90FM to air eighth annual Jazzfest

WWSP-90FM will be sponsoring the eighth annual 5-hour-long Jazzfest from Oct. 26 to Oct. 27.

The weekend will be divided into four-hour shifts, each manned by a student air personality. Each session will feature a selected jazz artist to play among the regularly aired songs of their choice.

Featured artists include Tom Scott, Harry Connick Jr. and the Pat Metheny Group. Listeners will have a chance to hear the best in all styles of traditional and contemporary jazz. Each session line will be open for calls all weekend at 346-2698.

Through Jazzfest '90 we want to familiarize listeners with the music of 90FM and bring more listeners to the station," said Weaver.

Throughout Jazzfest weekend, the station will hold a four-hour album giveaway.Listeners can call in and win albums by their favorite jazz artists.

According to Weaver, Jazzfest '90 is being aided by local sponsors in accordance with 90FM. Jazzfest took place twice a year until 1988, scheduling changes and the influence of Trivia as the station's major event limited Jazzfest to once a year.

Now the station associates Jazzfest with fall, hockey coverage with winter and trivia with spring. Weaver explained that there are free beer hosts and airs many other programs.

They include a movie review show "The Preview," a folk and bluegrass show, Harvest of Harmonies; a metal show, Metal Thunder; and Jazz-Cities.

"Hopefully, some of the listeners who enjoy into Jazzfest will become faithful listeners of our regular jazz program," said Weaver.

Mid-East crisis examined

Social Issues Forum, a division of Campus Activities, is sponsoring a series of speakers on the Middle East Crisis. The series is entitled "Are We at War?" and is subtitled "Kuwait: The Next Vietnam?"

On Thursday, Oct. 25, at 4:00 p.m., a panel will speak on the psychological perspectives of U.S. soldiers and family members with the involvement in the Middle East. Speakers will be a sister of a soldier killed in Kuwait, a Vietnam veteran, and a father of a son currently stationed in Saudi Arabia. It will be held in the Communication Room of the University Center.

Aamar Abdallah, a current Muslim Student Association member, will speak on Islam religion and Middle Eastern affairs on Thursday, Oct. 25 at 7:00 p.m. in the Communication Room.

On Monday, Oct. 29, the series will conclude with the topic of Palestinians and Prospects for Peace. Neil Lewis of the History department and Said Abubakker of the Paper Science department will be the featured speakers. The discussion will be at 7:00 p.m. in the Communication Room.

The series began on Saturday, Oct. 20, with speaker Reverend Shealah Sheehan, International Peace-maker for the Middle East and Chair of the National Committee for Protection of Arab land in Israel.

Abdeen Jabara, current national vice-chair of the American-Arab Anti-Discrimination Committee in the ACT Office.

Larry Weiser and Randy Cray, faculty from business and economics, spoke on economic consequences of U.S. involvement on Tuesday, Oct. 23.

Letter writing to soldiers in the Middle East is being sponsored by Residence Hall Association and University Activities Board.

A peace tree will be placed in the UC between the Information Center and the Tyme machine.

"We received the idea from St. Joseph's Elementary School where they had one. Our advisor Marie Brooks brought the idea to the Social Issues Forum," said Todd Lowney, coordinator from Association for Community Tasks.

The peace tree will be dedicated at 2:00 p.m. on Thursday, Oct. 25 by Chancellor Sanders. All organizations are welcome to submit symbols to hang on the tree. Symbols may be dropped off in the ACT office.

Intramurals lost fields to athletic complex

But students gained future opportunities

by Joe Wornson

"The construction of the Health and Physical Education facilities has had controversial effects on intramural and club sports. There is space in the intramural director of UWSP, Monte Charles is in charge of the intramural fields.

"The completed the big intramural field to the west which was three football fields, so it is kind of squeezing us for the other activities," said Charles.

"Naturally, indoor track and field events and things of that nature will be there but it's not a basketball arena. It's a diversified health enhancement center. It's primarily for the entire student body, not a select group of people," said Charles.

Even though three intramural fields were demolished, intramural sports still remain at the same level as last year.

"We just have to use the existing conditions that remain. And we did that. We have four intramural fields on the east intramural field," said Charles.

"We could have one on Coleman Field but we weren't pressed into using it because the marching band is using it along with the Rugby Club," added Charles.

Charles feels that there is adequate playing room if there isn't a large increase in intramural teams. One type of possible expansion might include lights.

"Somewhere along the line here, that issue will come up because we are in a squeeze position. When we get to this time of year with the daylight savings time we will lose another hour of playing time.

"I can see that we would eventually like a lighted playing field area so we can get another four, five, or six hours of use," said Charles.

Charles feels that the loss of space is well justified because of the benefit of the new complex. It is going to be a real asset to this university and to the community and especially to the students. The students have priority on it and then if we have extra time we will let others use it," said Charles.

Currently, the intramural department is thinking about having all campus co-ed track meets or swim meets.

Outside the complex, seedling has been done on some playing fields and turf has been added. The east intramural field will be upgraded.

"The city has pressured through the mayor to fix the fields just north of Quandt and Berg gymnasiums since we are trying to get an NFL team in here for pre-season training," said Charles.

A professional football team training in Stevens Point would add financially to the area and also to the upkeep of intramural fields.

A sign placed by the tree reads: This tree is a representation of peace. This tree and the symbols hung on it will remain until the Middle East Crisis is over. All organizations are welcomed to hang a symbol on the tree. Please submit your symbol to the Social Issues Committee in the ACT Office and join in our message of peace.

We cannot change the whole world at once. We must start with ourselves and implement it into our community so it can be implemented into our state, nation and finally our world.

"The peace tree will remain until soldiers are home and the Middle East Crisis is over," said Lowney.

The Social Issues Forum is a panel of about 15 people from ACT, DRA, University Activities Board, Student Government Association, Interfaith Council and Cultural Diversity.

Social Issues Forum wishes to increase awareness of issues which are taking place in the world and to provide information on all sides of an issue.

Students for Thompson working hard

The Students for Thompson, a recently recognized Student Organization on the UWSP campus, have just completed a very successful week.

"Being our first official week as an organization on campus, I could not be prouder by the large amount of support and effort by everyone involved. It's just wonderful," said Chris Carter, chairman of Students for Thompson.

"This week has seen a number of things for Governor Thompson. A literacy drop last Sunday, signs are going up and we're working down at the GOP Headquarters."

SGA calendar update

STUDENT SENATOR
POS!TION OPENINGS
AVAILABLE—STOP BY SGA OFFICE FOR AN APPLICATION!
• Chancellor Sanders addressed the senate. He spoke about the success of Project Listen, and the UWSP Strategic Plan, developed to lead UWSP into the next century.
• He also explained the policy of enrollment management, which has cut back on the number of students at UWSP.
• Funding

-Missouri and Tri-Beta, a biology honor society, were approved for travel expenses to professional conferences.
• A discussion on the No Age on Transcripts policy was tabled indefinitely. This policy would eliminate age and high school graduation dates from student transcripts.

• This week
• Senate will meet on Oct. 25, at 7:15 p.m., in the Wright Lounge
• Joanne Leonard, from Wisconsin Public Service, will address the senate about the upcoming Weatherization Workshops.

These meetings are about increasing energy efficiency in off-campus housing. They will be held.

UWSP is broadening its curriculum with a specialized program in tourism and forest recreation for business majors.

It is a particularly appropriate addition because of the Wisconsin economy's reliance on income spent for leisure services. UWSP president Jane G. Skitmore, dean of the College of Natural Resources, said after the UWSP Faculty Senate approved the plan this week.

It is important, he added, that people have new opportunities to be educated about the value of moving beyond exploitation of the state's natural resources to improved management of them.

To complete the concentrations, business students will be required to take courses in:

"Tommy has been working hard going around the state, and meeting the people to discuss his three "Ts." The economy, education, and the environment."

"The Economy of Wisconsin is stronger than ever and is just getting stronger; we are getting more companies to opt for Wisconsin than other states. Which brings more jobs to the people of the state."

"The state of Education in Wisconsin is by National Average one of the best in the United States. Our university system is considered to be one of the best university systems, and to achieve that level of Education Governor Thompson has implemented the valencedarian scholarship in order to keep our best and brightest students in Wisconsin colleges."

"Two of the largest land purchases in Wisconsin history; the turtle flambeau and the Chipewa Flowage have made Wisconsin and Gov. Thompson leaders in the protection of our environment."

Timex Fitness
Day, Nov. 5

UWSP will host Timex Fitness Day, November 5, to introduce to the students, faculty, and general public the new Health Enhancement Center.

According to UWSP instructor Jerry Gothan, this event "will" emphasize personal physical fitness for UWSP students during the week proceeding the grand opening of the new health enhancement center on Sunday, November 11.

From 6:00 p.m. to 10:00 p.m., students will have the opportunity to participate in either a five lap swim in the new pool, or a one mile run or two mile walk on the indoor track.

Also, high impact aerobics will be offered at 6:00 p.m., while a low impact session will be held at 10:00 p.m.

There will be booths outside the activity; areas where participants can register their names for drawings. At registration, each person will receive a free fitness tips guide for college students and a certificate of participation.

The drawings will be held at 10:00 p.m. at indoor track, and participants must be present to win. Prizes include Timex sports watches, certificates for Reebok athletic shoes, and Vexus sports eyewear.

The contest is open to all faculty, staff, students, and community members 18 or older, and is sponsored by the health promotion/wellness facility management students, Timex, and Reebok.

Campaigns becoming big business
What role does money play in election results?

by Ron Wirtz
Editor-in-Chief

The past few big elections in the state of Wisconsin have set a disturbing trend. Both this year’s gubernatorial race and the last U.S. Senate race filling William Proxmire’s seat have been financially David and Goliath matches.

Figures have recently come out analyzing the Thompson-Loftus race. Not surprisingly, Thompson’s campaign is outdoing Loftus’ campaign. It’s the money that makes the difference.

Thompson has received more than $500,000 from both Illinois and the 53217 zip code of Milwaukee (upper) north. And although Loftus has had the entire state of Wisconsin. Executives have given Thompson $14 million, and Loftus, only $30,600.

Now I’ll give Thompson credit. He’s one of the most popular governors in this state’s history, and he’s taken advan­tage of his own campaign. He’s done nothing illegal or even unethical. But this situation and those like it warrant a second look.

As a reference on the campaign to fill William Proxmire’s senate seat in 1988, Herb Kohl and Susan Clapper decided to face off. This election pitted a businessman against an experienced state politician. Kohl owned the Milwaukee Bucks, among other things, and had assets valued in the area of several billion dollars.

He spent money on no other election has ever seen in the state of Wisconsin. Most of this money came out of his own pocket. Which is good and bad. He didn’t do a lot of big-wig lobbying for donations, but then again, he didn’t have to. The millions he spent on his campaign was pocket change.

Susan Ettingerleiter, on the other hand, had been a distinguished member of the state legislature, and logically had more of the experience necessary to fill the seat of a very influential U.S. Senator. But she had nothing close to the financial backing of Kohl.

So the question remains—just when does a person’s checkbook become more important than his political platform or past experience in getting elected? With huge campaign budgets, and the current insistence on mud-slinging cam­paigns, elections today are focusing away from important issues that should be deciding elections.

Ideally, elections equal is­sues, not zeroes at the end of a checking account. How much does money have to do with swaying voters? Hard to say definitely. One thing it does is get the wealthier candidate more exposure. Kohl ran more commercials than The Clapper. Thompson was able to get President Bush into Mil­waukee for a fundraiser which raised more money in local donations ($500 and up $324,270) in one day than Lof­tus has raised in the same financial area—period.

This increased exposure is especially important for those voters who are not up on the is­sues and candidate platforms. Normally, they will vote for the person with the best image. Nowadays that’s the person with the least mud on him or her, which is the person who has more dirty money to throw on the opposition.

Somewhere along the line, campaign spending has to be capped. Having these caps will give each candidate equal op­portunities for publicity. More importantly, it will refocus at­tention on the election itself and the prevalent issues of the day.

It is widely acknowledged that Thompson should soundly defeat Loftus regardless of cam­paign funding. But both candidates have run very little ad­vertising campaigns. Thompson seems much more superficial than I originally perceived, and Loftus continually comes off as a weeene of sorts to me, kind of a cross between Cliff Claven and Charlie Brown.

But both candidates should have equal financial oppor­tunities to make weenies of themselves.

Peace.

Stop with the apathetic stereotypes by Mary Kaye Smith
Features Editor

It seems that ever since the media has deemed the up-and­coming generation interesting enough to write about we’ve been buried in an onslaught of negativity. If I hear one more derogatory characterization I am going to scream. I’m sick of it. Unedu­cated in history, math, geog­raphy—you name it. Doesn’t care what the state legislation is or how the city councils are run. Money lustng and self­ish. The MTV generation. A nonvoting population. Can’t compete with peers around the globe. And on a recent “TIME” magazine cover “Twen­tsy-somethings: laid back, late blooming or lost?” STOP.

My self esteem can’t take anymore. But before these criticisms drive me to run off to Calcutta and succeed Mother Theresa, I’d like to offer a little defense of my peers.

First of all I would like to make it clear that the following comments are not excusing apathy or a lack of political responsibility. Yes, it is impor­tant to be aware of the events around us. The global village is very real. But I don’t believe that every person must donate their entire lives to saving the world to make it a better place.

Instead of characterizing our generation as apathetic, I would like to instead offer what I feel is a more appropriate term. OVERWHELMED. Yes, we are the overwhelmed genera­tion. We have been weened on tv and its component issue sa­uration has negatively affected us. I don’t know if there have been any official psychological studies on the effects of mass issue loading but I wonder if the subjects wouldn’t somehow be characterized as apathetic and uncaring.

I can remember when I first became aware of the inherent in­stability of our planet. I was in high school. Each week in my social studies class we watched a news program specially geared to our age group. The segment which forever erased my sense of security focused on the proliferation of the nuclear arms build-up and the resulting threat of nuclear annihilation. I had nightmares for weeks until my mother finally asked my teacher to explain that an arms build-up did not necessar­ily signal the beginning of Armageddon. Somehow hear­ing these words from an authority figure helped, but not much.

From that point on I was very aware of all of the calamities and atrocities that life inflicted around the globe. And I cared, at least I tried to. But just when I decided to send every al­lowance I would ever earn to Ethiopia, a war and improved crisis would catch my attention. There were just so many to choose from. It was almost as if the entire world was going to hell in a handbasket at once.

Stop the apathy or a lac­k of political responsibi­lity. From that point on, I was very real. But I do not believe that life inflicted on me would ever earn to Ethiopia, a war and improved crisis would catch my attention. There were just so many to choose from. It was almost as if the entire world was going to hell in a handbasket at once.

The FAR SIDE

by GARY LARSON

"OK! I’ll talk! I’ll talk! . . . Take two sticks of approximately equal size and weight — rub them together at opposing angles using short, brisk strokes . . ."
People need to make educated choices

Dear Editor,

This is in regard to the letters in which Colleen Maher and Bart Sexton explain the pros and cons of vegetarianism and animal farming, respectively.

According to Maher there are several reasons why a person may choose a vegetarian diet, of which she states environmental, health, humane and economic reasons. Sexton’s article was concerned with clearing up some misleading facts presented by Maher, such as certain agricultural practices and their relation to the domestic use of livestock, as well as a brief description of the digestive tract of cows, which can break down foods containing cellulose. If we were to examine the digestive tract of another animal, the horse, we would note some interesting facts. The human intestinal tract is 10-12 times the length of the body, which is true of herbivores. Carnivores have an intestinal tract 3 times the length of the body, which enables rapidly decaying flesh to quickly pass through the body.

When humans consume meat, the decaying flesh is retained for a longer period of time, often producing undesirable effects. Carnivores also have the enzyme urease to break down uric acid, produced by meat consumption. Omnivores also have this enzyme, although humans do not. There are many other differences between carnivores and humans suggesting that humans are designed to pluck fruit from a tree, not rip the guts out of dead animals.

Many people are dying of heart disease and cancer. Could this have anything to do with eating foods our bodies are not designed to eat? The Journal of American Medical Association stated in 1961 that 90-97% of heart disease could be prevented by a vegetarian diet. Did you know that the silverback gorilla, which physiologically resembles man, is a devout vegetarian. Other vegetarians include the strangest land animal, the elephant, and great thinkers and leaders such as Ben Franklin, Thomas Jefferson, Gandhi, Plato and Leonardo de Vinci. Sexton and Maher conflicted about certain agricultural practices.

Sexton stated that corn grown to feed cattle is a high residue crop thus helping to reduce soil erosion. He also stated that “soybeans are not a food a residue source, but are also a staple of many vegetarian diets.” Actually there are many people who prefer a vegetarian diet who do not eat soybeans as a staple food. There are such a variety of vegetarian foods that there need not be any one staple food. Besides, you can feed many more people on corn meal than you could by feeding them meat raised on the same amount of corn. The cow eats 90 pounds of food a day! Another fact is that one acre of land will yield 165 pounds of beef or 20,000 pounds of potatoes. In addition, many fruits and nuts grow on trees, a definite benefit to the environment no matter what soil erosion equations you want to live by.

One forgotten point is that many fruits and vegetables can be grown in one’s back yard. This seems more practical than raising a cow in one’s yard to ultimately be slaughtered. Although some people are fishers and hunters, many of us do not have the urge to kill another creature. From the animal’s point of view it would probably be better to live in the wild and be hunted than be raised in a face.

Let students decide

Dear Editor,

On Thursday, October 18, the Pre-Vet Society and Doctor Hall sponsored a lecture and discussion on “Animals in Medical Research.” Perhaps Doctor Hall felt this would settle the issue raised last year on animal rights and classes such as BIO 281: Animal Physiology, at UWSP. I don’t think it has.

It is mentioned by the speaker that pre-med (pre-vet) students attending school need hands-on experience using animals as tools of learning. I’m sure those students do find classes such as BIO 281 very useful to their career. And, perhaps experimenting on some animals is necessary for medical research, as the discussion Thursday night stated. However, I want to know how many diseases have been cured in UWSP’s BIO 281 lately? I am a Wildlife Management major required to take BIO 281, and I do wish to learn about animals, but I don’t wish to experiment on them during lab. I asked for alternatives in place of those live dissection labs, but was told it would take too much

time to organize such class work. Kathy Simonis, Executive Director of the Portage County Human Society, has offered to help find and organize materials such as video tapes, models, charts, and books, because she would like to see alternative offered too.

I am very interested in animals and would have liked to listen to Doctor Hall’s lectures in BIO 281. However, I chose to take a genetics class pertinent to my major instead of this class because alternatives were not provided. How many other students have had to make similar choices? How many will in the future? Even though I won’t have such an opportunity, I will hope incoming students will someday have alternative labs available if they want to take BIO 281. If future medical students can have the opportunity to learn by live animal experimentation, why can’t the rest of us have the choice to learn by non-animal alternatives?

— Penny Hillmer

It’s time to get involved

Dear Editor,

We need you. The Student Government Association (SGA) needs students for senator position openings. These are very important campus positions that need enthusiastic students who are interested in developing their leadership skills.

As a returning senator from the College of Letters and Science, I have benefited immensely from my experience in SGA. Life on campus is more than going to classes. There is a great deal happening at UWSP. My involvement as a senator has allowed me to gain insight of the university from the inside out, and to see different perspectives.

Why should you be a senator? First of all, as a member of student government, you have a major role in determining university policy. You will also gain invaluable hands-on experience into the political process, an opportunity that will definitely help in understanding politics outside of the university.

Second, senators have the responsibility to allocate student segregated fees that are used to fund programming for campus organizations and student facilities, as well as for many other aspects of university life. Finally, you will have many opportunities to meet people, including students, staff and the administration of UWSP as well as those of our sister universities.

Take the challenge! Get involved as a senator! Pick up an application from the Student Government Association office in the Campus Activities Complex of the University Center.

Are our forests really dangerous?

by Steve Schmidt
Outdoors Editor

Remember the good old days when the forest was a place where you could plop your wagon, set up camp, and get away from the hectic turmoil of the outside world? It was a place where you could relax and blend in with the surrounding tranquility.

Well, now it appears that lurking behind the concealing beauty and marvel of the woods is an array of hidden dangers.

We've all heard about that minute menace better known as the bear tick. This tiny fellow travels from one warm-blooded mammal to another transmitting an undesirable ailment called Lyme's Disease.

Everyday dangers reported by people ill with a bronchial infection stands. Consequently, they become victims of a bullet sharp

State signs agreement with U.S.R.
Environmental attempt to benefit both parties

A cooperative agreement signed "up the hill" in the Soviet Union may transfer Wisconsin's internationally recognized control and natural resources management to the Russians and provide business opportunities for the state, Department of Natural Resources Secretary 'Buzz' Besadny announced.

Besadny signed the memorandum that commits both the state and the Soviet Union's Tarter Republic to a broad, cooperative program for the next five years. Highlights of the agreement include:

- "Elkishing Wisconsin business contacts in solid waste management, waste treat­ ment and purification facilities, environmentally sound tech­ nologies, information systems in environmental control, environ­ mental monitoring, and environmental education.
- "Training by DNR staff for Soviet specialists on topics such as economic mechanisms and the technology of environmental legislation and enforcement and the technology of environ­ mental monitoring.
- "Environmental tourism ar­ rangements in the Volga River Region of the Soviet Union.
- "Three other DNR officials joined Besadny on the 12-day Soviet trip: Lyman Wible, envi­ ronmental quality ad­ minister, James Hurton, Southern District director; and Jeff Smoller, director of inform­ ation, education, and trends analysis activities.

The basic agreement pledges to exchange brochures, studies, reports, bulletins and other information and agrees there will be free exchange of environmental and administrative and scientific personal­ nel.

It also opens the door to developing business, cultural and scientific ties related to environ­ mental protection and natural conservation.

The goal expressed in the "protocol of intentions" is to as­ sist the Republic "during its transition toward a market economy.

Throughout the trip, Besad­ ny and his staff were shown numerous examples of environ­ mental challenges facing the Soviet Union. The DNR delegation was inspired by the state's environ­ mental protection successes and the agency's reputation, Besad­ ny said. It is the first report of such a state delegation ever in­ vited to provide such advice.

"Time and time again, the Soviet people, and especially the people of Tartar told us that en­ vironmental protection is a key ingredient in their economic and social future," Besadny reported.

How about the old twig-in­ the-eye routine? On more than one occasion, I've caught a slight twinge in the passion of the deer hunt, breaks through a nearby thicket for a better shot only to be jabbed in the eye by a tree branch.

Thereupon, he stalks back to camp with a watering eye that will not open. Most of the time, the pain and suffering is short lived. The hunter is usually tromping back to the woodlot in an hour or so not to at least pick up his eyelid danging from the end of that damn twig.

Then there are all my time favorite dangers. You know, the rare and unusual instances whereby a wild game animal suddenly goes loco and attacks an unsuspecting person.

I remember reading in an issue of Outdoor Life that a buck shot and knocked a huge whitetail. As he proceeded in its direction, the buck which was thought to be dead, immediately jumped back on its hooves and charged the hunter with incredible speed and an amazing point rack of antlers. And of course, it wasn't for his trusty hunting .

Let me examine some of the everyday dangers reported by sportspeople.

Every year, a handful of hunters fall from their tree stands. Consequently, they become victims of a razor sharp

Wisconsin fishing

This is the first installment of "Wisconsin Fishing," a monthly column which will appear on the second Wednesday of the month. The column will be written by DNR Fisheries Management Direc­ tor Lee Koepke. Subsequent columns will be published in this weekly publication mid-month.

As the newly appointed director of the Bureau of Fisheries Management, my first objective is to do a better job of keeping those of you who love to fish in Wisconsin better in­ formed.

I'll be doing a monthly column to attempt to share with you some of the interesting is­ sues we deal with. Managing all of Wisconsin's lakes and streams is a huge challenge and, frankly, the 270 men and women who work in the DNR's fisheries program comes to it alone. We need your help and support; I hope this column will aid that.

Let me introduce myself so we might be better hunter.

I grew up in Sheboygan and learned to fish as soon as I could. My first fishing memories were fishing from our glacier pier on Lake Michigan. My summers were spent on Crystal Lake near Plymouth, where I got my ap­ preciation for the sparkling little lakes that Wisconsin is famous for. And I confess, I loved to water ski too.

From that time to Continued on page 7
Help reduce greenhouse gas pollution

by Jay M. Gregg
and
Chari Towne

Couldn’t we all afford to lose a few pounds? How about a billion pounds? How about a trillion pounds? Remember, we’re not just talking about a few pounds, a billion, or a trillion pounds. We’re talking about a trillion pounds of carbon emissions, contributing to the greenhouse effect.

These emissions are not the sole responsibility of giant industrial factories. They are caused by the vehicles we drive, the products we use, and the energy we consume in our daily lives. Each of us can make a difference by reducing our carbon footprint.

At home, by simply installing a low-flow shower head at a cost of $5-10, it is possible to eliminate as much as 300 pounds of CO2 emissions, and save $6.85 every week (assuming a price of $1.37/gal.).

At work, consider using public transportation, carpooling, or biking to work. These simple changes can add up to significant savings in CO2 emissions and reduce air pollution.

In our communities, we can support local businesses and organizations that are committed to reducing their carbon footprint. By choosing locally-sourced products and services, we can reduce our reliance on fossil fuels and support sustainable practices.

To help the public learn more about the production of CO2 and how to reduce it, the Union of Concerned Scientists (UCS) has been coordinating “The Billion Pound Diet, A Week of Education and Action”, from October 22-28.

Locally, the Environmental Educators and Naturalists Association (EENA) is sponsoring many events in conjunction with the national program. Stop by the EENA information booth in the University Center Lobby to learn more, and to start your diet.

U.S.S.R.

from page 6

the Soviet people in general and the Tartar Republic in particular. But it also could be a unique opportunity for Wisconsin, for our international environmental reputation and for business future,” Besadny continued.

During the visit, DNR officials visited industries, including a two-square-mile chemical plant and if 180,000-employee truck factory, wastewater treatment facilities, environmental labs; recreation areas; forest preserves; and solid waste management facilities.

“The Tartar Republic is like Wisconsin in much of its natural resource base and its people want a clean environment just like we do,” Besadny reported. “While they are proud of their environmental progress and awareness, they are candid about their shortcomings and eager to do a better job. Wisconsin can help them do that.”

Prime Minister Savirov told Besadny he wants to make major investments in dairying and dairy product processing, sugar beet production and processing, tourism, forestry and fisheries management. He also is interested in paper production, especially as the Tartar Republic works with neighboring republics along the Volga River on production and pollution control issues, Besadny said.

Part of the cooperative agreement with the Committee for Nature Protection will lead to an official Soviet visit to Wisconsin in 1991. Besadny said one of the Soviet’s top priorities will be to talk with Wisconsin businesses that can provide environmental protection and natural resources equipment, knowledge and technology.

The Tartar Republic is at the eastern edge of Europe. Its capital of Kazan is the size of metropolitan Milwaukee and is about 500 miles east of Moscow.

Halloween history explored
by Sarah Newton

Halloween is considered by some to be an unusual holiday. Therefore, it’s etymology that it should have an unusual history. The American holiday we call Halloween comes from the eve of All Saints Day, or All Saints Day, which is celebrated on November 1.

Pope Boniface IV made it into a celebration of all known and unknown Catholic saints and martyrs from the 7th century. In the 8th century, Gregory II changed it to October 31st from its original celebration day, May 13.

The original holiday was a joint Druidic festival which honored the Celtic sun god, and Samhain, the lord of the dead. It was also practiced in Rome where they honored Pomona, the goddess of fruit, and this led to the modern practice of trick-or-treating for fruit and nuts.

Throughout history, Halloween has been considered a day of pleading and praying for the past years’ dead souls that have not yet been purified. It was said that these souls ran rampant on All Hallow Eve.

How to celebrate Halloween
by Deanna Licari

When I was young, Halloween meant dressing up in the most unique costumes, getting together with some close friends, and venturing out to go Trick-or-Treating.

When I think of Halloween now, I think of midterms, money foolishly spent on candy to give away to people you don’t even know, and the approach of a long and cold winter.

Has Halloween become strictly a children’s holiday? It doesn’t have to be. College students can “be a kid again” and learn to enjoy Halloween just like they did when they were young. All you have to do is follow these simple guidelines.

1. Buy a pumpkin. I don’t mean buy it and set it in the window as is. Actually carve a face in it. And don’t forget to buy a candle to light it up at night.

2. Have a Halloween party. Complete with costumes, games (e.g. bobbing for apples), and hot apple cider.

3. Go to a Haunted House.

4. Go Trick-or-Treating. Don’t let this October 31 pass by as just another day.

Tradition promotes stereotyped images
Native Americans offended by costumes

As a Native American activist, Noland is anxious to call a halt to the stereotyping of her people which has been prevalent since the colonial period. As an educator, she believes it is extremely important to inform children about the diversity and the history of her native people, rather than depicting them as one-dimensional savages.

In many cases, Noland says, Native Americans are portrayed as either “squaws” (dresses or prostitutes) or Cherokee princesses.

Some of the other items which demean Native Americans are toys depicting Indian violence, greeting cards or cartoons with animals dressed as Indians, and groups such as Indian guides and princesses. Children and their leaders wouldn’t dress up and meet one a week is not to pretend to be blacks or Asians, but such groups do mock Indians, Noland says.

...being Indian is not an occupation or a role,” she adds. Native people can be doctors or lawyers or merchants, but their ethnic identity is not the way they make a living.”

Jaycees to hold annual haunted house
by Tammy A. Garrison

Remember when you couldn’t wait to dress up in the costume that took you hours upon hours to pick out at the nearby department store? Remember when you could think about dressing up for months in advance of October 31?

When you were once again to carve your Jack-o’-lantern, get out your black cut and clean the old skeleton out of your closet. Just in time for the ghoulish celebration of All Saints Eve, better known as Halloween, is the Jaycees’ annual Haunted House at the Centerpoint Mall.

Let the Jaycees’ take you back to the days when you could be easily frightened.

Upon entering the dreamy Haunted House, you might meet up with several unique and, interestingly enough, dead characters. Monsters, gorillas, zombies, snakes, lots of spiders, a few rats, and an appearance by a demented man with a chainsaw will be just a few of the many “things” you may encounter on this journey into the unknown.

The Haunted House will be held from October 26-31. The scheduled times for the event are Oct. 26, 6 p.m.-10 p.m.; Oct. 27, 11 a.m.-5 p.m.; Oct. 28, noon-2 p.m.; Oct. 29, closed for repairs; Oct. 30, 6 p.m.-9 p.m.; and Oct. 31, 6 p.m.-10 p.m. Admission is $1.50 per person with a special rate available on Sunday, Oct. 28 for people who bring their own can of food for Operation Bootstrap.

Borchardt commented that there were “several best olive green shirts” among the students who attended last year and he encourages people of all ages to come and take part in the fun.

What Halloween page would be complete without a shot from a local cemetery? A toppled gravestone adds a poetic beauty. (photo by Lisa Stubler)
Japanese buy ailing U.S. schools

By Doug Lowery

Salem College students returning to school this fall noticed physical changes and visible improvements in facilities on their Salem, W.Va., campus, but the most significant change took place in April when about 200 Japanese students arrived to take classes.

It's not a foreign exchange program, but an "east meets west" business and education merger that began when Japan's Teikyo U. spent $20 million to pay off all of Salem College's debts and mortgage. Teikyo now owns the entire 150-acre, private liberal arts college and is leasing it back to the school on a long-term basis, said Ronald E. Ohl, former president of Salem College and president of the newly named Salem-Teikyo U.

The merger is a result of negotiations that began in October 1988 after Salem College began to experience financial problems that almost closed the college bookstore and threatened to shut down the entire campus, Ohl said.

"The first Japanese student arrivals took English classes during the summer. Special classes for the students were added this fall to help them adjust to their new environment, and the spring 1991 semester will begin the scheduling of regular classes in which Japanese and American students will learn side by side.

University officials have expressed optimism that students are excited about the change, but there is some opposition. Junko Ijiima, a foreign exchange student from Tokyo who attended high school in West Virginia and applied to STU when it was still Salem College, is apprehensive.

"The reason most Japanese students come to the United States to go to school is because we want to learn with Americans," Ijiima said. "Going here will be like going to college in Japan for me. I think they'll have some tough times getting students to agree to come here. I'm planning on transferring next year if I don't like it here."
Sculpture project ‘illuminates’ view of assault

By Stephanie Dunnewind

The frightening experience of walking across campus alone at night inspired U. of Washington graduate student to spend $800 and a year’s worth of free time to create an interactive “sculptural event.”

Her sculpture, titled “Scary Places Illuminated,” consists of 30 small black boxes with flashlights and whistles attached. The boxes are placed at sites where serious or aggravated assaults have occurred during the last two years, said artist Eleanor Jones. If viewers open the boxes, they will find “mailers” that define assault and state the purpose of her project.

“It is my intent that this sculpture event serve as an educational tool about assault, that it results in positive change,” Jones said. “I’d like to see the piece as a tool for people to learn how to deal with fear in a viable way.”

Mailers inside explain that the boxes are “public tools” for marking scary places. “They can be moved, ignored, destroyed. What happens is in your hands.”

While investigating assault through the Police Crime Prevention Unit, Jones discovered that many of her own thoughts about assaults were incorrect. In most cases, the assailant is not a “boogyman,” she explained, is the ordering process that leads to the creation of a solution for a problem.

The actual art is the personal experience, not the boxes,” Jones said. “The object is the vehicle and carrier of the meaning, but the meaning is when the viewer actually responds. It is up to the viewer.”

Officials limit circulation of lab newspaper

By Candice Driver

U. of Texas, Austin

Officials at the U. of Texas, Austin, are allowing a state-funded, student-run Mexican-American newspaper, known for its criticism of the school’s administration, to continue being published, but barely circulated.

Tejas, a newspaper produced by an independent-study class and published quarterly for more than a year, now may be distributed only in the school’s College of Communication building, said Robert Jeffery, communication dean.

Jeffery said because Tejas is officially a product of a journalism laboratory class, it may not be distributed beyond the building and still receive state monies, as it has in the past.

“This is a policy that applies to all publications created as the result of a class project,” Jeffery said. The goals of the class are “to teach reporting, writing and editing and publication.”

But distribution, he said, “is not one of the objectives and cannot be paid for as one of the educational objectives.”

Tejas was brought about within the last year of a UT-organization, Students Advocating Valid Education, charged that the paper violated state law by using state funds to influence public policy and affect state workers.

An example they cited appeared in the last issue of Tejas. An associate dean was accused of causing campus racial tension. An editorial in the paper called for his resignation.

Jeffery said he will allow the class to direct the content and coverage of Tejas while using UT funds, as long as the paper keeps its low-circulation profile.

But Arnie Montemayor, a Tejas staff member, said confinement to the communication building will limit the paper’s goals, so the paper is searching for other sources of funding.

“Tejas is a policy that a student is going to send letters to the editor to each other?”

Tejas could turn to Student Publications — the publisher of The Daily Texan, UT’s traditional student paper — in order to continue operating as it did.

But students involved with Tejas are not in favor of that option because they say “conservative” TSP members would then choose the Tejas editor-in-chief and managing editor, exerting control over the “non-conservative” publication. Tejas staffers say the publication was created to offer Mexican-American students news, views and a forum that The Daily Texan does not.

Desks for mom and dad set up at U. of Alabama

By Angela Kamburis

U. of Alabama

Parents of U. of Alabama students went back to school for a week last spring for a lesson in modern college academics.

The first parents’ College provided special interest class lectures ranging from “The Agency of Gorbachev” to “Modern Finance: More than Just the Stock Market.”

More than 250 parents registered for the event, designed to allow parents to see some of the things their children must face in college, said University Relations Editor Janet Griffith.

Thomas Pettway and his parents drove almost 200 miles from Chattanooga, Tenn., to Tuscaloosa to attend.

“I feel it is a way for my parents to get to know some of my teachers. They pay the bill, and something like this is just what parents need,” Pettway said.

School employees asked to donate part of paychecks

By José Novoa

The Daily Texan

U. of California, Berkeley

Most colleges and universities that have a hard time making ends meet ask their state governments for increased funding.

But at the U. of California, Berkeley, Chancellor 1. Michael Heyman asked school employees to pick up the slack.

In anticipation of deep budget cuts during this fiscal year, Heyman published a brochure-style appeal to faculty, staff and student employees to donate part of their checks to the university.

In the brochure, Heyman explained the University, like all state and federal funding, “voluntary support has become critical in fulfilling Berkeley’s commitments. His solution is an outright cash donation from anyone getting a check from the state, or a State December’s minimum, automatic payroll deduction.

Heyman also sent a memo to all deans, directors, department chairs and administrative officers in late June, asking that, where possible, “hiring be postponed, non-salary support expenditures, like overtime and equipment purchases, be limited.”

Uncertainties about the budget and the possibility of failure for a higher education bond issue were behind the belt-tightening measures.

Support for Heyman’s payroll deduction request wasn’t widespread among employees, yet his appeal has not been met by protest.

Desks for mom and dad set up at U. of Alabama
Isaac grew to 59. greed, inflexible legislation or the U.S. 1989. and its closing would have hurt the gram in effect. A resident student would have any trouble mixing socially with the rest of the student body," Ashcraft said. "When the Japanese language first arrived we had an International Student Mentor program in effect. A resident student would 'adopt' two or three Japanese students and show them around campus and get them accustomed to what they might expect. ... We plan to expand that program in coming months." Salem's agreement with Teikyo was the second of four such mergers with the Japanese university in the United States. Teikyo sent letters to dozens of small U.S. schools that were having financial difficulties similar to Salem's. The first merger was at one of Denver's Regis College campuses, renamed Teikyo Loretto Heights. Westmar College in Le Mars, Iowa, and Post College in Connecticut also were purchased by Teikyo U. Schoshi Okinaga, chairman of the board of trustees and president of Teikyo U., said the merger of Salem College and Teikyo will "further the understanding and partnership of Japan and the United States." But residents of the Salem community have mixed reactions to the Japanese. Roger Bowen, 51, has lived in the town his entire life. "I'm afraid we're going to have 500 Japanese and no Americans," he said. But Salem Mayor Donna Stewart said she helped to find roomers and arranged town meetings with college officials to clear the air. "It's a progressive, not a regressive, and I'm prepared to welcome the kids with open arms," Stewart said. "Besides, the school (was) in deep financial straits, and its closing would have hurt the town financially, for sure, but more of all morally."

"It would have made no sense whatso­ever to deliberately seek to increase our financial difficulties by guaranteeing high-risk loans," Hawk said. Still, critics return to HEAF's marketing policy as the main reason for the crisis. "It is widely known that what HEAF did in the 1980s is that it very aggressively marketed their guarantees to the proprietary schools," said Dan Parker, public information chief for the California Student Aid Commission, also a guaran­tee agency. "Even with that, HEAF mar­keted to the very worst (schools), to put it bluntly," Parker added. But HEAF spokesman Scott Hooper said the blame has been misplaced on HEAF's marketing.

"Such criticism is unfair because there were very limited things HEAF could do," Hooper said. "HEAF was going along with the federal mandate, to be even-handed." Federal law prohibits HEAF, one of 53 agencies nationwide, from discrim­inating against any one kind of post-sec­ondary institution. Once lenders became acquainted with HEAF's fast service, coupled with its long-standing reputation for equal access, a larger portion of proprietary school loans came in than anticipated, Hooper said. By the time HEAF was able to deter­mine what was occurring in early 1987, nearly 70 percent of HEAF's portfolio was in high-risk loans. Although HEAF acted to reverse the situation, the Department of Education ruled their actions violated "equal access" provi­sions in the law by treating students at proprietary schools differently than stu­dents at other schools and that HEAF was discriminating against certain lend­ing institutions. While HEAF's future is uncertain, the agency still will have to pay out guaran­tees on past loans, estimated to be about $2 billion.

There's an IBM PS/2 made for every student body.

Protestors rally against fee, work to give students a voice

By Karen Emerson

More than 200 Central Michigan University students participated in a rally to protest a mandatory user fee approved by the CMU Board of Trustees to cover operational costs of a new on-campus physical education and recreation center that opened in September.

Students upset about the $90 to $112 fee, determined by whether the student lives on or off campus, displayed signs, one dubbing CMU as "Club Med University," addressed students and urged others to attend the sit-in.

Sophomore Quinn Auten said protestors told a tour of high school students and parents who passed through a campus building where the rally was held to consider other universities.

Following the day-long protest, 20 students locked themselves in Warriner Hall, which houses the president's and vice presidents' offices.

Three students were suspended from classes for five days after they refused to move from blocking the doorway of President Edward B. Jakubaszkas' office the next morning. They were found guilty of charges including the disrupting of university activity, blocking a university facility and refusal to move at the request of safety officers.

The $90 user fee is targeted to off-campus students because on-campus students already pay for the Student Activity Center in an annual fee of $112 included in their room and board, said James Hill, vice president for student affairs. The reason for the difference in fees lies in "statistics (that) prove on-campus students use an on-campus recreation center more," he said.

Hill said the money generated from charging off-campus students a user fee will go toward the $1.1 million in annual operational costs of the facility, which houses six tennis courts, a three-lane jogging track, a 12-lane bowling alley, six multi-purpose gymnasia, a spa and sauna area, a pool, and weight-lifting equipment.

"It works out to less than $8 a month, and students aren't going to find that kind of an opportunity anywhere (for a fitness center)," Hill said. "Nobody's totally happy about having a user fee, but once students are in and using the center, I think they'll see they're getting the best deal of all."

The controversy surrounding the user fee spurred a group called Students For a Voice at CMU and three other Michigan universities to protest the lack of student representation on governing boards. So, said that Michigan Constitution allow for student representation on the governing boards at all Michigan universities.

"We are the shareholders of the university, but we have no say in how the Board allocates our money, and how they charge us," said junior Elizabeth Snod.

She said the group's short-term goal is to pressure the Board of Trustees into reconsidering its decision on the fee so students have the opportunity to formulate alternative methods of raising the required revenues for the facility.

Gays go Greek, homosexual community protests... Less than a month after the opening of a gay and bisexual men's fraternity at the U. of California, Berkeley, members of the northern California homosexual community criticized the addition to the Greek system. Delta Lambda Phi, which President Brian Muller says should attract 15 to 20 brothers by the time it reaches full capacity, gained status in August as a regular fraternity, lacking only a house. However, some gay, lesbian and bisexuals say that people like themselves who join the Greek system are submitting to assimilation into the dominant U. S. culture. "A gay fraternity is counterproductive because the Greek system encourages homogenic masculinity," said Liam Kernell, a member of the UC Berkeley Multicultural Bisexual, Lesbian and Gay Alliance. However, Muller said he doesn't think the fraternity system is a "boothed of homophobia." UC Berkeley Inter-Fraternity Council officials say they welcome Delta Lambda Phi to the 48-house system and will support its quest for a house. • Ralph Jennings, The Daily Californian, U. of California, Berkeley

KANSAS

Who ya' gonna call?... There is a new club for Fort Hays State U. students interested in ghosts, goblins and the paranormal. Richard Atkinson, assistant professor of psychology and the Parapsychology Club's adviser, said they will investigate such things as hauntings, ghosts and poltergeists. "We will discuss anything that does not appear to have a natural explanation or is beyond the bounds of established scientific knowledge," he said. Interests of members include "survival of bodily death, out-of-body experiences, near-death experiences, mediumistic communications and deathbed visions," Atkinson said. Activities so far have included extrasensory perception demonstrations under hypnosis, and future plans include field trips to "haunted" houses. • Dave Hansen, The University Leader, Fort Hays State U.

NEW HAMPSHIRE

Revenge of the nerds and geeks... They wear tape around their Coke-bottle glasses and carry pens guarded by the infamous pocket protectors. And now, those who suffer from such stereotypes are banding together to form a Dartmouth College chapter of the Society of Nerds and Geeks. The first chapter of SONG was formed last year at Harvard U. to lobby for extended hours at the library. In its revised nerd manifesto, Dartmouth's SONG states its purpose is to "make people more receptive to the shy person whose interest lies not with 'Monday Night Football', but rather... Thomas Prychner's latest book." SONG President Andrea Lee said, "We want to promote education." She added that they also want to petition to keep the library open on a 24-hour basis. Other plans include a 24-hour eatery and a "studysesh" during finals to raise money for illiteracy. Lee said if SONG succeeds at Dartmouth, students from such schools as Cornell U., Amherst College and Claremont College may be interested in founding chapters. • Noah Levine, The Dartmouth, Dartmouth College

GEORGIA

Solving a messy situation... Students who are tired of hearing their roommates' stereo blasting at all hours of the night and finding laundry scattered all over the floor should fret no longer. Two U. of Georgia students have created the Bulldog Roommate Referral Service. Steve Massicott and Mike Courson charge $30 to match roommates on the basis of a two-part compatibility test. The first section asks basic questions about religious preferences and organization memberships. The second half is a psychological test, in which customers are asked to respond to a hypothetical situation, such as coming home to a messy apartment. Two computers are used in the matching process, Massicott said. Males and females can be paired off, as long as they agree to the arrangement. "The hardest thing to do is get people to trust us to place them with a good roommate in an apartment," Courson said. • Erik Schmidt, The Red and Black, U. of Georgia

INDIANA

The cult track... A recent brochure published by the Office of the Dean of Students at Purdue U. reported that the most vulnerable people for recruitment to cults are usually between the ages of 18 and 24. It also said college freshmen and seniors are more easily recruited because they are uncertain and anxious about the future as they "search for answers." Bill Whalen, director of publications, said, "Cult recruiters make a special effort to reach people at a vulnerable point." According to the brochure, people who have been recently hurt or disoriented because of personal crises such as death, divorce, or long separation from family or friends are easily susceptible. Whalen said students should be suspicious of groups that demand their total allegiance. "They ought to investigate the organization very carefully," he said. • Carol McNally, The Purdue Exponent, Purdue U.
U. Foundation honors outstanding students

Mark Kalashian describes himself as an "ordinary, hardworking student," which is an extraordinary statement in itself. What is ordinary about a 21-year-old "A" student, entering his senior year, who is a teaching assistant and tutor, a Golden Key National Honor Society and Alpha Lambda Delta member, a singer and organist, an equestrian, a radio show host and disc jockey, a food-drive volunteer and campus organization leader who, incidentally, has been blind since birth? No, Mark Kalashian is not ordinary. He takes his place among outstanding college students across America who, in addition to their academic and personal achievements, are extraordinary people. These are the students that the U. Foundation, in partnership with 18 corporate sponsors, sought to honor in its inaugural scholarship program.

After reviewing more than 2,600 applications, the trustees of the Foundation selected 19 finalists for the 18 scholarships. "The happy solution to our dilemma was the decision to create a special award to honor an extraordinary young man," said Foundation President Keith Berwick.

The U. Foundation Award for Special Achievement goes to Mark Kalashian of the University of Massachusetts, Amherst. Congratulations to Mark and the other U. Foundation scholarship winners listed below.

New lease on life - off-campus with housing

By Brenda V.

The BG News

Bowling Green

Confusion among landlords may be reduced if lease forms are standardized.

"The new form, Student Legal & Registration Services suggests, is designed to reduce tenant and landlord disputes, and many landlords say it makes their job easier. The form, signed by both, can be a" very happy solution for landlords," said Al Green, landlord.

"We want to do everything we can to help our students," said President Martin, "and we want to maintain a reasonable lease form for landlords and tenants. The new lease is designed to do that."
New lease protects off-campus tenants with housing advice

By Brenda VanSise
Bowling Green State U.

Confusion and misunderstandings between landlords and student tenants may be reduced by a new "standardized lease" made available this fall by Bowling Green State U.

The new form, provided by the school's Student Legal Services office, also may give students more leverage when searching for a place to live, said Greg Bakies, managing attorney of service.

Bakies said the lease may aid students who normally would sign a rental agreement without having a full understanding of it.

"We want to develop a standardized document that is fair," he said. "There currently are a lot of unenforceable and slanted clauses in leases."

The lease will be more understandable and readable for students than the leases many landlords use.

For example, many housing leases signed by university students state "joint and several" liability — in reference to the students' rental payment responsibility.

The new standardized lease explains in easy-to-understand terms that every tenant is individually responsible for the full amount of rent if their roommates fail to pay.

Bakies said he hopes most Bowling Green landlords will adopt the standardized lease.

"I think the students will be more reluctant to reach an agreement with a landlord not using the standardized lease and therefore cause a downturn in the landlord's business," the attorney said.

"Students, if properly organized, can be a very powerful union," Bakies said. "They can affect and make changes by collective bargaining."

Representatives from two area real estate management firms both said they are willing to consider using the standardized lease.

According to Bakies, a student consumer-advocacy group on campus during the '80s called the Student Consumer Union developed the model lease.

Student Legal Services offers seminars to explain the lease, and students have the option of taking a copy of the lease home to share with their parents.

The U. Foundation will announce the 1990 U. College Journalist of the Year at the annual fall convention of the Associated Collegiate Press and the College Media Advisers in Washington, D.C., on November 4.

The winner will receive a $2,000 cash prize. The 1st and 2nd runners-up will receive $1,000 and $500 cash prizes.

Judges for the third annual U. College Journalist of the Year award are Tom Rolnicki, Associated Collegiate Press; Jack Loftis, The Houston Chronicle; Everett Dennis, The Gannett Media Center; Columbia U.; Chris Carroll, CMA; Tulane U.; Ron Johnson, CMA; Kansas State U. and Dr. Keith Berwick, U. Foundation.

Application forms for the 1991 U. College Journalist of the Year competition, co-sponsored by the ACP and CMA, will be available at the ACP/CMA fall convention.

Deadline for the fourth annual U. College Journalist of the Year competition is May 31, 1991.

Brothers Jed and Rick  
- along .

Tuesday, October 25, 1990

There are a few things that even good friends don't talk about.

Religion, sex and politics have been making enemies of friends for a long time. Maybe it's because these three topics are rooted in normative moral values, the values that comment on how you think the world should be. And subjecting your moral values to the scrutiny of others, even friends, is risky. After all, you will be challenged to defend your values. That can be unpleasant.

But this is what has been happening for years on the streets of Arizona State U. and probably every campus in the nation. During the busy noon hours, maneuvering around Cady Mall, a student-gathering point at ASU, can be challenging physically and morally.

Well-known campus evangelists - Brothers Jed and Rick at ASU, Brothers Max and Jim at many other colleges - return every year to save the sinners and stop fornication on our dev illish campuses. At least that's what they'd want to like to believe their purpose is.

But it seems their purpose is pure entertainment, say the students who have been listening to their informal sermons lately; the crowds that have been gathering around Brother Jed and Rick have been doing a little more than listening.

Audience participation has become the norm during these noontime sermons.

One day last spring, a student jumped up onto the concrete bench next to Brother Rick and started to mimic his actions and tone of voice. As Brother Rick sang out against sex, the student demonstrated gesturally exactly what actions Brother Rick was denouncing.

Other students took it upon themselves to yell and lash out at the evangelists. Hecklers and jokers emerged spontaneously as the topics of conversation moved to more personal levels. Finally, when the evangelists began insinuating that all fraternity men were sinners because they fornicate regularly, the crowd responded with catcalls and other signs of disagreement, both gestural and verbal.

So, the question arises: Does anybody take these guys seriously?

Are there any students out there, among the rabid crowds, who listen and think about what is being said, and then change their moral values? Is it possible to lash out at a group of people, to let alone students, and hope to have a lasting impact on our lives?

Comment and Opinion  • OCTOBER 1990

Editor's Mail

Give women a shot at combat

To the editor:

As a Marine Corps Vietnam veteran, I read with interest the articles and editorials that have been appearing in the press lately concerning women going into combat. However, I have some problems with what I have read.

The first is that most people giving their opinions on this issue have not experienced war, fortunately. But their images of "going into combat" have been shaped by movies and television. One of the reasons respondents react negatively to Vice President Dan Quayle is his hawkish stance on military matters without any war experience. I would like to think that whoever sends men, or women, into combat has a clear understanding of what "going into combat" means.

Second, some opinions I have read are wrapped in the emotionalism of women's rights issues rather than in the characteristics of battle and whether women can succeed in combat. Obviously, when a nation goes into battle, it fights to win. We want the best combatants available. We do not want to send women into battle for ulterior motives, nor do we want to send them in to prove anything.

Therefore, the only question we should be asking ourselves is whether there are any combat assignments that women are capable of successfully handling.

If the answer is that there are, then we should give them those assignments; if the answer is no, then we should not.

People get into the strangest things

Contests call for students to swim in squishy edibles

By Katie Good
• The Auburn Plainsman
Auburn U.

In addition to immersing themselves in biology, English and other subjects, students across the nation are getting into stranger things — food.

Literally.

Students at different schools are participating in contests that require them to slosh around in dumpsters full of food and look for hidden objects amid the goo. Prizes are awarded to those who find the "treasure."

Watch it wiggle...

Some might call Auburn U. students crazy for participating in the school's annual Jell-O Splash, but students are actually finding their marbles, not losing them.

The object of the Jell-O Splash is to pull marbles out of a large tub filled with orange gelatin. The catch is that students have to use their toes to get them. "(Students) can use their hands, but I'm encouraging people to pull them out with their feet. It's more fun that way," said Julie Johnston, publicity director for the school's eighth annual Splash into Spring festival.

"I do it every year," senior Derick Sutton said. "People always walk by and say it's gross, but I think it's fun."

Sutton encouraged his friend, senior Stephen Craft, to try it this year.

"It seems to add to my tan," Craft said, while admiring his legs covered in orange Jell-O.

Few people usually participate in the Oatmeal Odyssey because it is so messy, said Eve Pelletiere, a Recreation Committee member for the festival. "I am glad that someone did it because a lot of people looked at the dumpster really funny."

Doin' the mashed potato...

A new style of Olympics was brought to Emporia State last spring — the Potato Olympics.

Events in the Potato Olympics included a potato treasure hunt, potato truck relays, potato head decorating, French fry eating, and the messier mashed potato

Mannequins, pantyhose among collector's loot

By Christine Paugh • Sunflower

Wichita State U.

Traci Furan loves it when department stores go out of business. When Heary's and Dillard's closed a store in Wichita, Kan., Furan went on the shopping warpath.

But she wasn't there to buy clothes or home furnishings. Furan went to buy mannequins.

"I don't buy a lot of clothes, I buy mannequins," said the Wichita State U. art history sophomore. In addition to half and whole mannequins, her collection includes "various hands and one weird-shaped head. I also have one with a really long neck that they must have shown scarves on. All of them are female."

Aside from mannequins, Furan also collects two other out-of-the-ordinary things — pantyhose and "Wizard of Oz" memorabilia.

"The first time I saw 'The Wizard of Oz' movie was before I could talk — around 3 years old," Furan said. "I loved it then some plaid and gingham ones," she said.

Her favorite pair has big, Avery flowers, in really bright oranges, reds and greens," Furan said. "People always say my legs look tattooed."

Furan admits that when people hear of her collections, they sometimes perceive her hobbies as being a little strange.

"But it's cool," she said. "My friends just kind of accept it for the simple fact that it's a part of me and always will be."
Adoption service finds campus homes for strays

By Kelly MacDonell
- The State News
- Michigan State U.

Lori Hough is a pet broker of sorts. With the help of a friend who houses hard-to-place and stray animals in her Middleville, Mich., home, the Michigan State U. zoology junior “adopts out” dogs and cats to MSU faculty, staff and students.

Since starting the service at MSU last November, Hough has adopted out 12 dogs and one cat. “Marge (Miller, partner in the adoption service) keeps the animals at her house while I try to find people here that will take the pets,” Hough said.

Miller and Hough met last summer while Hough was working at an animal shelter.

“She takes in the problem animals that I can’t find homes for right away,” Hough said.

In an attempt to save cats and dogs from research — or death — Hough spent the summer working to find owners for the animals brought into the shelter. Her efforts resulted in finding homes for more than 100 dogs and cats, she said.

“People always say, ‘I’d love to keep strays,’ but doing it is something else,” Hough said. “Marge’s patience is phenomenal. She’s taught me a lot.”

Miller, who lives with about 26 dogs and 92 cats, said having so many animals to contend with can be trying at times. “Sometimes the only place to get away from them is in the bathroom,” Miller said. “I had about 30 cats in the house until they trashed the furniture, then I converted the garage into a ‘cattery.’

“I have great friends and a really good support group,” Miller said. “And, although I do have a large vet bill, there is a vet that comes out to help me for free.”

Miller also purchases her dog food for a special price — $10 for a 50-pound bag. But Miller said she still needs more financial help since she only takes donations and does not charge people to adopt the pets.

“There are a lot of good people out there who may not be able to afford a fee,” Miller said.

To combat the rising costs, Miller and Hough are trying to become registered as a nonprofit organization.

“If I could become a nonprofit organization, the businesses I go to could write off the stuff they give to me,” she said.
MSU 'Nintendo-haulics' confess their addictions

By Richard G. Eppe
• The State News
Morichigan State U.

Ehren Gonzales is addicted. But mind-altering substances are not his downfall. The business freshman is addicted to his Nintendo video game set.

Tired of borrowing his friend's set, Gonzales invested in his own. Life in his dorm room hasn't been the same since.

"I've definitely gotten my money's worth so far," he said. "I've been playing it all the time."

Gonzales, who plays Nintendo four hours a day, said he does not believe his grades have slipped since buying the set. Conversely, he thinks Nintendo helps him with his academic game plan.

"You need a stress reliever sometimes. It's good to play a lot in between study-ing," he said. "I think it actually helps me get my homework done earlier, because I know when I'm done, I can play Nintendo."

A popular Nintendo game is Punch Out!, a boxing game in which players work up to fight the champ Mike Tyson. "I might add that Buster Douglas isn't the only one who's beaten Mike Tyson," Gonzales said.

In addition, the game's fanatics are prone to friendly disagreements about who reigns as the Nintendo champion.

"I have conquered every game," Gonzales said. "My roommate) and I just got into a big argument last night about who won, and who's the best."

Freshman Dave Carrier also stakes his claim as the top Nintendo player.

"They think they're the best, but you all know I'm the best," Carrier said, as he introduced rookie Nintendo player Brian Dickinson to a new football game for the system."

"I just started. I guess you could call me an addict," Dickinson admitted. "This is only the third day I've been playing it."

"What time is it now? Three! I thought it was one," he said, discovering his afternoon dwindling away. "Time flies when you play Nintendo. It's just like watching TV, and since you're sitting around doing nothing already, you might as well play Nintendo."

"It's the computer age. As computers have gotten really hot, Nintendo is looked at as a type of computer as well," said Rob Yuregian, manager at Circus World toy store in East Lansing, Mich. "It's a toy in the sense that it is fun to do, but people can get away with playing with it."

But toy or not, Gonzales will continue playing his Nintendo.

"You can get emotional with the game. It's easy to get addicted to," he said. "It can make you start to lose your mind."

Their other car is an ambulance

Kansas State U. students Terry Broadbent (left) and Jim Hart, both emergency medical technicians, inventory equipment in one of their ambulances.

Kansas students supplement classes by working as emergency technicians

By Monica Marcotte
• Kansas State Collegian
Kansas State U.

Jim Hart and Terry Broadbent spend their Friday and Saturday nights trying to get people out of trouble.

Hart and Broadbent are Kansas State U. students who work part time as Emergency Medical Services technicians. They work between 15 and 60 hours a week, in addition to being on call.

Hart, a senior in pre-medicine, completed a six-month EMS course. He said he believes his work with EMS is giving him valuable hands-on training dealing with patients.

Broadbent, a junior in pre-nursing, was a part-time EMS technician for the past six years but decided he needed to look more into the future.

"I would like to put my emergency training to use in a hospital emergency room, and there is more money in it," Broadbent said.

Both men have seen their share of gruesome sights, including a head-on collision near Wamego, Kan., in which three people were killed.

"You have to get a little calloused to be able to handle the situations all the time," Broadbent said.

Not all of the jobs involve tending to gruesome accidents; EMS technicians also stand by at sporting events.

"We pretty much get to stand by and watch football games," Broadbent said. "It can get boring at times."

Two people are assigned to each ambulance, with five people remaining at the station at one time, they said. Both men said it was hard to pinpoint any particular time when there was a higher incidence of calls, but they said people tend to be more active when the weather gets warmer. The average number of calls is seven per day, but Hart said he has seen as many as 13 in a day.

When the technicians are not out on a call, they are constantly practicing with their equipment, which includes splints, cervical collars, spine boards, and the "jaws of life," a device used to safely extract victims from wrecked vehicles.

Campus radio station sponsors 'world's largest trivia contest'

By Molly Bernas
• The Forum
U. of Wisconsin, Stevens Point

Question: Who recently hosted the world's largest trivia contest? Answer: 90FM, the student-run radio station at the U. of Wisconsin, Stevens Point.

According to Jim Oliva, a coordinator for the annual event, 370 teams and more than 350 college newspapers from more than 300 colleges in the American Collegiate Network. They edit, write headlines and design pages, and write and edit special reports about significant student issues.

The editors work at U.'s headquarters in Santa Monica, California. The paper provides a $200 weekly stipend, free housing near the beach and round-trip transportation.

Fellows are selected for their reporting, writing, editing and design skills. They must have a minimum of two years student newspaper experience, including one year as an editor or section editor, and senior status or a bachelor's degree as of July 1991.

Applications are available from newspaper advisers, or from Jacki Hampton, managing editor, U. The National College Newspaper, 3110 Main St., Suite 104, Santa Monica, Calif. 90405 (213) 450-2921.

The deadline for applications is Feb. 11, 1991.
Music of today can’t compare to the ‘classics’

By Gregory K. McVey

What has happened to today’s music? Not since the oh-so-golden age of disco have the leaders of the music industry needed to be as lined up and shot, shot again, and then have their lifeless bodies dragged up and down the streets of town by a team of horses.

I can’t take it anymore. Milli Vanilli, New Kids on the Block, Paula Abdul, Tone L.C., Live Crew... the list of musical ineptitude can go on forever. These people can’t write music. Their songs lack any soul, any depth, any inner quality that makes me want to listen to them over and over.

It seems the prerequisites for success in today’s music market are muscle and money. The key to doing what good looks and good taste are doing.

Where are the classics? Where are the songs, such as “American Pie” or “Stairway to Heaven,” that can stop a bar full of patrons from doing whatever they are doing? Where is the ‘classics’? Where have the lifeless bodies of the classics gone?

It seems the prerequisites for success in today’s music market are muscle and money. The key to doing what good looks and good taste are doing.

Join together in song! In order to be a classic, a song, like a good bottle of wine, must go through an aging process. One can’t write a song today and have it be a classic tomorrow. But has anyone heard a song lately that even has the potential to be a classic?

During the ’60s and ’70s, songs that eventually became classics were in abundance. These decades had songwriters who wrote stories that meant as much as the melody. Songs of yesterday also reflected the attitudes of the day and were representative of the social changes going on at the time. Who is writing these socially conscious songs today?

Does this mean all music must probe into the inner reaches of our gray matter and cause us to critically analyze the world in which we live? No, that would be asking too much. We must think when listening to music. Besides, music often can and should be pure, unadulterated entertainment.

The AMHERST SONGWRITERS’ ANNUAL SUMMER WORKSHOP will offer an opportunity for songwriters to meet and work together in an attempt to write quality music. The workshop is scheduled for August 4-7.

The workshop will be held at Amherst College with the cooperation of the Valley Community Arts Council, the Town of Hadley Cultural Council and the Center for Creative, Performing and Media Arts. The cost for participating in the workshop is $150, which includes room and board. For more information, contact Dave Fuskus at (413) 253-8315.

JOHNNY HALLYDAY’S NEW ALBUM “ENDED” is a true heart of the American music era. It features hits such as “Lapanes” and “I Am a Rock” and contains 13 tracks, including a duet with Dolly Parton and an acoustic version of “Memories.”

The album, produced by Michael Bublé, is a departure from his previous work and reflects a more mature sound. It’s a welcome change for fans and an excellent addition to his already impressive discography.

The album is available now at all major retailers, and it’s sure to be a hit with music lovers of all ages.

MUSIC

Student’s musical examiners racism tensions on campuses

By Julia Ferrara

Interested in the recently reported wave of racism at small liberal arts colleges, an Amherst College senior completed a rock musical based on actual racist occurrences.

“Whitewash” is the joint project of student Tom Marshall and theater professor Doug Anderson. Fusing an original musical score and script, the musical depicts the way racism becomes institutionalized at the fictitious Moreau College.

The story line and dialogue were drawn from actual racial incidents and their subsequent responses at such schools as Stanford, Smith, Middlebury and Oberlin.

“it’s a rock’n’roll concert telling a story,” Marshall said. “It’s frightening in terms of the political context, and the dangers of this being misinterpreted are huge.”

Marshall wrote about 20 songs on the topic of racism, 12 of which he used in “Whitewash.” He then approached Anderson, who was very interested in the project, as he taught at Middlebury when racial problems were occurring.

“it’s just a collaborative effort,” said Marshall. “We contacted several campus organizations that dealt directly with racism, attended meetings and then held auditions for the show.” The script was created in part from dialogue and responses heard at the meetings. The play’s style directly counters that

of traditional theater, Marshall said. While the band is traditionally below the stage and out of sight to the audience, in “Whitewash” the guitar, bass, percussion, synthesizer and saxophone band is onstage throughout the play. Almost all of the 15-member cast perform several roles, he said.

“The line between band member and actor is not clear, as the band members also serve to inform the cast,” Marshall said.

Professional musician for 10 years, Marshall toured the country with various groups before deciding to go back to college. Creating the fictitious Moreau College and its various traditions was a trying experience in realizing the racism within college communities, he said.

“The play affirms that racism not only exists, but that it is institutionalized.”

—Tom Marshall, Playwright

Making music: Machine allows listeners to record customized tapes

“Would you know ‘Only a Heart That’s Full of Love’ or ‘Comin’ Round the Mountain’?”

“I read they were these in a song, here. I made a reference to that, too.”

Jon Bon Jovi’s latest is a bomb. Western-themed ‘Blaze of Glory’ goes up in smoke

By Jane Bostwick

The State College Daily News
State College U.

I didn’t go into this review looking for blood. Really.

Although I don’t personally own any of Mr. Bon Jovi’s albums, I can appreciate the way he has carved such a successful niche in the pop marketplace. The man from Jersey (so far) has had no problem making a name for himself, and it cuts it relatively short at 4:48.

On “Blaze of Glory,” the guitar riffs on “Santa Fe” and “Dyin’ Ain’t Much of a Livin’” really should hit the road.

But Jon and record label Polygon are smart, they’ll release “Billy Get Your Gun” as the next single. it’s got the Jon Bon Jovi-amped-up chorus for a hook, and it cuts it relatively short at 4:48.

Let’s hope that Jon’s coming in the “Young Guns” flick sits his Western appetite. Then he can go back to his Jersey roots and make the airwaves safe for pop consumption once more.

Jobs turning employees into professional students
By Julie Inglebret
The Minnesota Daily
U. of Minnesota, Minneapolis

If you think you’ll never pick up another textbook after you graduate from college, think again.

In fact, many job seekers are now looking at what educational opportunities a company offers employees — at the company’s expense — before accepting positions.

“Education has almost become as important as dollars in taking a new job,” said Dick Ulland, an IBM spokesman. IBM spends about $1.5 billion a year offering employees college opportunities.

Effect on schools, students

Continuing education is widely viewed as one reason why today’s colleges are now more populated by non-traditional students, characteristically an older group geared toward taking only classes and guidance these days.

But there are no courses that teach us these things, and I need to know how to do a few things right now! How do I pay my bills (the water, electricity, phone, rent, groceries) on a very limited budget?

So I went home crying to my dad.

Dollars and Sense

By Erin Martin
The Daily Collegen
U. of Massachusetts, Amherst

I wish my university would offer a course entitled Real World 101. I could use some serious instruction and guidance these days.

After all, we are attending class¬es to learn what it makes to take it in the real world, like how to get a good job, how to raise a family and how to be successful.

But there are no courses that teach us these things, and I need to know how to do a few things right now! How do I pay my bills (the water, electricity, phone, rent, groceries) on a very limited budget?

It is so easy for me to get caught up in more immediate things. That my overdue bills don’t matter much — until my phone gets shut off.

I want someone to teach me how to balance my checkbook and how to get the most out of double coupons. I could also use some lessons in buying a car.

My dad offered some insight into the used car industry. When I was looking for a car, be told me the car was too old, if it had too many miles, and when I was being ripped off. Finally, I picked one for myself.

The old man who sold it to me promised it was a dream. But a day after I picked up the car, I found it was lacking something I had hoped for: brakes. I took the car to a mechanic who proceeded to tell me I needed $1,100 in repairs!

I returned the car to the dealer and demanded a refund. But the salesman refused to take the car back, so I went home crying — to my dad.

That same day, my father went to the dealer and was successful in obtaining a refund. I was so proud of him for the way he was able to stand up for me and make a difference, especially since I couldn’t help myself.

Still, I can’t help but wonder why no one ever taught me how to handle these kinds of situations. I wonder if the only way to learn is with age and experience, or if some of these “life lessons” could be taught — at least discussed — in the classroom?

Life would be much easier if we could learn how to handle real world problems before we have to face them on our own.
MAC can help put you in Fast Forward with $600 off a New GM Car or Light-Duty Truck!

Put Your Life And Career In High Gear With This Special Offer From GMAC.

GMAC could give you a big push in the right direction with our College Graduate Finance Plan.

If you’re a graduating two- or four-year degree student, a graduating registered nurse or a graduate student, you may qualify. And that would make you eligible to receive $600 off the purchase or lease of any new Chevrolet, Geo, Pontiac, Oldsmobile, Buick or GMC Truck when you finance with GMAC.

But that’s not all. How about no previous credit necessary, a low down payment, the opportunity to defer payment for 90 days*, and even the chance to enjoy financing options such as SMARTLEASE™ by GMAC and GMAC’s Buyer’s Choice Plan.

Participating GM dealers in your hometown or near your college can give you complete details about the GMAC College Graduate Finance Plan. So put yourself in fast forward today.

*Not available through GMAC’s Buyer’s Choice Plan, SMARTLEASE by GMAC, or when purchasing in Michigan, or in New Jersey on vehicles with a cash selling price of $10,000 or less. Finance charges accrue from date of purchase.
Real World 101: A needed course

I wish my university would offer a course entitled Real World 101. I could use some serious instruction and guidance these days.

After all, we are attending classes to learn what it takes to make it in the real world, like how to get a good job, how to raise a family and how to be successful.

But there are no courses that teach us these things, and I need to know how to do a few things right now. How do I pay my bills (the water, electricity, phone, rent, groceries) on a very limited budget? It is so easy for me to get caught up in more immediate things. That my overdue bills don't matter much — only until my phone gets shut off. I want someone to teach me how to balance my checkbook and how to get the most out of double coupons. I could also use some lessons in buying a car.

My dad offered some insight into the dealership industry. When I was looking for a car, he told me when the car was too old, if it had too many miles, and when I was being ripped off. Finally, I picked one for myself. The old man who sold it to me insisted it was a dream. A day after I picked up the car, I found it was lacking something I had hoped for: brakes. I took the car to a mechanic who proceeded to tell me I needed $1,100 in repairs!

I returned the car to the dealer, and demanded a refund. But the salesman refused to take the car back, so I went home crying — to my dad.

That same day, my father went to the dealer and was successful in obtaining a refund. I was so proud of him for the way he was able to stand up for me and make a difference, especially since I couldn't help myself.

Still, I can't help but wonder why no one ever taught me how to handle these kinds of situations. I wonder if the only way to learn is with age and experience, or if some of these "life lessons" could be taught — at least discussed — in the classroom.

Life would be much easier if we could learn how to handle real world problems before we have to face them on our own.

Jobs turning employees into professional students

By Julie Inglebrest
The Minnesota Daily
U. of Minnesota, Minneapolis

If you think you'll never pick up another textbook after you graduate from college, think again.

In fact, many job seekers are now looking at what educational opportunities a company offers employees — at the company's expense — before accepting positions.

"Education has almost become an important factor in finding a few jobs," said Dick Anderson, an IBM spokesman. IBM spends about $1.5 billion a year offering employees college opportunities.

Effect on schools, students

Continuing education is widely viewed as one reason why today's colleges are now more populated by non-traditional students, characterized as older "group geared toward taking only classes with direct, practical applications for their careers.

Jim Buchanan, education manager of a company based in Rochester, Minn., said, "I think you're seeing an increase on the focus of the importance of education and how to apply it to your career rather than just taking it because it's there."

Lynn Warner is one such student. She's working toward her master's degree in business communication at Minnesota's College of St. Thomas, thanks to Honeywell.

"I might have waited for many more years to get a master's," she said. "If there wasn't this program, I probably couldn't do it because it's just too expensive.

Warner, whose tuition is $865 each semester, said when she was offered the Honeywell job, she thought of the education perk "right away.

"I think it really weighs in Honeywell's favor," she said.

Management development programs, both external and in-house, have been on the rise since the early 1980s. External training refers to education on the company's policies and technologies, compared to external training, in which employees are sent to college at the company's expense.

Companies "profit investment"

And as managers are required to have more sophisticated training, including knowledge of the international business world, the popularity of

Graduation: an end to your education?

It is becoming more and more necessary to be required by your company to take extra training classes. Here is a look at what is to come.

Management development programs, both external and in-house, have been on the rise since the early 1980s. External training refers to education on the company's policies and technologies, compared to external training, in which employees are sent to college at the company's expense.

Where do you get a pair of Japanese pajamas with a 5-foot waist? You might try looking in the mail or department stores, but if you're a Michigan State U. student, your best bet would be the swap shop. Officially named the Gove or Tate Center, the swap shop is a small store that distributes items donated by the residents of three university apartment complexes.

Located in a small, white room in the basement of one of the complexes, the store holds a wide assortment of clothing, household items and other goods, which are offered free to other students who live in the complexes.

Denise Cowdery, the store's manager, said the Gove or Tate Center exists to help financially pressed students.

Jobs turning employees into professional students

By Devon Hyde
The Daily Tar Heel
U. of North Carolina, Chapel Hill

When Michael Berard decided to go into the T-shirt printing business in the summer of 1987, he figured his parody of a Budweiser can and slogans — printed on thousands of shirts — was just harmless humor.

But Anheuser-Busch Brewing Co. wasn't laughing with Berard, a senior at the U. of North Carolina when the case was filed last spring.

The brewing giant is suing him for trademark infringement, a potentially bankrupting suit for his company.

"Theoretically, I could lose everything," he said.

Berard came up with the design for the T-shirt from one he had seen on campus during his 1986-87 school year with "This Drunk is for You" printed on it, he said.

"I was really into this thing," he said.

these programs will continue to increase, Ulland predicts.
But only certain types of in-house training have
seen increased use during the last few years, said
John Fossum, director of Minnesota's industrial rela-
tions.
Some companies are becoming reluctant to pay for
external training because it can be used outside the
company, making it more of a bonus for the employee
than a benefit for the company.
"They can just pick up and leave with the training," Fossum said. "Organizations are reluctant to pay for
general training."
"The only time they'll do it is when it will help attract
and retain employees." IBM is an example of a firm moving toward in-house,
company-specific training. One of its plants in
Minnesota contains its own two-floor "classroom"
devoted to IBM training.
And many universities are offering an alternative to
the typical master's degree: non-degree executive man-
agement programs.
Although the programs do not carry the same clout
as a degree, William Buehner, director of Minnesota's
Executive Development Center, said most managers-
in-training — and employers — don't seem to care.
"Typically, they don't need another degree," he said,
adding that student managers want the most efficient
education possible.
They want education. They care less about the cre-
dentials that go with it."
But for those who do care about the credentials, IBM
will still pay for its employees' undergraduate or grad-
uate tuition — with the agreement that the employee
pay the company back.
And the courses the employee-students take usually
must be work-related. "Chocolate-dipping classes"
wouldn't qualify, IBM's Ulland said.
Other companies "protect their investment" by wait-
ing several years to see if an employee has company
loyalty before sending him to college. Honeywell's
Warme has been with the company five years.
"People tend to leave sooner rather than later," rea-
sons Fossum.

WE CAN ALSO PUT $18,000 FOR COLLEGE
WITHIN YOUR SIGHTS.
Fact is, we offer over $18,000 for college if you qualify for the Montgomery GI Bill and add
that to your Reserve pay during a standard enlistment.
We can help you pay off some or all of a qualified student loan, too, through the Student
Loan Repayment Program. And offer you the chance to train in a useful skill.
You serve part-time, usually one weekend a month plus two weeks a year at a nearby Army
Reserve unit. So you can continue to pursue your education while participating in the Reserve,
where your time can mean valuable college money.
Think about it.
Then think about us.
See your Army Reserve recruiter today. Or call 1-800-USA-ARMY.

BE ALL YOU CAN BE.
ARMY RESERVE

Shirt
Continued from page 14
While living at the beach during the summer, he finalized a T-shirt design and consulted a patent and trademark
specialist who said it was safe to print.
The following spring, Berard formed a company, Venture Inc., and started mak-
ing the shirts in large quantities. "I thought it was all right to sell them. I didn't hide anything," Berard said. "It was
all out in the open. It wasn't like bootlegging or anything."
The T-shirt Berard designed featured a drawing of a can printed in red and blue
that said "Nags Head — the King of Beaches," a slogan and design similar to Budweiser's "The King of Beers."
A single line on the back of the shirt said "This Beach is for You," which
Anheuser apparently thought was too similar to "This Bud's For You."
Wings, a chain store with more than 25 locations along the East Coast and a
store in Myrtle Beach, was one place that
bought the shirts, Berard said. Wings
alone sold a large quantity of the shirts,
and at the end of the summer the store
sent him a check for $27,000.
Payment on the check was stopped
soon after Berard received it, although
he did not know why. He later learned
that representatives from Anheuser
came to the store, seized about 4,000
shirts, stopped payment on the check.
Two weeks later, Berard's mother
was visited in her office by a U.S.
Marshal, an Anheuser lawyer and a pri-
avy investigator, he said. They proceed-
ed to raid her office and seize 200 shirts.
It was at this time he learned he was
being sued for trademark infringement.
Because Venture is incorporated, Berard
has some protection. A corporation will
shield shareholders from liability, mean-
ing only the corporation can be sued.
But Anheuser is trying to get past the
protection of the corporation in order to
 sue the corporate directors, Berard said.
"A motion has been made by the prosecu-
tion to pierce the corporate veil."
Robert Reeves, Berard's lawyer, said:
"Our position is that the design was
intended to be an amusing parody... In
order for a parody to be effective, it must
necessarily bring to mind the slogan or
the symbol being parodied. Otherwise, it
would not be an effective parody."
Because more than 80 percent of the
shirts were sold in South Carolina, the
case against Berard will be tried in a fed-
eral court in Florence, S.C.
Berard said he was optimistic about his
upcoming trial. "I will be happy when
it's over so I can get on with my life."

Swap
Continued from page 14
"We've been able to explain some students are breaking
'the rules,'" said Paul St. Germain, a recruiter at the
school. "But the students have been able to prove them-
selves and show they are capable of carrying
want."
And at the same time, the school continues to get
credit for being able to keep some of the best stu-
dents in the state. The school usually turns away
three to five students a year because of clothing
issues. This year is no exception.
"When the rules are enforced, the kids find the
rules more acceptable," St. Germain said. "They
realize the kids who are not following the rules
really are the kids who are having the most problems.
"The kids who are following the rules appear to
be the ones doing well."
They are a social work and classroom
Counselor and he's been helping them.

Semester
At Sea

A VOYAGE OF DISCOVERY

Is your education preparing you completely for the global community in which we live? Consider seriously internationalizing your course of study by spending a semester studying and traveling around the world on the University of Pittsburgh-sponsored Semester At Sea program.

Each fall and spring, undergraduates from across the U.S. and abroad live and learn together aboard the S.S. Universe, an 18,000-ton ship equipped as a floating campus. During this 100-day voyage, you can earn 12-15 transferable credits choosing from more than 50 lower and upper division liberal arts courses. Experience an itinerary as culturally diverse as Japan, Taiwan, Hong Kong, Malaysia, India, Turkey, the Soviet Union, Yugoslavia and Morocco.

For full information and application call 800-854-0185 / 412-648-7490 in PA, or write Semester At Sea, University of Pittsburgh, 8th Floor William Pitt Union, Pittsburgh PA 15260. Apply now, then prepare for the learning adventure of your life.

Washington Semester and World Capitals Programs

Spend your semester getting "real world" experience by participating in the Washington Semester Program. Enroll in one of eight specialized programs including National Government, Foreign Policy, Justice, Journalism, Art and Architecture, Peace and Conflict Resolution, and Economics.

Or, travel to a European, Asian or South American world capital and gain valuable international experience while you immerse yourself in the culture and language of another country. Choose from programs in: Vienna, Brussels, Madrid, London, Rome, Buenos Aires, Beijing, and Poland.

In our programs you will:
- learn valuable work skills in an internship you choose
- interact with leaders and decision makers in small-group seminars

An equal opportunity/affirmative action university.

We'd like to show you a path that often holds the greatest reward.

Rewarding careers for people who care.

Down the road a few years from now, you're going to be glad you chose a career path today that's right in the heart of Boston. It's Northeastern University's Boston-Bouvé College of Human Development Professions—the smart choice that leads to a greater reward for people who really care.

The graduate programs offered by Boston-Bouvé College provide you with a wide range of career opportunities in health, sport, and leisure studies, rehabilitation, counseling, communication disorders, and education.

Our faculty have received national and international recognition for their research, teaching and service to others and to their profession. Boston-Bouvé College has well-established clinical affiliations with some of Boston's leading medical, educational and research facilities.

Study may lead to a master's degree, certificate of advanced graduate study (CAGS), or doctoral degree. Most programs are offered on a part-time as well as full-time basis, combining classroom theory with practical hands-on experience. Courses meet in the late afternoon and early evening, so students can continue to work.

Graduate programs are offered in the following areas:

- Audiology
- Clinical Exercise Physiology
- College Student Personnel Work & Counseling
- Consulting Teacher of Reading
- Counseling Psychology
- Curriculum & Instruction
- Educational Research
- Human Development
- Human Resource Counseling
- Human Services Specialist
- Recreation, Sport & Fitness Management
- Rehabilitation Counseling
- School Counseling
- School Adjustment Counseling
- School Psychology
- Speech-Language Pathology

In line for food stamps

Many students qualifying

By Mary O. Ratcliffe

U. of Georgia

Brought 100 U. of Georgia students receive federal food stamps—commonly thought to be for welfare mothers and destitute families only—estimates the local food stamp supervisor.

Sid Jessup of the Clarke County Department of Family and Children Services said students said are "classic" candidates for food stamps because of their low incomes and few resources.

The coupons may be used in participating retail stores to buy any food for human consumption.

The D PCS defines a student as a person between 18 and 59 who is not disabled and who is enrolled in college at least half-time.

Every single-person household must prove it receives less than $648 in income each month (before taxes) and has resources of $2,000 or less to qualify for food stamps.

Income includes wages, social security benefits and student financial aid. Resources include cash, checking and savings accounts, property and cars.

Eligibility is determined by case workers during in-depth interviews with applicants at the local D PCS.

"Students might find everything too much to handle financially," Chakmanian said. "If they meet one of the six special requirements, they may be eligible for food stamps."

The requirements include: having a paid job, participating in a work-study program, receiving a welfare check, having been placed in school by the Job Training Partnership Act, having a child younger than 6 living at home and caring for a child between 6 and 18 when no other adequate care is available.

Chakmanian said that proving eligibility is not an easy process. Receipts, paycheck stubs, income tax returns and bank statements must be shown to the case worker. The interview process is thorough, personal and sometimes "embarrassing."

"It lowers self-esteem incredibly," she said. "It's difficult to say I need help."

Women

Continued from page 8

In my opinion there are, indeed, some forms of combat that qualified women could be assigned. The operating word here is "qualified.

If a woman has the right personality traits for this type of combat—the ability and motivation to kill another human being with hand weapons—she could be as successful as a man.

Women could be combat helicopter pilots. Courage was the overriding character­istic I witnessed in helicopter pilots, and certainly courage does not reside only in men's souls.

I think women could also be door gunners on helicopters.

 Couldn't women be snipers as well?

There is no reason why a man should be better at picking off an enemy soldier at great distances.

There are, however, some types of combat assignments that should be restrict­ed to men: the M-40 machine gunner and his partners the ammunition carrier, the radio operator with his gear on his back, the grenade launcher, flame throwers, combat bulldozer operators and artillery and mortar units.

There is another combat unit to which women should not be assigned: the ground troops.

How do I describe battle scenes with mud and rain, slogging 360-degree heat, 40-degree below-zero cold, no sleep or food for days on end, heavy, long marches and your friends dying in front of you?

Women have what it takes for this particular type of combat? I think not.

A project of seven universities
Love of a sport: Should players risk their lives?  

By Andy Skoogman  
The Daily Nexus  
U. of Minnesota  

On Oct. 30, 1988, Mark Seay, top wide receiver at California State U., Long Beach, made a mistake that nearly cost him his football career. As Seay passed a teenage boy riding his bicycle, he said, "That's happening, blood? Sound harmless, right? Wrong. A California street gang known as the Crips has a rich tradition as the Bloods. The teen was so agitated he returned later with a loaded gun and opened fire. Seay tried desperately to shield his niece Thawanda.  

She was not hit. Her uncle was. A 26-caliber bullet tore through Seay's right kidney, stopping an inch from his heart. He lost his kidney. His season was over. However, Seay's desire to play football remained. He even participated in spring drills six months later, but university officials said he no longer could play. They said the risk of injury to his remaining kidney was too great.  

But Seay said he'd take the risk. Should schools allow athletes to risk their lives over a sport?  

Seay, a criminal justice major who often counsels teens against joining street gangs, thinks so. He sued the university in August 1989, saying the decision to play should be his own. They settled out of court in September 1989, allowing Seay to play if he signed a waiver absolving Long Beach State of liability and wore a flak jacket to protect his remaining kidney.  

Seay agreed to both and is back in a Long Beach State 40er uniform this football season. "During the season, I consider it like a job. I do it just to make money," said Eric, who usually donates twice a week.  

Eric is one of about 35 to 40 regular donors at the California Cryobank of Berkeley, where 90 percent of the clients are UC Berkeley students, manager Chris Haskell said. "Our policy here is that medical decisions have the final word. Signing a release doesn't change anything in my mind.  

"I had a team doctor who said an athlete shouldn't play, and he went out and got hurt, or even killed, even if he was legally protected, I would feel morally responsible."  

Seay was lucky. He will live."
**When the body becomes 'something political'**

- The Miscellany News

Vassar College

Women under the age of 25 represent the first generation of women who have never known life without the option of safe, legal abortion. Many wonder how this affects their views.

So, Wendy Wasserman, a senior at Vassar College, and Veena Cabreros-Sud, a recent Columbia U. graduate, are editing a book they call "a historic blueprint about what our generation feels about reproductive rights."

Wasserman became interested in compiling such a chronicle while working for Representative Pat Schroeder, D-Colo. She then began consulting for Students Organizing Students, a national reproductive-rights activist group.

SOS was formed by students from colleges around the country, including Columbia U. and Rutgers U., who realized that although college-age students statistically have more abortions than any other group, they are often ignored. The organization is now sponsoring the publication.

Wendy Wasserman and Veena Cabreros-Sud are co-editing a chronicle about this generation's views on reproductive rights.

The book will consist of writings by college, high school and junior high school students. Wasserman and Cabreros-Sud have been meeting with publishers, generating funds and soliciting articles since last year. Submissions are due by the end of this month.

Wasserman said she is targeting not only average women, but also troubled and underprivileged women by posting requests for articles at homeless shelters and havens for runaways.

"We hope to take the project into the streets," she said, in an effort to create a "completely diverse" picture.

Response so far has been favorable, and the students have received assistance from as far away as Jerusalem, where an Israeli women's network is spreading news of the plans for publication.

The subject of reproductive rights does not just relate to abortion, Wasserman said. "It's a whole gamut of other things," including sex education, pre- and postnatal care, and birth control access.

Those rights, said Cabreros-Sud, include "not just the ability to control your own body, but the right to be able to feed, clothe, house and take care of your children without being penalized because you're a woman."

Along the way to reaching her goals, Wasserman said she hopes to open some eyes and educate the uninformed. "What reproductive rights means to me is that the body becomes something political," she said.
The Warlord turns into the ring. A leaping Captain Paradise restrains him in a headlock. The order is shaky; the camera obviously hand-held. But the figure on the screen is clearly Forman.

Despite appearances, professional wrestling involves intense violence. "You just can't walk in there and do an act. You've got to be a little off. You've got to be a little weak. Sometimes you have to look a little wrong-upstairs. Essentially, it's a freak show," Forman says.

He then turns off the television and stops smiling. "There's a point when two wrestlers just have each other so much they have to face-to-face match for themselves. They forget the audience," he says.

His make-up came when he faced off against Kokina and ended up getting his face broken with his own collar and earring. He then got so angry that he threw a man out of his front-row seat, ripped the chair out of the floor and used it to beat his opponent.

"Kokina fell back on the mat, eyes rolling up; he was out. I looked around. People were going nuts—yelling, screaming, applauding. My mat blessing was standing there yelling, 'Kill him! Kill the guy! Kill him!'"

Then, I looked to my side, and I saw something I'll never forget. I saw a group of kids behind any little daughter up to see me beat this guy senseless with a chair, and she was giving me the finger."

Forman shakes his head, "I just walked out. I had enough. I just had enough," he said.

Returning to Riverside, Forman withdrew from people for about four months. "I told people I'm going to retire for two years to detox from being The Warlord.

The biggest thing I had to unwind from was the pain endurance. You learn to like it. Pain is a drug, and you can get addicted."

Forman used to look for fights, but now simply walks away. "I've been around and there and I know what it's like to destroy your opponent. It's empty," he says.

After he left wrestling, he diverted his energy toward opening a restaurant and writing a book about his experiences to encourage parents to stop their children from watching what he calls "violence personified." Forman, who once thought professional wrestling was just an act, now takes a metal collarbone and suffers from occasional blindness.

He looks around his room, surveying the photos and promotional pictures left over from his days as The Warlord. "There are two myths about big guys. The first is that we're all slow. The next is that we're stupid. I'm 5'10, 260 for a reason."

"I was a professional athlete... but people still didn't give me any respect because I didn't have the college degree," Forman points to his textbooks, folds his arms and says, "So, here I am. This is my current fight.

Sperv

Continued from page 20

people who are having problems concerning and 35 percent are single women," Raboy said.

There is some danger involved in artificial insemination because so much of the information the doctors gave cannot be scientifically verified, Raboy said.

Despite these risks and the ethical debates that surround sperm donation, many student donors say they think of the program as a positive contribution to society. "Sure, there's the argument of dollars and cents and how the hourly rate is great, but I would like to be able to think of someone who wants to have children," said Mark, a 12th-year student, at Santa Cruz, graduate who donates at Cryobank.

Neither Eric nor Mark said he feels any attachment to the children the sperm might conceive. "Just because they are genetically part of me doesn't give me any tie to the child," Eric said.

Mark agreed, "I don't have any curiosity to know where my seeds are being sown. It's a clinical situation, there's no strong love or intimacy with the person who's having the baby," he said.

"I feel like I'm contributing, in my own small way, my good qualities and hereditary strengths without seeing and recognizing them," Eric also said.

"I just think God's left somebody on the planet who has my genes," he said.

The names of the donors have been changed.
As the party wound down, the Tog Jorgaack led the others in a spirited rendition of an old end-of-night favorite.
Homecoming Competition Results 1990

Due to an oversight last week the Features section neglected to list the winners of the overall Homecoming Competition and the winners of the individual events. Here they are one week late.

Small Games Competition -- Pray-Sims
University Carnival -- Hansen Hall
Talent Night -- Watson Hall
Yell Like Hell -- Watson Hall
Scavenger Hunt -- Pray-Sims
Parade Float -- Hyer Hall

The overall Homecoming Competition winner was Pray-Sims.

Notice:

In last week's Homecoming Pictorial, a photo was mislabeled. It should have stated that the float in the picture was the combined entry of Pray-Sims and the International Club.

In last week's Features Section an article about the band Trinity mistakenly stated that the band would be playing on campus October 25. They will not be returning to campus to perform until next semester. The article also stated that Trinity had replaced their drummer. Trinity currently features the same drummer.

THE FAR SIDE

By GARY LARSON

"Barbara, you just have to come over and see all my eggs. The address is: Doris Griswold, 5 feet 4 inches, 160 pounds, brown eyes — I'm in her hair."

Calvin & Hobbes sponsored by Galaxy Hobby
Chalterm the audience.

The Stitlers, legends in country music, thrilled the audience the minute they hit the stage.

True stars, their performance was flawless. I found myself swaying and clapping to songs I'd never heard before as well as classics I remember hearing in my youth.

The brothers did more than sing to the audience, they made them laugh, even me.

Campus Activities and the University Activities Board have brought two major concerts to campus this semester and both have been a huge success. These organizations are planning to bring another major concert to campus next semester.

From all of us music fans to Campus Activities and UAB, we can't wait!

Workshop to feature script writing

Creating Unforgettable Characters will be the subject of a workshop lead by "the script doctor," Linda Seger of Hollywood, on Saturday, Nov. 10 at UWS.

Sessions will be from 9:30 a.m. to 1 p.m. in the University Center's Program Banquet Room. Fees, including lunch, break, and materials, are $75 for the public, $55 for members of Wisconsin Screenwriters Forum and the best in seniors and citizens, and $10 for high school students.

FASHION POINT

by Molly Rae

Music Editor

"I'm a little bit country." No, I don't think so. After nine years of experience working with rockers, I'm not a country fan, generally speaking, and I've never been country before. Even in my youth.

I'm not sure if I'll ever love the show. Maybe there's a little bit of country in all of us.

I try my best not to be distracted by the show and was delighted to see that a lot of other students had the same idea. The house was full.

The country concert one-upped the Loaf show (held a week earlier at Quandt). Opening act Suzy Boggus was great. She was fun, entertaining and she showed the audience herself. Her songs were heard by many, her voice sent shivers down my spine. The quality, the intensity and the soul she showed Friday mesmerized the audience.

The Stitlers, legends in country music, wowed the audience the minute they hit the stage.

True stars, their performance was flawless. I found myself swaying and clapping to songs I'd never heard before as well as classics I remember hearing in my youth.

The brothers did more than sing to the audience, they made them laugh, even me.

Campus Activities and the University Activities Board have brought two major concerts to campus this semester and both have been a huge success. These organizations are planning to bring another major concert to campus next semester.

From all of us music fans to Campus Activities and UAB, we can't wait!

Calling All Commuters!

Are you finding it hard to study at home? Well, here are just a few of the many study places that are available to all students on campus. These are not just places for individual study, but areas to study with a friend or in a group.

Some of the individual places begin right in the residence halls. In the basement of all the residence halls are lounges set aside for studying. There are also study areas in the base- men of Allen and DeBot centers.

On every floor of the LRC are tables and desks where students can sit for hours studying. Other places for individual study are in the academic buildings. One place in particular is in Collins Classroom Center on the first floor. The room is set aside for quiet study, and is located on the west side of the building.

If you need to study in a group, places are set aside for this. On the fourth floor of the LRC, are special rooms where group study may take place. These rooms can also be reserved for studying during exam times. In the University Center, on the second floor, is also a study area set aside for students who work well in groups. Moreover students are always welcome to find a classroom in one of the academic buildings and work as a group.

Additionally, certain departments may offer assistance as well as a place to study. For example, for math, geography, or English, for example, you can go to get specific help with a subject or ask questions that will help you with further studying.

As you can see, there are many places set aside on cam­ pus for a student to study. You may not be able to study as well as you'd hoped, but you should be able to find an area that best fits your needs.

Stereotype

Amendment? Ending Third World hunger? STOP.

I doubt that even Gandhi had enough compassion to cover all of these issues. But yet we are surrounded by programs. We've been desig­ nated the clean-up generation. The world is falling apart all around us, and the other genera­ tions are counting on us to be selfless, pick up a broom and play juvenile.

The hard reality is that this is exactly what we are going to have to do — if not to save the world, at least to save ourselves: Day-in and day-out we are bom­ barded with this message. And I don't know about you but this responsibility not only scares me but makes me more than a little angry as well.

So, all of you doubting Thomases out there cut us a lit­ tle slack. Give us some time to grow up before we have to face solving the problems it has taken generations to create. And while you're at it give us a hand.

Biker's Alert

SAFETY TIPS SPONSORED BY PROTECTIVE SERVICES DEPT.

BOLT THAT BIKE!

For your bike be safe. Always lock your bike. Use a high security lock and secure it to a stationary object, like a fence post, pole, or cable with combination lock. Anchor both wheels and frame to an immovable object.

LOCK YOUR BAG

If you have a backpack, strap it to a stationary object. Use a cable lock and a combination lock.

PROTECT YOURSELF

Wear a helmet and protective gear when riding.

Intersect in the cycle lane, if available.

Get moving and have fun, but remember to protect your safety.
Tick-bites still a threat to hunters

Hunters and other outdoor enthusiasts are reminded to continue taking tick-bite precautions throughout the fall to guard against contracting Lyme disease, advises Sarah Hurley, Department of Natural Resources wildlife health specialist.

"All life stages of the tick can over-winter under leaf litter and tree bark," said Hurley. "However, they become active whenever temperatures are above 40 degrees or so."

Both deer and wood ticks are found in Wisconsin. Deer ticks (also known as bear ticks) may transmit a bacteria that can cause Lyme disease. Animals and humans can become infected with Lyme disease through a tick bite if the tick is imbedded in the skin for more than 48 hours.

"It's very important to check for ticks right away after you've been out in the woods or tall grass, and to remove them as soon as you find them," Hurley said. "Using a fine-tipped tweezer to grasp the tick, pull the tick straight out and then kill it."

Lyme disease symptoms can become progressively worse the longer the disease goes untreated. Within the first several weeks after infection, symptoms may include chills, nausea, headache, fever and in 70 percent of the cases, an expanding red rash that can reach 20 inches in diameter.

As the disease progresses it can cause damage to the heart, joints and the central nervous system. Lyme disease may be treated with antibiotics.

No matter what the season, the best precautions against Lyme disease include:

*Using a tick repellant or insecticide containing permethrin or DEET;*

*Checking yourself and your pets for ticks every few hours while in the woods or tall grass;*

*Tucking pant legs into boots and wearing a long-sleeved shirt buttoned at the cuff."

According to Hurley, hunters would be wise to practice added precautions because they come in direct contact with animals that may be tick infested.

"Because ticks are looking for a living organism, they may crawl from dead game onto the hunter if they haven't begun to feed yet," she added.

Hunters who are concerned about Lyme disease transmission can wear impermeable gloves when cleaning game to avoid contact with Lyme-infected animal blood. Although rare, Hurley noted that laboratory studies have shown that Lyme disease bacteria can pass through broken skin.

However, the bacteria can't survive in cooked meat.

"The Lyme disease-causing bacteria are heat sensitive and will be killed when cooking or smoking the meat," Hurley said.

Women's soccer team repeats state championship

by Kris Kasinski
Sports Writer

The UWSP women's soccer team defended its state championship over the weekend by defeating Marquette University 2-1 on Sunday in Beloit.

The Pointers opened the weekend with a 2-0 victory over Ripon College on Saturday afternoon and later in the day they shut out Lawrence University of Appleton 6-0 in the semifinals.

This weekend sweep improved their overall record to 10-4-2 and keeps them in the running for post-season play.

"The state tournament is always a test of team depth, strength and endurance," said head coach Sheila Miech. "Playing three games in a weekend is a challenge.

"All of our 21 players got considerable playing time prior to the final game which helped keep us strong for the championship. We won with team unity, desire and effort.

In the victory over Ripon, Kriki Soto led the way with two goals. Lindauer and Jenny Bradley also added one goal each. Lindauer was credited with two assists and Kim Luennenberg had one. The Pointers had 35 shots on goal while Ripon failed to get a shot on goal.

In the victory over Lawrence, Suzi Lindauer scored two goals to lead the way, while Diana Huesbschen, Lynn Olson, Aimee Jerman and Bradley each added one. Assists were credited to Lisa Mortensen, Huesbschen, Luennenberg, Lindauer and Bradley.

Point had 21 shots on goal while Lawrence was held to five. Lisa Mortensen and Jill Gillolla combined in goal for four saves.

In the title game against the Marquette Warriors, Kim Luennenberg and Jenny Bradley scored the UWSP goals. Bradley, Olson and Lindauer made assists.

The Pointers took a first half 2-0 lead and never looked back. They totaled 35 shots on goal and held Marquette to just 11. Lisa Mortensen recorded 11 saves in goal.

Forward Suzi Lindauer and midfielder Jenny Bradley were selected to the all tournament team.

"Anytime you can get a variety of players to score and make assists, your depth is a catalyst for winning," Miech said. "I am extremely proud of this team's ability to look at their weaknesses early in the season and work hard for improvement."

"Our defensive unit gave up just one goal all weekend. Our strong midfield controlled the tempo of the game and our forwards consistently attacked the goal."

The Pointers took on St. Mary's of Minnesota yesterday and will play their last regular season home game Saturday against UW-Green Bay. Game time is 2:00.

Whitewater fell to WSUC league

by Timothy A. Bishop
Sports Editor

Okay folks, how many of you out there really thought that the Cincinnati Reds could possibly beat Oakland in the World Series? I don't mean sweep, I just mean win four games.

Well, the Reds did exactly that, and stunned the sports world in the process by totally dominating every game and making the defending World Champion A's look totally sick.

As for the A's they have been A's problems accepting the severe whipping they received. Within minutes of the end of game four, the Oakland players were already bashing and coming up with excuses about the loss.

The Oakland players' wives even got into the act, calling A's coach Tony LaRussa names for just doing his job and benching players during game four.

But all the credit in the World has to go out to the Cincinnati players. They overcame injuries and doubts to take everything away from the A's in a manner in which no one can say was cheap or undeserved.

The only person missing from the Reds' celebration was outfielder Eric Davis, who tore a kidney fielding a ball in Game Four and was in intensive care in an Oakland Hospital. The rest of the team, however, made sure that Davis' contributions were not forgotten as they addressed the crowd and had his jersey draped over the podium.

CBS Sports may also be in action after the short four-game series. CBS has been hoping for a longer series to help recover revenue lost due to the recent economic slowdown. However, with the loss of three games' ad sales, USA Today is

The UWSP Hockey Team has been selected as the overall, overwhelming favorite to win the Northern Collegiate Hockey Association (NCHA) championship again this year. It was announced last Thursday.

The Pointers, who are the two-time defending NCAA Division III National Champions, received a total of 48.5 of 49 possible points in a poll of NCHA coaches including a total of 6.5 first place votes by the seven head coaches.

Manitowoc State, who received the other half of the one split first place vote, was a distant second in the poll with 38 points, followed by UW-Eau Claire with 36 points, Bemidji (Minn.) State with 28.5, UW-River Falls with 18, UW-Superior 17 and St. Scholastica 10.

The Pointers are the only team to have successfully defended a Division III hockey title and have also won the last two NCHA titles.

Last year, the Pointers totaled 41 points with a 19-2-3 record.

The UWSP Football Team ran into the top ranked team in the West Region of NCAA Division III last Saturday and ended up with a 27-7 loss at the hand of UW-Whitewater here.

The loss, which dropped the Pointers to 4-3 overall and 2-3 in the Wisconsin State University Conference, eliminated the Pointers from the race for the WSUC Title and a berth in post-season play. Whitewater remained undefeated and in sole position of the WSUC lead with a 5-0 conference record (7-0 overall).

Point coach John Miech said that Whitewater was the toughest competition his team has had all season.

"Whitewater was the best team we have played so far this year," said Miech. "The situation was that we are in a good football team.

Our defense was out on the field for three quarters of the game. The score would have been different if the offense had been out on the field giving the defense a rest."

Whitewater had possession of the ball for 42:18, compared to only 17:42 for the Pointers.

One bright spot for the Pointers was the performance of football team falls to WSUC leader

Members of the winners of the on-campus intramural football team (intramural department photo)
The UWSP Men’s Soccer Club took 2nd place in the NICC conference tournament this past weekend by beating St. Cloud State 4-0, but losing to UW-Eau Claire 2-1. Eau Claire now advances to the NCCSA National Tournament Nov. 16-18 in Austin, TX.

For the Pointers, the waiting game begins as they hope to earn one of the two wild card spots available for the tournament. The spots are given based on a season record, who they played, how they did, and past national tournament appearances.

"The chances are pretty slim for this at point," said Pointer co-captain Tim Foyle. "Our conference is a weaker one, so we have a chance to win many strong teams. We’ll just have to wait and see what happens." At the conference tournament, Point came out strong against St. Cloud, in a game played in pouring rain. Rob Ansems scored the only goal of the 1st half at 15:35 on a ball that went through the St. Cloud goalkeepers hands and into the goal.

In the 2nd half, it was all Stevens Point as three more goals were picked up. Dave Valentine and Foye both scored off dead ball fouls and Ansems scored again on penalty kick to ice the victory.

"It was good to do so well in our first match," said Valentine. "It gave us the chance to play a lot of players. Almost everyone got to see some action in the match."

Against UWEC, things were a bit different. Eau Claire, who was hungry for Stevens Point because they had to forfeit a previous match to Point, wanted revenge. They scored quickly in the 1st half off a comer kick to take a 1-0 lead.

The score stayed that way for almost the entire match. UWEC had a goal called backced due to a hand ball, but Stevens Point kept up the pressure and finally found the net when Valentine powered a ball past the UWEC goalie and a diving defender to tie the game 1-1 with about four minutes left.

Continued on page 14
Striking out from page 12

Timed Monday that CBS lost $100 million in the baseball deal.

- In the National Football League, the question of drugs has again reared its ugly head, but in a different manner.

Minnesota Viking place kicker Donald Igwebuike is being investigated by the U.S. Attorney's office in connection with smuggling heroin into the U.S. from his native Nigeria.

ABC News broke the story Monday, stating that drug agents had "irrefutable evidence" that Igwebuike was involved in the smuggling operation.

Elsewhere in the NFL, all of the National Football Conference's Central Division had the weekend off last week with the exception of the Tampa Bay Buccaneers. Tampa lost last weekend to Dallas to fall one-and-a-half games behind the Chicago Bears.

The Cincinnati Bengals look to be on their way to try to join their baseball brothers (the Reds) as they sit atop the AFC East with a 5-1 record after defeating cross-state rival Cleveland last Monday night. That game, which featured the return oficky Woods after an injury suffered last year, was marred by questionable officiating and long replay delays.

- In the National Hockey League, the Chicago Black-hawks and Detroit Red Wings sat atop the Campbell Conference's Norris Division with 12 points each. Meanwhile, the Minnesota North Stars have managed only one victory in nine games and are only one point out of last place at 1-6-2.

Wayne Gretzky, who celebrated his 30th birthday earlier this week went for his 2,000th career point last night. Going into last night's game with Winnipeg, Gretzky had a total of 1,999 points.

- In college football last weekend, the Wisconsin Badgers lost to Northwestern University, 44-34, in the annual battle for last place in the Big Ten. Wisconsin had led the game in the third quarter before letting Northwestern back into the game.

- UW-Whitewater remained the top ranked team in the NCAA Division III poll after last Saturday's 27-7 win over the Pointers.

If Whitewater can remain at the top of the rankings until the end of the season, the Warhawks would be the top seeded team going into the NCAA Division III West Regional playoffs next month.

Finally, the UWSP men's basketball team was mentioned in the preseason NAIA poll.

Soccer
from page 13

remaining.

With about one minute remaining in the match, UWEC had a shot that was deflected by Point's goalkeeper John Clark, but the rebound was shot back at the goal. Korey Fischer had no choice but to catch the ball to stop the goal. UWEC was awarded a penalty kick, which they converted to take the 2-1 win.

The end result was definitely disappointing for us, but I'm proud of how well we played as a team against tough competition," said Valentine. "Anytime you get beat by a penalty kick, the loss is hard to swallow, especially when a trip to nationals is on the line."

The season for Stevens Point is not over. Tomorrow they have a match at home against UW-LaCrosse and Sunday they play Michigan Tech also at home. Stevens Point wraps up their season next weekend when they have a two game series at Minnesota-Duluth.

Intramural notes

UWSP intramurals will be conducting a singles racquetball tournament for men and women on October 27-28. Entry deadline for men and women is Friday, October 26. Entry deadline for men and women is Thursday, November 1.

There will be a three-on-three basketball tournament for men and women starting Monday, November 12. Entry deadline for this event is Thursday, November 8.

Floor hockey competition has been tentatively scheduled to begin on Monday, November 5. Entry deadline for is Thursday, November 1.

The singles table tennis tournament has been cancelled. For more information or to register for these events, please contact the UWSP Intramural Desk in the lobby of Berg Gym.
