Sen. Helbach visits campus

By John Reynolds
Contributor

State Senator David Helbach spoke at a general faculty/staff meeting at UWSP on Monday, Feb. 18.

A roundtable discussion concerning legislative and university related issues took place.

The new two-year state spending budget was introduced Feb. 7 at $24 billion was the primary item on the agenda.

The four major areas of spending are: university level education, kindergarten through secondary education, welfare and Medicaid programs, and local government returns. Helbach indicated that primary education is of the most concern.

Twelve percent of the budget is focused on university spending which allows almost no room for administrative requests which means a 2.2 percent tuition increase in the first year of the budget and a 4.4 percent increase in the second year.

One percent of faculty pay catch-up funds will come straight from student fees.

Helbach pointed out that the budget is very tight and will only see an anticipated growth rate of 2.3 percent for new funds in the first year. The second year is projected to receive a six percent increase which is closer to the six to eight percent annual average increase.

Helbach also talked about transportation and road construction. There will be a three cent gas tax increase that would produce between $50 million and $100 million in revenue a year. This revenue would aid in the improvements of projects such as Highway 51 and Highway 54.

A member of the audience questioned Helbach on the 30 percent health care increase on campus. Helbach felt that there was little competition in the health care and wellness field in Stevens Point, unlike the Madison and Milwaukee areas.

Helbach reasoned that he foresaw little change in this area and that he had to concentrate on the larger areas to keep them in competition with private programs. He felt it would be uneconomical for a private program to open here.

Contrary to popular belief, our legislators work to meet the needs of the people, he pointed out.

"The public is concerned with current issues and we try to meet them the best we can without pulling dollars from one program to support another," said Helbach.

Avenue when a city bus stopped near the curb. Varnay stepped off the bus and into the crosswalk heading south. Vu was unable to stop in time and Varnay was struck as he walked out in front of the bus.

"The incident was the second pedestrian hit this year," said Traffic Bureau Commander Sergeant James Laszewski.

"How accidents are in the afternoon during the week when people are going home from work and school," said Sergeant James Laszewski.

"There were approximately nine pedestrians hit last year, but we haven't had any fatalities (in accidents of this nature) since 1988," said Laszewski.

Laszewski said, "We are concerned with current issues and we try to meet them the best we can without pulling dollars from one program to support another."
**Dinner preparations being made**

by Eric Meyer

Copy Editor

The Twenty-first International Dinner will be held Saturday, March 9, at 6 p.m. in the Allen Center. The dinner is sponsored by the UWSP International Club and the Foreign Student Office.

Preparations for the dinner that will serve 420 began in late January and will intensify as the Mar. 9 date approaches. According to Dr. Marcus Fang, one of three advisors for the International Club and a coordinator of the dinner, this dinner is particularly special.

"Each year we think that it's going to be better than the previous year. But when we look at the age of majority, we can really say that we are finally established now," said Fang.

The purpose of the dinner, according to Fang, is to "let the people in Stevens Point have an idea how people in other cultures and countries do their cooking. It is also another way for the foreign student population at UWSP to say thank you to the community who has really been warm to them."

The dinner will include four or five dishes and several deserts from around the world. Following the dinner, will be a 5:30-6 p.m. entertainment presentation by the foreign students that will feature music, dancing and singing.

"Fang noted that a great deal of thought goes into the selection of entries. "They have to keep an eye on whether this will be appealing to the American palate. We were to cook some of the things exactly as they are done in that country, it probably would not go."

"In many countries of the world, things are always chopped into small pieces before they are cooked. We try to modify that slightly. We try to cook it the foreign way but in the portion sizes that Americans are used to eating," said Fang. The entrées for the dinner are chosen from recipes that are submitted by the foreign students. Fang explained that menu items are selected on the basis of ease of preparation, visual appeal, and taste, with Scouty kinds of entrées being eliminated first."

"One year somebody poured sauce on everybody's back," recalled Fang. "Since that year we have property taxes being anything with a lot of liquid in it."

Fang feels that the dinner is a great learning experience for the approximately 200 students who volunteer their time. "Most of these people have never cooked for more than 10 people in their lives," said Fang.

Fang hopes that the dinner will give people a different perspective and that it will help them to know more about the foreign students on campus. He also hopes it will stimulate interest in foreign travel and in dining at the various ethnic restaurants in Stevens Point. "Maybe it will let the family know that there is more than one way to do steak or that there are many ways to do chicken," said Fang.

Tickets for the dinner are sold in the Foreign Student Office. Prices are $12.00 each.

**THE BIG PICTURE**

**Gulf War update:** It is widely regarded that a date has been set (but not announced) for the ground war to begin against 500,000 Iraqi troops awaiting the ground assault in Kuwait and Iraq.

A last-ditched peace effort between Soviet President Gorbachev and Iraqi Foreign Minister Tariq Aziz has produced no concrete results. The U.S. has also been ordered not to leave Iraq pull out of Kuwait without preconditions, but would bar any punitive action against Saddam Hussein.

Additional points are: all reconnaissance would also be dropped against Iraq, Iraqi national structure and borders are maintained, and all other problems, including Palestinian-Israeli questions, will be negotiated.

An earlier peace offer by Iraq on the previous Thursday was considered bogus, having many as being the Iraq's withdrawal from Kuwait. The latest peace proposal by Gorbachev has also been rejected by Bush, who stated that the UN resolution for absolute withdrawal without concessions is being strictly adhered to.

In Bogota, Columbia, a cordon was closed the bulfighting ring, killing 22 people, including 9 police officers, who were the reported target of the attack. Terrorists working for the drug cartel in Columbia have claimed responsibility.

**AFDC not for school**

United Council news

People who receive AFDC benefits in Wisconsin pay their own way through the university system should not be denied the opportunity to pursue a four-year degree, according to United CouncilLEGISLATION introduced by the Joint Committee on Administrative Rules would change the existing rule to allow AFDC recipients to enroll in four-year degree programs.

"The money women receive from AFDC is strictly for family maintenance. If a woman is academically qualified and able to find the money to get a degree, why deny her that opportunity?" Jennifer Smith United Council's Women's Affairs Director said.

**SGA Calendar Update**

At last week's meeting:

- Approval of new senators: - Tammy Ortega - Jeff Shadick - Jon Zaranski - Yang Ly

- Performing Artists for the Prevention and Treatment of Injuries was recognized as an official student organization. The group is oriented toward giving performing artists information on how to avoid and repair injuries. They hope to accomplish this through bringing in speakers and touring facilities.

- Under Finance: - Sigma Mu Tau was approved for funding of $154 and $379 for student expenses.

- This week's senate meeting will be held at 7:15 p.m. on Thursday, February 21, 1991, in the Wright Lounge of the University Center.

More to life than just good parking
Issues may not abound on this campus, but they need attention

by Ron Wirtz
Editor-in-Chief

There are quite a few loose ends waiting to be tied around campus. Right now several issues confront this university that will set university policy for some time to come. Decisions need to be made soon so people can begin to take stock of what this administration has for priorities.

Parking: I've heard way too much about this subject. People here don't know the real meaning of parking problems. Try going to Madison or Milwaukee campuses sometime and you'll see the real definition of parking troubles. People here whine that they can't park right next to the building they have class in. Well it's time people start searching on the off 'Nikes with a matching piece of duct tape across the mouth.

Granted, the parking efficiency of this campus could be much improved. However, there has been talk of parking services now offering a sticker for a nominal fee which allows you to use certain lots after 3 p.m. Is a great idea but they keep it a secret. But viewed as a whole, parking should take low priority on a campus with many other problems.

The related Greenspace controversy: Another good reason for people to whine about one side or the other. People do not use the huge field complex behind Berg as it is, and it is there for recreational use by everyone. Don't claim we need Greenspace by the new Health Enhancement Center because people need more space to frolic and run with patches of fuzzy dandelions. If greenspace is needed, it is because this campus has very little visual aesthetic beauty to it, and this may be able to improve (initiate?) this beauty.

On the flip side, 100 extra parking spaces would merely benefit a select crowd, none of whom are students. I believe the saying goes 'the needs of the many outweigh the needs of the few.'

People need to prioritize issues in order to concentrate on those that are truly urgent.

War-time ignorance not bliss

by Steve Schmidt
Outdoors Editor

Are you sick and tired of tolerating the constant interruption of your favorite television programs for a Gulf War update? How about the brain-cluttering war coverage not only on national news broadcasts but on the local level too?

If answering yes, contemplate reading on. I have a bone to pick.

What I'm sick and tired of is the apparent disregard of the war by so many students on this campus. Everyday, I witness a constant-provoking number of so-called intellectual, inspired and cognizant college students acting like new-homs, drudging about with a perpetual jumble of insignificant concerns like-who's screwing who, where the best price on barley-pop is tonight or perhaps, what time the game is on.

Frankly, it's time for these ignorant minds to begin giving a damn about US efforts in the Middle East. Failure to know increased fees and tuition: Always an eyesore to the student, the university system is attempting to match resources to students by cutting enrollment. Meanwhile, state and federally backed education programs are getting cut, faculty salaries are going up (which is fair, but an argument in itself), general costs are increasing, and there are fewer students to foot the bill.

But price increases are needed to maintain the current system. Education is not in a static vacuum, removed from the real-life problems of inflation and cutsbacks.

However, education is again becoming tied to income and background. The administration boasts that we are letting in only a select crowd in order to meet enrollment cuts mandated by the university system. Such policies smack of elitism.

The idea of a public university system is to offer higher education to those who need or want it. The past four years have taken the system directly away from that. Current talk is that a high school graduate must be in the top one half of their graduating class to be accepted. This in turn could have serious repercussions on society because the education level of the masses will be declining. But hey, as long as were all comfortably snug now, right?

People need to stay 'on top' of issues on campus. But almost more importantly, they need to prioritize those issues in order to concentrate on the ones that are truly urgent.

Peace
Organization needed at new athletic center

Dear Editor:

I'm sure by now everyone has had a chance to visit our new multi-million dollar Health Enhancement Center. After over ten years of battling and petitioning, we now have at our disposal, a professional indoor facility which can house almost any sport under the sun.

Impressed with the facility, I'm shocked to see the organizational structure within the new center doesn't reflect the illustrious image of the facility, and has taken another route. Unfortunately to the chaotic side. I realize that the building is just opened in November, however, I think that at least three months is enough to form some sort of a workable system which pleases the majority of the users of the facility. These complaints have already been brought up to the people in question, but I have seen no change at all.

First of all, there should be a designated person within the facility. Someone to answer questions, misunderstandings, watch for thieves, visitor help, and so on.

Another point I would like to make is that the athletic teams like baseball, soccer, track, volleyball, and basketball should be ON at the signed up times, and OFF when their periods are up. End of story.

By doing this, the following players or teams can actually use the facility. During peak times they'd signed up for. I would love to mention Men's Tennis team along with the above, as I did participate in it at one time and still am an avid player. However, the above doesn't exist at all anymore. This being so ironic considering the new facility.

Another question I have: Why is it that classes/facility aren't required to sign up for the use of the facility? Or at least it seems that way. As every time I sign up to use the facility I end up getting "bumped off" for an unscheduled class or a faculty priority just because their names weren't on the sheet. And how about once a name is down on the sheet, consider it SIGNED, sealed, and delivered unless cancelled otherwise by the signer. End of story, no more surprises or unscheduled Changes.

And why is it that certain minuscule classes need the ENTIRE facility when they don't need more than the equivalent of 2 to 3 tennis courts? I realize that it is an educational institution and not everyone can use the place all at once. Simple logic tells us that.

I truly believe that the majority of the potential users of the facility feel the same as I do, as I am writing on behalf of SEVERAL of us.

All we are asking for is a little stability and consistency with the rules and STAFF (if any). I.E. Have someone ALWAYS on hand, keep the sign-up sheet in ONE place and under TOTAL control, stick to the scheduling, and how about a bulletin board in the facility informing us of possible upcoming events/classes which might perhaps conflict with our so-called reservations....

Recycle those cans

They add up!

Dear Editor:

Last week, as I was leaving a class, I passed the trash can on my way out. To my great horror I saw the un-speakable. ALUMINUM CANS IN THE GARBAGE!

I would guess that the people who threw those particular cans away, actually do recycle aluminum cans at their homes. What troubles me is that one or two cans a week could throw out during a class.

I won't repeat what you probably already know concerning the large amount of space taken up in landfills by discarded aluminum (not to mention the energy waste and pollution increase). Think of it this way. You throw out two cans a week during the academic year. That's 64 cans.

All students who live in your apartment building in, for example, The Village, do the same: one building, 12 people, 2048 discarded aluminum cans. What about the other couple thousand people who are students or employees for the University? Or the people in Stevens Point, Wisconsin, or the United States?

The next time you finish that soda in class or at work make the effort to carry the can down the hall to the aluminum can receptacles. Unless you want in the very near future several thousand cans buried in your front lawn.

Sherry Brandt

Find alternatives for band-aid method

Dear Editor: 

If I just had a few extra dollars to invest in band-aid stock, I could be rich in a short time... It seems as though band-aids are the solutions to most problems. Put a band-aid on it, cover it up, it's not a problem any more. For example, with the current battle on what to do with the space near the new HIPERA facility, the band-aid will be a new parking facility.

The parking lot probably won't be built near the HIPERA facility but it will be built somewhere else. The real questions under the band aid are "Do we need more parking facilities?" and "Does the University want to continue to advocate driving to school?"

It has been quite a while since a study on parking availability and needs was done. And yet, some people say we need more parking lots.

By building more parking lots, the University is saying that driving to school is O.K. even though most of us could use the exercise in walking or biking. Global warming, acid rain, air pollution, and water pollution are major environmental problems caused by driving cars to school and work.

And you can't deny that the war in the Middle East is tied heavily to our use of oil/gasoline.

Dr. Munson says he needs handicapped parking and a bus turn-around facility. Look behind Berg Gym. The parking space that existing lot could be moved to Lot T (right across the street) which is never full, and probably could house the hand-icapced and bus lot without laying any more concrete.

Your chance to become involved

Dear Editor:

Students are pretty sick and tired hearing about student apathy. It's hard not to find a day where someone (maybe on campus) labels students as uninterested, uninvolved, or just lazy. I disagree.

However, I do find it even more surprising to hear members of our student body complaining about a lack of opportunities to be involved on campus.

They say that there isn't a way to voice their opinions, their feelings, their ideas at UWSP. They're wrong.

Because Student Government Association (SGA) wants you to make the student voice be heard. Applications for Senate, president, and vice-president are available today.

Students and SGA need your input now. These positions are important roles that allow you to be heard at the campus, local, state, and even national levels. Representing your peers is both a privilege and a responsibility. On some state campuses, students are treated as unimportant and left out of major university decisions. However, we have a unique problem at UWSP. Faculty committees are crying out for student representation.

SGA offers you an avenue to make a difference. I encourage you to take the challenge and make an effort. Prove everyone wrong -- you can be interested, involved, and active in the SGA. Applications are in the SGA office and are due Monday, Feb. 25.

Shawn Acker
SGA Public Relations Director

RED CROSS STANDARD FIRST AID CLASSES

Portage County Red Cross is offering STANDARD FIRST AID classes for the upcoming months with the cost of the class being $25. This class incorporates Adult, One Man CPR skills with basic First Aid techniques.

Textbook fees are included in the cost, and classes will be filled on a first-come, first-served basis. Participants will need to call the Red Cross office at 344-4052 between the hours of 9am-4pm Monday through Thursday.

The dates are as follows:

- Monday, Feb. 25 6-10pm (CPR)
- Wednesday, Feb. 27 6-10pm (FA)
- Wednesday, Mar. 6 6-10pm (CPR)
- Thursday, Mar. 7 6-10pm (FA)
- Tuesday, Mar. 12 6-10pm (CPR)
- Tuesday, Mar. 19 6-10pm (FA)
- Wednesday, April 10 6-10pm (CPR)
- Thursday, April 11 6-10pm (FA)
- Saturday, April 13 8am-4:30pm (CPR&FA)
- Monday, Apr. 22 6-10pm (CPR)
- Wednesday, Apr. 30 6-10pm (FA)
- Monday, Apr. 29 6-10pm (CPR)
- Tuesday, Apr. 30 6-10pm (FA)
- Wednesday, May 1 6-10pm (CPR)
- Tuesday, May 7 6-10pm (FA)

Eleven wolf packs roam northern Wisconsin

"We used to get a kick out of their howling, especially when one pack would answer the other. Many a winter's night was spent listening until we fell asleep," Author George A. Corrigan, writing about wolves in his book Caulked Boots and Cant Hooks.

Corrigan wrote about the days of early logging in Wisconsin. Since then fear, hatred and bounties eventually eliminated wolves from our state's landscape. Today, thanks to laws that protect this endangered species in Wisconsin and public education, howling of wolves is being heard once again.

An estimated 50 to 60 wolves in 11 distinct packs now roam northern Wisconsin. But because humans are the wolves' only natural predator, fear of people runs deep and wolves are rarely seen.

One person who does see them is Adrian Wydewan, endorsed resources manager for the DNR. Aided by special radio telemetry surveys by collared wolves, Wydewan has documented that lone wolves travel between Michigan, Wisconsin, Minnesota and Canada.

Such was the corridor of wandering used by wolves prior to their silencing by the guns of settlement. Today an expanding wolf population in Minnesota and one roving pack create the present packs we have in Wisconsin.

When a lone wolf finds a suitable territory and a lone mate of the opposite sex, they may form a pack, according to Wydewan. A pack's territory averages about 100 square miles and is closely guarded.

Wydewan said that Wisconsin has suitable habitat and ample food for this endangered species--habitats in the form of deer, beaver and snowshoe hare. Left alone, biologists believe that wolves could regain their niche in the forest that they've been deprived of for so long.

The public, like wildlife biologists, are also learning that this largest member of the dog family is a highly social creature. As parents, wolves provide care and protection for their young. As a pack, all members take part in digging the den, rearing the young and hunting.

Although the state's wolf population has been growing over the past few years, Wydewan believes they will never be as common as they once were. Their broad habitat needs, coupled with a deep aversion to humans, will keep wolf numbers between 50 to 120.

The timber wolf, which once howled freely in the State of Wisconsin, is presently an endangered species, doomed to a life within wire cages on concrete floors. Stricter regulations and improving attitudes, however, are helping wolf packs to reestablish in the northern portion of the state. (Photo submitted)

Bag limit lowered for Green Bay perch

At the urging of both sport and commercial fishermen, the Natural Resources Board passed an emergency order reducing the yellow perch bag limit from 50 to 25 fish per day, said Lee Kern, Fisheries Management Director for the Department of Natural Resources.

Board members voted unanimously in favor of the bag limit reduction at a telephone conference call board meeting held Monday, Feb. 11. The emergency rule took effect Thursday, Feb. 14, 1991.

Brian Belonger, DNR fisheries manager in Marinette who is responsible for the Green Bay perch fishery, said extremely favorable ice fishing conditions during the first three months of 1990 made unexpected high sport fishing catches possible last year.

"We estimate that ice fishermen on Green Bay caught more than two million perch during the 1990 ice fishing season. And fishermen are having similar success in 1991," Belonger said.

"We have been rebuilding the perch population in Green Bay since the early 1980s, but two big winter harvests back to back could damage the recovery effort and lead to poor fishing in the future," he said.

"About 50 percent of the perch being caught now were spawned in 1986, when water temperatures in the bay were ideal. We haven't had those ideal conditions since then and the fishery is depending too much on mature perch from that year. In addition a majority of the fish being caught are females."

Belonger estimates that the bag limit reduction approved by the Natural Resources Board will save 140,000 mature perch

To fish or not to fish, navigability is the answer

by Steve Schmidt

Outdoor Editor

With the inland trout fishing season just around the bend, anglers across the state will be slipping into a pair of waders and stepping their feet in their favorite stream, creek or river. Each year, however, more than a handful of anglers are burned with an earful of profanity, projected from the lungs of an irate and threatening landowner. The landowner usually shouts something like, "You've better get your ass out of my water or I'll have you arrested for trespassing, damn it."

Well if your feet aren't, keep your lowercase. Chance are, you can legally fish the stretch of water you're standing on. Most likely, the landowner is misinformed or just casting you a line of BS. Your knowledge will determine if you take it hook, line and sinker.

Navigability determines whether a waterway is open to public use or if it's private. Navigable waters (lakes, rivers, streams, canals, etc.) are public, and waterways and therefore are open for public use.

Whether desirable or not, the state of Wisconsin holds one of the most open definitions of navigability in the United States. And some people say that in order for a waterway to be classified as "navigable" in Wisconsin, it merely needs to allow the flotation of a trout on its side at low flow level.

Seriously though, Wisconsin's present definition of navigability is an offshoot of an earlier interpretation based on the great logging industry of the mid-1800s. It suggested that a waterway is navigable if it is capable of floating logs to market.

Since 1911, however, water uses have changed. And the state's current definition affirms that a waterway is navigable if it is capable of floating the shallower ends of the small craft at sometime during the year—even if only during spring floods periods.

Since navigable water courses are public, you may fish, swim, boat or travel by recreational water activity (skinny dipping?) provided you have the permission of the landowner to travel across their property to reach the waterway. And once on a navigable stretch of water, all you have to do is keep your feet wet to legally travel in any direction along the shore.

Murphy's Law applies to outdoor activities

by Brian Leahy

Contributor

Everyone is familiar with Murphy's Law--anything that can go wrong, will go wrong. That statement, most unfortunately, is affirmed many times over by various events. For an example look at the 1990 Green Bay Packers. Anything that could go wrong, such as having injured quarterback and a seemingly impotent offensive line, did go wrong.

There was no Super Bowl trip for the green and gold this year. The results of Murphy's Law presented them from achieving success.

Outdoor recreational pursuits are not living when it comes to the cruel, yet inevitable, application of Murphy's Law. Even being a former Pointe outdoor editor has not spared me from having my plans disrupted by Murphy's Law.

I have both observed and experienced this phenomena during my days on the water and in the woods. From these adventures I have come up with the Nine Dreaded Hunting and Fishing Corollaries to Murphy's Law.

Grouse will always put a large tree between you and them when they flush. They will never offer you a clean shot. This is in their best interest but it is highly frustrating to the hunter.

Since most legal hunting weapons are incapable of delivering birdshot, while still maintaining an effective spread pattern through any chunk of xylem and phloem that qualifies as a tree, grouse offer a nearly impossible shooting problem to the grous hunter.

As a result the last time that I held a dead grouse in my hand was when I removed one that flew through my uncle's garage window.

2. Have a net in the boat and the only fish you'll catch will be very small. Doesn't this mean that you have the net in the boat and you'll hook into a hard fighting, bruiser of a trophy that slips off the hook?

Continued on page 9
Gobbler hunting clinics underway

The 1991 Turkey Hunter Education Clinics are now underway throughout Wisconsin to help new hunters prepare for the ninth wild turkey season in the state, said Bill VanderZouwen, turkey season coordinator for the DNR.

The free clinics, held in February and March, are co-sponsored by the Wisconsin DNR and the Wisconsin Wild Turkey Federation.

VanderZouwen encourages first-time turkey hunters and those interested in becoming turkey hunters to attend the 3- to 4-hour clinics. The clinics will teach how to hunt wild turkeys in a safe, ethical, and successful manner. Each person attending will receive a Wisconsin Turkey Hunter's Guide that summarizes the information presented at the clinics. Advanced reservations are not required to attend.

Turkey hunting is allowed by permit only. All successful applicants have been selected and their permits mailed to them. A record 41,340 permits were issued for the 1991 season, according to VanderZouwen. The 1990 season issued 26,690 permits; and hunters tagged 6,501 turkeys.

VanderZouwen noted that there are two new hunting rules in effect beginning with the spring turkey season: hunters may not hunt with the aid of bait, and they may not hunt with shotshells loaded with shot larger than no. 4 lead or no. 2 steel, and without loads containing any shot larger than the no. 4 lead and no. 2 steel are not legal.

A current 1990-91 Wisconsin Wild Turkey Stamp is required to hunt turkeys. The stamp must be signed across the face and be in possession (attached to the license) while hunting turkeys. Senior Citizen Recreation card holders, first-year Wisconsin hunter education graduates and military licenses do not need a turkey stamp.

Wetland water quality standards set for adoption

After months of review and comment at meetings and hearings around the state, standards to guide the regulation of projects affecting wetlands are ready for consideration by the state Natural Resources Board. Consideration of the rule at the Board's February meeting is an important step in a process that has involved the participation of over 3,000 citizens, businesses and interest groups, according to Dale Simon of the Department of Natural Resources Bureau of Water Regulation and Zoning.

We've made some revisions that answer concerns we heard about vagueness in the original version of the rule," Simon says. "People who wondered what type of wetland impacts would be allowable should now have a firm understanding of methods that would be used to assess those impacts. The result helps us specify the standards we're hoping to maintain.

Simon says the standards would affect projects in which applicants hope to excavate or fill wetlands, dredge waterways or flood property. If adopted by the Natural Resources Board and cleared through legislative review, Simon says the board would help to assure consistent application of laws designed to protect wetlands and waterways.

"It's important that people understand these are not new regulations in and of themselves, but rather, standards for use in the implementation of existing state and federal law," Simon says.

A key element of the rule would require permits applicants to show there is no practical alternative to locating projects in wetland areas.

Scullion adds that measures sent out for public hearings will appear before the board again once the hearings have been completed and changes have been made in response to concerns raised during hearings. Each Natural Resources Board agenda spells out which items have been offered for final adoption and which are being offered for public hearing approval. Board agendas are distributed to the media and are available to the public one week before each regular meeting.

Anyone wishing to speak to the board is advised to contact Scullion at the DNR's central office in Madison by the Monday prior to the board's meeting date.

Persons wishing to comment on the rule proposal are invited to appear before the state Natural Resources Board in Room 207 of the GEF 2 State Office Building, 101 S. Webster St., in Madison at 9:30 a.m. on Feb. 27. If you wish to address the board, please register with Judy Scullion at (608) 267-7520 before 4:30 p.m. on Friday, Feb. 22.

Brookfield man wins waterfowl stamp contest

Accomplishment leads to grand slam

Terry Doughty of Brookfield was named winner of the 1991 Wisconsin Waterfowl Stamp Contest. He became the second artist to complete a grand slam of victories—waterfowl, turkey, inland trout and Great Lakes trout—in state conservation stamp contests, according to Harry Libby, DNR waterfowl stamp coordinator.

Doughty had double wins in 1988, winning the Wisconsin inland trout and turkey stamp contests. He was also named the winner of the 1991 Wisconsin Great Lakes trout and salmon contest.

This is also the first time that green-winged teal have been featured on the Wisconsin waterfowl stamp.

Doughty’s green-winged teal painting was judged the top entry from among 81 works of art entered this year.

Navigability from page 6

Now I understand obtaining permission to cross a landowner’s property is as easy as pulling chicken’s teeth. There is, nonetheless, a way to get around this obstacle.

Wisconsin law also states that a recreator may obtain access to a watercourse by traveling the shortest straight route from the roadway to the body of water. However, this would entail that an angler can get on his favorite trout stream at a bridge location. But what if your favorite fishing hole is 2 miles downstream of the nearest bridge?

Well then you’re out of luck and will have to hike the 2 miles to reach that spectacular hole. I know it stinks but so does picking rock salt out of your keester.

This brings me to those yahoo farmers who stretch fences across navigable waterways. One idiot in particular has an approximately five-foot fence crossing an area of the Tomorrow River holding some prime trout habitat.

Not only does this behavior inconvenience anglers by forcing them to go out of the water and travel around the fence, but the farmer's cattle raise havoc on the biological oxygen demand (BOD) of the river.

Every time one of his animals poops in my trout water it adds fertilizer to it, in turn affecting the delicate ecological balance of a trout water.

Unfortunately, riparian rights permit this kind of action by our agricultural geniuses. It’s important to realize, however, that you may indeed legally cross a landowner’s property to bypass a fence that inhibits your travels up or down a waterway.

So the next time an irritable landowner makes and chews you out for trespassing on a navigable watercourse, just smile and continue on your fishing adventure. If you feel some careful explanation of state law may be productive in hindering his gripes, by all means explain the situation.

And still if encountered by an extremely vicious landowner, give him the single finger salute, then make like a trout and swim like hell.

Murphy’s from page 6

just beyond your reach near the boat.

This means that you’ll never have a net when you need it. Bring one and you’ll get skunked. Treble hooks will just get tangled up in the damn thing. Don’t have one and you’ll be practicing advanced catch and release technique on wallhangers. Either way you are doomed.

3. The easiest access to a trout stream, besides sliding down steep banks, usually involves stepping into high suction mud up to a depth over your knees. This seriously reduces mobility and forces you to thoroughly fish the stretch of stream within casting range. Unfortunately this increases the likelihood of your snagging your lure on overhanging branches.

4. When gun deer hunting on public land someone else will always beat you to the spot you’ve selected for your stand. It never fails. This past season I tried waking up much earlier and healthier than I ever had before. It still didn’t help. I had to contend with a truck that had driven back into the woods and parked on top of a deer runway that went by my stand.

All of this so that he could have a comfortable place in the truck to sleep. If you’re going to sleep while deer hunting, sleep on the ground like a true hunter does. Not in a truck.

5. You are more likely to see grouse while bowhunting for deer. You’ll see enough to make you cry. You’ll wish you had you’re shotgun instead of the bow. You’ll especially wish you had your shotgun when one flushes and scares off a deer that was coming into range. You’ll want to make that grouse pay for his bad deed.

6. The simplest things will cause boat motors not to work at the worst of times. Personal experience has taught me this too many times. A 1 1/2 cent “O” ring with a hole in it caused me to miss my 16th birthday. Instead of eating cake, I was bobbing in high waves getting a layer of sunscreen on top of a layer of poison ivy. All of this because the fuel line wouldn’t let the motor suck fuel from the tank. In another incident, this one from last summer, the steering cable snapped. This slammed the motor into a turn and nearly flipped the boat before said driver, in an attempt to save his life as he knew it, could regain control.

7. The one time someone brings bottled beer along, no one remembers to bring a bottle opener. By the time someone realizes this, the stores are all closed.

8. The weather never cooperates. Plan a big weekend and it rains. Hope to get snowed in and you won’t.

9. This is perhaps the cruellest of them all. When you finally retire and have enough time and money to be outdoors often, your physical condition won’t allow it. When you’re young and able, work and study consume your time.

**Two person exhibit "Nature's Cycle" in CPS**

Pointer Diane Canfield

Bywaters and sculptor Barbara Cranford in a two-person show at Agnes Jones Gallery, UWSP, present nature's cycle of growth and decay in a way not originally intended by the artists. They only noticed the fact during last minute preparations for the show. Bywater's wide gorgeous oil-on-paper landscapes are full of springing vitality. Her bright vistas of New Mexican grasslands and sunny skies surge with life and promise. By contrast, Cranford's somber clay has relief and free-standing human torsos, torn and fragmented, sometimes disintegrating into the earth even as they strain against their destiny. They are the necessary other half that completes the eternal cycle.

Bywaters is an assistant professor on UWSP's Art and Design faculty whose work graces many collections nationwide. A grant from the University Professional Development Committee partially funded her recent trip to do these paintings.

**A Marine's thoughts on Saudi**

*Ex-student writes a letter and poem before heading out*

Dear Carl,

Don't know how much you've heard our but I am definitely going to Saudi Arabia. Training here is more mentally intense than physically although there's that too. Learning how to kill people (and how they will attempt to kill you) is stressful.

Had a chem warfare class today. Guess how Marines see if an area is still contaminated when they're in their suits? Pick 3 "non-essential" Marines, take their weapons and order them to umask! If there are chemicals in the air, they will die and you'll know the air is contaminated. I wish I could've told them there isn't a mother, wife or girlfriend out there who thinks their Marine is "Non-essential." If I bite it over there I want an autopsy done here. I'd hate to be a "non-essential" without a little posthumous revenge for such flagrant disregard for human life.

Geez it's the next day already! Had a class on land mines today. Too bad we can't spend the same amount of time finding a cure for cancer as we do improving the ways we try to blow arms legs and bodies off young men and women.

I just paused to read this and it sounds awfully depressing. I am in good company though, Carl. We are being well trained and there are many Marines here who feel as do that what we're doing is wrong at simply too fast or impatient.

---

**Embarrassed to be**

America has stood so long, so proud. But now we live in danger. We can't see for the shroud. We are told we are the greatest nation on earth. But only the raw uncounted night gives us the night to be first. How many fledging countries have we subdued? How many lives destroyed. To grant us a better living for all the world view. Is this what Washington, Jefferson and Franklin wanted for us? To use our freedoms to chase imaginary specters and race villages into the dust. We fight our socialist evils: the communist/socialist way. In the name of liberty, justice and freedom. We jump readily into the fray too late we find neither left nor right is the one that's bad. If it's how the show is. Keeping in mind the dreams Lincoln once had. We submit to secrets and darkness again and again. I hate to admit, but I'm embarrassed to be Called American.

Risley, '90

---

Did you gather my writing skills are deteriorating in this sea of active duty brainless parrots.

Any way did you hear about the protest at Eau Claire? Pretty damn good. If you mount your own offensive, feel free to use my name, poetry, whatever.

Let the world know there are people going who think it's wrong too. The government can put us in Leavenworth (a place that is not run along usual prison lines) for pot going to Saudi.

---

Have Steve Frosh bring a song for you to listen to in the lounge. It's called "Anybody Listening?" by Queenyche. You will like it for the message if not the music too. It seems to describe my position (feelings anyway) to a tee.

I am enclosing another poem for you to enjoy (or use if necessary). I pulled it out of this chaotic blend of emotion I've been dealing with.

Thanks for listening Carl.

Ever,

Riz

POINT OF STYLE
by Alphonsus Chung
Contributor

One of the ‘must have’ items this spring for women is the dress. The current rage for the nostalgic 60's is now extremely prevalent. Never before has the fashion world experienced such a revival of a style which many designers predict will last at least another season. Yes, the dress is back and this time with a vengeance!

The 60’s vivacious style is sweeping the fashion world. There is no doubt that the dress reached its peak of popularity during this decade. Just looking at our mothers’ old photos could easily attest to that. Even the silhouette for the dress of the 90’s takes on a trapez inspired, A-line design.

Introducing Stuart

by Stuart Nocleuski

Piss and monogor deluxe

A friend of mine once said that the world is a crazy place and that someone should sell tickets so one could gain a considerable amount of capital with this practice but I also believe that sooner or later people would figure out that it’s not a world that is crazy but the people inhabiting it.

My name is Stuart Nocleuski and I have never had a day in my life when something didn’t go wrong. It was at a very early stage of my career when I came to the realization that life was going to be a continuing battle of hardships and let downs.

I’m sure that I’m not the only person in this world to go through such hardships but I don’t really care about other people’s problems. I’m more concerned with, like most people, how the problems of others will affect my own.

I am currently a tenth year student at UWSP. My guidance counselor keeps demanding that I declare a major in a field that I would be interested in. But seeing that this system doesn’t allow me to declare "Sarcastic Observation" as my field of study, I shall remain without a major.

Over the next couple weeks I hope to share some of my personal observations with you.

I’m sure that a lot of people who read this won’t be interested in what I have to say, but I don’t care about those people.

They’re probably just a bunch of self-righteous fascists who continually insist on making my life a living hell, or maybe I’m just paranoid.

You be the judge. See ya next week.

Three Penny Opera a success

by Deby Fullmer

Contributor

People of all ages gathered at 7 p.m. in the Jenkint Theatre in the Fine Arts building to see the "Three Penny Opera." Sunday night’s performance was the third performance in a series of eight.

The play has run very well," stated Andy Erlanson who played the part of Tiger Brown.

He also stated that, "There have been no major catastrophes and everyone’s working well together."

The cast and crew have been creating and rehearsing from Jan. 10 - Feb. 14. They have put in practice time of approximately twenty hours a week to reach their finished product under the tutelage of Thomas F. Nevin.

Nevin is in charge of the musical staging and the direction of the music program. "Mr. Nevin is an excellent motivator. He lets us know what is expected of us and what to expect of ourselves each night, and then he gives us the energy to do it," said Erlanson.

Erlanson also stressed the importance of the musical staging. "Mr. Nevin is an excellent motivator. He lets us know what is expected of us and what to expect of ourselves each night, and then he gives us the energy to do it," said Erlanson.

"I’m really enjoying working in a show where the cast is one big family. It’s been a positive learning experience and I don’t use that as it’s my first show at UWSP," said Holly Grover who played the part of Molly.

The five remaining performances of the "Three Penny Opera" will be on Feb. 19-23.

Pregnant mothers sing to babies

Unborn babies sing to are more healthy

"When unborn babies have been exposed to the sounds of their mothers’ singing, following delivery they are friendlier and they bond with loved ones more readily," says a Suzuki voice teacher who is beginning a new class for pregnant women at UWSP.

Mary Slattery Hofer, who joined the UWSP Suzuki program last fall, will lead the classes for women who are at least four months pregnant. "We begin about half way through the pregnancy, or later, because that’s the time at which a fetus begins to hear."

Suzuki Director Dee Martz says there will be two or three social gatherings over the summer, then meetings with the mothers and babies will begin again in the fall. Hofer also invites dads to join the classes, learn the music, and enjoy these activities with their families.

The adult participants will master a specific set of songs including nursery rhyme tunes and lullabies. They will then continue to sing set patterns of these songs to their babies, in utero and after delivery. The program will also teach relaxation techniques accompanied by music, breathing exercises and vocal warm-ups.

Hofer says a Finnish Suzuki teacher, Patti Kukkasniemi, has been achieving dramatic results with this type of program. She still has more than 60 families involved after four years, and she has discovered some interesting things about the parents and children enrolled in the classes since before birth.

Following birth, the infants seem to be more contented, better able to entertain and comfort themselves, and easier to soothe with the use of music, she comments. In addition, some of them are able to “pitch match,” or stay in tune, as early as six months, a skill which was thought to first occur at about four years.

As far as vocal talent is concerned, Hofer says anyone can learn to stay in tune while singing these simple folk songs. The classes are taught using the Suzuki philosophy of nurturing and nurturing development, which offers encouragement and support to students of all ages, the teacher says.

Local obstetricians she has contacted are enthusiastic about the program, according to Hofer. She says Dr. Steve Ber- gin of the rice Clinic has coordi- nated it to traditional practices of the Sioux Indians, whose pregnant women met with the elders of the tribe to sing and tell stories. This custom was regarded as the first important step in passing on ancient tribal legends and traditions from one generation to the next.

Weekly classes will be at the Suzuki House on Main St., beginning the week of Feb. 25-May 1. Meetings will be scheduled from 7 - 8 p.m. on either Mondays or Wednesdays. Interested expectant parents are asked to call Hofer at (715) 346-3633. The cost is $36.

On Monday, February 18, about 50 students gathered outside of Knutzen Hall during the evening. The students decided to show solidarity with American troops in the Gulf War by holding the national flag and the sign pictured above. (Photo by Al Crouch.)

Wrestlers take second at conference; Loy gets coach of the year

By Mark Gillette

Sports Writer

The 1991 WUSC conference wrestling championships were held this past weekend in Quadti Fieldhouse. Stevens Point placed strongly as they took second place out of a nine team field with 77.5 points. UW-Whitewater captured first place with 86.5 points and UW-La Crosse took third place with 35.5 points.

Point Coach Marty Loy was very satisfied with the meet. He felt that his team "wrestled a really good tournament." Loy, who received Coach of the Year honors over the weekend, added, "Overall, our wrestlers were outstanding. We made a couple mistakes, but wrestled really well. We got beat because Whitewater did an outstanding job throughout the meet," said Loy.

In four out of the ten weight categories, Stevens Point placed first. Additionally, they got two others on the team could see it. He got the others motivated like he has done all year."

Steve Point's Carl Schech- chuk got first in the 150 pound weight category by defeating Jolyed weight of Oshkosh 7.5. Loy said of the sophomore: "He it, which is a testimonial to him -- he made it his championship."

Sophomore Brian Succo-cki captured first in the heavyweight category against top-seeded Brad Strides of Oshkosh by pinning him in 5:41. Loy explained that Brian "out- scored the best he has in one and a half months. He knew what he had to do and controlled the match."

Freshman Travis Ebner took first in the 190 pound weight class as he defeated Dale Stah- mann of Whitewater 9-4. "Travis has been improving all year," said Loy. "His weight class was up for grabs and he got skilled and used better techni- que than his opponent. He pinned all three opponents he faced," Loy added.

Dave Carlson from Stevens Point took third place over Jeff Jacobs of Stout 5-2 to get third in the consolation final of the 115 pound weight class. Dennis Schmeltz gained third in the 142 pound weight category by defeating Mike Meunier of Oshkosh 14-5 to win that consola- tion final.

Earning fourth place for Point in the consolation finals is the 134 weight class was Jeff Bartkoviaik. Bob Loeheier of Point also got fourth in the 126 pound weight category.

 Following Whitewater, Point, and La Crosse in the final team scores were Stout in fourth, with 445 points, and Oshkosh in fifth, with 413 points. River Falls came in next with 34.5 points. Platteville and Eau Claire trailed with 16 and 15 points respectively, and Superior came in last with 3 points.

Regional come next for UWS when they travel to August College in Minnesota this weekend.

Hockey gets swept by Mankato, start NCHA playoffs in Bemidji

by Kris Kasinski

Sports Editor

The UWSP hockey team traveled to Mankato, MN to take on the Mankato State Mavericks last weekend and found themselves returning home with two losses and a third place finish over the weekend.

Bemidji State, who split with UW-Eau Claire over the weekend, and Mankato State, with their two wins over the Pointers, tied for first place in the NCHA.

Mavericks 4, Pointers 2

On Saturday, the Pointers came out needing a win, but were unable to do away with the Mavericks, and were defeated 4-2.

Paul Caufield got the Pointers on the board by scoring just 54 seconds into the game with a shorthanded goal to bring the score to 1-1. Then, just two minutes later the Mavericks captured their second goal to gain the lead. At

the 15:12 mark of the first period, UWSP's Mike Toth scored his first goal of the year to tie the score at 2 each. Assists went to A-Bouchor and Frank Cliere. The score tied tied until 2:41 of the second period when Mankato scored the only goal of the second period to go ahead for good.

The Pointers could not manage to put the puck in the net in the third period, even after going 6-5-5 after pulling goalie Kevin Marion. Marion scored at 19:47 of the period with an empty net goal to bring the score to its final 4-2.

Kevin Marion had 16 saves in the Pointers net and Mankato goaldenter Glen Prodahl had 30 saves.

Mavericks 3, Pointers 1

On Saturday, the Pointers hoped to turn things around, but once again came up short, with a 1-3 defeat.

The Pointers managed to get on the scoreboard first again with Scott Krueger scoring a power-play goal at 12:36 of the first period. He was assisted by Paul Caufield and Dan Bailey. This gave the Pointers 1-0 lead after the first period of play.

The second period's only goal was scored by Mankato at 17.30 of the period to tie the score at 1-1.

The third period remained scoreless until the 10:26 mark of the third period when Mankato took the lead 2-1. Just two minutes later the Mavericks put the puck in the net again to gain the 3-1 lead.

"Thought we played well for 2 periods then our defense made two very bad plays," said Head Coach Mark Mazzaoui.

Kevin Marion had 22 saves for the Pointers and Prodahl had 26 saves for the Mavericks.

"I thought Kevin (Marion) was outstanding tonight. He played well enough for us to win the game. He gave us great goalkeeping," commented Maz- zaoui.

"You've got to take your hat off to them (Mankato). They're a damn good hockey team. We got beat by the conference continued on page 15

Women's basketball defeats UW-Stout, now at 14-6 overall

by Scott L. Zuelke

Sports Writer

The UWSP Women's Bas- ketball team defeated the UW-Stout Blue Devils' 60-59 last Saturday night in Berg Gym. The Pointers were outplayed in the first half, at UW-Stout, at one point leading by as many as eight points, eventually took a 22-26 lead into intermission.

The second half, however, provided an up-tempo game with Tricia Peterson leading the way for the Pointers. Peterson scored 10 of UWSP's first 13 points of the second half. The difference coming from a Kate Peterson three-point shot.

Lisa Grudzinslais' two free throws enabled the Pointers to take their first lead of the second half with 3:20 to play. Grud- zinski then made a lay-up to in- crease UWSP's lead to 57-54.

The Blue Devils then scored, followed by Amy Pelaver free throw. After another Fayette leading the way for the Pointers. Fayette scored 10 of UWSP's first 13 points of the second half. The difference coming from a Kate Peterson three-point shot.

Lisa Grudzinski's two free throws enabled the Pointers to take their first lead of the second half with 3:20 to play. Grud- zinski then made a lay-up to in- crease UWSP's lead to 57-54.

Former Pointer Baumgartner signs with World Football league

by Victoria Christian
Contribution

Former UWSP football All-American Kirk Baumgartner took another step in the direction of a professional football career when he signed recently with the World League of American Football.

Baumgartner, who was drafted by the Green Bay Packers in the ninth round last spring but was cut in August, during the pre-season, competes with approximately 44 quarterbacks for a final position on a World League team.

Swimmers in Conference Championship

The UWSP Men’s and Women’s swimming teams had the weekend off to get ready to compete in this weekend’s WSSL (Wisconsin State University Conference) meet. The Pointers have compiled a record of 2-0 in the two meets they have participated in the UW-Lacrosse Invitational.

The Pointers will travel to Menomonie for the conference competition. All swimming events will be held at the Menomonie High School pool while the diving competition will take place at the UW-Stout Johnson Fieldhouse.

The NAIA Championships will be held March 6-9 in Seattle, Washington.

Hockey league closes in on playoffs

by John Reynolds
Contribution

As the CIHL closes in on the playoff week, the teams are fighting to improve their points standings. Sunday night’s game matched up Pine Ridge and Play It Again Sports.

It was a high scoring game with Play It Again coming out on top 9-7. The leading scorer for Play It Again was Eric Laskowski with his season high 4 goals. Steve Buckley followed with a hat trick, and Kurt Hietzinger added 2. Putting Pine Ridge on the board, were Matt Bogenet and Tory Dean with 3 goals, and Chris Gross with 1.

Bull’s Eye took on the Puk’s in the first game on Monday night, with the Puk’s pulling out a 7-2 victory. Scoring for the Puk’s, were Scott Swidt with a hat trick, Josh Schultz with 2, and Mike Wenholz and Brian Leszczynski, both with 1 goal each. Russ Lojquist and Brian Leitinger scored for Bull’s Eye.

In Monday night’s second game Campus Cycle played Buffly’s. Campus dominated the game and pulled out a 7-1 win. Leading scorers for Campus were 2 goals each were Rick Blosser and Neil Cegelski. Mick Auniga, Kevin Legue and Dan Brown put 1 goal each on the board for Campus.

The standings after the fourth week of Play leave Buffly’s and Bull’s Eye tied for first (3-1-0), Campus Cycle in second (2-1-1) and Pine Ridge in third (1-2-1). Bull’s Eye and Play It Again Sports tied for fourth place with a (1-3-0) record.

Men’s basketball completes weekend sweep of Superior, Stout

By Ginger Parker
Sportswriter

Pointers 88 UW-Superior 75

After a long bus ride to Superior, the Pointer Men’s Basketball team got the win over the Yellowjackets for a victory. It was pointed out by Pronschinske that this was the Pointer’s second strong half that carried them past Superior 88-75.

"We forgot to play defense," said UWSP coach Bob Parker. "At half time we had a nice little lead, but in the second half we got after them."

Senior captain Chas Pronschinske pulled the team along in his outstanding efforts in the game.

"Chas played a very excellent, excellent game for us," said Parker.

Pronschinske’s efforts allowed him a season high 21 points, 5 rebounds, 6 steals and 7 assists. From the field, Chas sank 8 of 19, including 2 of 3 from the three point line and 3 of 4 free throws.

Tracksters host Stevens Point Invitational

by Kristian Erik Sydow
Contributor

This past weekend, the UWSP Men’s and Women’s Track teams hosted the UWSP Invitational in the newly constructed Health Enhancement Center.

Mens:

The UWSP Men’s team finished in first place overall, finishing second, and Milwaukee, who finished third. "I was very pleased with the effort given by the entire team," said Head Coach Rick Witt.

Winning events for Stevens Point were Blair Larsen in the 355, weight with a throw of 50’3 1/2”, Mike Cummings with a pole vault of 14’0”, Dave Scheurer with a long jump of 21’6” 1/4”, Dean Bryan with a time of 23.33 in the 200m, and Chris Larson in the 200m hurdles (25.52).

The Stevens Point team swept the first four places in the 400m and the first three places in the 800m. Finishing in the 400m were Dean Bryan (48.97), Andy Vallia (51.60), Ryan Hebert (52.56), and Dean Schwab (53.24), respectively.

The top three places in the 800m went to Doug Engel (1:58.07), Matt Hamilton (1:59.38), and Pat Crawley (1:59.93).

The 4x400m relay team also took first place with a time of 3:32.18. Coach Witt later said that, "Those weeks of training are really starting to show up and there has been a lot of improvement in the depth of our team."

The Pointer Men’s Basketball team got the win with an 11 point lead, but that dwindled to 49-45 at the half.

Early in the second half the Yellowjackets came out fighting to jump into the game at 57-57. Points then pulled away from the last place Yellowjackets. UWSP had five players in double figures. Jon Julius led the way with 22 points. Vince Nichols three in 14 points and chipped in 8 assists. Mike Harries added 12 points and Justin Friar drilled 10 and grabbed 6 rebounds.

Offensively, the Pointers had a sound night. They were 34 of 53 from the field for 64 percent. They also connected on 4 of 8 from three point range.

The Pointers tough defense in the second half forced Superior to turn the ball over 21 times during the game. Meanwhile, UWSP drew it away 15 times.

"We can’t get in a full game. We’re getting wins, but I want a night where we put up 40 minutes of basketball together," said Parker.

Pointers 88 UW-Stout 79

The Pointers held off one more loss over the weekend. The Stout Bluedevils battled, but Point pulled away to beat them 88-79.

The win completed their weekend sweep and gave them 12 straight wins over Stout. The wins upped UWSP’s record to 8-6 in the conference and 15-9 overall. In the conference, Point is tied with River Falls for fourth place. They are just one game behind third place Whitewater. UW-Eau Claire is in first, and UW-Platteville is in second.

In the victory over Stout, the Pointers came out storming in the first half. They connected on 22 of 30 from the field for 73 percent to gain a 19 point half time lead. 57-38.

As the second half began, the head coach announced that his starting five would be sent out of the game, leaving in their substitutes.

The Smart Career Move

Highly challenging & rewarding opportunities in more than 70 countries. Greatest demand is for people with forestry, environmental sciences, agriculture, biology, chemistry, math, education, skilled trades, accounting & health/nutrition backgrounds.

Excellent benefits.

Men’s volleyball improves overall record to 7-0

by Jason Smith
Contributor

The UWSP Men’s Volleyball team improved its overall record to 7-0, and its divisional record to 5-0, with four victories over the weekend.

The Pointers defeated UW-Platteville in their first home match on Thursday night, 10-15, 15-11, 15-6, 15-5. Bruce Meredith led with 16 kills.

Saturday, UWSP picked up two non-divisional victories beating Bethel College 15-0, 15-11 and Luther College 15-12, 15-5 at Bethel College. Scott Towne and Jason Smith had 11 kills in the two matches.

Sunday, in what proved to be the toughest match of the year so far, the Pointers defeated Winona State 6-15, 16-14, 17-15, 11-15, 15-6 at Winona State. Bruce Meredith led the Pointers with 21 kills, while Scott Towne had 15 kills and 11 blocks, and Mike Johnston added 16 kills and 10 blocks.

“It was a long weekend, but we did what we set out to do,” said co-captain Jason Smith. “Bruce and Scott played fantastically, and Mike is coming on very strong. It was also great to see the turnout on Thursday night,” he said.

The Pointers next home match is Thursday, Feb. 21, at 7:00 in Berg Gym vs. Bethel College and also Sunday, Feb. 24 at 1:00 in Berg Gym vs. UW-Stout. ADMISSION IS FREE.

Valentine's Day made sweeter by Sorority

Alpha Omega Rho, a social sorority on campus, sought to make a few people just a bit happier on Valentine's Day.

The society had some flowers left over from a fund-raiser and with those flowers they visited the patients at Saint Michael's Hospital.

The women involved met from room to room distributing the flowers. "We felt so good about giving them out, when we ran out, we bought more from the hospital gift shop," said one Alpha Omega Rho, Jodi Marmer.

In all, the sorority gave out over three dozen single flowers to the patients.

In addition, every holiday the sorority donates handmade decorations who are in charge for the room doors and the decorations up themselves, something they have been doing for the last two years.

Paula McGuire, another sister, comments, "We try to do our part for the community."

Alpha Omega Rho was established in the fall of 1948 in reaction to a dissolution of a little sister program that some of the founding members were a part of at one time. With a few enthusiastic little sisters and their friends, Alpha Omega Rho was founded. They continue to be one of the largest sororities on campus and are still growing. They are in the final stages of becoming a national sorority, which would make Alpha Omega Rho the only national sorority on this campus at this time.

According to President Lori Anderson, "We have almost reached our goal of becoming a national sorority, something we have been working hard at for three years."

Although Alpha Omega Rho is simply a social sorority, they are involved with many community activities. They have helped with Hunger Cleanup, sponsored a family for the holidays by providing food for a Christmas dinner, and a certain percentage of their profits go to a special charity.

Conference planned by Jeremy Krause

News Writer

The Society for Human Resource Management (SHRM) is hosting a conference that deals with things such as employee relations, job training, and becoming a marketable career person.

The conference will bring speakers in to talk about working in the private sector versus the public sector, employee compensation and benefits, as well as other topics.

Registration begins at 8 a.m. in the lobby of the auditorium.

The day will run from 9 a.m. to 3 p.m. The fee is $15. Any students wishing to be on any committees such as publicity, accommodations, fund raising, programming or hospitality, should contact Brian Krolczyk at 346-3858 or Denise Mack at 344-5516.

The organization meets weekly on alternate Mondays and Wednesdays. The next meeting is scheduled for Feb. 25 where resumes will be critiqued. Check the Daily for the exact room.

Honor society here by Amanda Scott

News Writer

The Society recognizes and honors those persons who have excelled in academic scholarship, in whatever field.

Phi Kappa Phi invites undergraduate who are in the upper five percent of their junior class, and seniors who are in the upper ten percent of their class to join. Graduate and professional students must rank in the top ten percent of their graduate class to join. Graduate and professional students at UWSP once invited, a fee of $136 and two letters of recommendation must be paid. The total cost of the ASD is six-hundred dollars.

A simple procedure is performed by taking a standard dental impression of the patient's teeth and precision tooling the molded plastic device for final fitting. It requires no surgery.

Not everyone can wear the device, however. People with physical abnormalities, jaw joint disease, or people who are in generally poor dental health are not considered good candidates.

For more information about the Cook ASD, and a free copy of "Snoring: Questions & Answers," call or write: Cook ASD Clinic, 22 Wilson Avenue NE, #207, St. Cloud, MN 56304; USA or call (612) 239-5797.

Press kit including sample articles is available. Arrangements may be made to interview Dr. Cook.

Anti-snoring device gives hope by Cara Kinczewski

Pray-Sims orientation assistants provided an opportunity Monday night for students to become more informed about the war. Dr. Neil Lewis and many international students were available for questions. Dr. Lewis is a UWSP professor and a Middle East specialist.

His perspective on the war was very dim, "Whenever I get popular, it means the world is going to hell in a major way." Dr. Lewis feels that the war will cause negative international relations throughout the world for many years to come.

The war encourages more violence. It's used as a cover up for other violent situations in the world," said Lewis who used Lithuania as an example of this undercover violence.

Dr. Lewis ended by saying that the ground war is about to begin and that "it will be a nasty and bloody situation."

The four international students reported that they and the countries they represent have negative feelings about the war. Dr. Lewis ended by saying that the ground war is about to begin and that "it will be a nasty and bloody situation."

The four international students reported that they and the countries they represent have negative feelings about the war.

Lewin and students rap on war

On that same issue, Naomi Osugi said, "My mother gets angry about sending money for the war. She said it comes to $50 per person in Japan."

Emily Cheng, an international student from Singapore and an assistant for the annual International Dinner, said that the Arab students were asked not to participate in the dinner this year.

The Arab students were asked to keep a low profile. I guess there was an incident of these students being "hacked recently," said Chung.

LOSE 20 POUNDS IN TWO WEEKS!
Famous U.S. Women's Ski Team Diet

During the non-stop, off season, the U.S. Women's Alpine Ski Team members used the "Ski Team" diet to lose 20 pounds in two weeks. That's right — 20 pounds in 14 days! The base of the diet is chemical food aid and was devised by a famous Colorado physician especially for the U.S. Ski Team. Normal energy is maintained (important!) while reducing. Keep "full" — no starvation. 2 pounds a week is the recommended loss rate. It's a diet that is easy to follow whether you work, travel or stay at home.

This is honestly, a fantastically successful diet. If it weren't the U.S. Women's Ski Team wouldn't be permitted to use it! So, give yourself the same break the U.S. Ski Team gets. Lose weight the scientific proven way. Even if you're tired or feel the other diets you once tried failed you, you owe it to yourself to try the U.S. Women's Ski Team Diet. That's it, if you really do lose 20 pounds in two weeks. Order today. Tear this out as a reminder.

Send only $10.00 ($10.50 for Rush Service) to: SlimQuik, P.O. Box 103, Dept. 29, Hayden, ID 83835. Don't order unless you want to lose 20 pounds in two weeks! Because that's what the Ski Team Diet will do. © 1990
