Women unite for their rights

by Sarah Sell
Contributor

About 200 students rallied in the sundial on Wednesday, April 14, for the second annual "Take Back the Night."

The rally was a good way to raise the awareness of students on the subject of rape—especially date rape," said Bridget Busster, president of Women in Communications (WIC). WIC was one of the sponsors of the rally.

Governor Thompson then introduced Alexander, pointing out to the federal secretary that, "In the past couple of years, Wisconsin has led the nation in graduating seniors. The people of this state are dedicated to excellence in education." Alexander followed up on this theme in his speech, commenting, "What impresses me is that Gov. Thompson is willing to innovate to get better, to realize the world is changing. When you innovate, you don't always succeed, but you usually stay ahead. It brings a lot of credibility to this state.

Alexander went on to discuss President Bush's education strategy. "The President's job is to see the most urgent needs, then develop a strategy to meet those needs," Bush's education plan, called America 2000, "is a strategy to help move America toward the national education goals by the end of the decade."

Although the federal government only spends about 6 percent of all money spent on education in the U.S., Alexander explained that, "Our (the federal government's) proposal is not primarily based on more spending, it's based on changes" to improve the educational process.

This strategy is outlined in a four-phase plan:

- Improving schools by implementing national testing and by allowing parents to choose the school that their child will attend.
- A new generation of schools which will take a "different" approach to education from traditional ways.
- Increased programs for literacy, job skills and other forms of adult education.
- Coordinating local, state and federal services that influence a child's education outside the classroom, such as day care for parents and finding employment for unemployed parents.

Alexander stressed the need to "change the way we think about education. We need to examine the institutions we use to deliver our educational services to students."

"What the president is attempting to do is lift America's attention to our own educational needs, to help us take education more seriously with regards to better, more accountable schools, a wider diversity of schools, and focus action on all things outside the school," concluded Alexander.

Students carried signs and shouted chants such as "matter what I wear or where I go, yes means yes and no means no!" Another chant was "1-2-3-4, we won't take it anymore. 5-6-7-8, no more date rape."

Marchers wore yellow armbands to symbolize unity for the cause. Some also wore yellow "Take Back the Night" t-shirts.

After the rally and march, a dance featuring Osia and the Aligators was held in the University Center.

Alexander praises Wisconsin

by Ron Wirtz
Editor-in-Chief

U.S. Secretary of Education Lamar Alexander was at UWSP Monday as the keynote speaker for the Melvin Laird 13th annual Youth Leadership Day. Former Secretary of Defense Melvin Laird hosted the day's activities, and Governor Tommy Thompson, former Governor Lee Dewey, former Senator Gaylord Nelson, and other well known public figures were present from the fields of government, education, business and religion.

During recent routine maintenance, it was discovered that the roof of Smith Hall had risen approximately four inches. At the outset, a separation between the cinder block wall and the ceiling was attributed to excessive stress from pressure lofts.

"Pressurized lofts have a 4x4 running across the ceiling and nuts and bolts are tightened to put pressure on the floor and ceiling to support the loft," said Mark Olkowski, president of the Residence Hall Association (RHA).

During recent routine maintenance, it was discovered that the roof of Smith Hall had risen approximately four inches. At the outset, a separation between the cinder block wall and the ceiling was attributed to excessive stress from pressure lofts.

"That is very unlikely," said Director of Residence Life Randy Alexander. "The pressurized lofts are not causing structural damage to the building, but they are causing cosmetic damage such as scarring up the ceilings and the floors."

"But our primary motivation for doing away with the pressurized lofts is the danger of damaged floor tiles," said Alexander. "The tile is asbestos and they are perfectly safe as long as they're not damaged. When a tile gets crushed it becomes powdery and that is when it can be dangerous."

"A large majority of lofts used on campus are pressure lofts," said Olkowski. RHA is now sponsoring a loft contest with $599 awards for the four best designs. "It will be judged on whether it causes any damage, and whether or not it's safe," said Alexander. The designs must be turned in to RHA by Friday.

Beginning in the fall, students will have a choice between the four approved designs for their lofts. The lofts must also be constructed with un-taxed lumber such as pine, cedar and redwood. "Treated lumber inside a building is prohibited by fire code," and it also gives off toxic fumes when used in a confined area said Alexander.

UWSP Maintenance may construct prefabricated kits for students to purchase and assemble.

Chancellor Keith Sanders, Mayor Scott Schultz, and Judy Goldsmith, director of Affirmative Action, spoke at the event. Other speakers' topics included true stories, statistics and information on women's rights.

Students were encouraged to speak out about their own personal experiences of sexual assault. "No female or male should be afraid to walk alone," said one student.

A "Take Back the Night" march proceeded up Division Street to Maria Drive.

Campus ranked first

The U.S. Environmental Protection Agency named UWSP as number one among the nation's schools of higher learning.

Chancellor Keith Sanders said the recognition is appropriate in view of UWSP's longstanding role as a leader in the field of environmental education.

"This is yet another instance in which the university practices what it teaches," Sanders said.

Jerry Burling, director of purchasing and risk management, and Sherry Wilcox, assistant manager for physical plant operations, have been invited to Washington D.C., to receive the EPA's first Annual Administrator's Award from William K. Reilly, Burling and Simonis co-chair the campus recycling effort, and "with their associates, they bring this recognition to our university," the chancellor said.

EPA established nine categories for recognition, focusing its first round of recognition on innovative waste recycling programs.

UWSP was the winner in the colleges and universities category with a comprehensive recycling, reuse and reduction (3R) program for the total student body and university personnel. The local program was started in late 1989, and in its first full year of operation, resulted in savings of nearly $19,000 plus revenues of $4,200.

The most notable component of the project, in the estimation of the EPA, was the use of pellets from the papermaking industry as fuel in the coal-fired continued on page 18
Spring break results reveal need for more protection

Although students’ concern about catching AIDS or other sexually transmitted diseases (STDs) continues to rise, the number of students actively protecting themselves against STDs has dropped, according to the fifth annual Trojan brand Spring Break Survey.

In a poll of nearly 1,000 college students in Daytona Beach, 88 percent acknowledged being either “very concerned” or “somewhat concerned” about contracting a STD, compared to 86 percent last year.

However, the number of students using condoms for STD protection dropped to 62 percent compared to 68 percent in 1990. This percentage had risen steadily from 50 percent in 1987 when the survey was first conducted.

The number of students claiming to be “extra selective regarding a sexual partner” also decreased from 26 percent from 29 percent in 1987 and 31 percent in 1989.

This year’s survey indicates students may be becoming less in their efforts to protect themselves against STDs, said Mark Klein, vice-president of Trojan Products.

“This would be cause for considerable concern, given the still prevalent risks associated with AIDS and other harmful sexually transmitted diseases,” said Klein.

More than one-fifth of people in the U.S. with AIDS are between the ages of 20 and 30, as reported by the Centers for Disease Control.

Because of this, the Centers for Disease Control recently revised the need for the HIV infection and STDs survey.

Students were requested to take a different kind of survey so we took the opportunity to provide something else,” said Kathy Reck, housing coordinator.

“This will have no resident assistants, assistant hall director or hall director. South Hall will appoint a student as the building manager. The position will also be required to purchase a meal plan.

Students living in South Hall will have the best of both worlds, in both cost and living environment,” said Reck.

Students interested in South Hall should contact the Housing Office at 7512 for further information.

Chinese diplomat visits

by Ron Wirtz

Minister Zhao Xixin of the People’s Republic of China, and his wife, Madam Li Peiqiong, spent three days this past week visiting the UWSP campus and Wisconsin’s surrounding communities and industries.

Xixin is the deputy ambassador to the U.S. from the People’s Republic, and is the second highest ranking diplomat in this country from mainland China.

The minister and his wife were invited to UWSP by Assistant Chancellor Fred LeFleuran following several study tours of China by UWSP students groups and a visit here several years ago by a Chinese professor.

Xixin’s main purpose during this trip was to initiate talks of an exchange program between businesses and institutions of higher learning. UWSP has reciprocating interests due to the fact that it has only one person in its entire student body from China.

On Tuesday night, Xixin met with five student leaders at an informal dinner to discuss American student’s beliefs on worldly issues. Discussion ranged from attitudes on the Gulf War and President Bush to freedom of speech on campuses.

When asked about his favorite part of his visit, Xixin answered, “Door County. It is very beautiful.” He and his wife also toured Consolidated Papers, the state capital, and a potato farm. White on campus, Xixin gave a presentation to the chancellor and his cabinet on “How to initiate academic and economic exchanges with China,” and also went to two classes at UWSP during his stay.

“Don’t make any erratic movements, Miss Halloway... not only is the truculent nature of this species amply documented, but, as you can discern for yourself, the little suckers can really jump.”
The widening gap in today's perspectives

by Boogie Stu

Just Boogie

The world is a callous place. Murder rates are increasing everywhere. Corruption is rampant. Racial and ethnic prejudices abound, and in general the human race is pretty darn stupid.

After a while, a person can start to believe in the Hobbesian theory that selfishness is the core of every human spirit. Every act a human undertakes has as its root a selfish motivation.

People have lost their sense of perspective. A friend put it in better terms for me.

"The word is empathy. People no longer know how to feel for other people."

Empathy, Not sympathy. Fify implies a sense of superiority, an immediate comprehension of 'I'm-sorry-but-I'm-glad-I'm-not-in-your-shoes syndrome. Maybe being in those shows gives you a genuine path to comprehension of inner-self realization. Maybe through the understanding of other perspectives, of a feel for other people's beliefs and hardships we can begin to understand the true nature of our own character.

In order to truly understand things outside the personal realm of experience and knowledge, one must be able to transcend personal beliefs and values, and recognize prejudices to see how they influence personal behavior and attitudes toward other people and things.

The world is at no time black and white. One of the biggest perpetrators of this is our understanding of history. People read things in a book and believe this is how things concretely happened, end of story. What people fail to recognize are the underlying factors, the prejudices, the biases, which everyone of us nurtures, including those people who record world events throughout the archives of time.

People are not bad for having biases. Biases are natural. They produce in us a personal guideline for right and wrong, good and bad.

The destructive part of biases is they often do not allow a person to see beyond these biases, beyond their concrete lines of right and wrong, familiar and alien. They facilitate a holier-than-thou right or wrong to every situation, instead of allowing investigation and inquiry to perspectives and ideals that are different, or non-status quo. What this translates into are attitudes that are narrow-minded and self-centered atitudes that cannot escape their own gravity.

Pretty pessimistic I agree, and as a journalist, I am sometimes its worst offender. Just the facts ma'am.

Lack of empathy runs through every situation imaginable, from right here on campus to the Gulf War. How can people begin to truly open up their minds to alternative thoughts? This is a question that has plagued humankind since its existence, and it certainly wasn't answered by some editorial in an obscure college newspaper.

To feel sorry is to feel sympathy. To feel compassion, understanding, and appreciating for another is to feel empathy. A hard concept to grasp, but a lot more rewarding than being locked in your own mind.

Cartoon by Daren Passot
Fourth Ave becoming dangerous

Dear Editor:

I would like to express my concern about the past end of Fourth Avenue. My chief concern is the lack of a curb, gutter, and sidewalk.

My observation reveals that there is a great deal of pedestrian traffic along with motor vehicle traffic, all using the road bed at the same time. This creates a dangerous situation. When there is too much trash or snow, there is not a dry area to walk through. There is such little roadway that there is only room for one-way traffic and this must be shared with University students walking to or from class.

The upgrading of Fourth Ave should take top priority for safety reasons.

This short stretch of approximately two blocks has more traffic than any other area in the city. Also, there is the dangerous problem of Partner's Pub using the back drive of Fourth Avenue, at all hours of the night. The street is being used as a drag strip.

The reason for the additional traffic is that there are several new multiple housing units, making this a highly populated area.

The upgrading of Fourth Avenue should take top priority for safety reasons. Therefore, I am asking the Planning Committee to consider this area for improvement.

Nancy Basch
Second Ward Alderman

A few words on tobacco policies and habits

Dear Editor:

I want to comment on a letter printed two weeks ago written by Mike Schumacher on smoking in the LaFollette lounge. Mr. Schumacher thinks the proportion designated to smokers in unfair given the number of smokers compared to non-smokers using the lounge to study and relax.

Only 10 to 15 percent of UWSP students smoke. So, proportionally, 25 percent of the LaFollette for smokers is more than fair.

I agree that ideally an enclosed, well ventilated area could be set aside for smokers on campus, but smokers should enjoy the space they have for now. My guess is a year from now they will be out in the cold. I would like also to give thanks to the tobacco chewers on campus who leave their wads of spit snuff in the drinking fountain.

Thank you for a great source of amusement. It is particularly entertaining to see how long it takes to wash all the grannies down the drain. But please have the courtesy of leaving the spent tobacco in one large wad because it offers more of a challenge.

A special thanks should go to Skool and other mint tobacco users. The aroma coming from one of these wads is very enjoyable when getting a drink of water.

Thanks again boys, for making our campus a pleasant atmosphere for everyone.

Scott Thoma

Discrimination...who is to blame?

Dear Editor:

"I am a student from Japan, and I am discriminated against. American students yelled at me on the street because I am a foreign student and they are prejudiced. An American student called me a 'Chinese nerd.'" Discrimination against foreign students has been a big issue on this campus these days. Almost every week, we see letters and articles in the Pointer complaining about how badly foreign students are treated by American students.

Since foreign students got their point, maybe we need to listen closely to their messages. American students are prejudiced because they yell at foreign students on the street. American students isolate foreign students in class. American students would rather talk to their fellow American students because they are racially prejudiced.

Right. Foreign students are always the victims of racial discrimination by American students, and they have nobody to blame.

Foreign students never speak languages that American people do not understand so they can isolate themselves. American students never yell at other American students on the street. And foreign students never develop a clinic among their own races.

American students never call their fellow student "American nerd." When they do, they don't put the adjective "American" just so it won't become a racially discriminatory remark.

So, here they come. Foreign students took a stand and said no one should call them names. All American students must smile and say "hi" to them, because they are from foreign countries. Because they are minority, they are special. They are different. They are special.

Some students just happened to come from 1,000 miles away from UWSP, while many were born closer. But you still have to pay special attention and care to some people because they are called "foreign students."

Paul Kei Matsuda

Say no to President Bush's energy plan

Dear Editor:

President Bush's budget proposal is absolutely hideous. In this proposal is a segment that should distress anybody concerned with the future of the Planet Earth.

Surely, Treasures great and small will suffer from the ramifications of Bush's proposal if it goes through. His idea: to open up exploration for gas and oil in the coastal plain area of the Arctic National Wildlife Refuge.

This 1.5 million acre haven for wildlife is extremely susceptible to development by man and industry. Ignorant to the Department of the Interior's 1987 report that the diverse biology will suffer from exploitation, and only a 1 in 5 chance exists of finding a 200-day supply, Bush and his followers seek to promote a global warming!

Where did global warming pop in the picture? This growing accident or our intelligence is the result of our inability to begin using alternative energy sources. The highly potential crisis exists because society is trying to change nature to meet its present needs and wants. By continuing to exploit gas and oil to survive, we will only experience drastic, irreversible ecological consequences.

The remaining 125 of 1100 miles of U.S. Arctic coastline not open to exploration is hardly a generous gift to nature as it is.

In fact, with Bush's promises to be an "environmental President," I can't understand why he isn't returning some of that shoreline to nature. Oh yeah, it must be because the pollution from spilled toxic wastes is so hazardous in and around the industrial areas.

I'm providing President Bush's address: 1600 Pennsylvania Avenue, Washington, D.C. 20500, for all to utilize.

The power of your pen can make a difference. We must join together and conquer the continuing threats on our planet. And most, all creatures great and small will be looking for another home.

Kevin Guecket

Productive tactics for inland trout waters
The art of landing Zunker browns on light tackle

by Steve Schmidt
Outdoors Editor

The crisp early morning hours are all but silent as the fog gently drifts over the white water ruffling rhythmically through the boulders bordering my favorite pool. Equipped with ultralight spinning gear, I flip a 1/32 oz. Rooster Tail into a gaping crevice between two monstrous boulders barely permeating the turbid, slow current waters. The cast is precise and within two turns of the bail, a scrappy brown trout bursts into sight, dancing haphazardly to shake the well-set spinner from its mouth. Moments later, I cautiously net the 14-inch fish. It appears too out of shape to be viable. The Tomorow River brown will surrender to my strategies. Indeed, this morning’s fishing adventure shows prudence and experience are the keys to harvesting fat, fleshy, and meaner trout in Wisconsin’s trout-infested waters. Hence, an opportunity to soak a line on a regular basis supplies you with a knowledge incomparable to that of weekend anglers.

Trophy-size inland trout, no matter what the species, are inherently difficult to catch on hook and line. Yet once you have mastered the art of understanding a trout’s intuition and a few basic principles, you’re well on your way to experiencing the almost excitement that trout fishing has to offer.

Personally, my schedule allows me about 10 hours a week to religiously fish spring trout in all of Portage County’s trout waters. My preference, nonetheless, is the Tomorow River, a body of water large enough to fly fish yet so structurally diverse that spinning gear is usually of benefit to accommodate the variability in trout habitat.

I generally hit the river with a four and a half foot graphite ultralight spinning rod. My reel is spooled with four or six pound test depending on the stretch of river I intend to fish and the probability of encountering aggravating snags in rocks, roots or similar structures that trout find irresistible. I can’t stress enough the importance of correct line and lure choice when fishing those elusive trout. Line size is one of the most significant factors affecting the successful harvest of "wall-hangers." And as much as most of us would prefer to fish with one or two pound test monofilament, it can’t efficiently be done when dropping a line in waters with adequate trout-holding structure.

The smaller the diameter of line you fish with the better your chances are of deceiving a trout’s uncanny ability to recognize it. New and improved magna-thin type lines provide the same amount of strength with almost half the diameter of common monofilament, an astonishing rectification to the sport of fishing as a whole. Nevertheless, it’s important not to go too light as undercut banks and submerged rocks and logs will raise havoc on the number of hooks or lures you brought with. On many an outing I have failed to correctly calculate the stretch of water I would be fishing. The annoying result is my fourth pound test giving-in to a stubborn snag five feet below the water surface. Your choice between four and six pound monofilament then, largely depends on the bottom structure of the particular site you intend to fish. But no matter how strong a section of water may be, I tend to shy away from two pound test since tangling into overhanging brush and organic riverbed debris is inevitable.

Lure and bait selection is undoubtedly the foremost dilemma anglers must tackle. Surprisingly enough though, basic principles pertaining to color selection of lures are quite simplistic. Regardless of what species of trout you venture out for, a productive standard to follow is "bright baits for bright days" and "dark baits for dark days." Yet like any fishing rule that can be shattered to pieces, this one is no exception. It does, nonetheless, provide a starting point when strategically tempting hungry trout. Due to its productivity in the past, I follow this rule until poor success rates lead me to experiment a bit.

My favorite fish attractors are spinners and although worms, hellgrammites, small minnows and a variety of other live baits are traditional "fish-killers," I’ve caught my largest trout on these artificial minnows. And an added benefit of spinners is the time you conserve by not having to continually retrieve after strikes, snaps or poor casts.

Panther Martins spinners have always been my personal favorite until a fishing buddy recommended the use of an assortment of Rooster Taills. I can’t thank enough for that advice, since it has allowed me to favorably increase the amount of time and size of brown trout I catch on the Tomorow River.

The added plus for Rooster Taills is their production in a variety of hues. Small Panther Martins, on the other hand, are only manufactured in bright red, orange and yellow which can limit their effectiveness to days of little or no cloud cover. They are, however, almost always deadly weapons for brookies residing in murky beaver ponds where poor water clarity may hinder strike responses.

A silver $1/22 Rooster Tail is a dynamic provoker of chunky browns in the spring of the year when fish are up to gorge themselves on smaller food sources that require less

Skills enhanced at Save Our Streams program

by Mary Beth Pechiney
Staff Photographer

Seventy-five area high school students are participating in the Izak Walton League’s Save Our Streams program on the Little Plover River this week. The project will provide students with "hands-on" stream quality assessment skills.

The League, formed in 1922, named themselves after the man who wrote the "hible" on angling, Izak Walton, author of "The Complete Angler." Students from the College of Natural Resources will teach the high school students about stream water quality by seineing and identifying invertebrates. Various water quality tests will also be performed.

The students will then work along side the Wisconsin Conservation Corps learning bank stabilization methods and planting grasses. The project will take place over a three day period beginning Monday, April 29 from 9 a.m. to noon.

Save Our Streams is a nationally recognized Izak Walton League environmental education program.

The event is organized and sponsored by the UWSP student chapter of the Izak Walton League, the Village of Plover, and the Wisconsin Conservation Corps.

The League began an environmental education program in the state in 1954 when member Pearl Pohl of Milwaukee introduced the Young Wisconsin Conservationists (YWC) camp. In 1969, the Save Our Streams program was launched nationally.

The YWC camp is an annual weekend of environmental education for secondary students across the state of Wisconsin. Individual students are sponsored by their local chapters of the League.

Every year since 1954, the League has sponsored the camp and every year a new topic in natural resources is chosen.

"We try to improve every year," said Edith Kueene, Director of the YWC camp for Continuous on page 17

Treetheaven holds reptile and amphibian retreat

Reptiles and Amphibians of Wisconsin, a weekend study retreat, will be offered at Treetheaven Field Station near Tomahawk Friday night, May 10 through Sunday noon, May 12.

Students will learn why many diverse animals and their habitats are diminishing in Wisconsin. Natural history, ecology, management and research will be explored during classroom and field activities. More than two dozen live specimens will be available for display and "hands-on" experience.

For more information, or to register, call (715) 453-4106. Treetheaven is operated by the College of Natural Resources at UWSP.
County waters provide good fishing opportunities for season opener

by Buck Jennings

Outdoor Ed-Elect

At last the time is upon us. Opening weekend. That moment you've all been waiting for when every moorin in a stuffed shirt crowds your favorite trout stream. What do you do when your prize stretch of trout creek looks like Bell's parking lot? Well, the trout have been having a rough time, so why not give them a break? I like to wait until the low WSI rating, few effects of winter on the state's deer, bear and furbearer populations. Preliminary outlook shows increase of below-zero temperatures and moderate snowfall. Last Wisconsin's deer herd undamaged. Antler development on bucks this fall should be very good. (Photo by Brian Justen)

Abundant bluegills and crappies can provide some fine eating from this clear lake. Selective harvest will insure the healthy survival of catchable fish in this overstocked water. If you still think Schmeekle is lame and you want clean, edible fish you are still in luck. Eastern Portage County is loaded with small lakes. Many of these lakes are the result of chunks of ice left behind by the receding glacier. Most are crystal clear, spring fed and deep, some over 60 ft. Most of these lakes support healthy populations of cleanmouths and smallmouths.

Despite its proximity, Schmeekle goes largely under fished. There's plenty of deep water to fish. Up coming finals are bound to have a few people given to a study schedule. For some good fishing very close to home try Schmeekle Reserve. That's right. I've heard plenty of people claiming to be "the ones who put the fish in Schmeekle" (last time I checked transporting game fish was illegal). Whatever the means, Schmeekle does support a healthy population of smallmouths and walleyes.

Mild winter leaves deer healthy and abundant

Preliminary outlook shows increase of antlerless permits

Wisconsin's deer herd has emerged from last winter in fine shape, reports Bill Ishmael, the Department of Natural Resources' deer, bear and furbearer ecologist. The Winter Severity Index (WSI) used to measure the ef fects of winter on the state's deer population averaged 36, indicating a very mild season. "Basically, Wisconsin's deer herd is very healthy and remains very abundant," Ishmael said. "When winter began, the deer population was estimated at right around 900,000. And with the low WSI rating, few—if any—deer were lost during the winter."

The index is calculated using two factors: below-zero temperatures and snow depths above 18 inches. Both conditions affect the survival rate of whitetails throughout Wisconsin's winters. One point is added for every day during the winter that one or both conditions exist.

This season's total means that those conditions were met only 36 times, and the majority of those points were for below-zero temperatures, noted Ishmael. Very few areas of the state accumulated more than 18 inches of snow. The department's winter data is gathered from 39 stations statewide and is correlated with Department of Natural Resources and Department of Agriculture weather data.

"Our research has shown that continued on page 17"
Fishing season opens:

The long winter is done and gone, ice is finally leaving Wisconsin lakes, and leaves are reappearance on trees.

Can the open water fishing season be far behind? Indeed, with the May 4 opener just days away, anxious anglers can be everywhere testing fishing tackle, repairing equipment, tuning up boat motors, and purchasing 1991 Wisconsin Fishing Licenses.

Before taking to the water, DNR North Central District Recreation Specialist, Bob Tucker, reminds anglers that before lubricating the fishing reel, before calibrating the fish finder, and before launching the boat, they should make sure safety devices, such as personal flotation gear and running lights on the boat, are in good condition and in working order.

Each year, we have the sad task of investigating a drowning that shouldn’t have happened because the individual was not properly using a flotation device. It’s such a simple thing, but each year, a number of people die because they don’t take precautions,” said Tucker.

DNR fisheries managers say inland waters such as lakes will be ready to go, come Saturday, May 4, but they remind that trout streams in 11 northeastern counties have restricted angling due to the effects of the drought over the past three seasons.

"In the 11 northeastern counties, trout fishing is limited to catch and release using only artificial lures," said DNR north central district fisheries manager, Elmer Simonson. "This season, the restrictions are for all trout fishing waters in the 11 northeastern counties, except Wisconsin/Michigan boundary waters and lakes that are stocked with trout.

"We are hopeful that the catch and release restrictions will allow streams to recover from the effects of the drought that, in some cases, severely damaged native populations of trout," added Simonson.

Fish that are caught and about to be released should be handled carefully with wet hands and played as little as possible. When fish are deeply hooked, put the line as close to the hook as possible and let the fish swim free. The hook will dissolve without harming the fish.

Many lakes and rivers in the northern third of the state have reduced bag limits for walleye. It is important to remember that the total daily bag limit for walleye remains at five. If the lake you’re fishing has a bag limit less than five, you can move to another lake to fill out your bag limit.

You cannot possess fish on any lake in excess of that lake’s bag limit. You must remove all fish from your boat prior to traveling to a second lake that also has a restricted walleye bag limit.

A few last reminders:

Sometimes this fishing season, a lucky angler will land a really big fish. If you think you’ve caught a fish that may be a state record, here’s what you do:

- Don’t clean or freeze the fish.
- Keep the fish cool, on ice.
- Get the fish weighed as soon as possible on a certified scale and witnessed by an observer.
- Contact the nearest DNR office to get the fish species identified and find out if it is a state record.

One last thing: Anglers have a wealth of information to share about their sport. What better way to pass on what you know about fishing than with a youngster along the bank of a swift trout stream or on the lake searching for walleye. In other words, take a kid fishing!

This is the actual set under construction for the play "Oedipus Tyrannus." It is being built on the stage of the Jenkins Theatre at the COFAC. Sophocles' tragedy opens at 8 p.m. on Friday, May 3.

Rex
from page 10

Often used as an example of the "perfect tragedy," this is the first production Baruch directed more than two decades ago as an undergraduate student at North Texas State University.

When the curtain rises at 8 p.m., the actors will be masked in the traditional style of Greek drama with the masks portraying the predominant personality traits of each character. According to Baruch, the facial coverings will serve to dissociate the actor's physical presence from what is being said, and will also help to illustrate the changing and un-realistic nature of human identity.

A chorus of 15 men and women will comment on the action and assist the audience in understanding the tragic consequences that occur over less than a day's time. The drama moves so swiftly, the director says there will be no need for an intermission.

J.J. Saecher, a student composer from Markesan has written original electronic music to accompany the drama. Debra Listof will design the costumes and masks. Her task will be to depict the garb and the demeanor of all strata of society, from street people to royalty.

Gary Olsen, the lighting designer, will be called upon to indicate and enhance the changes in mood throughout the play. Both are members of the theatre faculty.

Playing the role of Oedipus, the king, will be Neil Roberts of Long Lake. His queen, Jocasta, will be Dawn Timm of Waukesha, and her brother, Creon, will be Dan Katula of Brookfield. The priest will be Joseph P. Schmitz of Hartland, and William Bolt of Waukesha will be Teiresias. The assistant director will be Cara Kincaid of Freeport, Ill., and the stage manager will be Aaron Hubbard of Jackson.

"Another interesting aspect of Spain's culture is the siesta. We thought this time was set aside only for an afternoon snooze. However, we discovered that siesta in Madrid is a time when the majority of families return home for the biggest meal of the day."

Crossing the street is a battle and extremely dangerous if we are not careful. The roaring and honking of traffic noise is compounded by loud jackhammers of the construction projects which litter sidewalks everywhere.

Another interesting aspect of Spain's culture is the siesta. Unknown to us upon arrival, most commercial businesses close from about one until four o'clock to preserve this ritual. We thought this time was set aside only for an afternoon nap. However we discovered that siesta in Madrid is public of the siesta and to discourage theft.

Because the siesta is one of the customs of Spain, it will be missed by many of us, although others will not miss the inconveniences of the strange business hours.

Although Madrid has a few downsides we shall cherish the memories of Spain's social and cultural life for a long time to come. It will be sad to say farewell. Spanish is friendly, affectionate, and easygoing.

THE FAR SIDE

by GARY LARSON

Achorus of the student patrol program in this spring semester draws to an end. I would like to offer some departing words on behalf of the 16 of us on the UWSP Spanish program. We are experiencing the culture of Spain.

When we leave, we are going to miss many of the customs, activities and aspects that we may never encounter again. Saying farewell will be difficult, but I shall give it a try.

Many of us will not miss the hustle and bustle of the city life which we encounter often. We will not miss dodging European cars, trucks and loud motorcycles along narrow back streets and main intersections.

As this spring semester draws to an end, I would like to offer some departing words on behalf of the 16 of us on the UWSP Spanish program. We are experiencing the culture of Spain.

Recycle
from page 11
apartments on the North Point Drive is in the same predicament. Apartment buildings contract trucking companies to pick up their garbage, and might rely on them to take the recyclables too. Whether they will depends on the company contracted, and if the service is requested (it may involve an additional fee).

If you live in an apartment and aren’t sure if recyclables are picked up, ask your manager or owner. If they’re not, the next step is up to you: Enclose a note with your next rent payment to request they provide this service for you.

Don’t let your concern for the environment stop now that Earth Week’s over. Caring for our planet requires a lifelong commitment.

THE FAR SIDE

Spain
from page 12
Spanish couples, whether on a metro, in a street, or in a cafeteria are nearly always arm in arm. This affection is not only evident in romantic couples, but also reaches out to parents, children and friends.

During greetings and farewells, instead of an extended hand, one usually gives a kiss on each cheek: “dos besos.” People of Spain are truly warm and they have an open arm policy. There is a saying about this country: In Spain people work to live and in the States we live to work. This seems to be true. Many hours are spent socializing in the small cafes while sipping “cafe con leche” (expresso with steamed milk).

The famous Retiro park is located near our hostel and it is a beautiful place where we can go and relax. In this park on cloudless days, vendors sell their concessions, artists display their works of art, and musical groups perform their best tunes.

An interesting aspect of “la mancha” is that going out before 11 p.m. is considered silly. As a matter of fact, at 9 p.m. most discotheques are empty and some do not even open prior to midnight. “La mancha” typically ends at 5 or 6 a.m. with a common favorite snack known as “chocolate con churros.” It is fried dough dipped in chocolate syrup.

It will be strange for us to return to a land where we will not be considered foreigners. On occasion I have heard group members say, “I am going to be much more sympathetic to all foreigners when I return.” Even though we are foreigners, Spain is treating us well.

From the busy traffic, to the fascinating social culture, to the crazy night life, we have thoroughly enjoyed Spain, and leaving will be extremely difficult. This country will live long in our memories. Goodbye and farewell Spain…”Hasta Luego.”

**Sports Editor**

The UW-Stevens Point softball team finished the 1991 season on a high note, rising from their sixth seed to finish fourth in the annual WWIAC tournament at Zenoff Park in Stevens Point last Friday and Saturday.

The number one seeded UW-Eau Claire won the championship with a 5-1 record followed by UW-LaCrosse at 4-2, UW-Platteville at 3-2, UW-River Falls and UW-Superior at 1-2 and UW-Whitewater and UW-Oshkosh at 0-2.

Pitcher Ellen Paul and centerfielder Lisa Mortensen were named to the all-WWIAC Eastern Division Team at the tournament awards banquet held Friday.

**UWSP**

The UWSP men’s baseball team had a split and one RBI. Don Radomski went 3-3 with two runs scored. Rick Wagner was 1-1 with two RBIs.

Bob Johnson recorded the victory on the Pointer mound, going 6 1/3 innings, giving up five hits, one run, one walk and striking out three. Brian Quinnell came on in relief, pitching 2/3 an inning and walking one.

**UW-Whitewater**

In the first game of the doubleheader, the Warhawks scattered eleven hits while the Pointers only came up with five hits, as the Warhawks pounded the Pointers 9-4.

Whitewater went on the score board first, scoring two runs in the first inning. The Pointers tied the score, crossing the plate once in the first and once in the second. The Warhawks scored one in the third, only to have the Pointers tie it up with a run of their own in the fifth.

Whitewater scored two in the sixth to gain a lead they would not lose. They also scored four times in the ninth to secure the win.

Ellen Paul gave up just six hits to record the victory. Going the distance, Paul allowed just one run with no walks.

UW-LaCrosse 6

**UWSP**

In the Pointer’s second game on Friday, UW-LaCrosse erupted to grab the 3-1 victory.

The score was tied 1-1 after the first inning, and the Pointers gained the lead by scoring twice in the fifth. But the Eagles scored twice in the seventh and ninth, and also crossed the plate in the sixth to secure the victory.

Mortensen and Barenwald led the way for UWSP, each hitting a home run. Mortensen was 3-3 with one run scored, two RBIs and two base on balls, and Barenwald was 1-4 with one run scored and one RBI.

Also shining at the plate was Michelle Krueger, going 2-5 with two runs scored.

Ellen Paul suffered the loss, pitching nine innings, giving up thirteen hits, one walk and striking out one.

**UWSP**

On Saturday, the Pointers stayed alive in the double elimination tournament with a 4-2 win over UW-Whitewater.

Superior got on the scoreboard first, with a pair of runs in the third, but UWSP came back to score twice in the fifth and sixth to grab the victory.

Kelly Anklaun led the way for the Pointers, going 2-3 with a pair of triples, one run scored and two RBIs. Sevick went 2-4 in the game with one run scored and one RBI.

Krueger recorded the victory on the Pointer mound as she went the distance, giving up five hits, while striking out two.

**UW-Plateville**

The Pointers drove a crown ended in their next game as they fell to UW-Plateville, 9-5.

Plateville jumped out to an early lead, scoring twice in the first inning. The Pointers scored in the second and the fourth, but the Pioneers put the game away by scoring three times in the fifth inning. The Pointers fought back, scoring three of their own in the sixth, but the Pioneers came through again in the seventh with another three runs.

Peters led the way with two runs driven in while going 1-3. Amy Schumacher was 2-3, and Mortensen went 2-3 with one run scored and one RBI.

Paul suffered the loss, going seven innings, giving up fourteen hits, three walks and striking out two.

"I'm pleased with the way we finished out the season," said first year Coach Sharon Stellwagen. "The second place finish at the UW-Whitewater tournament two weeks ago was the first time all season we started to come around and we played well from that point on out. We hit the ball well in the championships and our defense and pitching was good for the most part."

Ellen Paul, the team’s lone senior, compiled a 4-5 record with a 1.82 ERA in WWIAC play, including a 2-0 no hitter over UW-Plateville in the Whitewater tournament. She struck out 20 and walked 12 while giving up just 16 earned runs in 61.2 innings.

For the season, Paul was 7-12 with a 2.82 ERA, and 38 strikeouts in 124 innings.

Lisa Mortensen

Mortensen, the Pointers other WWIAC pick, was cited for her outstanding defense in center field. She hit .167 for the season with three RBIs and 3-4 stolen bases. She was second in the team in conference play with 14 total bases and led the squad with a pair of home runs, both hit in the same game against UW-Platteville during regular season play.

For the season, Mortensen hit .257 with three home runs and 10 RBIs. She also had a .405 slugging percentage and stole 9-8 bases.

The Pointers finished their season with a 10-23 record overall and a 4-10 record in conference.

Baseball splits in last two series

By Kris Kasinski

**Sports Editor**

Ellen Paul, Mortensen named to All-WWIAC Team

Leading hitters for the Pointers were Rick Wagner, 1-3 with one RBI, Chris Peterson, 1-2 with one RBI, Don Radomski, 1-2 with one RBI, and Tim Hale, 1-3 with one RBI.

Chris Combs suffered the loss on the Pointer mound, pitching 6 2/3 innings, giving up 10 hits, nine runs, six walks and one RBI.

The Stevens Point Rugby Football Club traveled to Whitewater this past weekend to take on a Whitewater club team.

In the first half, the Whitewater rugby club out- scored Point 15-5. Point controlled the game, but gave up points on mistakes in their own end. The only try of the first half for Stevens Point came from Kevin "smelt fishing is my life" Rockow, followed by a conversion by Todd "bigtoe" Fredrickson.

In the second half, Stevens Point came out and dominated the field. They scored three tries that came from Todd "bigtoe" Rockow, Eddy and Matt "chainsaw" Langer

Track teams in Drake Relays, Lacrosse Invite

By Mark Gillette
Assistant Sports Editor

Over the weekend the Pointers traveled to Iowa to participate in the Drake Relays. There were 186 colleges and university teams at the meet from all over the country.

The Pointer men fared well and were selected the Honor Team of this year’s track relays, Coach Rick Wit commented, “This honor is given on the basis of a formula that accounts for performances given by teams for a period of time at the relays.” He added, “This is the highest honor that they give at the relays, and it is something the Pointers should be proud of.”

The Pointer athletes placed well in their events. Coach Wit and results could have been better. “It was not due to lack of effort. They found themselves competing against people they have read about and in turn (we) were not concentrating to the level we need to in order to run our best.”

In the 4x100 meter relay, the Pointer team of Helmlisch, Biolo, Green and Bryan placed 11th in the 4x200 meter relay and with a time of 1:29.94. Green’s hammering pull played a part in the team’s slower than usual time. “This was something we couldn’t control and was a real shame as we had a real good chance to do really well here,” said Wit.

In the 4x400 meter relay, three freshman - Ryan Hetzel, Ryan Hebert, and Marty Kerschner, and Sophomore Bryan got 10th place with a time of 3:18.54 minutes.

Doug Engel, Pat Crawford, Andy Valla, and John Cepipna competed in the 4x800 meter relay and placed 14th.

Albrecht, Valla, Cepipna, and Hamilton combined in the distance medley relay to take 10th place with a time of 10:11.4 minutes. “These guys did a good job. We ran well here and while we made some mental mistakes, I thought we competed well,” said Wit.

While part of the track team was at the Drake Relays, the other part traveled to LaCrosse to compete in the LaCrosse Classic. The weather, good at times, bad at others, determined the outcome of many of the races.

Women:

In heat 2 of the 100 meter hurdles Pam Getzloff had a time of 16.80 seconds to place 5th. Lisa Wnuk placed 6th in the race with a time of 17.69 seconds.

In the women’s 1500 meter finals Marnie Sullivan got 6th place with a time of 4:56.81. Tina Jarr finished 10th in it with a time of 4:55.61 minutes.

Coach Hill was very impressed with both of these performances saying, “They were both personal bests.” Kaye Dannum placed 9th in the discus finals.

Men:

In the men’s 110 meter hurdle preliminaries, Todd Skarban of Point finished first with a time of 15.99. Chad Folbran finished third with a time of 15.79 seconds.

In the men’s 110 meter hurdle preliminaries, Pointer Tim Bristol finished third with a time of 15.51 seconds. Lynsh Smith took fifth with a time of 16.24.

Jason Ryf and Jason Zuekel took 6th and 7th respectively in the St orele chase with times of 9:41.06 and 9:43.13.

In the 110m hurdle finals, Skarban placed 5th (15.83), Bristol 6th (16.06) and Fobran 9th (16.42).

The 800 meter race had three Pointers placing. Joe Pease go 15th with a time of 2:01.48 Mike Price came in at 2:04.47 to take 23rd place, and Dave Rolatia placed 25th with a time of 2:07.53.

In the 400 meter hurdles, 5 Pointers placed. Doug E n gel took 10th with a time of 58.40. Dave Woyak finished 11th with a time of 58.64. Coming in at 58.66 was Luke Stadsmennar to take 13th place. Billy Spaelic took 14th place with a time of 58.99 and Mike Woyak placed 17th at 1:00.21.

In Scott Harrison placed 689 in the hammer throw with a distance of 154 feet, 6 inches.

The 4x400 meter relay team of Woyak, Schwab, and Leaky finished 8th with a time of 3:33.31 minutes.

The Pointer’s next meet will be this weekend, May 3-4, at Oshkosh.

Healthy Heart Biathlon Sunday

This Sunday, the University of Wisconsin Stevens Point will host the annual Healthy Heart Biathlon. The biathlon will begin at 11:00a.m., with registration at Quandy Fieldhouse from 9:00am. to 10:00a.m. the day of the race.

The competition will include a 5k run outside, a 400 swim and a 1.5 run inside. The pool and indoor track of the new UWSP Health Enhancement Center will be used. The event is a race for people of all competition levels, from beginners to more experienced athletes.

The race is run continuously from start to finish. To make sure that there will be no bungling up in the pool, the race will be started off in heats of fifteen every two minutes.

The event is being sponsored by Bank One, Physical Therapy Associates, Pepsi Cola Bottling, Hostel Shoppe, Del Monte, The UWSP campus vending program and Campus Cycle.

Other contributors are the Athletics Foot, the UWSP Employee Wellness Program, LaClairie’s Frozen Yogurt, Andy’s Pasties, Pizza Hut, the Holiday Inn, Area Certified Massage Therapists and Jet Stream Car Wash.

All entrants receive a T-shirt and are eligible for door prizes which include: two pair Cata-go sunglasses and fourpair Exisle sunglasses, three one hour massage therapy sessions, one night stay at the Holiday Inn, shorts, t-shirts and water bottles for gift certificates from area restaurants, and three free car washes from Jet Stream.

Bank One is providing fluorescent sport bottles to the first 100 spectators.

Awards will be given to the top three male and female finishers in age groups of 19 and under, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59 and 60 and up.

Refreshments following the event will be provided by Del Monte, Pepsi-Cola Bottling and the UWSP Campus Vending Program.

The event is being coordinated by Pam Gifon, Nancy Stuart, Dr. John Munson, Beth Spielvogel, Dave Woyak, Scott Halverson and Ann Benson.

For more information, call Pam at 341-8823.

Volleyball falls at conference meet

By Jason Smith
Sports Writer

It was a long tournament weekend and a sad ending to an otherwise impressive season for the UWSP men’s volleyball team.

After completing a 13-1 season and earning the number one seed going into the conference tournament, the Pointer men failed to put the pieces together when it counted most.

It’s very disappointing, and even more so because UW-Eau Claire is our rival, and a team which we defeated twice this season, won the tournament,” said team Captain Jason Smith.

With some tough luck the Pointers began the tournament in the toughest seed. “We managed to win it, but not after dropping a game to host McCallister College and #17 seed overall,” said Smith.

To give an idea of how popular we were, during that game, when the score was 13-9, play was stopped on the other three courts, and the avm literally emptied when we lost, said Smith.

The loss put the Pointers at the #3 seed, behind St. Olaf and Eau Claire, and put them face to face with UW-Stout. Perhaps a bit overconfident, the Pointers underestimated the strength of Stout and let two matches slip away 15-8 and 15-13.

Regrouping the next morning the Pointers destroyed Gustavus Adolphus 15-6, 15-5 as they asserted a position in the losers bracket. It was not to be for the Pointers though, as they lost the next match against arch rival Carleton College 15-5, struggled back to take the second 15-9 and bowed out 15-15 in the grinder match.

Carleton then lost to St. Olaf in the semifinals. Dean Schwab, Eau Claire defeated St. Olaf in the finals 15-8, 15-13.

Bryan McLeion was selected to the first team all-conference, and Dennis Jensen from Eau Claire was this year’s MVP. Jason Smith received a second team all-conference berth.

Bruce Mapes was selected to the first team all-conference, and Dennis Jensen from Eau Claire was this year’s MVP. Jason Smith received a second team all-conference berth.

Rugby from page 14

Whitewater also scored one more try and made the score 21-20, Whitehall, but with five minutes of the game, neither side would budge, and no further scoring occurred.

The Point Ruggers will be playing the Milwaukee Black and Blues Rugby Football a second time this Saturday at 1:00 at Milwaukee along the lake shore. The Point Ruggers will also welcome all fans out to go.

Any questions, call 344-5725.

striking out four. Travis Rosen­
baum came on in relief to pitch
1/3 of an inning, giving up one
hit and one walk.

UWSP 3
UW-Platteville 2

Last Saturday, the Pointers
hosted the Pioneers, and once
again came up with a split on the
doubleheader.

In the first game of the
doubleheader, the Pointers
scored twice in the bottom of the
seventh to capture the victory.
There were no outs when the
winning run was scored.

The Pointers scored in the first
inning, but Platteville held the
lead until the seventh after scor­
ing twice in the third.

Leading the way for the
Pointers at the plate were Ken
Krug, 2-2, Don Radomski, 1-3
and Rick Waenner, 1-2.

Rob Wolff recorded the vic­
tory for the Pointers, going the
distance, giving up four hits, one
walk and striking out two.

Deer
from page 7
there are no winter losses suf-
fered by the deer herd at a WSI
rating of 50 or under, and no
measurable losses are noted
until the index hits 80," Ishmael
explained. "Fawn production
this spring is expected to be ex-
cellent and antler development
on bucks this fall should be very
good because of the relatively
low amount of energy used by the
deer to make it through the
winter."
Hunters should enjoy another
year of excellent hunting suc-
sess in 1991, added Ishmael.
Potentially there will be as many
deer — or more — this fall prior
to the hunting seasons as there
were last year. In 1990, bow
and gun hunters harvested a
record 400,000 deer in the state.
However, Ishmael pointed
out that the current condition of
abundant deer is not likely to
last due to the limitations of
habitat, weather, and human
tolerance for a large deer
population.
"The current high deer
population is not indicative of
the long-term ability of the
northern forest habitat and
weather to support this many
deer," Ishmael said.
Rather, the existing large
herd in the north is the result of
a series of unusually mild
 winters. Ishmael added that
the hunter's role is critical for
managing deer at levels suit-
ed to the habitat, weather and
human concerns of crop damage
car—deer collisions.
"Now's the time for deer
hunters to take advantage of
these conditions we're experienc-
ing, while recognizing their important role
in helping to keep populations at
established goal levels," he said.
In carrying high numbers
of deer, Ishmael said there is a
potential risk of damaging the
natural food base in the habitat
and escalated crop damage in
agricultural areas of the state.
Since 1986 the rate of deer
herd growth in the north has been
about two and one half
times the normal rate, creating
the need for aggressive harvests
since then.
"A preliminary look at what
hunters in Wisconsin can expect
for a quota deer (antlerless
deer and fawns) harvest is 245, 470,
accompanied by 228,530 in 1990," Ishmael said. "That
harvest level will generate about
601,800. Hunter's Choice Per-
cesses this fall, up from the
514,000 available in 1990."

High fawn production this spring will reflect the
mild winter season. (Photo by Brian Justen)

Skills
from page 6
the last five years. "We try to
pick topics that are pertinent and
up-to-date that will interest the
student at the same time," she said.
This year's topic at the YWC
Camp, the YWC Camp's goal.
Camp, the YWC Camp's goal.
Camp, the YWC Camp's goal.
Camp, the YWC Camp's goal.

Whether you need a computer to write papers or
create graphics, charts and spreadsheets, there's
an IBM Personal System 2/30 or 32 right for you.
The IBM PS/2" family of computers has every-
thing you asked for — including pre-loaded software,
a special student price and affordable loan payments.**
All models come with IBM DOS 4.0, Microsoft
Windows 3.1, 3.5-inch diskette drive and an IBM Mouse.
Try one on for size. We're sure you'll find one
that fits just right.
And on a different note, for only $599, you can get
the Roland® Desktop Music System
that transforms your IBM PS/2
with Memoshop® into
an exciting, comprehensive
music maker.

Recycling program is rated tops in the nation

The UWSP Sociology Club conducted an alcohol survey of UWSP students. The survey was conducted in 1990 and was randomly distributed to students living in residence halls. Data was collected from 264 respondents.

Of the respondents, 104 were men and 160 were female. Nearly two-thirds of the females and over a third of the males were underage. Of those over 21, 52.7 percent were male and 47.3 percent were female.

For the survey, a drink was defined as one ounce of liquor (80 proof), 12 ounces of beer or four ounces of wine. Over one-fifth of the males and over one-third of the females drank while under the influence of alcohol.

In the area of recycling, the university has a 30-yard packer box, which saves 24 hours of labor per month in the handling of more than 18,000 pounds of mixed paper. In addition, the department recycles a minimum of 10 tons of paper. This increases efficiency in transportation costs and also gives better payback of paper sales.

"We struggled with market development and getting the right containers and a sufficient number of containers to get going," he explained.

Developing an arrangement with the Fox Forward Corp. of Green Bay, which began purchasing an unsorted mixture of magazines, used stationary, newspaper and other grades of paper, was an important step forward, Fort Howard continued.

Fort Howard was the only Wisconsin winner of an EPA award. It took top honors in the large business category on the basis of developing a recycling advocacy program touching all facets of its operations.

Other winners were in the areas of small business, kindergarten through grade 12 educational institutions, community and non-profit organizations, citizen, local government, state agency and federal agency organizations.

An aspect of recycling here that is a model for other schools is a SEARCH program (Students, Employees and Administration Recycling for Community Health). It involves recovering items for reuse which are normally disposed of at the end of each semester by students moving out of the residence halls. Appliances, clothing, miscellaneous supplies such as recreation items and apartment furnishings are collected and distributed to charitable organizations instead of being tossed in garbage cans.

"Apparently the word was out that we were doing something positive," he observed.

For Further Information Please Contact the Campus Activities Office at 346-4343!!!
FOR SALE

For Sale: Studying desk, computer desks, S20 each. Ph. 344-6982.

For Sale: 1983 Camaro Ph. 344-6982.
