Karate kicks off tournament

Japanese expert to lead training sessions

The 1990 UWSP Goodwill Karate Tournament will be held this weekend. Hirokazu Kanazawa, an eighth degree black belt from Tokyo, is the featured guest.

Exhibition karate teams include: the Traditional Karate Organization from Chicago; Shotokan Karate from Central Illinois; and the Japanese Karate Club from UW-Madison. The UWSP Karate Club will be sponsoring the event and hosting other teams.

"We're trying to get as many people to stay with people from our club so they don't have to pay for accommodations," said Bob Wall, president of the UWSP Karate Club.

A kick-off dinner will be held at the Tempura House on Friday for black belts and Kanazawa.

Two training sessions with Kanazawa will be held on Saturday. An exhibition tournament will be held from 6-8 p.m. The cost to the public will be \$2 for adults and there will be no charge for those under 12.

Individuals will compete as part of teams. Medals and trophies will be awarded.

Two more training sessions will be held on Sunday with a black belt exam at 4:30 p.m.

Dave Breuner, advisor for the Karate Club, will be testing for third degree black belt. Breuner has traveled to Japan to train with Kanazawa.

Kanazawa was born in 1931. In 1956, he graduated from Takushoku University and joined the Japan Karate Association (JKA). In 1960, he was the chief instructor in

Hawaii and the United States in Shotokan karate.

"Shotokan karate stresses a long, low stance and more use of hand techniques than kicking," said Breuner.

Kanazawa formed Shotokan Karate International (SKI) in 1977. SKI has more than 38 countries affiliated with it.

"He is world-renowned for his teaching ability and knowledge of martial arts," said Wall.

The Karate Club meets Tuesday and Thursday nights from 6-8 p.m. in the gym. Anyone can join for \$30 per semester and may also earn credit.

"We are trying to get organized as an intercollegiate sport. Hopefully, intercollegiate competition will come about," said Wall.

Indian sovereignty debated at forum

by Barry Radler
Staff Writer

UWSP hosted an event called "Forum of Sovereignty: Divergent Jurisdictions," on Oct. 7-9. It was sponsored by the Wisconsin Indian Resource Council and state judicial officials.

The purpose of the forum was for experts in Federal Indian Law and State and Federal officials to present their individual points of view in a scholarly setting. The forum is the apex of two years work by Stanley Webster which will conclude Dec. 31, 1990.

Among the attendees were members of the State Supreme Court, state and tribal judges, attorneys, leaders. Representatives from New Zealand and Canadian tribes, as well as many religions, were also present.

The purpose of the forum was to educate people about Indian Tribal sovereignty and the jurisdictional implications arising from what Webster defines as "the state or quality of being greatest; chief; supreme." Tribal governments are sovereign entities under an important but obscure body of law called Federal Indian Law. Federal, State and Tribal court jurisdictions often interact within this law.

The Supreme Court is currently reviewing two cases affecting Indian tribes. Earlier this year, the Court handed down a decision allowing the state of Oregon to make illegal sacramental peyote use by the Native American Church. This and other issues were addressed at one of ten sessions titled "Religion and Medicine." The sessions were held at the University Center.

"That particular Supreme Court Decision, in effect, repeals the First Amendment

protection for most religions," said a member of the forum's steering committee, Episcopal Bishop William Wantland.

"It is a very dangerous decision. The decision speaks of all religions and says that an unpopular or minority religion may find that it doesn't have the freedom to exercise its practices. The Episcopal Church could find its religious practices outlawed, as indeed it was, and the Supreme Court decision would allow that now."

The Supreme Court has traditionally made a distinction between belief and behavior when it comes to religion. The Supreme Court decision raises a topic of interest among forum attendees: Does the U.S. government acknowledge tribal sovereignty or allow it to exist? The peyote ritual happens to be twice as old as Judaism and five times older than Christianity.

"The Oregon case takes away the compelling (social) interest and says that if law passed by the state that is not specifically aimed at one religion, but has the practical effect of prohibiting that religion, the state may do so," explains Wantland. "Religion is a sovereign issue here because this issue does impinge not only on particular religions, but on the whole relationship between state, federal and tribal entities. Each government tries to be as sovereign and powerful as it can."

Webster expanded on this concept when he addressed the luncheon on Tuesday, explaining, "Sovereignty is the will of the tribe. The whole concept of sovereignty is overwhelming. A tree has sovereignty, the soil has sovereignty, individuals have sovereignty—it's a natural right, a law of nature."

It is currently unknown if another will be held next year. Several participants have requested another be held and that it should have a narrower focus, but there is disagreement on the target of that focus.

Remedial courses hit by 12-credit rule

by Jodi Ott
News Editor

The UW Board of Regents have passed Regent Resolution 5088 which restricts students to a maximum of 12 credits if they are enrolled in English 50/57 and/or Math 50/51. Previously, students were allowed to enroll in either of these remedial courses, or even both, and still take a full credit load.

"The reasoning behind this policy isn't bad. If a student needs to take a remedial course then that student will need to concentrate on that course to insure success," said David Eckholm, registrar of UWSP.

This 12-credit rule will apply to the spring semester of 1991. Also, a second part of the rule will begin in the fall semester of 1991. Students taking one of these courses will be charged a course fee approximately

equivalent to regular tuition. This was not the case before.

"This conflict goes back over the last few years when there has been a problem with resources on campus. We are using valuable university resources to teach high school courses. That is why students will be paying next fall," said Eckholm.

All other UW schools offer remedial courses except for UW-Madison. High school students go through a regional placement test and then internal testing through their chosen institution. So each campus determines the level of their English and Math programs. What could be considered a 100-level course at one school may be a remedial course at another.

"Not everybody that places into these courses are poor students. Maybe they concentrated their studies elsewhere, such as music or his-

tory," said Eckholm. "Foreign students that are excellent students may still need help with English."

Eckholm said that the numbers of students in these classes is reducing steadily. He predicts that the university could be rid of English 50/57 in another year but it will take a longer time to delete Math 50/51.

There are 52 students registered for English 50/57 for the fall of 1991 and there are 780 students registered in Math 50/51 for that same term.

"Coming out of high school, there are a small number of kids who are not prepared to take college-level math or English and I can't tell you why. Maybe it's because their minimum requirements in school were really not requirements for our courses. Maybe their English credits

were literature as opposed to writing," said Eckholm.

Eckholm feels that the 12-credit rule might cause some problems for the future freshman class because the policy was passed so fast.

"Typically, you get a year or two of leeway time. This would have been valuable to high school students when they were juniors or seniors instead of graduating now and not being adjusted to it," said Eckholm.

The Resolution states that exceptions are to be considered only under the most compelling and extenuating circumstances. The university is required to provide a record and justification for exceptions.

Eckholm said that there was opposition throughout the state against Regent Resolution 5088 and that United Council was silent on the issue.

Students voice concerns and get free lunch, too

by Wendy Nagel

Contributor

Project Listen held another lunch with Chancellor Keith Sanders, Student Government President Craig Schoenfeld and students who were picked at random.

Homecoming festivities were first on the agenda. Everyone agreed that it was a success. Yell Like Hell almost saw the appearance of Governor Tommy Thompson. Kerry Thomas, a member of University Activities Board, thought it would be a neat idea if Thompson participated in Thompson Hall's skit.

Thomas talked with Thompson and the arrangements were finalized. Later, Thomas

received a letter saying Thompson couldn't participate. The funds for Yell Like Hell were from a university state fund.

Melissa Arndt brought up the fact that, "the University Center doesn't have enough places for students to gather. Activities are only programmed for the weekend and are minimal."

Arndt thinks that the UC has a study oriented atmosphere, and that there aren't enough places for students to socialize. She feels that since the library is just across the street, there is no reason not to use the UC to meet student social needs.

Sanders said he felt that the reason for this problem is the recent closings of Piccadilly and Jeremiahs. He encouraged

students to attend the food service committee meetings to express these concerns.

Janet Kazda commented on the excellent service of the non-traditional student office. She attributed its success to the current head, Martha St. Germaine. St. Germaine will be transferring to the cultural diversity department. Kazda expressed concern over the next replacement.

Kazda suggested hiring someone who can be available to work flexible hours, especially evenings. Steve Gelbraith suggested having afternoon or evening hours and deleting some morning hours.

Sanders said, "Non-traditional numbers are growing, however, the institution's

awareness is behind in the population being served, and it's up to the non-traditionals to be sure that their feelings and needs are being articulated."

Both Sanders and Schoenfeld stated this is a concern of theirs.

Pat Greenwall asked about the Health Enhancement Center and funds connected to it. Schoenfeld explained that SGA has put up \$1,060,000 so that students would not have to pay until they could utilize the center.

This is the first semester students have had to pay \$6 for the center's upkeep. There was some concern expressed about whether faculty should have to pay \$50 per year and whether alumni should be required to pay \$265 per year for use.

Sanders was also concerned that athletes who are required to use the facilities are being made to pay fees.

Schoenfeld headed discussion over the city bus service. Some students said they utilize the service and some said they didn't. Terry Twet said, "I don't use the service because it isn't advertised and it's hard to know when and where they pick up."

A suggestion to extend hours in the evenings and weekends and decrease hours in the morning was made. Currently, SGA funds half of the city bus ticket cost for the year if students buy their ticket at the UC.

It was suggested that off-campus students need an escort service.

Warts most common STD

by Barry Radler

Staff Writer

The most common sexually transmitted disease among college students is likely not the most familiar. The number of cases of venereal or genital warts caused by Human Papillomavirus (HPV) are at epidemic on the disease. Dr. Jim Zach of the UWSP Health Center states there are over sixty different types of HPV, with more being discovered every year. HPV has long been linked with causing pre-cancerous and cancerous tumors.

Approximately three million new or recurrent cases are occurring in the United States each year. The disease seems to be highly contagious, with up to ninety percent of the sexual partners of people who have HPV found to also be infected.

HPV can infect the skin and reproductive tract mucus membranes through small breaks and abrasions that commonly occur during intercourse. The disease can be transmitted by any unprotected sexual contact and even on areas not covered by a condom.

The average incubation time between infections and first occurrence of warts is two to three months but can be as short as a few weeks or exceed twelve months. Warts that appear on the genitalia should be of particular concern. Some viral types of HPV are associated with causing cancer, particularly cancer of the cervix. Figures from the mid-1980's indicate that 13,000 women had cancer of the cervix, of which 8,000 died, while there were far less cases of cancer of the vagina, vulva, penis and anus. It can take from two to 15 years between the time of infection and the development of cancer. Predisposing factors increasing the risk of cancer include cigarette smoking, genetic make-up, and combinations of other STDs.

Abstaining from sexual activity is obviously the most effective prevention strategy for any STD. If you choose to be sexually active, caution advises a stable, monogamous relationship with a person you care about and who cares about you. This means discussing sexual histories, general health and drug use openly and honestly with your prospective partner before becoming sexually involved.

While latex condoms are a proven barrier against penetration by bacteria and viruses, they do not protect genital areas not covered. Condoms offer the best protection against STDs that are transmitted via semen or vaginal fluid between mucus membranes. HPV or herpes, though, are often present on areas not separated by a condom. For this reason, vaginal spermicides are recommended for their anti-bacterial effect and possible anti-viral benefit.

There is no talk of a cure for HPV yet. Viral infections of this sort usually persist for the infected person's lifetime, even if the presence of warts is eliminated. However, infected monogamous couples in remission probably have little to fear from contracting warts again.

Chairman selected

The Students for Thompson, a recently recognized student organization, received a new chairman. Christopher M. Carter was appointed chair of the organization by Ray Carey, state chairman.

Governor Thompson met with Carter at the Portage County Republicans headquarters. They discussed issues important to students.

"I want to inform students of the governor's past record and to show the students why he is the right choice," said Carter.

"In the area of education, Thompson has created tax-free college savings bonds so parents can help finance their children's college education. He has also established the Governor's Scholarship Program to keep our best and brightest students in Wisconsin," said Carter.

"In the area of the economy,

Thompson has helped to create 250,000 new jobs for the state while keeping the unemployment level below the national average for 30 consecutive months."

Carter went on to explain, "In the area of the environment Thompson has made two of the largest recreational land purchases in state history, the Chippewa Flowage and the Turtle Flambeau Flowage. He has also recently signed one of the toughest recycling bills in the nation proving that the environment is important."

Students for Thompson will meet at 6 p.m. on Wednesdays with the College Republicans. Students interested in joining may call Carter at 346-5917.

"The governor's record is better than anyone else on the issues and this is why he will be re-elected," said Carter.

SGA calander update

STUDENT SENATOR POSITION OPENINGS AVAILABLE: STOP BY SGA OFFICE FOR AN APPLICATION!

At last week's meeting:

- Lance Walters, United Council Legislative Affairs Director stopped by senate to talk about the importance of voter registration. His visit is part of a whistle-stop tour of all universities who are part of United Council.
- Tiffany Strong was approved as Minority Affairs Director
- Phi Eta Sigma did not receive funding for travel expenses to their national convention due to the fact that only executive board members would attend.
- Bryan Rach and Daren Vertien were approved as senators for the College of Professional Studies.
- A Residence Hall Association (RHA) representative spoke on issues that RHA is addressing including involvement with Food Service committee and hall security.
- Approval of constitutional Revision #9
- This policy has more controls regarding SGA spending policies, which should help keep student segregated fees lower.

This week

- Senate will meet on October 18, 1990 at 7:15 p.m., in room 116, College of Professional Studies building.

- Legislative Affairs Director Andy Witt has declared this week to be Voter Registration Week for UWSP.
- Students are urged to come to the SGA Office in the Campus Activities Complex in the University Center to get registered to vote. Voter Registration cards need to be back in the office by Oct. 23.
- Chancellor Sanders will address the senate of UWSP Strategic Plan.
- Up for Finance Approval Karate Club, \$600 to bring in a karate expert for a karate workshop
- PRSSA, Public Relations Student Society of America, \$208 for travel expenses to national conference in New York City
- Tri-Beta, a biology honor society, \$500 for travel expenses to their national conference in Charleston, South Carolina
- Approval of new senator: Peter Valitchka

Finance Committee will speak on a proposal regarding spending limits for organizations programming and travel needs.

- Academic Affairs will bring up a proposal to remove student age information from academic transcripts. This is a result of the concern expressed by a non-traditional student at a previous Senate meeting.
- President Schoenfeld will bring up a proposal to "Save Our Bus System." This states that UWSP students support the area bus system and use the buses.

Congress vs. the President

Regardless of the battle, citizens odd man out

by Ron Wirtz

Editor-in-Chief

OK, someone please explain to me this whole mess with the U.S. budget. How can a country simply run out of money? How can the first 37 presidents balance a budget, and the last three (although Carter was minor) liken it to tetter-tottering with Fat Albert.

One of the biggest problems Bush faces is the fact that almost one fourth of the entire budget (\$289 billion) is automatically set aside as interest payment for the current debt that Reagan is mainly responsible for. But I'll give the man credit, he taught George pretty well. Those two can say "deficit spending" faster than you can say Toyota.

But what is Bush doing at Camp David anyway? He spent the Sunday before the first budget deadline at this mountaintop retreat. Maybe he was trying to get closer to God so he could find a solution to the problem. Maybe not.

He also vetoed a bill designed to keep the government operating during negotiations. It's good to know he cares so much about the people under him when he sits so smugly on top of Camp David looking down on everyone like Jim Jones.

It seems he's more interested in stalling the budget talks so the budget doesn't pass. This will immediately put the budget on automatic. Graham-Rudman pilot, which mandates a balanced budget with pre-established cuts in all areas of the budget, particularly in the welfare programs.

It seems the federal government has led the pseudo-lemming media into believing that the government would collapse. The belief here is that when Congress finally does pass a budget, people will sigh and cheer for heroic lawmaking above and beyond the call of duty, not recognizing the "budget compromise" as the big doodle it really is.

Re-evaluation must be done to find out why budget negotiations are one month before elections. Either budget negotiations or elections need to be moved away from the other in the calendar year to give each one the attention it deserves. More importantly, by doing so you would prevent one's consequences from influencing the results of the other.

Very few Congressmen seem genuinely interested in balancing the budget. They are instead more concerned about making an impression that will get them re-elected, meaning they will stick along party platforms which got them there in the first place when budget voting comes around.

They are concerned more for their own selves than for the state of our nation and its economy. They'll save their jobs as they watch hundreds of thousands of others lose their jobs to a weak economy being stretched even further by a

depression-threatening national debt.

This budget impasse has also created a backlog of important legislation in Congress which still needs to be considered, although it is not budget-related. Among this legislation, are bills for clean air, housing, civil rights, and child care. These are bills that could improve the generally deteriorating condition of the U.S. So you ask "What exactly has Congress accomplished?" Well, for one they all agreed on congressional pay raises.

What?! While socially conscious legislation gets passed over, Congress is passing laws where the only debate is whether they want Mercedes or BMWs as the company car.

Recent polls conducted by Times/CBS show the general public feels the same way. Fifty-eight percent said they believed that members of Congress were serving themselves

instead of their constituents.

Even more interesting was that 71 percent believe that the federal government is controlled by big business. It seems that the American public trusts the motivations of Bush and Congress about as much as I trust a weight watcher to guard my fudge brownies.

The Reagan-Bush administrations have sold pipe dreams to every citizen worshipping the almighty dollar, while Congress turned its back on balant over spending and waste. Only now are we realizing these dreams had a pay-after-you-see admission fee. Well, it's time to pay up, but the federal government seems to have left it's wallet in the car.

Regardless of the budget outcome it appears that the U.S. citizen has once again become a second class person to the selfish, narrowly focused group of politicians we all put into office.

PEACE

Stop putting things off, solve the problems

by Timothy A. Bishop

Sports Editor

By now, just about everyone has heard about the lockerroom controversy surrounding professional football. Well, A Wisconsin legislator has proposed a bill which would just sweep the entire problem under the carpet by closing locker rooms to all reporters.

This proposal, however, is an example of how politicians would rather avoid a potential problem by burying it and letting someone else deal with it.

For example, the United States is at risk of driving itself deeply into bankruptcy. The problems of deficit spending and governmental budgeting have been known for years. But, for those same years, the American government and the politicians

have avoided the problem to save face politically.

Now that the budgetary problems have come to the point where they can't be ignored or put off any longer, the politicians in Washington are working overtime, not to solve the problems, but to prove that the money problems were caused by the other political party.

But the budget is not the only example. How about the seriously deficient education system in the U.S.? Where were the politicians when the problems with small town and urban schools first developed?

Well, they were trying to reduce the money available to school systems for buildings, equipment and teachers to the point where urban schools were collapsing around the students and rural school districts could not afford to continue to operate. School lunch programs were cut back and teachers

became among the most underpaid and over-worked workers in American society.

And how about social programs in the U.S.? Why has the most industrialized and "economically advanced" country in the world become the one with among the worst social programs? Because the American politicians have sat back and watched these programs get cut back rather than take on the part of society that the money would come from to support these programs (you know, the same ones who provided them with the campaign money to get elected in the first place).

It is time for American politicians to stop avoiding the issues in favor of easy postponements. After all, don't we elect these people to solve problems, or is that they can look good when it comes time for reelection?

OUTDOORS

UWSP receives \$87,000 collection Doctor donates rare and exotic bird specimens

by Steve Schmidt
Outdoors Editor

UWSP wildlife students may be learning more about avian life than they bargained for. Recently, the College of Natural Resources received a collection of about 434 mounted birds appraised at \$87,000.

The donor of this extensive collection is retired physician Dr. R. J. Mathwig, from the Chippewa County community of Stanley. He began his collection in the 1930's and continued enlarging it until the late 1980's.

Kirk Beattie, a UWSP wildlife professor, has delegated the university in receiving the gift. He notes that, "80 percent (of the collection) are exotic upland game birds within the pheasant and quail groups." He adds that the collection will be especially valuable for purposes of instruction as well as for furnishing the natural resources building with a unique attraction.

Beattie suggests that the species represented in the collection are found natively around the world. Many of the birds are scattered in Australia, South America, Europe and New Zealand.

Currently, three wildlife graduate students are assisting the professor in establishing an accurate inventory of the

species. Beattie says many of the exotic birds were bought by Mathwig from game farms. Here, the birds tend to let down some of their normal breeding rituals resulting in more interbreeding than one would expect in the wild. Therefore, about a dozen of the ducks in the collection are hybrids.

Beattie maintains, "Some are hybrids between Mallards and Black Ducks, between White Cheek Pintails and other ducks. One looks like it's a cross between a Scaup and a Wood Duck which is kind of interesting considering one is a diver and one is a dabbler."

Although some of the species are difficult to identify, the inventory is going well and should be complete within two weeks. Beattie says the graduate students have successfully identified about 80 percent of the collection and are presently struggling with the identification of the more difficult birds.

Each bird in the collection was personally mounted by Mathwig and, as a whole, the collection should be of benefit to wildlife students.

"It will broaden their perspective on wildlife from different parts of the world mainly because the species they're used to studying here, that we have mounted, are from North America," says Beattie. He

Natural resources students Karen Kollross and Scot Nauert, display a few of the 434 mounted bird specimens donated by Dr. R. J. Mathwig, a retired physician from Stanley. (Photo courtesy of University News)

continues, "By bringing in a different species from around the country, they can develop a better appreciation for wildlife from other areas."

It is common for universities like UWSP to have large collections of North American waterfowl. However, Beattie feels it is safe to assume UWSP may now hold the largest university collection of exotic waterfowl species.

Since the Natural Resources Building does not have a display area for all the birds, approximately 200 specimens will be exhibited in the Techniques Room/CNR 314. Located in front of each bird will appear an identification plate stating the species of the specimen.

Remaining mounts will be utilized in classrooms, at Trehavan, a UWSP field station near Tomahawk, and at other educational departments in Stevens Point such as the UWSP Museum of Natural History.

Dr. Mathwig's total collection, which contains some 2,000 bird mounts, has been distributed between UWSP, the high school in Stanley and the College of Lake County in Grayslake, Illinois. "Members of the doctor's family organized the donations.

State updates fish consumption advisory

MADISON, WI -- Lake Superior siscowet larger than 20 inches, several fish species from 16 inland lakes, and portions of several rivers have been added to the state's sport fish consumption advisory.

The advisory aims to protect the most sensitive population--pregnant women and young children, from potential long-term health risks posed by environmental contaminants found in sport fish, said Dr. Henry Anderson, chief of environmental epidemiology at the Department of Health and Social Services (H&SS).

"The advisory gives consumers the information they need to decide whether or how often they should eat sport fish from waters where contamination is a problem," Dr. Anderson said.

The Department of Natural Resources (DNR) and H&SS issue a publication describing the advisory each April and October. The guide explains which species and sizes of sport fish may contain environmental pollutants and describes how anglers who want to eat their catch may limit their exposure to these contaminants.

The advisory, issued since 1976, now lists fish from 194 sites. The state has tested fish in more than 650 inland and bordering waters.

Heavy contamination in in-

land state waters continues to follow a pattern similar to previous years, said Jim Amrhein, DNR fish contaminant specialist.

A few predator fish from about one-third of the lakes sampled during any given season contain mercury levels higher than the state health guideline of .5 parts per million. Other fish in the same waters don't display a mercury problem, he said.

Several species and sizes of gamefish from a number of inland lakes have been added to the advisory due to mercury contamination. Those lakes are: BARRON CO. - Bass (T33 R10W S34), Beaver Dam, North and Silver Lakes; BURNETT CO. - North Sand L.; DOUGLAS CO. - Bond and Red Lakes; FOREST CO. - Arbutus and Julia Lakes; ONEIDA CO. - L. Julia, Medicine L.; SAWYER CO. - Ghost Lake; and VILAS CO. - Ballard, Dead Pike, Forest and Pioneer Lakes.

Also added to the mercury advisory are the Red Cedar River north of Tainter Lake, Dunn Co., Chippewa Falls Flowage, Chippewa Co.; the North Fork of the Flambeau River in Price Co.; including Crowley and Lower Park Falls flowages; and Peshtigo Flowage, Marinette Co. Tainter Lake and several other flowages of the Chippewa and Flambeau

rivers were already named on the state's fish advisory in previous years.

Officially added to the updated advisory is a previously-issued precaution on dioxin-contaminated white bass in the Wisconsin River's Petenwell Flowage and carp from the river's Castle Rock Flowage. The state issued consumption advice affecting those fish in July after adopting a more stringent health guideline for dioxin contamination in sport fish.

DNR tests of fish tissue show that Lake Superior siscowet larger than 20 inches contain concentrations of the pesticide, Chlordane levels in siscowet smaller than 20 inches are lower than .3 ppm. Siscowet are a type of lake trout with a high fat content. They are not as popular with sport or commercial fishermen as other types of Lake Superior gamefish, Amrhein said.

Chlordane is an insecticide that was widely used in the United States on a variety of crops until the U.S. Environmental Protection Agency banned it in 1988. Laboratory mice exposed to the pesticide displayed immune changes, liver damage and lower fertility. Scientists theorize that chlordane may promote tumors or prompt the development of cancer in humans.

In the state's publication "Health Guide for People Who

Eat Sport Fish from Wisconsin Waters," advice for fish contaminated with PCBs and pesticides differs from precautions issued for fish contaminated with mercury.

"The two types of contaminants pose different health risks," Dr. Anderson said.

Fish contaminated with pesticides or PCBs (polychlorinated biphenyls) are divided into three groups based on contaminant levels and fish size.

Group 1 fish meet health standards for PCBs and pesticides and pose the lowest health risk. Pregnant women and children under 18 should not eat fish in Group 2. No one should eat fish in Group 3 because these fish contain contamination levels higher than health standards.

Fish contaminated with mercury are divided into four groups based on mercury concentrations. Pregnant women should eat no more than one meal a month of Group 1 fish. Children under 18 as well as pregnant women should eat no more than one meal a month from Group 1 fish.

Children under as well as pregnant women should not eat Group 2 or 3 fish; everyone else should limit consumption of Group 2 and 3 fish to 26 and 13

Applications available for seedlings and shrubs

"Application forms are now available for ordering tree seedlings and wildlife shrubs from the Wisconsin Department of Natural Resources for delivery in the spring of 1991," said Trent Marty, nursery coordinator for the department's Bureau of Forestry.

One, two and three-year-old hardwood and conifer seedlings are available, as are a variety of wildlife food shrubs like hazelnut, wild plum, crab apple, ninebark, highbush cranberry and silky dogwood.

Landowners who want to buy tree nursery stock from the department must adhere to a number of regulations," said Marty. "And a minimum order of 500 tree seedlings is required."

The forestry stock must be used for growing forest products, game food or cover, controlling soil erosion, or establishing windbreaks or shelter belts. Purchasers cannot give the stock away or use it for decorative, ornamental, Christmas tree, or landscaping purposes.

Landowners are encouraged to order trees as soon as possible because of the demand for nur-

Groundbreaking planned for Conservation Hall of Fame

by Mary Beth Pechiney

Contributor

Ground breaking for the Wisconsin Conservation Hall of Fame (WCHF), located on Schmeeckle Reserve, is expected to begin in November of this year, according to Schmeeckle Reserve Director Ron Zimmerman.

The main purposes of the Hall of Fame will be to: 1) convey to the public the importance of Wisconsin's natural resources, 2) emphasize that we as individuals, and as members of a community, have an impact on natural resources, 3) commemorate those outstanding individuals who were instrumental in the public's education and conservation of natural resources.

The Hall of Fame concept was conceived in 1982 by former UWSP Dean of the College of Natural Resources, Daniel Trainer who mentioned the idea to the National Association of Conservation Districts Regional Representative, Bill Horvath.

Horvath remains the driving force for making this dream into a reality, according to Zimmerman. Part of what spurred Horvath on to establish this Hall of Fame was his own lack of knowledge regarding the historical resource management movement in Wisconsin. He wanted to know more and he wanted others to know the rich history of the movement too.

"There is a sound and deep conservation ethic in Wisconsin, but what was missing, was

a way to pull all that history together," explained Horvath. He was instrumental in gathering 16 statewide conservation organizations which have remained committed to the Hall of Fame idea from the beginning.

"Everyone was real above board about the purpose of the Hall of Fame. There were altruistic feelings from the beginning," assessed Zimmerman.

The WCHF Foundation a non-profit organization depends on fundraising for their main source of funding for making the Hall of Fame materialize. Members of the WCHF Foundation solicit businesses for construction and planning funds in return for those businesses sponsoring an exhibit in the Hall

of Fame. The City of Stevens Point donated \$70,000 toward the WCHF, collected from the city's hotel-motel tax.

Stevens Point is expected to benefit from the Wisconsin Conservation Hall of Fame. The Hall of Fame is designed to be a tourist attraction, as well as an educational facility. "We may see as many as 100,000 visitors a year," estimated Zimmerman. Highway signs for Interstate 51 and 10 have already been designed and paid for.

Schmeeckle Reserve was chosen as the site of the Hall of Fame because it is a University-owned educational facility, it has a central statewide location, and it is in close proximity to the College of Natural Resources.

A professor at the College of Natural Resources, Zimmerman

is hoping it will prove to be a stimulus to UWSP students. "I'm hoping that students will find this inspirational. The people that have been selected to be honored in this gallery are people who would not take 'no' for an answer. It not only gives UWSP students, but students of all ages, a chance to get closer to the real events and the real people who were involved."

Phase One of the Hall of Fame, including the inductee gallery and the classroom, is expected to be open to the public by the spring of 1991. Phase Two of construction will begin at this time and the projected completion date is spring of 1993.

OUTDOOR REPORT

Duck hunters had pretty good success statewide on opening weekend. Large numbers of wood ducks, green-winged teal and widgeon are in the backwater areas of the Mississippi around La Crosse. There are also plenty of ducks in Sauk, Dodge, Green Lake and Jefferson counties.

Goose hunters are doing well in the Horicon Zone, where there are large numbers of geese and more arriving daily. About 15,000 geese have been counted at Theresa Marsh and more are coming in.

Bow deer hunters have been doing well in many areas of the state. The deer are working oak areas where there's a plentiful acorn crop. Hunters who exert the effort to locate those areas should find excellent hunting.

Deer are beginning to move around with the shorter days and changing weather. Motorists should be on the lookout for them at dusk and during the nighttime and early morning hours.

Grouse hunting has been good in Douglas, Bayfield and Sawyer counties. Woodcock are moving into young aspen stands. The fall turkey hunt is underway. Many flocks have been seen in the Argyle/Blanchardville area.

Recent windy weather has

DNR targets nonpoint polluted watersheds

RHINELANDER, WI -- The DNR's North Central District and the Department of Agriculture, Trade and Consumer Protection have selected four waters in the North Central District to be targeted as priorities in a comprehensive effort to control the impacts of nonpoint source pollution.

DNR North Central District Nonpoint Source Pollution Coordinator, Tom Blake, says the four waters are:

- Lower Big Eau Pleine River Watershed
- Upper Yellow River Watershed
- Lake Minocqua
- Town of Port Edwards Groundwater Demonstration Project

"Each water body we have selected is impacted by water pollution as a result of how the land is used around them," Blake pointed out.

knocked down lots of nuts, so harvest quickly if you want to beat the squirrels!

Fishing for smallmouth bass, northern, walleye and crappie is improving on many northern lakes and flowages. Muskies have been hitting on Lake of the Pines, and muskie anglers are using Woodruff-area boat landings quite heavily; suckers are the preferred muskie bait at this time of year. Smallmouth bass and walleyes are being caught on the upper Wisconsin River.

Brown County's Voyageur Park is producing muskies (not tiger) in the 30-to-37-inch range. Brown trout fishing has been good at several Door County piers. Anglers on the Kewaunee River are getting catches of chinook and coho salmon.

Brown trout are active at the Menominee River dam in Marinette County; many salmon are being hooked on Little River, where fishing pressure is heavy.

Some snagging is evident, and anglers are reminded that snagging is illegal. Oconto County's Geano Beach is still the place to catch perch -- boats are regularly getting their limit in a few hours. Minnows are the best bait.

There's some good fishing in the southeast. Anglers are get-

ting chinook salmon, brook, brown and steelhead trout at the dam in Kohler, and action is improving downstream from here.

In the harbor slip south of Milwaukee's McKinley Marina, they've been getting brown trout and chinook.

Good numbers of trout and salmon have migrated up to the North Avenue dam. Everyone is catching chinooks on the Root River, where brown and brook trout are also being taken and steelhead action is picking up.

Walleye activity is increasing on the Wisconsin River below the Prairie du Sac dam. Beaver Dam Lake anglers who took advantage of the season opener for gamefish last weekend enjoyed fair success. Some large northerns were taken, along with a fair number of nice-sized walleyes. Bluegills have started to bite on Big Green Lake. Walleyes are hitting on the Black River.

Rib Mountain State Park

One of nature's hidden treasures

by Laura Naus

Contributor

As the narrow road slowly spindles upward, the attraction of this magical place becomes obvious. Brilliant sunbeams glint through golden-leaved tree branches on both sides of the road to envelop the visitor with the park's natural majestic beauty.

A wooden platform provides a picturesque view of the rural countryside below, where minuscule silos and houses intermingle with vivid patches of crimson, amber, auburn, and saffron.

The beautiful colorama attracts nature lovers of all ages to Rib Mountain State Park in Wausau. The guidebook given to visitors upon entrance to the park reads, "The prettiest time, by far, at Rib Mountain is the transition period from summer

to winter when the natural color of the trees imprint a sense of calm and of belonging."

Judy Lewandowski, an employee at the park, admits that the fall is the prettiest but also the busiest time of the year. "Last weekend with the sunny skies and 60 degree weather, you wouldn't have been able to find a parking spot," she said.

With an altitude of 1,940 feet, Rib Mountain is one of the highest elevations in the state. The mountain towers high above the surrounding areas because it is composed of quartzite. The hardness of the quartzite resists erosion more than the soft rock of the lowlands.

Jacob Gensmen donated the land to the people in 1923. The Kiwanis Club of Wausau enlarged the area and dedicated it

Wisconsin designates Wolf Awareness Week

Wisconsin will observe Wolf Awareness Week October 21 - 27. The proclamation by Gov. Tommy Thompson was arranged through the efforts of the Timber Wolf Alliance in cooperation with the Department of Natural Resources, said Ron Nicotera, director of the DNR's Bureau of Endangered Resources.

The eastern timber wolf has been a part of Wisconsin's native animal life since the retreat of the glaciers some 10,000 years ago.

At one point the wolf was extirpated from Wisconsin, but it began reestablishing packs in Wisconsin's northwoods in the early 1970s as wandering wolves from Minnesota discovered habitat to their liking.

"The U.S. Fish and Wildlife Service put the eastern timber wolf on the federal endangered species list in 1967," Nicotera said. "Wisconsin declared the wolf an endangered species on the state's listing in 1975."

Wisconsin studies in the mid-1970s confirmed that wolves had established themselves in the state and had grown to about four to six active packs by the 1980s.

A Wisconsin timber wolf recovery plan was developed and adopted and stressed three key areas critical to the survival of wolves in the state. These areas include, public education about wolf ecology, continued wolf population monitoring and habitat management.

The Timber Wolf Alliance (TWA) was formed by interested citizens from all areas of the state. They have taken on the challenge of keeping people informed of the status of the wolf in Wisconsin by providing both monetary support and public education materials.

One of the efforts is the Wisconsin Wolf Awareness Week. The TWA has produced and distributed a poster using original artwork donated by Al Agnew to highlight the week.

Aerial surveys flown in the winter of 1989 showed Wisconsin with a population of 32 timber wolves, according to Adrian Wydeven, DNR biologist and a member of the timber wolf recovery team. Presently there are 11 known packs in the state. Summer surveys have provided information that pups were produced in eight of the packs.

There are two main clusters of packs in Wisconsin. One

cluster of four packs is located in the Douglas County area. The second main cluster in the Lincoln, Oneida, and Price county area has another four packs.

The other three packs identified include the Rainbow Lake pack in Bayfield County, Frog Creek pack in Washburn County and Log Creek pack in the Sawyer/Ashland County area.

"We're hoping that this winter's survey will find somewhere around 40 animals, which will put us half way to the overall state population goal of 80 wolves," Wydeven said. "The newest pack that was discovered is the Little Rice River pack in Oneida County."

The most accurate survey work is done in the winter time when flying gives firsthand observations of wolves and track counts. Along with the packs that have been identified, several lone individual wolves have been reported in the Nicolet National Forest, but the reports have not been confirmed.

"The disease problems that caused much of the mortality to the wolf population in the 1980s has not been occurring recent-

ly," Wydeven said. "The wolf population increase is also due to the large deer herd population and the high wolf populations in Minnesota dispersing into Wisconsin."

Coyote hunting is banned in the northern one third of the state during the gun deer hunting season to protect timber wolves from being mistakenly shot by hunters.

UAB Visual Arts Movie: TO CATCH A THIEF, 8PM (Encore-UC)

WWSP buys remote unit for mobility

WWSP, the student radio station at UWSP, is beginning a new year with a recently purchased remote unit, which allows reporters to broadcast live from area events such as the recent Spud Bowl.

Station manager Jennifer Bugni, senior communication major from Cudahy, says the device will give her staff much more flexibility and will be particularly useful when local news stories break. The money for the equipment was allocated to the station by the Student Government Association, which funds campus organizations and activities.

Economic learning center to be located on UWSP Campus

A Center for Economic Education to serve the north central part of the state has been established at UWSP.

Its director is Lawrence Weiser, an economics professor who has taught on campus the past 18 years.

Announcement of the center's formation was made at a breakfast meeting in Wausau and a luncheon in Stevens Point on Wednesday, hosted by Sentry Insurance and Consolidated Papers Inc.

The firms are among the corporate sponsors of the Wisconsin Economic Council for the purpose of advancing economic education.

The center is another example of new partnerships the university is interested in forming with its service area, according to Chancellor Keith Sanders. He said the value of UWSP's in-kind support of personnel and space amounts to more than half of the total cost of operating the new unit.

Weiser will be working largely with elementary and secondary teachers of the area to help them in their efforts to improve the understanding of economics among young people.

Students are getting into the act, too.

Weiser is overseeing a project that will involve 25 teachers and their students in a stock market game that will continue through this fall.

Teams of the students will use \$100,000 of fictitious money in the development of a make-believe stock portfolio that will be revised each week. The groups will receive periodic updates about how they are faring compared with teams elsewhere in the state and nation.

Awards will be presented to the winners at the end of the year.

In addition to developing special instructional programs for the teachers, Weiser will oversee the formation of a resource room in the Collins Classroom Center that will contain teaching materials that can be signed out.

The center is one of six of its kind throughout Wisconsin.

Weiser received a special orientation for his new assignment when he was chosen this summer as one of 73 American educators to attend a leadership institute in Indianapolis sponsored by the Joint Council on Economic Education.

The council is the national umbrella organization for all state centers.

Bugni describes this as a "building year" for the station. "We want to make some changes and really move into the 90s," she says. "We have a lot of experienced people back, so we're off to a good start."

Bugni heads a staff of about 70 students who run the station. James Haney of communication is the faculty adviser.

The program director is Dan Seeger of Stoughton and assistant program director is Colin Walsh of Oshkosh. The news director is Dave Liethen of Green Bay and sports director is Tom Weaver of Wausau. Other directors are: business, Brad Washa of Mayville; public relations, Michelle Marver of Wausau; public affairs, Sara Hahner of Wisconsin Rapids; production, Dan Getzen of Lake Geneva; and continuity, Paul Ochtrup of Adams-Friendship.

The station has joined the national AP Network to strengthen its emphasis on news coverage. National and international news is broadcast at the top of every hour, followed by state and local news, plus live specials when stories break. The AP Portfolio,

public affairs interviews with prominent people, is aired every Friday from 6-7 p.m.

Also from 6-7 p.m. every other night during the week, public affairs shows are aired. "Reel Thing," on Mondays, features movie critiques by Seeger and Steve Senski. On Tuesdays, "Starting Lineup," a call-in sports show, includes Weaver and other staff members with an interest in sports. On Wednesdays and Thursdays, "University Spotlight" and "Point Blank," feature local public affairs and community issues. The programs are hosted by Hahner.

Other shows include live hockey coverage, classic rock, up-beat acoustics, "Sneaky Pete's Blues Cafe," heavy metal and reggae music.

The annual Jazz Fest will be aired for 54 hours in late October, beginning with the Von Freeman Quartet out of Chicago and concluding with the Faculty Jazz Quintet. The annual Trivia contest is held in April.

The station is at 89.9 on the FM dial and can be heard throughout Central Wisconsin.

Landlords and students collaborate on city council housing committee

by Jodi Ott
News Editor

Recently, a volunteer group was formed by city council to look at housing concerns by students, landlords and homeowners.

Larry Sipiorski, associate registrar of UWSP and a member of city council, will be heading the group. Two students, two landlords and three homeowners form the rest of the group. They will be updating rules that were implemented ten years ago.

"It is basically a group formed to listen to housing concerns and to suggest the needed changes," said Sipiorski.

The group will be looking at other cities' ordinances and how Stevens Point compares. Noise was one topic of discussion.

Sipiorski also noted that students, who have a complaint with their landlord, but fear a bad reference, may come back later on and report him. The landlord still may receive fines ranging from \$80 to \$500,

depending on the landlord's past record.

"There is a state law that if a student is in a house where it is zoned for three but four are living there, the landlord is responsible for fines and expenses incurred," said Sipiorski.

"That means the landlord has to pay for moving expenses and comparable living quarters. If a similar home can't be found then he will have to pay that difference. The student is never just kicked out onto the street for reporting a landlord."

There is also a city ordinance that if a landlord receives more than three citations in one year for a building that contains ten or less occupants that license may be revoked.

The violations could deal with noise, garbage or zoning. Sipiorski said that no landlord has ever had their license revoked yet.

"If it makes the landlord be more careful then it is helpful in maintaining a peaceful neighborhood," said Sipiorski.

RESERVE OFFICERS' TRAINING CORPS

CASH IN ON GOOD GRADES.

If you're a freshman or sophomore with good grades, apply now for a three-year or two-year scholarship. From Army ROTC.

Army ROTC scholarships pay tuition, most books and fees, plus \$100 per school month. They also pay off with leadership experience and officer credentials impressive to future employers.

Crowd got off on Meat Loaf

by Molly Rae
Music Editor

Like a "Bat out of Hell," Meat Loaf and his entourage descended down into Quandt gym Friday night. And ladies and gentlemen, they kicked ass!

The crowd got into their act. The whole audience stamped their feet, clapped their hands, and sang along at the top of their voices all night long. Meat Loaf took the stage with the energy, vitality, and soul rarely found in entertainers today.

The audience screamed "Paradise, we want paradise," in demand of an encore. The house lights were turned up and the crowd took center stage as they crooned the immortal words of "You took the words right out of my mouth," en masse. The loudest ovation, however, was heard when Meat Loaf announced that his new album which he's titling "Bat out of Hell - II" is scheduled for release this spring.

I had the opportunity to talk to "Meat" (That's what all his friends call him he said) after the show and found out more about his new album. Meat Loaf previewed one of the tracks from it at Friday night's show.

Titled "Out of the frying pan and into the fire," the band opened with this hard-edged anthem that's reminiscent of the old favorite from the first album, "All revved up and nowhere to go." Although Meat doesn't think it will be the first release he said there'll definitely be a video version out soon.

According to Meat all the tunes (co-written with Jim Steinman) are finished and the project is in pre-production.

A private moment with Meat Loaf.
(photo by Blair Cleary)

my favorite thing." Meat said he enjoys doing film and touring. "Basically, whatever I'm doing I like it. I had a great time with this audience tonight," he said.

Expecting the stage dynamo, Meat was surprisingly quiet and demure. He was a nice gentleman and politely asked me to ask him what his favorite circus act was.

"No one's ever asked me that before," he said. So I asked, "The motorcycle rider with the girl on his handle bars that cruises on the high wire," Meat answered. Ah, musicians.

"Bat out of Hell - II" is being produced by Meat Loaf and Todd Rundgren. The producer of the original album, will be working with him too. Meat said

they're targeting March for the album's release.

Take a bow UAB and Campus Activities for a well-organized, well attended, and fun evening with a true rock legend and his tight and talented group. According to Greg Diekroeger of Campus Activities there were more than 2250 people in attendance at the concert.

"There was wonderful attendance for a homecoming event," it was a great way to kick off the major concert season," said Diekroeger. Was that a hint Greg?

Make sure you pick up next week's issue for the real story, a sneak peek at the most talked about and most exciting show in town, the incredible Joe Savage Experience. It's the hottest ticket in town.

Traveler to sing at Encore tonight

by Cheryl Richter
Contributor

Pamela Chickering and Kelly Houston, the acoustic duo known as Traveler, will be singing at the University Center Encore at 8:00 tonight.

The group can be heard performing a set at the Cabin or providing backup vocals for

concerts on campus.

Audiences are often surprised that the two UWSP seniors are not music majors, as they have been singing and collaborating on songwriting for five years.

The music of Traveler defies categorization. With guitarist (Shane Totten) and pianist (Joe Tritz) complementing the vo-

cal, Kelly and Pamela are reminiscent of the late sixties folk rock legends. A Dylan song is even included in their repertoire.

An attempt to compare the beautiful vocals and memorable lyrics of Traveler could never give enough credit to the singers. So come to the Encore room at 8:00 tonight. It's free!

Sculpture, painting to highlight art show

Artists Anne-Bridget Gary and Robert Stolzer will show their ceramics and paintings in a two-person exhibition from Oct. 15 to Nov. 20 in the Agnes A. Jones Gallery of the College of Professional Studies, UWSP.

"Two Views: Paintings, Sculpture and Books," is the name chosen by Stolzer, who will show about six large abstract oil paintings, and by Gary, who will exhibit a series of several handmade books and 10 wood-fired ceramic sculptures.

Since both artists have spent considerable time in Japan, much of the displayed work will pay tribute to an eastern aesthetic, with a focus on the figure and traditional craft ideas, according to Gary.

A freelance illustrator whose work has been published in the New York Times, Houston City Magazine, and The Progressive, Stolzer also is an assistant editor for Remco Worldservice Books, and a scriptwriter for the comic strip "Gasoline Alley."

During the summer, he served as art chairperson of the Belvoir Terrace Fine and Performing Arts Center in Lenox, Mass. In addition, he has been an instructor at UWSP. He holds an M.F.A. from Tyler School of Art, Temple University, and has taught at Moore

College of Art and Design and at Rutgers University.

Gary came to UWSP last fall from Philadelphia, where she was a resident artist at The Clay Studio, head of the ceramics faculty at Abington Art Center and department chairperson at the Belvoir Terrace Center.

Last summer she received an emerging artist-in-residence fellowship from the Jerome Foundation of St. Paul to work at St. John's University in Collegeville, Minn. While at the university, she completed her series of painted, tapestried and stitched books, plus ceramic sculptures which were fired in a traditional Japanese five-chamber, wood-fired kiln.

Gary was introduced to the ancient Japanese practice of wood-firing through her affiliation with the International Workshop of Ceramic Art in Tokoname, Japan.

She says the huge kilns, which have been used in Japan for centuries, produce a special ash deposit, which creates a unique surface on the ceramic pieces. At St. John's, she has gained further wood-firing experience while working with leading scholar Richard Brenahan.

Gary holds an M.F.A. from Massachusetts College of Art.

Faculty recital to be held

Clarinettist Andrea Splitberger-Rosen will perform in a faculty recital at 8:15 p.m., Monday, Oct. 29 at UWSP.

The performance in Michel-sen Hall, Fine Arts Center, is open to the public without charge.

She will be assisted by faculty colleagues Michael Keller, piano, Dee Martz, viola, Jean Saladino, soprano, Paul Doebler, flute, Patrick Miles, horn, and David Beadle, bassoon.

The program will include Robert Schumann's "Fantasiestucke, Op. 73," Henri Tomasi's "Sonatine Attique," Gioacchino Rossini's "Introduction, Theme and Variations," Kurt Weill's

"Frenantanz, Op. 10," and Wolfgang Amadeus Mozart's "Trio, K. 498."

As the Uhwarrie Duo, the clarinetist and her husband, Robert Rosen, a percussionist, made their New York debut in 1980 at Carnegie Recital Hall. After joining the UWSP faculty in 1984, the couple was invited to play for the International Clarinet Society's annual convention. The duo's activities also include four years of participation in the North Carolina Visiting Artist Program.

This fall, they were invited to participate in the first Southwest Contemporary Music Festival and Conference at San Marcos, Texas.

FASHION POINT

by Susan Stadler
Contributor

The snow is starting to fall, winter is almost here. Do you have a good coat to carry you through this soon to be treacherous season? A good coat will have an outer fabric and insulation to meet your functional needs and personal style.

Wool is the most basic fiber for winter coats. It provides warmth and is somewhat water resistant. Wool is also a good choice for dress and car coats.

There are other outer fabrics, however, that work better for severe weather or sporting situations such as skiing. Many materials used for these conditions are lighter weight and have better resistance to snow, rain, and frigid temperatures. Some materials used for outer garments include: nylon, gore-tex, super microft, and sway.

Nylon by itself is good for breaking a dry wind but has little water resistance. It is often combined with other materials to give it more waterproofness or repellency. With most fabrics, as waterproofness increases, breathability decreases.

Gore-tex is a fabric that is waterproof and breathable. It is a laminate applied to a base fabric like nylon or polyester. The seams, however, must be sealed since the needle holes are large enough to let moisture in.

Super microft is a water-repellent/breathable fabric but unlike gore-tex, doesn't need to have the seams sealed. One step beyond these waterproof/breathable fabrics is an outer fabric called sway.

Sway fabric is 100% nylon and coated with microcapsules of temperature sensitive dye. The fabric is most often white indoors, and changes to a color outdoors in cooler temperatures.

Waterproof fabrics are mainly for heavy or long exposures

to precipitation. Water-repellent outer fabrics do not hold up under wet conditions as well as waterproof fabrics, but are suitable for everyday winter jackets. More technical jackets are designed with an insulation that is laminated with a waterproof or repellent fabric.

The warmth of an insulation depends on the amount of air trapped between fibers. The more air that is trapped, the warmer it will be.

Down is excellent in dry weather, but loses it's insulating qualities when it gets wet. Polyester fiberfill provides insulation in damp and dry conditions but is very bulky.

Thinsulate consists of microfibrils. It is much thinner than down or polyester fiberfill, and provides twice the warmth. Some more advanced insulations include barritherm and solar alpha.

Barritherm is related to polyester fiberfill. It is composed of free-floating polyester

flakes surrounded by two layers of batting. Pores in the batting react to temperature-by closing up to retain heat outdoors, and opening up indoors to expel heat.

Solar alpha is a fabric containing zirconium carbide - a substance with a high rate of absorption, often used in solar power generators. The fabric absorbs sunlight, transforms it to heat, and holds it in the fibers. The fabric is also heat reflective so it will work on a cloudy day.

These are just a few of the components of winter coats this season. Some are basic and some are very advanced. Keep in mind that most likely higher technology carries a higher price.

When you look for a new coat this season, consider where you will wear it most, and the conditions to which it will be exposed. You can then choose a jacket with the materials that best suit your needs and your pocketbook.

Trinity to return campus

by Chris Stebnitz
Contributor

The area rock band from Menomonic WI., Trinity, will be coming back to UWSP to play at the Encore in the University Center.

Trinity, who played here twice last year, will be playing one more show at the Encore starting at 7:30 p.m., on October 25.

Trinity is made up of three brothers-Lance, Pat, and Kelly St. John, and a recently acquired drummer. The brothers have been playing together since they were kids and have written over 200 songs.

The concert is being sponsored by UAB, the University Activities Board, and will cost \$2 with a UWSP ID or \$3 without an ID.

Social Issues Forum to feature Middle East

A week long schedule of activities focusing on "U.S. Involvement in the Middle East," including a talk by, the former president and vice chairman of the American Arab Anti-Discrimination Committee (ADC), will be held Oct. 22-29 at UWSP.

Coordinated by the Social Issues Forum, a 14-member group of students and staff at UWSP, the programs will explore different perspectives of the situation in the Middle East.

The social issues committee hopes people will become better informed about what's really going on in that part of the world, says Mari Brooks, an employee of campus activities and member of the group. All of the sessions are open to the public without charge.

The schedule of events is:

-Monday, Oct. 22, 7 p.m. in the University Center's Wisconsin Room, Abdeem Jabara, former president and current vice chair of ADC, will discuss

"U.S. Arabs and the Gulf." A Detroit lawyer specializing in civil rights cases, Jabara left his law practice of 20 years when he assumed the presidency of ADC in 1986.

He describes the current state of the Middle East as "a grave situation." His appearance is sponsored by the history department, the Chancellor's Office, the Residence Hall Association, and the University Activities Board.

Tuesday, Oct. 23, noon to 1 p.m. in the UC Communication Room, UWSP business and economics faculty Larry Weiser and Randy Cray will talk about "Economic Consequences of US Involvement in the Middle East."

Thursday, Oct. 25, 4 p.m. in the UC Communication Room, military science faculty members Lt. Col. Roy Yenchesky and Capt. Marc Marszalek, plus the sister of a soldier killed in Vietnam, a Vietnam Veteran,

and the father of a soldier stationed in Saudi Arabia, will discuss

"Psychological Perspectives of the US Involvement in the Middle East."

-7 p.m., Communication Room, Ammar Abdulhamid, UWSP student who previously worked for the Islamic Information Service in Los Angeles, will address "The Islam Religion and Middle Eastern Affairs."

Monday, Oct. 29, 7 p.m. Communication Room, faculty members Neil Lewis, history, and Said Abubakr, paper science, will talk about "Palestinians and Prospects for Peace."

Other activities planned throughout the week will include letter writing to US soldiers coordinated by the RHA and the UAB, and a Peace Tree in the University Center.

In addition, on Saturday, Oct. 20 at 7 p.m., a program at Frame Memorial Presbyterian Church will precede the university's

series.

Reverend Shehadeh, international peacemaker and chair of the National Committee for Protection of Arab Land in Israel, will give a talk sponsored by the church.

All of the UWSP activities are coordinated by Brooks, assistant director of campus activities for community involvement. Further information is available by calling her at 346-4343.

Discussion to highlight animal rights debate

"Animal research is responsible for nearly every modern medical advance, including a cure for polio and cures for more than 80 percent of once-fatal heart diseases," says the director of a statewide organization who will speak at 7:00 p.m., tonight at UWSP.

Frank Vogel of the Wisconsin Association for Biomedical Research and Education (WABRE) will discuss "Animal Welfare vs. Animal Rights: The Debate Resurfaces" in room D101 of the Science Building. The presentation, sponsored by Beta Beta Beta, biological honorary society, is open to the public without charge.

A Wausau native educated at UW-Madison, Vogel is the head of a nonprofit, Milwaukee-based organization which promotes better public understanding of the need for humane biomedical research.

Its membership includes the Medical College of Wisconsin, Marshfield Medical Research Foundation, faculty and staff of UW-Madison and 350 individuals throughout the state.

Before joining the association in January, Vogel worked for the State Medical Society and for Wisconsin Department of Health and Social Services.

He calls the animal rights debate "a pitched battle for the hearts and minds of the American people."

"Despite having the support of most Americans, researchers are put in a precarious position because of radical animal rights activists willing to use any means to prevent humans from using animals," he says.

The long term goal of the animal rights movement, according to Vogel, is to stop the use of animals for any purpose—food, science, clothing, entertainment of even companionship.

Vogel encourages his audiences to raise their consciousness about animal research and to urge their legislators to support sympathetic legislation.

Standard First Aid (SFA) Class Schedule (One man CPR & First Aid) for Semester I, 1990

October 18 - (Thurs) 6pm - 10pm

16 - (Tues) 6pm-10pm

23 - (Tues) 6pm-10pm

24 - (Wed) 6pm - 10pm

25 - (Thurs) 6pm - 10pm

30 - (Tues) 6pm - 10pm

November 1 - (Thurs) 6pm - 10pm

19 - (Mon) 6pm - 10pm

26 - (Mon) 6pm - 10pm

December 5 - (Wed) 6pm - 10pm

6 - (Thurs) 6pm - 10pm

Other classes may be added as needed - All classes to be held at the Red Cross office, 3057 Michigan, Ave. There will be a 12 person limit per class. To pre-register for classes please call the Red Cross office between the hours of 9am - 4pm; Monday - Friday at 344-4052. The cost of the course, including textbook, will be \$25.00.

THE FAR SIDE

By GARY LARSON

"Zak! Don't eat parsley! Just for looks!"

We're looking for seniors who like working with all kinds of hardware.

Careers in data processing, accounting, actuarial, and auditing at State Farm.

At State Farm, we understand the concept of "work." Believe it or not, we also understand the concept of "play."

That's because we don't think you can be really outstanding at the first without having an appreciation for the second. Which is why a career at State Farm in Bloomington could be the ideal place for you.

You'll work for one of the country's most respected companies on the most advanced computer equipment in the industry. You'll be challenged and stimulated. You'll be rewarded with excellent pay and benefits. You'll make your classmates very envious.

What's more, you'll also have time to appreciate the finer things in life. That's because Bloomington isn't just a great place to start a career, it's a great place to live. Here you'll find pleasant neighborhoods, inviting parks, excellent recreational opportunities. And two universities that offer a host of cultural and social activities.

So if you're a senior with a math, accounting, data processing, or computer science background,

State Farm Insurance Companies

Home Offices: Bloomington, Illinois.
An equal opportunity employer.

come talk to us at your college placement office. After all, you're not just looking for a great job. You're looking for a great way of life.

Theatre Department attempts to balance repertoire

A balancing act is being staged in the Department of Theatre and Dance at UWSP.

The drama stems from the complications of juggling the needs of the department, its teachers, its students, and the general public, all at the same time, says Chairman Arthur Hopper. "While we are trying to train young actors and technicians, we must simultaneously mount productions that are appealing enough to draw audiences," he says.

Many members of the university and public audiences are discerning viewers, Hopper believes. Many others, however, prefer plays and musicals that are well known and entertaining over works that are more serious in nature or unfamiliar to them. So the balancing act between providing an educational challenge while pleasing audiences comes into play.

Added to the complexities of educating people simultaneously, is the incentive to remain financially stable, but this situation is akin to what goes on in

the real world, Hopper says. All productions, unless they are major theatrical events, have rather stringent financial parameters, so they have to be universal enough to draw crowds.

The department's production budget has not increased measurably in several years, according to the chairman. Because production budgets must depend upon ticket revenues, it is important for each season's bill to attract a sufficient number of ticket buyers.

For the theatre and dance faculty, one of this dilemma's biggest drawbacks has been their inability to expose students to multicultural productions or to contemporary plays which are a radical departure from the traditional mode.

"Like many arts institutions throughout the country, we face the challenge of educating and training our majors, exposing audiences to contemporary trends in theatre and dance as well as the classical theatre repertory," he continues.

"This challenge is becoming greater each season. The gap is widening between contemporary trends in theatre and dance and what is viewed as 'entertainment' by many of our audience members. Much of contemporary drama is written in forms that are unfamiliar to many of our audiences, deals with subjects and uses language that many of our audience members might find offensive," he estimates.

"However, as faculty we do not believe we can continue to deny our students and our audiences exposure to what has become the main stream of contemporary theatre practices," Hopper contends.

"Much the same can be said for dance. Contemporary trends in dance are often challenged as 'not being dance.' But the reality is that traditional dance forms are being stretched to include newer forms of expression through movement and choreography."

Future theatre seasons at UWSP will include works which reflect these new trends,

Hopper anticipates. "Some of our regular audience members may not respond positively, but we hope the majority of our fans will understand that we are fulfilling our roles as educators."

"As teachers we have an obligation to train our students in a variety of theatrical forms. Young actors, dancers, technicians and designers need to be stretched; they should be exposed to a broad variety of periods, styles and forms, including Shakespeare, Greek tragedy, contemporary drama and musical theater, plus various styles of choreography and dance," Hopper says.

"Even though we are making some changes, our audiences also need to know that we will not neglect the more traditional forms of theatre and dance. They will always make up the majority of what we produce. Our goal is always to 'entertain' but our definition of entertainment goes way beyond 'amusement.' It includes moving our audiences emotionally and intellectually as well," he says.

Hindu festival to be celebrated Saturday

Foreign students at UWSP invite area residents to join them in the celebration of a Hindu festival Saturday night at the Plover Municipal Hall.

The approximately 25 members of the South Asian Society are hosting the event that will begin at 5 p.m. A potluck supper will be served and entertainment will be provided, including Indian dancing.

Those who wish to participate are asked to bring a dish to pass. Reservations may be made by calling Mrs. Jyotsna

Chander, the South Asian Society faculty adviser, at 341-1538, or Jamil Hussain, from Bangladesh, club president, at 345-1209.

The holiday is called "Diwali" or "Festival of Light," and it is much like a combination of Christmas and Fourth of July celebrations in the United States, according to Mrs. Chander.

"Ode to an Autumn Laboratory"

by Dwarde Orterp
Contributor

Part I: Anthem
We Lead the Way, all night and day
of strong hearts and minds are we

Teaching what we know, by example we show
to all of those who aspire to be

The Point Battalion's pledge is to stand out on the edge
Of any rock, cliff or ledge
Our voices we sound
Without looking down
While rappelling on down to the ground

Part II: A kind of summary
Working together as a team is often harder than it may seem

But by using your brain
You find you maintain
The squad's morale and high self-esteem

Dangerous anticipation felt to fire on a range
Strict instructions, sight on target

and on command,
ENGAGE!

Heave-Ho! with all our strength
to get from side to side
Stretch and secure one-twenty foot length

to snap in and go for a ride
The sun goes down, the day was long

and we finish off the training
Back to the barracks, to watch some movies

and pray Sunday isn't raining!

Souvenirs and Scars are all that's left of Fall Lab

But as you look at the weekend whole...

It really wasn't all that bad
We've learned so much, of tasks and such

to tell some exciting tales
But mostly it's been, an exercise in

believing we can work together

Then get in on the ground floor in our Platoon Leaders Class program for college freshmen, sophomores and juniors. You could start planning on a career like the men in this ad have. And also have some great advantages like:

- Earning \$100 a month during the school year
- As a freshman or sophomore, you could complete your basic training during two six-week summer sessions and earn more than \$1400 during each session
- Juniors earn more than \$2400 during one ten-week summer session

- Seniors and graduates can be commissioned through the Officer Candidate Class Program
- You can take free civilian flying lessons
- You're commissioned upon graduation

If you're looking to move up quickly, look into the Marine Corps' commissioning programs. You could start off making more than \$20,000 a year.

We're looking for a few good men.

Want to move up quickly?

Angry Dog Defense shuts UW-Oshkosh down

by Timothy A. Bishop

Sports Editor

The Angry Dog Defense made its presence known Saturday at Goerke Field as the UWSP Football Team shut down the Wisconsin State University Conference's top ranked offense enroute to a 23-3 victory over UW-Oshkosh in the Point Homecoming Game.

The Pointers held Oshkosh, who had been averaging almost 500 yards per game in total offense, to only 129 yards and only one field goal, that coming after the Pointer offense had fumbled the ball away at the UWSP 40-yard line.

Pointer coach John Miech said that the strong defense was an offshoot of an improved offense.

"We have an excellent defense, but the key to why they played so well was that the offense was able to take some time off the clock," said Miech. "It gave them some enthusiasm knowing that they did not have to go out there and do it themselves."

"I am really excited about the way that the defense held them. They had been averaging 500

yards and we held them to 135. And, I am happy about our offense, they put some points on the boards and gave us something to hang our hat on."

Oshkosh managed only 66 yards rushing and 69 yards passing.

After each team failed to move the ball on its first drive of the game, the Pointer offense, behind quarterback Roger Hauri and halfback Chris Moore, drove 69 yards on 10 plays. Hauri and Moore capped off the drive when they connected on a 26-yard touchdown pass. Dave Schneider added the extra-point to give UWSP a 7-0 lead.

The next time the Pointer got the ball, Hauri engineered another touchdown drive. This time, Hauri tossed a five-yard scoring pass to Barry Rose and Schneider added the extra-point to finish off an 89-yard, 12-play drive and the Pointers led 14-0.

The only successful Oshkosh drive came late in the first half. Oshkosh recovered a Pointer fumble at the UWSP 48, and the Titans drove to the Point seven-yard line before settling with a

Jandrin leads Point women to title

PEWAUKEE--The UWSP Women's Cross Country Team took three of the top five individual finishes to win the Carroll College Invitational here Saturday.

The Pointers won the meet with 34 points, followed by UW-Oshkosh with 45, Carroll College 78, St. Norbert's College 92, Ripon College 150, and University of Chicago 153.

Suzi Jandrin took the individual title, finishing first with

a time of 19:34. Marnie Sullivan took second, finishing seven seconds behind her.

Other top finishers for the Pointers were Aimee Knitter (5th, 19:59), Amy Voigt (14th), Tina Jarr (16th), Tami Langton (20th), Debbi Hartz (30th), and Pam Prohaska (49th).

Pointer coach Len Hill said that his runners gave a total team performance.

"I was very pleased with the total team effort in this race,"

said Hill. "The three lead runners did exactly what they needed to do for us."

"I felt that the next three runners (Voigt, Jarr and Langton) also ran very well. As we go into the conference meet in two weeks, we to get that second pack closer to the lead pack."

Hill also complimented some of his runners individually.

"Individually, Jandrin took

Pointer men win Carroll College race

PEWAUKEE--Rodney Garcia took his second straight individual title as he led the UWSP Men's Cross Country Team to a first place finish in the Carroll College Invitational here Saturday.

Garcia, who was running in his hometown, won the meet with a time of 25:41.

Pointer coach Rick Witt said that running at home really inspired Garcia.

"Garcia was running in his hometown with all of his relatives there," said Witt. "He responded by again showing that he is one of the top runners in the

country. He was in control the entire race and ran a good time on a tough course."

Other finishers for the Pointers were Bill Dean (4th, 26:55), Kevin Mahalko (6th, 27:00), Jon Smith (10th), Jason Zuehlke (11th), Matt Hamilton (12th), and John Ceplina (13th).

Witt said that his team ran well despite being shorthanded due to illness.

"This was another step in what we hope to be an excellent season," said Witt. "We knew that the level of competition

STRIKING OUT

by Timothy A. Bishop

Sports Editor

It is beginning to look a lot like the Green Bay Packers should have let quarterback Don Majkowski have the season off after holding out in a contract dispute. After all, it doesn't take a well paid quarterback to throw five interceptions as the Packers fell to the Tampa Bay Buccaneers, 26-14, Sunday in Tampa.

The Packers and the Buccaneers are almost reversed in the standings from where they were expected to be. The Pack was expected to compete for the NFC Central Division title, while Tampa was expected to languish toward the bottom of the division.

Instead, Green Bay finds itself fighting to stay out of fourth place in the division while the Bucs are only one game behind division leading Chicago.

The Bears remained atop the

division with a victory over the downtrodden Los Angeles Rams. The big story is not the Bears' victory but rather the fall that the Rams have taken. They were expected to contend with San Francisco for the NFC West title, but rather they are sitting on the bottom of that division with only one win this year.

The Vikings, who were picked by almost everyone (including me) to dominate the NFC Central, have found a place at the bottom of the standings. Minnesota has started out 1-4 including Monday's loss, which was a game that the Vikings had won before turning the ball over three times late in the game to blow a nine-point lead and pick up a 32-24 loss.

• The Packers, Bears, Detroit and Minnesota will enjoy a week off as they all have an open date scheduled. Maybe Majkowski will find some of his magic (and his timing as well), and the Pack can come back to

challenge the Bears and the Buccaneers.

• Finally, how about those San Francisco 49ers. It is hard to say the word dynasty with any team in any level of any sport, but the 49ers have to be considered a contender for dynasty-hood in the NFL. San Francisco quarterback Joe Montana just seems to get better and better. Last weekend, Montana threw six touchdown passes and passed for a career high 475 yards as the 49ers beat up on Atlanta, 45-35.

• Major college football continues to suffer from very questionable officiating. First, Colorado was inadvertently awarded an extra down in the game on October 6. The result was the winning touchdown for the Buffaloes as time expired in a game which may have national championship ramifications.

Tennis team wins first dual meet, 9-0

PLATTEVILLE--The UWSP Women's Tennis Team broke an eight match losing streak with a 9-0 shut out victory over UW-Platteville here Saturday.

That win followed a 9-0 loss at the hands of UW-Whitewater last Wednesday.

The Pointers are now 1-8 overall and 1-6 in the Wisconsin Women's Intercollegiate Athletic Conference.

"We were very pleased to get our first win of the season," said Pointer coach Nancy Page. "Our players are hard hitters, so this match was a test of our patience."

"Shelly Locher and Tammy Jandrey had the toughest matches (Number one and Two Singles), but they managed to come up with the victories. Amy Finnel played her first varsity singles match (Number Six) and overwhelmed her opponent."

Other Pointers adding to the decisive victory were Katie Imig (Number Three), Jamie Jensen (Number Four) and Melissa Hoff (Number Five) in singles action. In doubles play, it was the teams of Imig and Jensen (Number One), Jenny Cordes and Finnel (Number Two), and

24-yard field goal.

The Pointer defense continued to shut down the Oshkosh offense throughout the second half. The one time the Titans did manage to put together a drive, they drove to the UWSP eight-yard line before Jerry Olszewski intercepted an Oshkosh pass in the endzone. With the exception of that drive, Oshkosh was unable to pickup a single first down in the second half.

Meanwhile, the Pointer defense and the offense each put points on the board.

In the third quarter, Pointer running backs Robert Reed and Jason Sicchio combined for 80 yards rushing as the Pointers took a 21-3 lead. Sicchio scored on a 33-yard run and Schneider added his third extra-point of the afternoon.

The Point defense scored the final points when Pointer punter Steve Topel and an Oshkosh penalty put the Titans back to their own 18-yard line. On the next play, a bad snap put Oshkosh back to its own one-yard line and then Point linebacker

Craig Verhagen tackled the Oshkosh running back in the endzone for a safety and a 23-3 Pointer advantage.

Miech said that the play of Verhagen is an important part of the Pointer's defensive success.

"He is our Lawrence Taylor type linebacker and that is what we do with him. We want him to be our leading sacker, and he is. The defense always looks to him for good play and he performs."

Hauri, who had struggled during his last several appearances for the Pointers, completed 13 of 23 pass attempts for 192 yards and two touchdowns. Moore led Point with two pass receptions for 48 yards, while Sicchio had four for 45 yards and Scott Zirschwitz had two for 43 yards.

Miech said that Hauri's play was a key to the victory.

The offensive line gave him a lot of protection," said Miech. "He didn't have very much pressure, and as a result he is doing a better job of hitting the open receiver. His performance today is what we needed."

Reed led the Pointers with 19 carries and 88 yards rushing. Moore had 86 yards on 17 carries for UWSP.

Olszewski had two interceptions for the Pointer defense, while Eric Wojciechowski had one. Eric McGath recovered a fumble for UWSP, while Verhagen sacked the Oshkosh quarterback twice.

Things don't get any easier for the Pointers this week as they travel to UW-Whitewater to take on the WSUC leading Warhawks.

"We know what we are up against," said Miech. "They are on a roll and if we want to get to the play-offs, they are the top-ranked NCAA team in this region. If you have a defense, you have a shot. I think they will come ready to play even more than they did today."

Saturday's game starts at 1 p.m. and can be heard on radio station WSPT.

Women's soccer team defeats Luther

by Kris Kasinski

Sports Writer

After having its game against UW-Eau Claire cancelled because of last Wednesday's early snow fall, the UWSP Women's Soccer Team came out strong on Friday to defeat Luther College of Iowa, 8-0.

Eight goals by eight different players set the tone for encouraging team morale. Lynn Olsen, Suzi Lindauer, Jenny Bradley, Aimee Jerman, Maureen Flynn, Sara Uhlir and Krista Soto all scored during normal play, while Jenny Erso added a goal on a penalty kick.

Olsen, Bradley and Lindauer each added two assists, while Flynn and Soto each had one for the Pointers. Pointer goal keepers Lisa Mortensen and Jill Golla combined for eight saves.

Pointer coach Sheila Miech said that here team is playing well as the season draws to a close.

"We had a fine performance by the entire team," said Miech. "Players that we injured early in the season got considerable playing time and played extremely well."

"Winding down near the end of the season, our team strength is surfacing. We are working hard to end our season strong."

The Pointers traveled to Oshkosh Tuesday, and this weekend, they will try to defend their 1989 State Championship as they travel to the State Tournament in Beloit.

They return home next Wednesday when they play host to St. Mary's on the intramural field starting at 4 p.m.

Tennis

from page 14

Locher and Jandrey (Number Three) that capped off the Pointer win.

Page said that her team did play well in the loss to Whitewater, but was just overpowered.

"Whitewater is very strong," said Page. "We played well, but most of the scores were fairly

lopsided. Jensen lost in a tie-breaker in the third set of the Number Five singles. She played well but was unable to come up with the win. Locher and Bather almost won their match at Number Three Doubles, but faltered in the third set.

The Pointers concluded their dual season on Tuesday against Lawrence University and will compete in the NAIA District 14 Tournament this weekend.

Men's Cross Country

from page 14

would not be what it was last week at Notre Dame, but that was okay as we were not at full strength (this week).

"Both Hamilton and Jason Ryf have been bothered by colds this week, but the team as a whole ran extremely well and took up the slack nicely."

The Pointers return to action this Saturday when they travel to meet top-ranked UW-Oshkosh in a dual meet. On Saturday, October 27, they will race in the Wisconsin State University Conference Meet in Whitewater.

Women's Cross Country

from page 14

the lead before (the end of the first mile and then she held it the rest of the way," said Hill. "Sullivan stayed right with Jandrin and gave us her best race of the season. Voigt and Langton also had their best races of the season. Voigt keeps getting stronger and moving up every week. Jarr has given us solid performances each week and that is all I expect from a freshman."

The Pointers travel to UW-Oshkosh on Saturday for a dual meet and on October 27 they will run in the Wisconsin Women's Intercollegiate Athletic Conference meet in Whitewater.

Injury-riddled volleyball team drops three weekend matches

The injury-riddled UWSP Women's Volleyball Team continued to struggle as they dropped three matches in

Striking Out

from page 14

Then, last Saturday, top-ranked Michigan rent for the win rather than the tie and attempted a two-point conversion last in the game against Michigan State. The Michigan receiver on the play was apparently interfered with, but there was no penalty called and State escaped with a 28-27 victory.

That game left the door open for Virginia, who remained as one of the five unbeaten, untied teams left in NCAA Division IA, but there is again fuel for the national championship playoff series as all five teams, including the Atlantic Coast Conference's Virginia and Georgia Tech, have relatively weak schedules this year.

The Wisconsin Badgers lost again, this time they dropped a 30-10 decision to Iowa. This Saturday, the Badgers travel to Ann Arbor to take a Michigan team which is still smarting from last weekends upset.

• Elsewhere in football, it was announced that the World American Football League will begin play this spring with between 10-12 teams, including four teams in Europe and six to eight teams in North America.

The league also said that they will place teams in several U.S. cities even if they can not find owners to pay for them. Those teams would be run through the league office. Spring football failed in the United States Football League, and soon the WAFL will find out if an international flavor can keep warm-weather football going.

And they will learn if American football can compete against International Football (soccer) and Australian Football (insanity).

• Major League Baseball is coming to a close for another year, and what a close it is looking to be.

The Oakland A's went into the 1990 World Series as the overwhelming favorite to make quick work of the Cincinnati Reds and pick up their second straight World Championship.

The Reds, however, have shown that they are a force to be contented with. They have found a combination of strong pitching, good defense and excellent hitting to win Game One, 7-0, on Tuesday and then outlast Oakland, 5-4, in 10 innings last night.

Now, Oakland is faced with the task of sweeping all three games by the bay this weekend and then returning to Cincinnati next week and win either Game Six or Game Seven. Sorry, all bets are off.

• The National Hockey League is up an going, and the Chicago Blackhawks look ready to compete for the Stanley Cup as they have started the season strong with a 4-2-0 record, including wins over the Minnesota North Stars and the New York Rangers. Only one team, the Boston Bruins, has started off with a better record at 4-1-1.

straight sets at the Macalester College Invitational last Wednesday.

The Pointers are now 3-21 overall and 0-5 in the Wisconsin Women's Intercollegiate Athletic Conference.

UWSP lost its first match to Northwestern Bible College, 12-15, 9-15, before losing to UW-Superior, 7-15, 10-15, and St. Olaf College, 7-15, 13-15.

Pointer coach Sharon Stellwagon said that her team played well despite season-long injury problems.

"We have been playing extremely well considering we have not had a completely healthy team since the first match of the season," said Stellwagon. "They play hard and they never give up which are qualities which I admire."

Individually, Laurie Helling had four service aces to lead the Pointers, while Dawnette Updyke was top blocker with six solos and six assists. Sue Manion had eleven kills and a .346 spiking average for UWSP.

Rugby Club crushes UW-Milwaukee, 38-4

The UWSP Rugby Club got a well-deserved victory last Saturday, as it routed the UW-Milwaukee Rugby Club, 38-4, on the UWSP Intramural Field.

The Point Black and Blood came out strong and scored on the opening drive. Point punished Milwaukee through out the first half with hard hitting as it scored the first four tries of the half. Todd Fredrickson added the conversion kick three of four times as Point took a 22-0 lead.

Milwaukee started out strong in the second half and took advantage of some sloppy play by Point, scoring on the first possession after the intermission.

Point, however, took advantage of an injury timeout to regroup and scored three more tries while shutting out Milwaukee.

The scrum of the Point Rugbys lost scrums for the first time this season, but they made up for it with the loose play and excellent presentation in the rucks and the mauls. Also, the Point backs continued their excellent passing and hard running.

Point coach Mike Williams

said that his team learned some lessons in the game with UW-M.

"We learned that we can win the game out of the scrum," said Williams. "This was an excellent match for us to get our confidence back as we go into our

biggest match of the year next week."

Point will take this weekend off before hosting UW-Eau Claire on October 27 to determine the winner of the Northern Conference.

The scrum of the UWSP Rugby Club battles for the ball against UW-Milwaukee last Saturday on the Intramural Field. The UWSP "Black and Blood" defeated Milwaukee, 38-4. (Rugby Club Photo)

Merck will be visiting your campus soon. Sign up now for a personal interview and learn how Merck can help you reach your most ambitious career goals.

We're a preeminent developer of health care technology as well as careers. Producing a wide range of answers to infection, pain and disease. What's more, Merck is a world leader in the protection of animals and crops.

To an exceptional graduate, this means growth. Simply because of Merck's continuing success in its endeavors and major plans for the future.

If you're at the head of your class in engineering, life and physical science, business, liberal arts or law, you may qualify for an extraordinary career with Merck.

We not only develop extraordinary products, we develop extraordinary careers. Merck is an equal opportunity employer M/F.

Soccer Club clinches playoff berth

by J. Patrick
Contributor

The UWSP Men's Soccer Club qualified for the Northern Intercollegiate Soccer Conference (NISC) Tournament by defeating UW-LaCrosse, 2-0, last Friday.

With only last night's match with River Falls remaining, the Pointers can finish no worse than second in the NISC.

"Right now, we are waiting for news about possible forfeits by UW-Stout and UW-Eau Claire due to the last of certified referees in those matches," said Club President Jason Muelver. "Either way, we are in the conference tournament."

In the match against La Crosse, it appeared equal for the first 20 minutes, but then Stevens Point found its groove.

At the 21:00 mark of the first half, Point's leading scorer Jon

Eynon scored his eight of the season and UWSP took a 1-0 lead.

Point co-captain Dave Valentine scored the clincher at the 15:00 mark of the second half. He took a pass towards the near side of the goal and powered the ball past the La Crosse goalie.

"It was nice to have our full team out with us," said Point co-captain and goalie John Clark, who picked up his fourth shutout of the season. "For conference, we should be at full strength, a place we haven't been for quite a while."

Among they players who have returned from injuries are Jim Feathersen and Jim Runge.

The Pointers will take their full roster of 25 players to this weekend's conference tournament in Blaine, Minn., where they will play either Mankato State University or St. Cloud State.

The NISC Champion will travel to the National Collegiate Club Soccer Association (NCCSA) National Tournament November 16-18 in El Paso, Texas. If the Pointers make it, it will be their third appearance in as many years.

Golfers finish up third in conference and district play

SPRING GREEN--The UWSP Men's Golf Team ended its season last week with a third place finish in the Wisconsin State University Conference Tournament and NAIA District 14 Tournament in Spring Green.

The third place finish gave the Pointers a third place finish in the WSUC season, over taking Whitewater during the final part of the conference season.

UW-Parkside, which is not a part of the WSUC, took the team title in the District 14 competition with 1159 strokes in the three day, 54-hole competition. Eau Claire took second with 1189 strokes, followed by UWSP with 1200, UW-Whitewater 1211, UW-Platteville 1235, UW-Oshkosh 1247, UW-Superior-1247, UW-Stout 1268, UW-LaCrosse 1272 and UW-River Falls 1276.

Eau Claire took the WSUC season title, which is computed from the finishes in the three regular season conference meets and the conference tournament, followed by Whitewater, UWSP, Platteville, Oshkosh, Stout, La Crosse and River Falls.

Todd Gaynor led the Pointers with rounds of 78, 83 and 75 strokes for a 54-hole total of 236. Chip Summers finished on stroke behind him with 237 (80-

77-80).

Other scorers for the Pointers were John List (76-82-80) 238, Joe Titus (78-81-86) 245, John Sams (81-82-89) 252 and Bert Janko (84-91-81) 256.

Intramural Notes

Rich Schenkus won the Men's Free Throw Contest held last week, while Mark Armstrong took second place.

Amy Schumacher took first place in the Women's Free Throw Tournament, with Sarah Sonneman taking second.

Registration for the Singles Racquetball Tournament ends on October 26. Play is scheduled to begin on October 27-28.

Entry deadline for the Three-on-Three Basketball Tournament for men and women is November 8. Play is set to begin on November 12.

Entry deadline for Men's and Women's Floor Hockey is October 19, with play set to begin on October 22.

Men's and Women's Singles Table Tennis Tournaments will begin on October 22. Entry deadline is October 19.

COME EARLY TO AVOID THE COVER

HERE'S WHY THE SMART MONEY AT UNIVERSITY OF WISCONSIN IS GOING WITH TIAA-CREF AS IF THE FUTURE DEPENDED ON IT.

Because it does. Smart investors know that your future depends on how well your retirement system performs. TIAA-CREF has been the premier retirement system for people in education and research for over 70 years. We have enabled over 200,000 people like you to enjoy a comfortable retirement. And over 1,000,000 more are now planning for the future with TIAA-CREF.

SMART MONEY LOOKS FOR SECURITY, GROWTH AND DIVERSITY FOR RETIREMENT SAVINGS.

Security—so the resources are there when it is time to retire. Growth—so you'll have enough income for the kind of retirement you want. And diversity—to help protect you against market volatility and to let you benefit from several types of investments.

THAT'S EXACTLY WHAT YOU GET WITH TIAA-CREF.

TIAA offers you the safety of a traditional annuity that guarantees your principal plus a specified rate of interest, and provides for additional

growth through dividends. CREF's variable annuity offers opportunities for growth through four different investment accounts, each managed with the long-term perspective essential to sound retirement planning:

**The CREF Stock Account
The CREF Money Market Account
The CREF Bond Market Account*
The CREF Social Choice Account***

**CALL 1-800-842-2776
TO FIND OUT MORE**

Our experienced retirement counselors will be happy to answer your questions and tell you more about retirement annuities from TIAA-CREF.

Experience. Performance. Strength.
Your future is protected by the largest private retirement system in the world. We have done so well, for so many, for so long, that we currently manage some \$85 billion in assets.

Ensuring the future
for those who shape it.™

* The CREF Bond Market and Social Choice Accounts may not be available under all institutional retirement plans, but are available for all Supplemental Retirement Annuity plans.

For more complete information, including charges and expenses, call 1 800 842-2733, ext 5509 for a prospectus. Read the prospectus carefully before you invest or send money.
