel discussion on German Reunification. An international group of experts will be elaborating on their personal views of this important situation for the club.

Planned, is a discussion of the Ramifications of German Reunification on Germany, for the German People and for Europe. Each panelist will present his or her views and then the floor will be open to questions from the audience.

**Symphony to present "Messiah"**

The Central Wisconsin Symphony Orchestra, under the direction of Acting Music Director Dan Stewart, will be joined by the Montevideo Master Chorale and four vocal soloists to present Handel's "Messiah" (selections) on Saturday, December 1, at 8:00 p.m., Sunday, December 2, at 2:00 p.m. (matinee), and at 7:30 p.m. in Sentry Theater (Stevens Point).

The Montevideo Master Chorale is under the direction of Dr. Gary P. Bangsberg and was organized in 1986. It is a semi-professional ensemble of 55 singers from Portage, Waupaca, and Wood Counties.

Vocal soloists appearing include: Jean Saladino, soprano; Diana Strommen, alto; James Moe, tenor; and Eugene Moertschel, bass.

In addition, the concerts, the C.W.S.O. Guild will also be hosting a silent auction with items to be donated by area businesses and individuals.

The concert, on Thursday, November 29 at 8:00 p.m. in room 125/125A of the University Center.

**Lecture to highlight UFOs**

A researcher trained in the history of unidentified flying objects, will present a lecture on the subject of "flying saucers" Tuesday, Dec. 4 from 8-10 p.m.

"UFO's, The Hidden History" will be held in the Wisconsin Center for the Arts and Humanities, University Center. Sponsored by the University Activities Board (UAB), admission is $1 for students and $2 for the public.

Robert Hastings will apprise his audience of the history of U.S. government involvement with UFO's. Hastings will present confidential information which he and other researchers have discovered. Hastings will also explain why material has been kept confidential.

This sneak peak is based on documents once hidden in the secret files of the CIA, the Defense Intelligence Agency, the FBI and the U.S. Air Force.

**Dinner**

Dinner. Following a candle lighting ceremony and the singing of the "Boar's Head Carol," a meal of spinach salad, prime rib, parsley buttered potatoes, carrots in dill sauce, and plum pudding with rum sauce will be served. The meal arranged will include the traditional Wassail, spiced tea and madrigal wine.

Throughout the evening, the audience will be entertained by student performers including the banjo, dulcimer, guitar and mandolin, who will perform about 20 Christmas carols from throughout the world and holidays, dance and sing, and entertain by putting on a good show at the same time.

The evening will conclude with a 40-minute nature documentary narrated by leading national stars such as the National Audubon Society, the National Geographic Society and the National Wildlife Federation.

**Learn to cram effectively**

A test? Covering chapters 1-23 in two days? No way.

Every student's worst nightmare...a cumulative final on text readings not even started. If this type of situation has ever happened to you and left you frantic, don't pull an all-nighter, help is on the way!

"Cramming for Tests," a workshop led by Marsha Konz of Tutoring Services, will be held for students Tuesday, Dec. 4 at 3:00 p.m. The meeting will be held in the Mitchell Room of the University Center and is free of charge.

The program will include strategies and methods on how to remember an enormous amount of information in a short period of time. According to Konz, many times students read text material and forget everything upon closing their books. "This session will help participants retain text material," Konz said.

Konz, head of UWSP tutoring services, has taught Psychology 101 since 1980. She has conducted previous seminars in test-taking, increased reading and listening skills and note-taking for both on- and off-campus students. She received her doctoral degree in educational administration from UW-Madison.

The "Cramming" course is sponsored by the UWSP Student Government Association and Tutoring Services.

**Role model from page 3**

When boys are farcical. Sad to say, but I find many of today's religions hypocritical and blind to the needs of anyone but the most faithful followers.

Look at the Roman Catholic Church's dealings with the Milwaukee Archbishop Weakland. I thought the catholic church was finally becoming realistic and modern in its approach to some of today's issues. Weakland, although not supporting abortion, has presented more liberal views from within the church on the abortion issue. In the end, he was only punished for his open-mindedness.

So what does all this mean? It means that the "me" generation has little to look forward to in the way of true role models. We are a product of our society, and in most cases, the end result is not something we'd bring home to mom.

That doesn't necessarily mean we're a doomed society, but I think it does say something very critical about our society in general. People need to start looking for good examples on the personal level, closer to home, instead of the societal level.

But all is not lost. We still have Bart Simpson. You don't think he's a good role model for kids? Well, eat your shorts man. Peace.
Debot renovation really cooking

Every effort will be made to inform students of the utility cutoffs ahead of time through campus radio and TV, informing halls, and a new publication, As Debot Turns.

As Debot Turns will be available at both Debot and Allen Centers and at the front desk in each residence hall. The publication is being written by Kyle White, in conjunction with the University Center Administration, and will help keep students informed of deviations from the regular dining schedule and of renovation progress.

The administration is trying to be sensitive to students' needs. Said Lineberger, "We will adjust hours according to what needs are. We really don't know right now exactly what we need to do. We're relying on students to give us feedback.

Students are encouraged to talk to the residence dining center managers, Betty at Debot Center (346-2036) and Vivian at Allen Center (346-2168), or the food service director, Jerry Wilson (346-3434), and let them know their needs. Large issues should be directed to Jerry Lineberger, or Bob Busch who is the director of University Centers, (both may be reached at 346-3201).

In addition, there is a food service committee advisory group that works with Bob Busch. Each residence hall has a representative in the group. They meet on alternate Wednesdays, with the time and location published in The Daily.

Students need not be representatives to attend. It is a forum for expressing concerns, and all students are welcome.

Some students have noticed the disappearance of the Point Card Office from Debot. It has been temporarily relocated to the lower level of Allen Center in room 0038. The phone number remains 346-2012.

The renovation project is scheduled to be completed in December of 1991.

by Sandra Volkman
Contributor

The $3,000,000 Debot Center Renovation officially began on November 5. As anticipated, students and administration have already encountered several obstacles as a result of the project.

The most obvious obstacle is the fence surrounding the work site. "The reason the fence is up is because there's heavy equipment moving through here and the guys driving these things aren't looking for students to be in between them and the road," explained Jerry Lineberger, associate director of University Centers.

Lineberger continued, "It's not because we're mean and evil people. We just don't want to get somebody crushed. We realize it's awkward and we realize that it's not easy to get in and out of the building.

THE FAR SIDE

by GARY LARSON

Lineberger sympathizes with the inconvenience that the students face, but his main concern is for their safety. The fenced-off space is a hard hat zone. Only contractors and people wearing hard hats are allowed in that area. Students jumping the fence are violating a posted zone and the UWSP cannot be held liable for any injuries incurred.

Once students make their way into Debot they face limited hours and limited seating, as only two of the three dining rooms can be used while the other is being worked on. In addition, there will be times when the construction when gas or electricity will have to be shut off for short periods.

To compensate for these inconveniences, Allen Center offers continuous service from Monday through Thursday. Debot will remain open during utility cutoffs, but may not be able to provide the intended menus for those days.

OUTDOOR REPORT

Wildlife managers are termi­ning the deer season opener as the most productive opening weekend in the history of Wisconsin deer hunting, due in large part, to the unseasonably mild weather and a burgeoning deer herd. More than 171,800 deer were registered in the first two days, compared to 143,000 a year ago. That’s about a 19 percent increase. Warm temperatures prompted many hunters to register their deer right away so they could get the meat home for processing before it spoiled.

The Western District led all other areas of the state, with a record opening weekend registration total of over 45,000, an increase of 17 percent over last year.

More than 27,000 deer were harvested in the northwest; nearly 31,000 in the north central counties; more than 34,000 in the Lake Michigan district, more than 30,000 in the southern district; and just over 2,100 in the southeast.

Sheboygan County saw a 100 percent increase in the number of antlerless deer harvested, due to an increase in the number of Hunter’s Choice permits issued for the area.

Though most locations reported an increase in registrations, Winnebago County was down 13 percent from last year.

Woods and marshes are extremely dry, and the wildfire danger continues to be very high. A special fire alert has been issued in the northwest, where several fires were attributed to careless hunters.

Bowhunters who plan to hunt on December 1-2 must wear fluorescent orange for their safety and to comply with the law.

**Hockey splits with Bemidji, sweeps Scholastica**

by Kris Kasinski

**Assistant Sports Editor**

The Pointer hockey team now holds a 4-2 record after sweeping Bemidji State and sweeping St. Scholastica.

**UWSP 7, Bemidji State 3**

The Pointers hosted Bemidji State on November 17 and 18, recording a 7-3 victory on Saturday and falling to the Beavers 4-3 on Sunday.

In Saturday's game, seven different Pointers combined to score the seven Pointer goals.

Todd Trettel got things going for the Pointers in the first period scoring a power play goal with an assist from goalie Todd Chin at 11:03. Bemidji, then answered with their own power play goal at 17:19, but just ten seconds later, Bill Horbach scored a short handed, unassisted goal to put the Pointers back on top.

Three Pointer goals in the second period allowed the Pointers to take control, holding Bemidji to just one. At 1:59, Marc Draplen scored off an assist from Frank Cronke. At 4:24 in the period, Tim Hale beat Bemidji goaltender Chad Perry with an assist from Scott Krueger.

The Pointers third goal of the period was scored unassisted by Paul Caufield. Bemidji scored on a power play goal at 17:13 by Scott Krueger.

Both pointers in the third period were scored on power plays. Captain Mike Stablen scored at 2:37 with an assist from Moore Conrad and Scott Krueger scored unassisted at 8:41. Bemidji scored at 9:16, but could come no closer.

Bemidji scored on four of seven power plays while Bemidji only converted on two of ten. Goalie Todd Chin stopped 20 shots and Bemidji goalie Chad Perry stopped 19.

**Bemidji State 4, UWSP 3**

On Sunday, the Pointers looked as if they would have their first sweep of the season after leading 2-0 going into the third period, but Bemidji scored three times in the third period to come out with the 4-3 victory.

Jeff Marshall started the scoring at 4:21 in the first period with an unassisted power play goal. The Pointers second goal also came on a power play when Scott Krueger beat Bemidji goaltender Todd Kreisch with assists from Paul Caufield and Dan Bailey. Bemidji scored once in the first period at 9:18.

The second period was scoreless for both teams.

The third period went all Bemidji's way. Just 19 seconds into the period Scott Johnson scored a power play goal. The Pointers held them off until there was just 4:47 left in the game when Bemidji took a 3-2 lead. Less than two minutes later, they scored a short handed goal to boost their lead to 4-2. Dan Bailey kept the Pointers hopes alive by scoring a power play goal at the 17:16 mark but this was as close as the Pointers could come.

The Pointers had 25 shots on goal and Bemidji had 27. Todd Chin stopped 19, but couldn't stop the other 6.

**Pointer basketball team wins Tipoff Tournament**

by Kris Kasinski

**Assistant Sports Editor**

The UWSP Men's Basketball team held their annual tip off tournament last weekend and for the second year in a row, won the championship. The teams in this year's tournament were UWSP, St. Norbert College, Edgewood College of Madison and Moorhead State University of Minnesota.

**UWSP 86, Edgewood 60**

On Friday, the Pointers took on Edgewood College and after a 22 first half spurt in just four minutes defeated the Eagles 86-60.

On Sunday, the Pointers started the point run and led the way with 22 points of his own. He was 10 for 13 from the field and had four rebounds. Also scoring in double figures for the Pointers were Mike "Boomer" Harrison with 15 points and Jack Lothian with 13 points. Chas Prunchoznowski had 9 points and freshmen Tuwan Clayton had 8.

On Friday Moorhead State defeated St. Norbert 89-57 to advance to the Championship.

**UWSP 101, Moorhead St. 93**

In the championship game Saturday, the Pointers were forced into overtime play by Moorhead, but managed to outscore them 18-10 in overtime to come out with the 101-93 victory.

UWSP appeared to be in good shape in regulation, but had to struggle with critical mistakes.

Chin recorded 23 saves in goal for UWSP. The team knew they did not play as well as they did against St. Scholastica.

UWSP 8, St. Scholastica 0

In the series against St. Scholastica last weekend, the Pointers totally dominated the Saints and got their first sweep of the season.

Friday's 8-0 victory, freshman Al Boushcher led the way for the Pointers with 2 goals and senior Kevin Marion recorded a shutout in the Pointers net.

Frank Cirone, with an assist from John Drollette, got goals going at 1:54 in the first period. Boushcher scored his first goal of the night at 2:35 to put the Pointers ahead 2-0 after the first period. He was assisted by Jared Redders and Pat Moran.

The Pointers beat the Saints 3 goals times in the second period. Mike Green scored with assists form Bill Horbach and senior Mike Stahley scored twice and had two assists. Tim Hale and Todd Tretter. The Pointers rounded out their scoring attack in the third period with three more goals. Pat Moran scored at 1:49 to increase the Pointer lead to 6-0. He was assisted by Bailey and Green. Tim Hale, at 4:05, assisted by Rick Kempter on a power play goal added the seventh goal, and Boushcher added the final goal at 16:48 with an assist from Sean Maran. Pointer goaltender Kevin Marion recorded 16 in the shutout and Saints goalie recorded 62.

We played eight defense all night," said assistant coach Joe Balmartera. "Offensively, we put a lot of pressure on them all night. We outscored them most of the time and continuously beat them to the puck.

UWSP 8, St. Scholastica 1

On Saturday, the Pointers once again came out strong and recorded an 8-1 victory and a sweep of the series.

Junior Paul Caufield led the way with a hat trick and an assist and senior Mike Stahley scored twice and had two assists. Caufield accounted for the only goal of the first period with just 54 seconds left to give the Pointers a 1-0 lead.

Stahley and Caufield scored the only goals in the second period. At 4:15, Stahley was assisted by Monte Conrad and Mike Green and at 13:46, Caufield scored with an assist from Frank Cirone. Score Krueger got things going at 12:10 in the third period. He was assisted by Hale and Todd Chin's shutout bid to bring the score to 4-1. The Pointers then turned the game into a rout when Stahley, Cirone, Hale and Caufield all scored power play goals in the final 3:34 to bring the final score to 8-1.

Todd Chin had 19 saves and John McEwen had 54 for the Saints.

The Pointers felt confident with their play and feel they really needed this sweep.

We scored two goals in the first five minutes of the series and dominated from there on. If it wasn't for their goals recording 116 saves over the weekend, who knows what we would have done to them," said freshman Frank Cirone.

Freshman Sean Maran added, "Both games this past weekend helped boost our confidence. We proved that we can play our best two consecutive nights. This hopefully will be the spark that leads us to a great season."

The Pointers next game will be Friday in Eau Claire. Saturday, the Pointers will host the Blugolds at 7:30 at K.B. Willet Arena.

Four Point wrestlers seventh in Madison

Loy said that his team accomplished a lot of the goals it had set for itself. "Our goal was not to be intimidated and to mix it up with these people, and that is exactly what we did," said Loy. "I think our guys learned that there is not that much of a difference between them and us.

"We also set a goal of having at least one of our guys finish in at least sixth place. Unfortunately, we felt just short, having four wrestlers miss the mark by one match."

Intramural Champs

Members of the Co-ed volleyball team which won the UWSP intramural competition were Kris Zander, Scott Towne, Mike Buechler, Paul Boriek, and Kathy Gory. Not pictured is Beth Krueger. (Intramural department photo)

Announcing...

Members of the UWSP men's intramural volleyball champions were Bee Vang, Xiao Yang, Tang Yang, Meiyphao Xengley, Mike Dahlquist and Jason Mieler. (Intramural department photo)

down the stretch. Moorhead came back from a 12 point deficit in the final 6:30 of the game by taking advantage of Pointer turnovers and missed free throws.

However, Senior Co-Captain Chas Pronschinski came through for Point in overtime, sinking nine consecutive pressure free throws in the final 3:55 of the overtime period and came up with two big steals. He had 18 points and six assists on the night.

Jon Julius and Mike Harrison also helped the Pointers escape with a victory, scoring 21 points and 15 points respectively.

The Pointers shot 18 for 36 in the first half and 15 for the second half for a field goal percentage of 49%. The shot 71% from the free throw line.

Moorhead shot 36.5% from the field and 75% from the line. They were lead by Ralph Western with 30 points. Moorhead out-rebounded Point 44 to 42.

Coach Parker was happy to get two victories, but still showed concern with the team’s play. "We should by 3-0 but we just as easily could be 1-2. At times, we played some very good basketball but we also had far too many mental errors down the stretch."

"We weren’t able to milk the clock and still play hard on defense. We started playing defensive offense. We stayed back on our heels and didn’t punch the defense with hard basket cuts," said Parker.

In the consolation game, Edgewood College sank two free throws with 1:10 time on the clock to defeat St. Norbert 60-58.

Chas Pronschinski was named tournament MVP and received the Mr. Hustle award. Jon Julius and Mike Harrison were named to the all-tournament team along with Mike Polomny and Ralph Western of Moorhead State and Keith Treinen of Edgewood.

The Pointers record now stands at 2-1 after losing the season opener to Viterbo in La Crosse 61-60. The Pointers hosted UW-Parkside last night and will travel to North Dakota this weekend to take on Valley City State and Division II North Dakota State.

Striking Out

Campbell Conference

Other division leaders in the NCAA are Los Angeles in the Smythe Division, the New York Rangers in the Wales Conference’s Patrick Division and Boston in the Adams Division.

In the National Basketball Association, former Pointer standout Terry Porter and the Portland Trail Blazers have yet to lose this year, opening with a 10-0 record to lead the Western Conference Pacific Division.

In the Eastern Conference Central Division, the defending NBA Champion Detroit Pistons hold a one-half game lead over the Milwaukee Bucks. Michael Jordan and the Chicago Bulls got off to a slow start and trail the Pistons by three games.

Other division leaders in the NBA are Boston in the Eastern Conference’s Atlantic Division and San Antonio in the Western Conference’s Midwest Division.

The cloudy college bowl picture cleared a bit over the Thanksgiving Holiday, with all but four teams knowing exactly where they are going.

The major, New Year’s Day matchups are:

- Gator Bowl, Jacksonville Florida: Michigan vs. South Eastern Conference champions
- Citrus Bowl, Orlando, Florida: Georgia Tech vs. Nebraska
- Hall of Fame Bowl, Tampa, Florida: Illinois vs. Clemson
- Cotton Bowl, Dallas: Miami (Fla.) vs. Texas

Intramural Notes

The UWSP Intramural department is desperately in need of referees for the Shick Super Hoops tournament which begins play next week. These are work study positions. For more information, contact the Intramural Office.

Play in the Shick Super Hoops Tournament is scheduled to begin on Wednesday, December 5 in Quandt Gym. The registration deadline for this event is Tuesday, December 4. There is no entry fee for this three on three basketball tournament. Teams can register at the Intramural Desk in the Berg Gym Lobby.

Students are reminded that Quandt Gym is open for volleyball play on Wednesdays from 7-10 p.m.

Intramural Champs

The intramural team, "Oldies But Goodies," won the women’s volleyball competition last month. Members of the team were Sarah Lane, Tammy Kuester, Paula Slattery, Lori Wolter, Anne Cort and Heather Seering. (Intramural department photo)
