Deadline passes and war begins: events reported day-by-day

by Ron Wirtz

Editor-in-chief

This article provides a brief summary of the events that have transpired in the Gulf since the expiration of the U.N. deadline of January 15 for Iraq to unconditionally leave Kuwait.

Wednesday night, Jan. 16. Coalition air forces invade Iraq, bombarding Baghdad, Iraq's capital, and many other strategic military targets. Initial reports stated that as much as 50 percent of the Republican Guard, Iraq's prestigious air command, had been destroyed.

Thursday night, Jan. 17. Coalition air attacks continue. Iraq fires eight SCUD missiles at various targets in both Israel and Saudi Arabia, one of which is intercepted by a U.S. Patriot missile. No deaths resulted, as most of the missiles appeared off-target.

Israel vows to respond, stating it has the right for self-defense. The U.S., and later the Soviet Union urge Israel to refrain from all military involvement, fearing that Jordan (and other Arab nations) will become involved on the side of Iraq if air space is violated. At this point, only Egypt has stated it will remain firmly with the coalition regardless of Israeli involvement.

Friday night, Jan. 18. Israel is struck with two more Scud missiles. All such missiles have contained conventional warheads and not the chemical warheads as feared. Israel now seeks "an antidote for fear."

Again, they are urged to not strike militarily.

Coalition air strikes are now reaching 2000 missions a day. Military officials believe they are effectively taking out many of the fixed and mobile site Scud launchers which Iraq has used to retaliate.

Saturday, Jan. 19. U.S. and ally forces move closer to Kuwait and Iraq frontiers anticipating further action. At this point, there has been one confirmed death, and additional reports of missing pilots. Ten planes (4 U.S.) have also been lost. Air strikes have also been slowed due to incoming poor weather.

Jordan's King Hussein states in a press conference that they will not stand for an Israeli violation of their airspace. Jordan's parliament denounces U.S. attacks on Iraq and calls for all Arab and Islamic nations to strike out against the interests of the U.S. and its coalition.

The U.S. sends Patriot missile batteries to Israel for self-defense purposes against further Iraqi bombing. All batteries will be manned by U.S. soldiers due to the high-tech training necessary.

Sunday, Jan. 20. Iraq launches three volleys of Scud missiles totaling ten in number at Saudi Arabia, and all but one are intercepted by Patriot missiles. The remaining missile hits Riyadh, the capital of Saudi Arabia in a residential area. Coalition sorties (air strike missions) now number over 7000.

Local area junior high and high school students rallied at the Stevens Point Post Office on January 15 after Iraq's deadline expired. Advocates of the war and their opposition remained fairly peaceful. However, names and snowballs were exchanged. (Photo by Lisa Stubler)

Coalition forces capture 23 Iraqi POWs off Kuwaiti oil platforms being used as anti-aircraft stations. Five additional Iraqis were killed in the confrontation.

Iraq broadcasts interviews with the seven captured coalition pilots. All make statements, and many express regret for the role they played in the war, sentiments which were echoed earlier by Iraq. It could not be determined for certain if they

were speaking under duress, which, along with the broadcasting of the interviews, are violations of the Geneva Convention on the treatment of POWs.

Hussein also addresses his people for the first time since the hostilities, vowing to increase Iraq's counterattacks.

Monday, Jan. 21. A comparably quiet day. Air strikes continue against Iraq. Marine

artillery shells Iraqi positions, making it the first direct ground attack in the conflict.

Tuesday, Jan. 22. Iraq launches more missiles at Saudi Arabia, all of which were intercepted by Patriot missiles. One Scud, however, scored a direct hit after being fired at Tel Aviv.

Students polled about war aren't apathetic but supportive

by Maria Hendrickson

News Writer

War in the Gulf caused grave concern among a generation who has never, until last week, witnessed their government commit troops to combat.

There isn't any sense of apathy among the many UWSP students with friends, neighbors, and relatives directly involved in Operation Desert Storm.

Several students predicted the fighting to be over within six months. However, senior and elementary education major Lee Ann Kittleson said, "My gut feeling is it will take a long time. And even if the fighting is over quickly, our troops will remain to clean up for some time."

There is fear and trepidation all over campus concerning the uncertainty of the already committed United States troops in the Middle East.

Is the U.S. justified to be involved? Senior and elementary education major Teresa Wonders said no. "We get pulled into too many things that are none of our business because others know we have the power to help."

Junior Matt Scholes, a Spanish and communication major, referred to the United States' former support of Saddam Hussein when he replied, "It's not the United States' right to play global police, especially in the Middle East where our support of nations is changing constantly."

On the other hand, "Saddam Hussein has to be stopped," said sophomore and international business major Joey Borisch. There are many UWSP students who firmly support the United States' involvement as a member of the United Nations coalition.

But how stable is the UN coalition? Some students replied that it is strong enough to withstand the war, while others voiced concern over obvious internal strife. Scholes

cited the Soviet Union's upheaval as an example.

Israel's involvement or the lack thereof weighs heavily in the balance. Should the Israelis retaliate against Iraq's unwarranted attacks and risk the breakup of the coalition?

Senior and Communication major Wendy Nagel said, "If Israel is attacked again, then yes, they should defend themselves."

Kittleson replied, "Israel is justified to retaliate, they have been attacked and the Arab nations need to realize that. Also, their well-trained troops could really help."

Other students fear a broadening of the war and confusion among allied troops in combat if Israel does take the initiative and joins in the fighting.

What are UWSP students' views concerning the anti-war protestors? While students agreed the demonstrators have the right to voice their own opinions, only a few agreed with their cries to pull out.

"I don't agree with them, I keep thinking about Vietnam

and how the returning soldiers were treated. Our troops need all the support they can get," said Nagel.

"I don't think they're looking at the whole picture."

Brian Polzin, a UWSP Psychology student poses with the peace symbol that he and fellow roommates, Mike Brell and Chris Lee, painted on their living room wall. All had preferred a non-violent solution to the Gulf crisis but now feel that since America is involved they should do it right this time. (Photo by Jeff Klemen)

Female students top males in enrollment

Composition of the student body at the University of Wisconsin continues to change, with notable gains in numbers being made by women and members of minority groups.

The undergraduate enrollment, which comprises the greatest share of UWSP's traditional students, is now made up of 3,977 women or 50.1 percent of the population. When adding graduate students, many of whom are teachers, the percentage becomes even larger.

The male-female mix was about the same a decade ago, then took a slight dip. However, 20 years ago, women accounted for only 47 percent of the undergraduate students.

UWSP's registrar's office, which releases the most current enrollment data, also reports about a 10 percent increase in the number of minority students, up 22 from one year ago for a total of 250.

Gains have been made among Native Americans, up 11 to 92; Hispanics, up 11 to 49; and Asians/Oriental, up 9 to 59. The black population of 50 is down to 9.

Females have made impressive inroads into academic programs once viewed as male fields, particularly in the number of graduates in biology this year (38 percent), business administration (35 percent), political science (31 percent), psychology (67 percent), and sociology (79 percent).

Women in the College of Natural Resources grew in numbers markedly from about 1970, when the first female graduate was recorded, until 1985, when the percentage of degree recipients reached 22 percent. By this spring, however, the percentage of women graduates in the college had declined to 13.

Registrar David Eckholm reports that another major

THE BIG PICTURE

Due to the war in the Gulf, much print has been given to keeping people up to date. This section however, will focus on what's going on outside the war (at least indirectly), here in the U.S. and elsewhere.

Five people were killed and nine others wounded after Soviet commandos attacked Russian Republic Latvian police headquarters on Jan. 19. The attack was apparently ordered by Moscow, but the Kremlin has since said that it will not impose direct rule on the republic.

Soviet tanks and troops also moved against Lithuanian independence demonstration on Jan. 12, killing 14 people and injuring 200. It left the clear indication that the Soviet government's tolerance to hos-

tile republics is wearing thin. The attack was not ordered by President Gorbachev, but after finding out about it the next day, he stated that Lithuanians brought it upon themselves.

Gorbachev's image has consequently been severely damaged due by his support for both crackdowns. More than 300,000 people in Moscow and 40,000 in Leningrad took to the streets in a demonstration demanding Gorbachev's resignation.

Special police forces in the Yugoslavian republic of Croatia are also organizing to prevent a move on the part of the Yugoslavian army against the independence-minded republic. Police spread out in the Zagreb, Croatia's capital, to discourage an army attempt to overtake the city. Those involved have said

they will fire on any army movements. Yugoslavian leaders have said there will be no military intervention.

Government officials have reported that it is unlikely a draft will be initiated. A spokesman for the Defense Department said that they do not want, intend to have, or feel the need for a draft.

The Dow Jones had seen a surge of trading since the U.S.-led coalition invasion of Iraq. Jan. 17, the day after the initial invasion, the New York Stock Exchange closed at a record 114 gain. The next day oil fell below \$20 a barrel for the first time in six months. Trading remained good for several days after, but has since declined as hopes for a quick war begin to fade.

Shaw has five principles for UW and war

As the war in the Persian Gulf continues, Kenneth A. Shaw, president of the University of Wisconsin System, called upon the University community to "acknowledge and respect" five principles vital to free expression of personal opinion and appropriate university action.

"The current war in the Persian Gulf presents significant challenges for all Americans," Shaw said.

"Those of us in the University community are inextricably affected by its events and citizen reaction to them. I believe that it is essential for the University community to acknowledge and respect five principles as we address this issue in the days ahead," he added.

The first principle was that

the University should continue to be a place where all issues can be discussed. Through the instructional process and out-of-class activities, the campuses should provide an environment where issues and ideas can be debated freely and openly.

Shaw feels that this is an essential component of our Bill of Rights. It is also necessary to preserve and protect the foundation of academic freedom which is a unique attribute of higher education.

Shaw's second principle is to maintain institutional neutrality by allowing individuals to pursue the truth and speak it as they see it.

He feels that universities must yield the freedom to take institutional positions on such issues so that their faculty, staff

and students have the freedom to express and pursue their individual beliefs.

Shaw believes that strong dissent and protest are an accepted part of the democratic process and his third principle is that such expressions should be expected and will occur on our nation's campuses.

The fourth principle set forth by Shaw encourages the university community to obey campus policies and local, state and federal laws. He feels that those that protest should want it no other way.

Shaw's last principle is that the University's commitment to its ongoing responsibilities of teaching, research and public service must continue regardless of war or other external conflicts.

War sirens demand your voice

by Ron Wirtz

Editor-in-Chief

The first blows have been struck. Like it or not, we are in a global crisis the likes of which the younger generation has never seen.

We are now experiencing a time that will dictate foreign and world policy for decades. It's a time that in twenty years we will all look back and remember exactly where we were and what we were doing that Wednesday night when U.S. air fighters went into Iraq and Kuwait.

It's also a time when people are forced to make decisions, to examine their consciences for a definition of right and wrong, good or bad.

For this generation, it may very well be the hammer that shatters the glass bottle we've lived in for so long which has allowed us to remain unaffected by world events.

Although I don't like the idea of U.S. playing world policemen, I do support our being in the Gulf. In my eyes Saddam Hussein has shown the type of attitude which foreshadows the probability of further naked aggression against other passive Gulf countries. I don't like the fact that air strikes are being taken upon Iraq and its people, but if it intercepts aggression in the future, in global terms I think it's the best thing to do. It's not the good thing to do, merely the lesser of two evils.

One thing I think is very encouraging is the fact that everyone has taken such an interest in the events that are unfolding. Everyone I talk to is updated on the situation, and more importantly, spends time to stay updated on what's going on.

I know I've never witnessed anything that had such a nationwide affect on absolutely everything. Rallies are going on

across the nation both for and against our involvement. And I'm glad to see that both sides are voicing their attitudes.

Many pro-involvement people are angered to see peace rallies going on, believing them to be

with the egotistical you-can't-do-that-to-my-friend mentality that I see in a lot of people.

However, peace does not come of its own accord. Aggression can only be stopped through failure and/or returned aggression. People who think

geographical area in the world.

If left unchecked, even considering the sanctions imposed on Iraq, it's not unreasonable to believe he could build a force rival to any. He already has the military capability, particularly in the air. He has soldiers seasoned by their war with Iran. But most importantly, he seems to have the fanatical support of the people he leads, a people who seem willing to die because he has convinced them that this mission is the will of his god.

All speculation aside, I'm interested to see how campuses nation-wide, particularly this one, react to this situation now that school is back in.

Express your ideas. Write and tell The Pointer what you think about the war, both pro and con. This is much too important a time to be a passive observer.

Peace

WHAT 20 YEARS CAN DO TO A NATION'S CONSCIENCE

Persian Gulf: little man fighting for oil

by Barry Radler

Features Editor

There is always some distinguishing current event which leaves its mark on the "real" world (as compared to the cloistered and sheltered world of academia, yea right) and has little bearing on students except as some professor's lecture fodder. There's a war going on in the Middle East which is not one of these.

The war will affect every one of us by the time the battlefields are silent and the blood is dried and brown. You may refuse to admit this, but it will, directly or indirectly, have a lasting effect on every human.

The world has already changed irreversibly since last week. It changed forever when many jets dropped many bombs on Iraq in the early morning hours of a January day. Do you deny this? What say you?

Now is not the time to belittle our own lives and thoughts in the face of a global conflict. Rather, our lives and thoughts are exactly what American troops are fighting for. Alright, maybe our soldiers aren't defending against an attack on the continental United States or preventing a madman from burning our Constitution.

Soldiers don't need a reason, only an order. The grunts in trenches and fighter pilots in the sky have been told to fight.

Period. This is the methodology of a military hierarchy.

Indeed, to some the war seems vague and distant. Some may not have friends or family in the military and the relation to the war is dim—until you go to a gas station.

The executive and legislative branches of our democracy issued an order for the military to attack. Why did our government do such a thing? Well, Saddam now occupies a lot of desert with a lot of oil under its sand.

On the assumption that you're convinced oil has nothing to do with it, ask yourself this question: "Gee, if Kuwait, Iraq, and Saudi Arabia were composed of barren, oil-less desert, would our country's

armed forces ever have appeared on the scene to resist the illegal acquisition and occupation of such a tiny, unknown country?"

Without oil, the U.N. would have given a grim and futile slap to Iraq's wrist and we would have heard little more of it but for Amnesty International's cries of human rights violations. My guess is that we would see even less of it.

I wouldn't fight anyone over decompounded fossils, no matter how many gallons, and neither would any other right-minded individual, I hope. Big oil has our country by the balls and is squeezing hard. Not even the President can tell them to

Bush fighting war of economics

Dear Editor:

Welcome to Bush's "New World Order." A world where the punishment for dissent is devastation. Diplomacy will always be tried as soon as enough forces are assembled to make a full-scale war.

And, of course, the best diplomatic techniques will be employed: no pansy, weak-at-heart, reasoned and rational negotiations, just loud voiced, table beating threats and completely inflexible positions. It is, after all, order that is sought... not peace.

Peace through force is, at the core, force. The Webster's New World Dictionary defines peace

as, "freedom from war." Perhaps my grasp of logic is terribly naive, but it seems to me that there is something inconsistent in the idea of achieving freedom from war through war.

The skills of Sophists are once again in high demand, for our rulers, excuse me...our leaders wish to spew for the rhetoric in defense of their (his) actions. What saddens me is that the average person will most likely believe the rhetoric and may have no capacity to listen beyond the words.

Iraq may be ruthless, but some of our allies (e.g. Syria) are no better. The Administration has turned its collective head in response to past Iraqi

horrors -- until of course, they went beyond mere human rights violations and into the realm of economics. D.C always rallies for the cause of the Almighty Dollar.

President Saddam Hussein is getting exactly what he wants with this intense, primarily American, military effort. We have effectively said that this upstart, petty tyrant, who has delusions of invulnerability and dreams of power is a threat to the entire world. The man isn't some kind of demigod.

The price of war is staggering. The price obviously involves the incomprehensible loss of human and non-human life. Additionally: There is the ac-

tual dollar cost of a military operation.

There will be the cost, when this is over of refurbishing the armed forces. There are many psychological wounds that shall be incurred. There is the less thought of cost of distracting us (both leaders and citizens) from domestic problems and the, dare I say it, infinitely more important environmental issues that we as a nation-state and, increasingly, as a global community, face today.

When it's too late and we win the prize, I think we'll find out that Saddam Hussein's head was not worth the prize.

Christopher Thoms

Career Services need help

I would like to comment on the "fine" service provided by the Career Services Office at UWSP. Each time it was necessary for me to have contact with this office, the people working there behaved in an incredibly rude fashion.

Service is defined as the act of serving or helping. The only service students can get from Career Services is a hassle. Don't expect courtesy unless you have a job interview and then only because that interview may increase their placement record.

The service at Career Services pales in comparison to the service students receive from the Career Placement Office at UW Eau Claire. At UWSP, the fee for the first year of the job bulletin is \$20; for UWEC students, the bulletin is provided free of charge for the first year.

Career Services charges \$10 to place your credentials on file in their office. At Eau Claire, this is a free service. Career Services will send your credentials free for the first three requests. UWEC provides unlimited free requests.

As freshman, students rarely consider the service they will receive in helping them attain a job in their chosen field. Perhaps, if more of them did, UWSP would not have an enrollment problem.

If I could make my choice again, I would certainly choose a school where the placement office stressed the service part of Career Service.

Name withheld by request

Reserves are important military cog

Dear Editor:

I am writing in response to the front page article of the Dec. 6 issue of the Pointer containing students' thoughts and opinions about Operation Desert Shield.

In this article there were several comments directed toward the Army reserve and National Guard implying that these forces should not be used and that they are not skilled enough or even part of the "actual" military. I would like to clear up these misconceptions.

The people who are being called up are not being forced against their will to participate in active military service.

When these people enlisted they signed a contract with the government and took an oath to obey the President and protect the constitution. They knew at this time that there was a possibility of being activated at some time during their enlistment.

As a whole, I believe Reservists and Guardsmen who are called up may be inconvenienced, but they are willing to do what their country asks of them with honor and pride. As a Reservist, I know I would.

As for the Reserve components not being part of the actual military, let me state that

over one half our military forces are composed of these part-time forces and they play an integral part in the scheme of military operations.

And the Reserves and Guards are not skilled, right? Allow me to enlighten people who hold this perception.

The Reserves and Guards go through the same intensive basic training and skilled training side by side with regular Army soldiers. Once this training is complete they train twelve weekends a year (at least) and over two weeks a year at an active army post. Often during these two week missions they out-perform the regular soldiers they displace at this time.

I know some groups who have been activated are not as prepared as they should be, but many of them are receiving the training they need before they

even leave the states. During weekend drills soldiers are tested on their skills and are brought up to standards.

I know this is true because as a Drill sergeant it is my job to keep myself proficient so that I can train them right.

Also, many Reservists have already served with the active military previous to their part time enlistment. I have worked with people who served in Vietnam and who saw combat in Grenada.

So, as you can see, the Reserves and Guards may not be as incompetent as some people may think. I am not advocating war, I just want people to know that we can do the job.

Besides, we might be the only difference standing between reinstatement of the draft and your desire to remain in college.

Rob Glocka

War not a worthy cause or priority

Dear Editor:

War euphoria must come to a halt. We as Americans seem not to fathom what we have collectively engaged ourselves in with the war against Iraq.

The top generals and analysts state that the war, barring a miracle, will drag on for an unspecified time beyond a month. Remember that we once thought our ever-loving supreme technology and air power would "win" the Vietnam War.

Why do you think that our Senators and Representatives agonized and were nearly split over their resolutions? Because folks, war is death, plain and simple. War is our boys and girls coming home in body bags or psychologically and or physically maimed.

War is also the death of innocent civilians in Iraq and Israel. Yes, we are "minimizing" civilian casualties in Iraq, but don't kid yourselves, innocent lives are being lost. Furthermore most large scale modern wars have required mass

civilian targeted bombings to force a surrender.

War is also costly at the tune of \$1 billion per day. Now where are we going to find the money for education, the environment and our ever increasing ranks of the poor?

Perhaps the most important question we should ask ourselves is what Senator Sam Nunn asked the Senate: "Will we have suffered unneeded casualties because we were not patient enough to wait another six months to a year for sanctions?"

An even more poignant question would ask, what do we do once we've won? Yes, let's support our troops while they are there; no let's not call this a "just" war - the churches certainly don't.

Lastly, President Bush, once we free Kuwait can I get my marching orders to free Lithuania, Latvia, Tibet, Belfast, South Africa, the students of Tinnamen Square, or the inner-city of Chicago?

Slow fishing success requires stupidity

by Steve Schmidt

Outdoors Editor

Becoming accustomed to the variance in ice fishing success rates comes with the territory when you're a Wisconsin angler. The unusual lack of action so far this winter, however, is no excuse to retire the auger and hibernate till the spring thaw permits some open water fishing opportunities.

Simply put, slow periods during the hard water fishing season are prime times to motivate the mind to concoct a variety of means for having fun on the ice. And once you've overcome the fear of impressions other's on the ice may form of you, you're prepared to engage in wholehearted stupidity.

Snow on the ice is always an added plus when searching for ways to entertain one's self between strikes. And a good packing snow or slush is excellent ammunition for several types of winter games.

Tipup assault, for instance, is one such game that will provide an hour or so of amusement. The objective, of course, is to bombard your opponents tipups in a fixed area of about 10 ft. in diameter. And just as it's important to have a few beers under the belt, it's also necessary to form tactics to prevent

assault of your own tipups.

Using Beaver Dam type tipups is strategically wiser since they are notoriously more difficult to locate and trip with a well placed throw. Traditional stick tipups are surprisingly tough to nail but easy to see. Windjammers, on the other hand, are challenging targets in gusty weather but stand defenseless on calm days.

If more than a handful of anglers are congregating in

boredom, pikeball is the game of choice. Assuming one lucky sole caught a hammerhandle northern, you're in business for a rugged game of pikeball. General football rules apply if scoring is desired. Nonetheless, smear the queer is also exciting. Just use the frozen pike as the ball.

Remember, however, that in warmer temperatures pike slime can leave a devastating display of blood and guts on expensive ski wear. And never attempt to receive a pass at head level. Frozen pike are hard, capable of leaving an impressive ding in a forehead at best or a smashed snoz at worst.

Party shanties are also an added benefit when fish refuse to bite. For the less energetic angler, the warmth of an ice shanty makes for an ideal poker playing atmosphere. But where would we be without poker

chips?

Ice fishing is a rugged sport requiring the use of any available ingenuity. Therefore bait works well to bet with. Frozen smelt are the best choice since they stay in one spot. When using waxworms or spikes, your earnings have the tendency to crawl away.

Furthermore, you can always heat up a smelt or two on a lantern mantle or propane heater to curb those annoying hunger pangs that periodically set in after a long day on the ice.

Altering fishing companions' lines is another method to produce a few laughs. Discreetly tripping off tipups is fun but short lived in terms of what remains humorous.

Fellow fishing partners will swiftly become irritated following a couple false alarms at the most distantly located tipup. However, messing with a greenhorn's equipment can amount to down right ludicrousness for the prankster.

Last ice fishing season, for example, generated talk for weeks on Long Lake in Southeastern Wisconsin. Taking advantage of a naive youngster who was fishing in a nearby shack, a buddy and I hooked a deceased muskrat on one of his tipup lines. Words cannot justly describing the appearance of an angler pulling up a waterlogged muskrat to the surface.

And we thoroughly convinced the boy that he had mastered a feat accomplished by only the most elite anglers.

Therefore, stupidity plays a vital role in upholding morale during slow periods of ice fishing. Motivating one another to participate in off-the-wall behavior produces a satisfaction comparable to landing a lunker.

UWSP awarded grant for smelt study

The Sea Grant Institute has awarded a \$52,000 grant to UWSP for a major study of rainbow smelt in Green Bay and adjacent waters of Lake Michigan.

Professors Fred Copes, Dan Coble, Douglas Post and Richard Frie will be investigators in the project that also will involve five students.

Rainbow smelt are major prey of lake trout and various kinds of salmon, and they also support large and valuable commercial sport fisheries, according to the researchers.

However, in recent years, while the commercial harvest increased, the spawning-run sport catch in tributaries and along shore in Green Bay has been severely depleted.

The collapse of in-shore sport fishery at the time of an expanding offshore commercial fishery suggests existence of different stocks, the researchers add. But the present system of smelt management is being handled as if the population were a single stock.

The study will determine magnitude, species composition, and size and age composition of the catch of rainbow smelt in the trawl and pound-net fisheries in Green Bay and in in-shore areas, including tributaries, during the spawning run in spring.

In addition, an estimate of population size, biomass and yield potential of the smelt will be made. Attempts will be made to identify the separate stocks of rainbow smelt along the west shore of Green Bay if, indeed, they exist.

Local anglers report spotty success on area waters. Catches have consisted mainly of pike, crappies and perch.

Consumers must comply with new statewide recycling law

January 1 marked the beginning of a new law requiring consumers statewide to recycle for the first time. Motor oil, worn-out vehicle batteries and old household appliances will no longer legally be thrown out in trash destined for landfills or some incinerators.

The disposal ban affecting batteries, oil and appliances is authorized by Wisconsin's new recycling law, said Department of Natural Resources Secretary C.D. "Buzz" Besadny.

"Some people have been recycling for a long time," Besadny said. "Now everyone in the state must recycle because it's required by law."

According to information compiled by DNR, Wisconsin consumers discard half a million used household appliances each

year, but most already are recycled.

Only 9 percent of the 3.5 million to 4.5 million gallons of waste oil produced by do-it-yourself auto mechanics in Wisconsin is recycled. The rest is dumped on the ground, deposited in trash bound for landfills or poured down storm sewers.

Most car and truck batteries are recycled because they contain valuable lead, but 20 percent of Americans are storing two or more old batteries that could be recycled.

The January disposal ban is the first of three bans mandated by the state's recycling law, which Gov. Tommy G. Thompson signed last April. Yard waste may not be hauled to landfills or burned in in-

cinerators that do not recover energy beginning in 1993.

And within five years, more than a dozen items must be recycled instead of buried or burned, including newspapers, cardboard and glass, plastic and steel containers.

"By 1995, recycling will be second nature for many Wisconsinites," Besadny said.

According to Paul Koziar of the department's Bureau of Solid and Hazardous Waste Management, good markets currently exist for old batteries, used appliances and used oil.

"All three items contain valuable, recoverable raw materials," Koziar said. "They can be successfully recycled if handled properly and taken to

Area backwater provides some action Respectable catches possible on Second Lake

by Buck Jennings
Contributor

"The fish are here, you just have to work for them." "On the early ice we really nailed 'em." These are two commonly voiced phrases on the Wisconsin River's second lake.

The river's backwater is located behind Roy's Showboat Saloon near the Highway 10, County Trunk E intersection west of Stevens Point.

The fish of choice is the crappie, with walleyes and northerns providing occasional tipup action. Diligence pays off with ten- inch crappies usual and

bonus fish twelve to fourteen-inch-plus, not uncommon.

The January cold snap has slowed fishing to a crawl. Crappies bite slow but steady all day long with action peaking around dusk. Northerns and walleyes have proven to be rare in constructing an accurate feeding schedule.

Crappie tackle must be light. Jig poles should be equipped with ligmy line, light bobbers and ligmy tackle. The smallest ice spoons, (larger open hooks are preferred) and small fat-head minnows hooked dorsally, are the tackle D'jour.

I've achieved some success

by using a tiny treble hook instead of an ice spoon. The treble increases the number of successful hook sets on 'ol paper-mouth.

The angler using this method may place a small fluorescent bead on the line above the treble to provide some color. Experiment with various jig patterns, tempos and minnow sizes. There are no set rules in fishing.

Follow-suit with tipup tackle. Light lines, mono leaders and medium golden shiners. Set these minnows near

Pollution control permit sought by hospital

Present incinerator becomes obsolete

St Michael's hospital has applied to the Department of Natural Resources for an air pollution control permit to install a new hospital waste incinerator.

The current incinerator at St. Michael's Hospital will not meet new state guidelines for infectious and municipal waste incinerators as of April 1, 1991. The new guidelines contain stricter regulations for controlling the emission of hazardous air pollutants into the atmosphere.

Currently, about 84 percent of the material incinerated at St. Michael's Hospital consists of general hospital waste (cardboard, paper, wood and rubbish). About 16 percent of the materials to be incinerated consist of infectious hospital waste (sharps disposable needles, etc.) plastics, linens, and paper.

The Bureau of Air Management of the DNR has reviewed the application and has preliminarily determined that the project should meet all applicable criteria for permit approval, including air emission limits and ambient air standards.

The proposed incinerator will have a secondary combustion zone with a temperature exceeding 1800 degrees F and a retention time of at least two seconds combustion zone at its temperature. This will control organic hazardous air emissions to a level that is the lowest achievable emission rate for incinerators with a capacity of less than 200 pounds per hour.

In order to assure compliance with the air emission limits, the preliminary permit contains various conditions. One condition requires compliance emission tests for particulates, carbon monoxide, hydrogen chloride, and various heavy metals. Among the other conditions is a requirement to continuously monitor and record operating temperatures and a requirement for a properly trained incinerator operator.

The preliminary determination of this project was public noticed in the Stevens Point Journal on January 4, 1991.

Drunken snowmobilers "a dying breed"?

If this year's snowmobiling season proves to be anything like last year's, state experts expect to see fewer accidents involving drunken snowmobilers. According to Department of Natural Resources Recreational Vehicle Safety Officer Gary Homuth, fatal snowmobile accidents involving legally intoxicated operators dropped by more than 50 percent last year.

"One snowmobile season probably isn't enough to say we've got a trend developing, but this is certainly an encouraging statistic," Homuth says.

Homuth points to figures from the three seasons prior to last year's -- seasons that claimed a total of 37 lives through fatal snowmobile accidents. Investigations turned up evidence indicating 68 percent of the victims had blood alcohol

levels above the .10 percent legal limit at the time of their deaths.

Last year's figures showed blood alcohol levels above .10 percent in 28 percent of those killed in Wisconsin snowmobile accidents.

The reduced role of alcohol in fatal snowmobile accidents is

a development Homuth would like to see continue.

"We're not only talking about people who are legally intoxicated. Alcohol in any amount impairs your judgement regarding speed- and your general behavior," Homuth says. "People tend to become

more reckless once they've had a drink or two. It's a factor in over half of the accidents we see each year."

Homuth says stepped-up enforcement probably helped keep drunken snowmobilers off the trails last year.

Emergency rule changes early trout season

Catch and release should improve drought stricken fish

The 1991 early trout season in eight southwestern Wisconsin counties will be catch and release only. Catch and release rules are also being proposed for the regular 1991 season for 11 northeastern counties and six of the eight southwestern counties.

The emergency rule limiting the early season, passed by the Natural Resources Board in December, is necessary to protect trout resources hard hit by years of drought, according to Larry Claggett, Department of Natural Resources trout and fish habitat specialist.

Along with allowing only catch and release fishing, the rule emergency requires that anglers use artificial lures and flies from January 1 through May 3. The counties included in the emergency rule are Columbia, Crawford, Grant, Green, Iowa, LaFayette, Richland and Sauk. All lakes and ponds in those counties are open under the new 1991 regulations.

"The zero bag limit in these counties is necessary because streams continued to show depressed populations of adult trout and poor natural reproduction in 1989 and 1990," Claggett said. "The fish populations

need the continued protection to insure adequate numbers of spawners and a diverse size structure of fish populations for future years."

Catch and release fishing using artificial lures and flies did protect the resource while allowing significant angling opportunities during the regular season in 1990, Claggett said. Hooking mortality using artificial lures is between one and 10 percent, he added, and some of those fish would die from natural mortality.

The Natural Resources Board will consider a proposal to continue the catch and release rules throughout the 1991 season (May 4 through September 30) for six of the eight southwestern counties and for 11 more northeastern counties when it meets in Madison today.

Under the proposed rules, Crawford and Green Counties will open during the regular season starting May 4, 1991. The northeast counties where trout fishing was closed in 1990 would continue with harvest restrictions of zero bag limits this year, but would allow catch and release fishing only using artificial lures.

Those counties are Forest,

Florence, Langlade, Lincoln, Marathon, Marinette, Menominee, Oconto, Oneida, Shawano and Vilas.

The southwest and northeast areas received below-normal precipitation for three years resulting in 10-year low stream flows in 1988, 1989 and early 1990.

These low flows combined with high temperatures, flash floods and reduced spring flows caused poor natural production in those years, Claggett explained. Adult trout mortality resulted in population reductions from 40 to 100 percent below normal.

"Even though flows returned to normal during the summer of 1990, the rules are still needed because groundwater is still recovering and normal trout reproduction has not occurred on these streams in three years," Claggett said. "Adult trout in a few of the better streams have increased in total weight due to elimination of the harvest."

The emergency rule passed by the Natural Resources Board takes precedence over the rules printed in the current 1991 trout regulation pamphlet. Flyers outlining the changes will be printed and will be distributed statewide.

Consumers

from page 6

the right place."

Batteries contain lead that can be processed and reused. Appliances are made of high-quality steel that can be recycled into new metal products, including new appliances. Used motor oil can be cleaned, or "re-refined," producing a motor oil with a quality as high as new motor oil.

"It's important to recycle these items, not only to save landfill or recover raw materials, but to protect the environment," said Koziar.

According to the department, used oil that isn't recycled can contaminate Wisconsin lakes, rivers, wetlands and groundwater. Used batteries sitting in homes and garages present a safety hazard.

Some old appliances manufactured before 1979 feature motors cooled with liquids that contain toxic PCBs.

(polychlorinated biphenyls). PCBs from appliances that are handled improperly can escape into the environment and pose a health risk to organisms in the food chain, including birds, mammals and humans.

Recycling batteries, oil and appliances is relatively straightforward, Koziar said.

"Some people already recycle these items," he said. "A lot more people need to start by finding out where and how these items can be recycled locally."

Used oil may be taken to public or private drop-off sites, he said. Batteries may be taken to battery retailers, who are required under the state recycling law to accept up to two batteries a day from each consumer.

Retailers may charge a small fee of several dollars for taking used batteries; others may pay rebates when the used battery market is strong. Some local governments charge fees to transport used appliances to recycling businesses.

The department has prepared a directory of businesses or

public sites which accept used oil, batteries or appliances. The agency will distribute the list next week to its offices statewide and to local governments and other outlets.

Copies are available upon request at the Recycling Unit, Bureau of Information and Education, P.O. Box 7921, Madison WI 53707, (608) 267-7375.

Balls

from page 3

stop as they laugh.

The oil industry has a willing accomplice in the weapons industry. The bomb makers have Congress in their left breast pocket where the wallet is conveniently kept. The hand holding the country's testicles and the wallet is old and rich.

War is always started by the old and rich, and is always fought by the young and poor. I'm young and poor and I don't want to fight for the old and rich. President Bush cannot convince me to fight by disguising the war's real motive behind such fecal tainted sound bites as "a threat to the American way of life," or "an act of naked aggression."

The people telling our soldiers to fight need their fix of money and power. Oil happens to fulfill both addictions. This young and poor person is not going to give them their fix. Neither should any of the young and poor if they choose not to.

Do something, students. This country exists for and because of our future.

"You plan the wars you masters of men plan the wars and point the way and we will point the gun."

Backwater

from page 7

the bottom and make sure that your tip-ups are free of obstructions and that line pays off of the spool easily. Check your sets often. There is nothing worse than pounding your tip-ups at the end of the day only to find that the minnow has been gone for who-knows-how-long.

Experiment also with location and depth of two adjacent holes, one will often provide 80 percent of the action-you got me on that one. Move around. Change your depth. The most common waters fished on second are above six feet deep.

Change the depth of your baits. Crappies are designed as

surface feeders. Their eyes favor looking up and they enjoy attacking their prey from beneath. Be aware of this, watch for a bobber that suddenly lays on its side because of slack beneath it.

I've observed captive crappies feeding and they will rarely descend to a bait. If you are working three lines, place one perhaps a foot to eighteen inches off of the bottom, one at mid-depth and one about a foot below the ice. Change your depths when fish are located.

Seems like a lot to remember. Get out and try it. It will all seem natural and logical. Work 'em, a fourteen-inch crappie will get the blood pumping and provide cheap eats.

FEATURES

This is one of many photos in the Edna Carlsten Gallery featuring the diversity of stylistic, technical and conceptual issues in contemporary photography.
(photo by Jeff Clemen)

Carlsten exhibits contemporary photography

Contemporary photographs by 60 artists from throughout the United States will be featured in an exhibition which will run from Jan. 22 through Feb. 17 at the UWSP Edna Carlsten Gallery.

The reception in the gallery of the Fine Arts Center will be from 7:30 to 9:30 p.m., Thursday, Jan. 24, including a 7:45 p.m. talk by Catherine Angel of the UWSP art faculty, who will discuss "Looking at Photographs."

She will address questions such as "What makes an interesting photo? How is photography art? How are symbols used in photography?" and "Why were particular works chosen for this exhibition?" The reception and talk are open

to the public without charge.

The juried show, which traveled to 10 galleries and museums throughout the west, is the sixth photography invitational assembled by UW-Green Bay. It includes 71 monochrome, color and applied color images by 60 artists.

The photographs were chosen from more than 1500 works submitted by 266 photographers. They range from surreal and postmodern imagery to classic documentary photography.

After leaving UWSP, the show will travel to colleges in Indiana, Michigan, Illinois, and Wyoming, plus the Bergstrom-Mahler Museum in Neenah and other community galleries in Indiana and Ohio.

Relaxation classes offered at UWSP

Classes in relaxation through movement, ceramics, clay mask-making, drawing comic strips, and life modeling in clay are among the new offerings scheduled this spring by the Conservatory for Creative Expression at the UWSP.

The center provides non-credit instruction and involvement in dance, music, theatre and visual arts for area resident

of all ages. Faculty members at UWSP and others who are specialists in the arts lead the classes in the late afternoons of weekdays and on Saturdays.

Costs range from about \$25 to \$85 per course for group instruction, plus a \$4 administrative fee.

Private lessons and ensemble opportunities, including a youth wind ensemble and youth orchestra,

also are available. Group classes, some of which begin at the end of this month, are of varying lengths. Meetings are in the Fine Arts Center or the Learning Resources Center.

For a copy of the timetable listing all of the offering for the semester or for registration information, call the conservatory office at 346-2787.

Alumni has lead in "Cats"

An alumna of UWSP will perform in supporting roles and eventually take over the lead of a major production of "Cats" mounted by Hal Prince in Hamburg, Germany.

After seeing an ad in "Backstage" for a national casting call, Susan Spencer of Greendale spent an entire day auditioning in Chicago.

She has been asked to join the cast as an understudy to the actress playing Grizzabella, the leading female cat, who sings "Memory," probably the best known song from the musical.

In the meantime, Spencer also will alternate in the roles of Jelly Lorum, whose solo is "Gus the Theatre Cat," and Demeter, who sings "Macavity." She leaves for Hamburg on Jan. 14 and her contract runs through April 1992.

This is the fourth year for the production, staged by director/producer Prince in a theatre seat in 1100 in the former West German city. It continues to play to 98 percent capacity audiences, according to Spencer.

Upon her graduation from UWSP last December with a major in musical theatre, the actress was invited to recreate her role as Bananas, the ec-

centric wife in "House of Blue Leaves," at the American College Theatre Festival in Fort Wayne, Indiana.

Following her return to Wisconsin, she was selected for the cast of "70 Girls 70," a musical staged at the Fireside Theatre in Fort Atkinson. In late August, she was asked to return to the dinner theater to portray Tzeitel, the eldest daughter, in a production of "Fiddler on the Roof." She will remain in that role until the end of the month.

While in Germany, Spencer, who doesn't speak the language, will have her own private teacher and vocal trainer. She says she hopes to be conversing fluently by the time she returns to this country. She has visited England and Spain, but this is her first trip to Germany.

Spencer says she comes from a "dramatic family," but none of them are in show business. Her parents, an insurance man and a homemaker who is a former dancer, have always stressed appreciation of the arts in their home.

She is the youngest daughter of Wayne and Joan Spencer, 8849 Glenwood Drive, Greendale, and a graduate of Greendale High School.

Alumni writes potential classic

An alumnus of UWSP, now a clinical psychologist at his alma mater, has edited a new book described by its publisher as a potential "classic."

Gregory P. Bauer, Ph.D., who returned to UWSP two years ago to work as a therapist at the Counseling Center, is the editor of "Wit and Wisdom in Dynamic Psychotherapy," a compilation of thoughtful quotes by well-known psychologists and psychiatrists. Jason Aronson of Northvale, N.J., the book's publisher, said he is enthusiastic about the book and its reception in the psychoanalytic community.

The book has been called "immensely useful, enlightening and entertaining" by a fellow psychologist. "An interesting, lively book," according to Fred Leafgren, assistant chancellor for student life at UWSP.

Leafgren has described the book as "a distillation and analysis of selected comments that gives the reader the 'ah ha' experience knowing he has just read the profound statements of noted authorities who have provided the foundation for our profession."

For example, the book contains a quote in support of psychotherapy by contemporary psychiatrist Paul Deward. He wrote: "The luxury of having someone listen to all that is said and treat it with regard, respect and interest is in itself a relatively unique phenomenon, and provides a

significant gratification to the patient which is rarely offered in other human relationships."

Many of the comments were coined with great good humor. Bauer observed as he quoted Erwin Singer, a clinical psychologist from New York: "It must be kept in mind that there are a good many people who are thoroughly convinced that to irritate is their only chance for maintaining contact with another human being."

And about the uses of humor, Bauer chose Lawrence Kubie's analysis: "Sometimes humor expresses true warmth and affection. At other times it is used to mask hostility behind a false facade of camaraderie or to blunt the sharpness of disagreement...Even in social situations humor is not always kind. And since both kinds of humor can occur simultaneously, it is not always easy to be sure which is dominant."

For Bauer, the comments contained in the book are "like old friends who assist me in sorting out my experiences in the consultation room. Over time, they have become part of how I view my world, my profession, and myself."

Bauer began his professional training in 1969 as a psychology major at UWSP, graduating with a bachelor's degree in 1973. He pursued graduate studies at Purdue University and at Oklahoma State University, where he received a Ph.D. He also served a predoctoral internship and a postdoctoral fel-

lowship at the University of Texas Health Science Center in San Antonio.

While at the University of Texas, Bauer worked with Joseph C. Kobos, director of the counseling service and professor in the department of psychiatry, whom Bauer credits with being a mentor.

The two have collaborated on several papers and onebook, "Short term Psychodynamic Intervention," published in 1987 by Aronson.

Before returning to UWSP in 1988, Bauer served seven years as assistant director of counseling and director of the psychology internship program at the State University of New York's Counseling Center.

Bauer and his wife, Kathleen, are Wisconsin natives. He grew up on a dairy farm in Iowa, which is still operated by his brothers. His parents, Mr. and Mrs. Frank Bauer Sr., of the village of Iowa, and many of his nine brothers and sisters have stayed in the area. Kathleen, whose maiden name is Blaser, is a registered nurse at St. Michael's Hospital and a native of Oconto Falls.

The psychologist is a member of two editorial boards which review articles for publication in professional journals. He has a great interest in research, publishing and reading professional literature, and he believes the editorial work helps him to improve his own writing.

Also affiliated with the Stevens Point Psychiatric Clinic, Bauer currently is working on a book about transference in psychotherapy.

Comm students win top prize

A team of communication students at UWSP has won the top prize in a regional advertising contest and third place at the national finals.

Winning the accolades are Vickie Nielsen of 816 Roy Ave., Green Bay; Kiki Meyer of 111564 N Pinehurst, Mequon; Dave Van De Kreeke of 3119 W. Seneca, Appleton; and Brett Penager of 1220 Timbercliff, Marshfield, Ohio.

The Specialty Advertising Association International of Irving, Texas, initiated the competition this year, focusing on advertising needs of one of its members, Mary Kay Cosmetics, Inc. The firm asked student teams joining the contest to put together campaigns that could be used in communicating with

preferred customers.

Professor Larry Kockeler formed three teams from his advertising strategies class, and they finished in first, second and third places in the regional competition with schools from Illinois and Wisconsin.

The top team's entry was an ad package that dealers could use to stay in touch with their customers. It included the likeness of a lottery ticket with a warning "Don't Game" on cosmetic purchases; a follow-up mailing in the form of a forget-me-not door hanger containing a package of seeds for forget-me-not flowers and the dealer's business card; and a request for referrals in the form of a card with the picture of a little boy helping a little girl at a drinking

fountain. The card's theme: "Everybody needs a little help sometimes."

The students and UWSP's Division of Communication will receive plaques in recognition of the third place national finish.

They'll also receive plaques for their top regional championship. All three of the local teams will receive a trip to Chicago to receive the awards.

Members of the second place team are Michelle Glodowski, Renee Zielinski, Kris Kasinski, and Tom Bird. The third place team is comprised of Pat Watson, Jeff Stuckey, Derrick Kepler, Dean Besiada, and Stephanie Bass.

Mendelssohn quartet plays UWSP

The Mendelssohn String Quartet, resident ensemble at Merkin Concert Hall in New York, at the Santa Fe Chamber Music Festival, and at the University of Delaware, will perform at 8 p.m., Wednesday, Jan 30 at UWSP.

Tickets for the Performing Arts Series event in Michelson Hall, Fine Arts Center, are available at the College of Fine Arts and Communication box office. Ticket prices are \$11 for the public, \$7.50 for senior citizens and \$5 for students and children.

Founded in 1979 at New York's Hebrew Arts School, the

quartet quickly won the Young Concert Artists award, an early recognition which enabled it to start touring nationally at the beginning of its quartet life.

The group has a strong interest in contemporary music and has given world premieres of works by composers Stephen Paulus, Tobias Picker, Shulamit Ran, Ned Rorem and Bruce Adolph, all commissioned by and for the quartet.

Its recordings of works by Ernst Toch on the Laurel label and a Nonesuch recording of Picker's "New Memories" will be released this year. The quar-

ter also has three recordings on the Musical Heritage Society and Musicmasters labels.

Including violinists Ida Levin and Nicholas Mann, violist Katherine Murdock, and cellist Marcy Rosen; the quartet has received funding from the National Endowment for the Arts, the New York State Council on the Arts and Chamber Music America.

The performance at UWSP is supported, in part, by funds received from the Wisconsin Arts Board.

Air strikes continuously successful

from page 1

Israel. Initial reports say 3 died of heart attacks, and 70 were injured. Two Patriot missiles apparently were unable to intercept the Scud.

Iraq sets blaze to oil refineries and an oil field in Kuwait. Opinion is divided as to the motivations of such an act. Some feel it is meant to reduce visibility, hindering coalition air strikes. However, a Kuwaiti diplomat said it may be giving cover to afford a withdrawal of Iraqi troops from Kuwait. Still others believe it was ordered to sap the wealth out of Kuwait.

U.S. strategy for initiating war

Administration officials who took part in the decision to attack Saddam Hussein on Jan. 17 say President Bush wanted to give Hussein one full day as a grace period before they would attack. This would allow Hussein to stand up to the UN deadline and show Iraqi people and the Arab world that he could defy the US and world power.

The general hope was that after Hussein had proved his point of conviction over the deadline, he might decide to withdraw. On Tuesday, 10:30 EST, Bush signed the National Security Directive document authorizing the U.S. military to attack Iraq.

Also in Bush's decision-making committee were Defense Secretary Dick Cheney, Secretary of State

James Baker, National Security Advisor Brent Scowcroft, Chairman of the Joint Chiefs of Staff Gen. Colin Powell, White House Chief of Staff John Sununu, Vice President Dan Quayle and Deputy National Security Advisor Robert M. Gates.

General military strategy

U.S. and the coalition - Coalition forces will continue air strikes in an attempt to take out Hussein's biggest weapon, the Republican Guard air command. Once this military force has been neutralized, ground troops will probably engage the remaining Iraqi force on the ground.

Coalition air strikes have also focused on knocking out military command and control centers, blocking present and future military communica-

tions, and destroying Hussein's ability to use biological, chemical and nuclear warfare. There has, however, been a recent refocus on bombing Iraqi troop, tank, and armored divisions in hopes of softening Iraq's ground capabilities.

Saddam Hussein and Iraq - Experts believe he is attacking Israel in an effort to get them into the war, thus alienating other Arab coalition countries, encouraging them to join Iraq's forces, or at least back out of the coalition. Hussein has made this into a holy war, and is ready to sacrifice the lives of thousands for victory.

Hussein's belief is that the longer he holds the U.S. off, the better his chances. Experts believe he thinks that U.S. forces don't have the will to fight over an extended period of time, and that the U.S. public will not stand for a long war.

Students leave

Fourteen students at UWSP have been called to active military duty since October, according to Associate Registrar Larry Sipiorski.

The students were members of either Army Reserve or National Guard units in scattered parts of the state that were activated because of the Persian Gulf crisis.

Sipiorski said those who have been called represent more than 10 percent of the total number of 125 reservists who began the fall semester at UWSP.

Registration/records specialists on campus maintain information about students who are in the military for purposes of certifying their eligibility to receive \$140 per-month educational stipends.

Sipiorski said the university has policies of "giving the benefit of the doubt" to student soldiers who are forced to withdraw from classes.

SPORTS

Men's basketball improving as season progresses

by Kris Kasinski
Sports Editor

The UWSP men's basketball team has turned things around for themselves after suffering a 5 game losing streak, their longest in 15 years, from Dec. 1-15. However, since Dec. 28 the Pointers have come together and have begun to prove themselves with an impressive 6-1 record. They are now 10-7 overall and 3-4 in WSUC play.

The Pointers are coming off a weekend sweep of Superior and Stout and will have the week to prepare for their next game which is on Saturday in LaCrosse.

UWSP 90 CARDINAL STRICH 77

The Pointers began their turn around on Dec. 28 when they ousted Cardinal Strich 90-77 in the annual SENTRY Classic. The Pointers trailed just once during the game at 14-12 with 12:58 left in the first half, before putting together an 18-6 run over the next seven minutes to take a 30-20 lead with 5:04 left in the half.

The Crusaders got the lead

under double figures just once more during the game when they pulled to within nine at 69-60 with 6:05 left before the Pointers opened it back up with a 10-2 run in the next two minutes.

Mike "Boomer" Harrison, who has played a major role in the Pointers success of late, led the way with 22 points. Jon Julius and Vince Nichols added 18 points each. Jack Lotman grabbed down 8 rebounds.

UWSP 93 MARIAN COLLEGE 89

In this 93-89 overtime victory, four Pointers led the way for their second straight win. Jon Julius, Scott Frye, Vince Nichols and Mike Harrison were all instrumental in the victory. Julius scored 19 of his 21 points in the second half and in overtime.

Nichols was 10-11 from the free throw line in the second half and over time, including 5-5 in the extra period and seven points. Harrison hit 4-5 three pointers in the second half and overtime and also had a game high 24 points.

Frye had career high with 10 points and 10 rebounds with all of his scoring in the second half.

A major plus for the Pointers also came on the night. After missing just two games with a knee injury suffered in an on-court collision with Billy Fraaza, senior Co-Captain Chas Pronschinske returned to the Pointer lineup.

In 18 minutes of playing time, Pronschinske contributed two points and four assists before fouling out with 7:51 left in regulation.

UWSP 91 UW-OSHKOSH 67

On January 9 the Pointers traveled to Oshkosh looking to keep the winning streak alive and they did just that defeating a tough Titan team 91-67.

Mike Harrison and Jon Julius emerged as leaders once again for the Pointers, scoring 21 points apiece. They each scored 13 in the second half to lead the way in a 50 point half. Julius also was game high rebounder, pulling down 13. Harrison tied a Pointer record against the Titans when he converted 13-13 free throws in the game to equal Cal Kuphall's 1972 record.

The Pointers size advantage over most of their opponents finally paid off as well, with

Hockey remains in third in NCHA

by Kris Kasinski
Sports Editor

The Pointer Hockey team compiled a 5-3 record since December 21 and now hold a 14-6 overall record. They currently stand in third place in the NCHA behind first place Mankato State and second place Bemidji State. The Pointers are

tied for first in the WSUC with UW-Superior. Both teams hold a 6-3 record in Wisconsin State University Conference play.

This weekend the Pointers will travel to Superior to take on the Yellowjackets in a key NCHA/WSUC matchup. The Pointers will play their last regular season home game on February 1 against UW Eau Claire. On February 2 they will

take on the Blugolds in Eau Claire.

In the remaining regular season, every game will be crucial to the Pointers in their bid to reach post season play.

Bemidji State 3 UWSP 2 Bemidji State 4 UWSP 3

The Pointers started the second part of the season by

Women's Basketball at 9-4 overall

The lady Pointer Basketball team currently stands in second place in the WWIAC with a 9-4 overall record and a 5-2 record in conference.

Since Dec. 8 the Pointers have been impressive, holding a 6-2 record. They moved into first place after knocking off previously unbeaten UW-Oshkosh and UW-Whitewater. They are coming off a loss to UW-Stout on Saturday night and will have the week off before returning to play on Saturday to face UW-LaCrosse.

UWSP 75 UW-EauClaire 68

On Saturday, Dec. 8 the Pointers defeated the Blugolds 75-68 in Eau-Claire. The Pointers were led by Junior Tricia Fekete with 21 points and 14 rebounds. Julie Schindler had 19 points. The Pointers shot 57.5 percent from the field.

Michigan Tech 75 UWSP 57

On Wednesday, December 12, the Pointers traveled to Houghton, MI to take on Michigan Tech and suffered a 75-57 loss. The Pointers were led by freshman Kacia Klapp

UWSP 66 UW-Platteville 64

On Saturday December 15, the Pointers traveled to Platteville to take on the Pioneers and came away with a 66-64 victory. UWSP never trailed while building their lead, which they held until a lapse in the final six minutes of the game. Amy Felauer hit a pair of free throws inside the last minute that shut the door. Senior Kate Peterson led the Pointers with 20 points, including six three-pointers while Felauer added 13 and Tricia Fekete added 12 points and 14 rebounds.

UWSP 58 UW-Oshkosh 33

The Lady Pointers came away with a dominating 58-33 victory over the previously unbeaten Titans in Berg Gym for High School Night. Senior Kate Peterson led the Pointers with 17 points and Tricia Fekete was high rebounder with 8.

UWSP 77 UW-Whitewater 75

Amy Felauer hit a game-tying three pointer with six seconds left and then sank

Hockey

from page 14

traveling to Bemidji hoping for nothing less than a sweep, but despite their hard effort and tough play, they were swept by the Beavers.

Pat Moran scored the first UWSP goal, assisted by Bill Honbach and Mike Toth at the 5:13 mark followed by Scott Krueger's goal assisted by Mike Green and Todd Chin at 14:26. But three goals in eight minutes of the second period by Bemidji State gave the Beavers the 3-2 win. Chin made 14 saves in the Pointer's losing effort.

Saturday, the Pointers again scored first on a Jeff Marshall goal assisted by Caulfield, but the Beavers tied it at one-all four minutes later. UWSP grabbed a 2-1 second period lead on a goal by Stahley, assisted by Horbach to take the lead into the final period.

Bemidji tied it up four minutes later and then won it with just 1:52 left for the final 4-3 score. Kevin Marion stopped 38 shots for the Pointers.

UWSP 13 St. Scholastica 1

UWSP 5 St. Scholastica 1

UWSP rebounded quickly after dropping a two game series at Bemidji, by putting on an offensive show in the two game sweep over the Saints.

They also tied the record for most shorthanded goals by getting a pair, one each from Mike Stahley and Todd Tretter. Al Bouschor had a hat trick to lead the Pointers, followed by Stah-

ley with two goals and three assists and Scott Krueger and Paul Caulfield with two goals and two assists each.

Tretter, Mick Kempfner, Jeff Marshall and Pat Moran also added goals for UWSP. Kevin Marion made 10 saves for the Pointers.

Saturday the Pointers were a little less impressive but came up with the same results, as they defeated the Saints 5-1. Tretter scored just 33 seconds into the game to get things going, and Caulfield followed with his third goal of the series to grab a 2-0 first period lead.

Freshman John Wigen scored his first goal as a Pointer early in the second period before the Saints got their only goal of the contest at the 2:40 mark for the 3-1 score. Stahley and Grant McDonald finished up with one goal each in the third period for the 5-1 score. Kevin Marion recorded his second victory in the weekend, stopping 13 shots.

UWSP 6 UW River Falls 3
UWSP 4 UW River Falls 3
The Pointers extended their winning streak to four games and completed their second sweep in as many weekends by defeating the Falcons 6-3 and 4-3.

In Friday's victory, Todd Tretter once again got things going for the Pointers by scoring at the 35 second mark of the first period to give the Pointers the early lead. He was assisted by Mike Toth and Paul Caulfield.

Less than one minute later, Scott Krueger put the Pointers ahead 2-0 on a power play goal and assists from Dan Bailey and

Caulfield. River Falls responded with a goal of their own at the 6:22 mark to bring the margin to 2-1.

However, the Pointers came back with yet another first period goal by Pat Moran at the 12:32 mark to bring the score to 3-1 after the period. He was assisted by Jared Redders.

The second period started much like the first period, in that Tretter started the scoring, this time at 3:24 into the period. He was assisted by Redders. The Pointers increased their lead to 5-1 when Redders scored his first goal of the season with an assist from Mick Kempfner.

In the third period, the Falcons came back with one more goal, their last goal of the evening at 6:37 into the period. Hale once again responded with his second goal of the evening at the 10:24 mark to bring the score to where it would stay at 6-3. Hale was assisted by Monte Conrad and Tretter.

Kevin Marion recorded his seventh victory of the season stopping 18 shots in the Pointer nets.

Saturday's game was a little harder for the Pointers, along with a little more exciting and a lot rougher.

The first period started with the Falcons scoring a short handed goal at 5:51. The Pointers failed to get on the scoreboard in the period.

The second period proved to be much more exciting, as Jeff Marshall started the scoring at the 8:10 mark. He was assisted by Mike Stahley and Scott Krueger.

River Falls then answered with two goals in less than two minutes to put themselves ahead 3-1 with nine minutes to go in the period. Hale then scored his third goal of the series to bring the Pointers to within one. He was assisted by Conrad and Bill Horbach.

Time expired after the second period, but the players failed to go straight to their locker rooms. With both teams having a few words to say, a pushing and shoving match broke out. It looked as if it were to end there, with players beginning to skate away, when just seconds later, both teams came out in full force.

The fighting between the two teams evolved into more than just words and became more physical as the confrontation heated up. Fighting broke out between a number of players.

This continued as players scrambled into the stands and near the Falcon locker room.

After it was finally broken up, players on both teams received game disqualifications, including four Pointers.

The third period finally did begin, and the Pointers knew they had their work cut out for them. Paul Caulfield, however, answered the challenge and scored twice in the period to give the Pointers the 4-3 victory. He was assisted twice by Krueger and by Marshall.

Todd Chin recorded his seventh victory of the season, stopping 25 shots in the Pointer net.

The Pointers will travel to UW-Superior this weekend to take on the Yellowjackets. The game will be covered on campus radio station WWSP 90 FM. Pregame begins at 6:45 p.m.

Wrestlers continue hotstreak

The UWSP wrestling team completed a busy, and successful Christmas break but it was two post-Christmas meets that Pointer Head Coach Marty Loy wanted to talk about.

"We wrestled very well against UW-Oshkosh and UW-LaCrosse, especially in the third period," said Loy, whose squad ran its WSUC mark to 3-0 with the two wins.

UWSP toppled UW-Oshkosh 30-14 last Wednesday; with Brian Dobrinski scoring a pin at 126 and Bob Koehler (118), Dennis Schmidt (142),

Chris Kittmann (158) and Dave Carlson (167) scoring major decisions to pace the way. Carl Shefchik (150) and Colin Green (177) also posted wins while Travis Ebner wrestled to a draw at 190.

Against LaCrosse in the Pointers' 90-91 opener, UWSP captured four of the first five matches on the way to a 28-11 win. Schmit pinned his opponent at 142 while Joe Ramsey (118). Loy or the team had no grand illusions going into its Saturday match with Purdue University of the Big Ten.

"We didn't get intimidated or back down at all," said Loy. "We wrestled with a lot of heart. All three of our winners wrestled very good matches and Chris Kittmann wrestled very well against an All-American at 158. We'll learn a lot from watching this video."

Dobrinski recorded the first Pointer points at 126 with a 10-4 win but three major decisions in the first four matches by Purdue was enough as they coasted to the win.

continued on page 17

Lady Pointers

from page 14

two free throws with one second left to rally back from a 41-32 halftime deficit. Tricia Fekete scored 27 points to lead UWSP while Felauer added 20 and Kate Peterson 15.

UWSP 75 St. Norbert 60
The Pointers used a 12-3 run midway through the first half to get some breathing room and then coasted to a 75-60 win over St. Norbert College in Berg Gym on January 15. Julie Schindler led the Pointers with 17 points, six assists and 7 rebounds while Fekete scored 14 points and Yonker and Felauer nine each.

UWSP 87 UW-Superior 43
Julie Schindler once again led the way during last Friday's 87-43 route of Superior with her first career triple double, scor-

ing 10 points, grabbing 11 rebounds and dishing out 10 assists all in just 20 minutes of action. She also recorded five steals on the night. Kacia Klopp added her season high 14 points. **UW-Stout 79 UWSP 74**

UWSP saw their five game winning streak come to an end as they fell 79-74 to Stout on Saturday.

Kate Peterson had 18 points, including six three pointers to lead UWSP while Felauer and Julie Schindler scored 15 apiece and Fekete had 10.

Freshman Julie Schindler was awarded WWIAC Player of the Week for the week ending January 19. The Chippewa Falls native helped the pointers to their 2-1 week. In those three games, she scored 42 points, grabbed 24 rebounds, dished out 24 assists and made 8 steals.

The Pointers next game is Saturday when they host UW-LaCrosse at 3:00 in Berg Gym.

Men and Women's track begin indoor competition

MENS

The UWSP Men's Track Team opened their 1991 indoor season at the University of Minnesota's "Northwest Open" Saturday in Minneapolis.

"This was an excellent meet with a lot of schools we don't normally see during the year," said Head Coach Rick Witt. "We only took a handful of guys with us but they did a nice job."

Leading the way for the Pointers was Dean Bryan, who qualified for Nationals and set a

school record in the process in the 400m, winning the event in 49.48. Doug Engel grabbed third place in the 800m, coming in at 2:00.6, while Scott Hellmich and Matt Hamilton both recorded fifth place finishes. Hellmich in the 55m (:06.55) and Hamilton in the 300m (8:56.88).

Others placing in the top eight were Tony Biolo, sixth in the 200m (:23.32); Mike Cummings, seventh in the pole vault

(14'1"); and Todd Skarban, eighth in the 55m high hurdles (:08.00).

WOMENS

The UWSP Women's Track Team officially opened their 1991 indoor season on Saturday at the University of Minnesota's "Northwest Open" in Minneapolis. Four Pointers finished in the top six in the non-scoring meet.

Beth Mears led the way with a 43'1/2 effort in the shot put, good enough for third place in the invitational part of the meet. The toss also qualifies her for the NCAA Division Indoor and Outdoor Nationals.

Pam Getzliff was second in the triple jump (35'1 1/4) and sixth in the 55m hurdles in her first collegiate meet. Sarah Salaj also recorded a second place finish, running the developmental meet 200m in :28.1. The other top six finisher

for UWSP was Suzy Jandrin, fifth in the 300m (11:00.00).

Others not placing but competing well in the early season are Marnie Sullivan in the 1500 (15:08), Lisa Wnuk in the 55m hurdles (:09.2) and Tami Langton in the 800m.

The Pointers are back in action this Saturday when they host first Alumni/Intrasquad Meet in the new Health Enhancement Center indoor track. The meet begins at 11:00a.m.

Basketball

from page 14

UWSP pulling down a season-high 57 rebounds, the fifth highest single game total in Pointer history. They also blocked 11 shots, with four each by Julius and Lothian.

UW-WHITEWATER 104 UWSP 98

On January 12 the Pointers returned to Quandt Gym to begin a four game home stand. They took the Warhawks into overtime but fell short in the extra period to see their winning streak end at three games.

Vince Nichols led the Pointers scoring with 28 points and Jack Lothian grabbed down 10 rebounds. The Pointers out-shot the Warhawks from the field, 53.4 percent to 52.1 percent.

UWSP 89 MICHIGAN TECH 76

UWSP won for the third time in four games and completed a hectic four games in seven days schedule with an 89-76 win over Division II Michigan Tech on January 14. The Pointers took a 7-6 lead on Mike Harrison's layup with 14:47 left in the first half and never lost their advantage.

Vince Nichols led the Pointers with 18 points followed by Harrison with 17, Jon Julius 16 and Pronschinski and Justin Freier 10 each. With this Michigan Tech game, UWSP has completed its non-conference schedule for the 1990-91 season with a 7-3 record.

UWSP 87 UW-SUPERIOR 64

The Pointers opened up their weekend series at Quandt Fieldhouse with a dominating

87-64 victory over the Yellow-Jackets at Superior. All twelve Pointers scored against UW-Superior, including Jeff Bartol's first points of the season. Vince Nichols led the Pointer scoring with 23 points and Justin Freier had 7 rebounds. The Pointers shot 56.1 percent from the field and UW-Superior shot 44.6 percent.

UWSP 90 UW-STOUT 66

Mike Harrison scored 28 points, including a record-tying six three-pointers and Vince Nichols added 16 as the Pointers routed the UW-Stout Blue Devils 90-66 on Saturday in Quandt Fieldhouse. This win was their sixth in seven outings since their first game losing streak.

This game belonged to the Pointers from the start. UWSP broke to a 20-8 lead after the first nine minutes and led by 10 at half at 42-32. The Pointers put together an 18-8 run in the first seven minutes of the second half to take a 60-40 lead with 13:33 left in the game. UWSP went on a 16-4 blitz which led to a 80-50 advantage with 6:25 remaining.

Although guard Nichols was the only other Pointer besides Harrison to reach double figures (16 points), nine other Pointers scored on the night.

Head Coach Bob Parker credited several outstanding performances by his players. "Boomer was just fire," he said. "Lothian and Freier are really giving us a lift and Mike Dahlquist had a nice weekend."

The Pointers next game will be on Saturday when they travel to LaCrosse to take on the Eagles before they travel to Platteville on Wednesday to take on a tough Pioneer team.

Opinions

from page 1

"They're not concerned with the global consequences of Saddam Hussein's power," replied Wonders.

Students also voiced concerns over Iraq's treatment of allied prisoners of war and Saddam Hussein's disregard for the Geneva Convention.

Senior and biology major Valerie Borth said, "It's frightening. Saddam Hussein has no concern for our POWs. He's another Hitler."

There is a common concern over the eventual use of ground forces in the gulf. Although the air strikes have been largely successful according to U.S. reports, UWSP students agree that they alone will not force Saddam Hussein out of Kuwait. Students also agree that the activation of ground forces will result in a horrendous loss of life.

The ecological affects of this crisis in the Middle East may be vast, warn many students.

Senior and biology major Brian Clancey commented, "If all the oil wells are destroyed as Saddam Hussein threatens, the pollutants dispersed into the air will be tremendous. There will also be a lot of ecological problems if oil is spilled into the gulf."

As the United States enters its second week of war in the gulf, UWSP students are responding with mounting concern to the many questions resulting from the crisis. No, apathy doesn't reign here at UWSP.

Big Picture

from page 2

Raytheon, maker of the Patriot missile, has seen its stock soar in the past week due to the success the missile has seen in battle. The missile was almost scrapped several years ago, but was saved by the lobby efforts of an Indiana senator named Dan Quayle.

Both Germany and Japan have agreed to pay a larger portion of the Gulf war's costs. How much and how soon has not yet been determined.

A four cent increase in first-class mail rates was passed Tuesday by the Postal Service Board of Governors. A five cent increase was previously rejected. The increase would follow the three-year cycle that postal rates have dictated over recent years, and will go into effect on Feb. 3.

Wisconsin legislators will be reviewing a proposal to limit the type and expense of lottery advertising. Currently, promotional advertising (enticing

people to play the lottery) is prohibited under state law. Many legislators believe the Lottery Board has already crossed that advertising line, while board members insist that the advertising is informational.

The Food and Drug Administration announced it will continue to allow the sale of bovine growth hormone (BGH) milk, feeling that it poses no risk to human health. FDA officials pointed to anti-BGH reports that were filled with inaccuracies

and misstatements.

A Fort Lauderdale jury took all of thirteen minutes on Thursday, Jan. 17 to acquit rock group Too Much Joy for performing 2 Live Crew songs in the nightclub where 2 Live Crew members were arrested for obscenity.

Many jurors were critical of the prosecution for bringing the case to court, and mentioned that the verdict would have come quicker, but several jurors had to go to the bathroom first.
