SGA candidate personalities display variety

Angela Moe, running mate to David Kunze (photo by Al Crouch)

by Sarah L. Newton
Editor-in-Chief

The UWSP Student Government Association will hold elections for the 1992-93 President and Vice President on April 7th and 8th. The Pointer will run a three week series giving student voters a look at the candidates' backgrounds and motivations for running, their campaign issues and focus points, and finally, the results of the elections and an in-depth view of the winning Presidential team.

Twenty year old junior, David Kunze, has been active in UWSP Student Government for three years. As current Executive Director, he is partially responsible for the governance of over 8,000 students.

The youngest of five children and a native of Stevens Point, Kunze says he enjoys traveling with his parents, and visiting his three sisters and one brother who all live out of state.

Political-type involvement came early for Kunze. He was a member of his high school student senate and became involved in the Youth in Government program there, in which the students strove to create a "model legislature." Kunze is a Communication major with an emphasis in organizational communication. A former Food Service Management major, Kunze enjoys Continued on page 8

Randy Soquet of Green Bay, current Speaker of the Senate, has been part of Student Government since the Fall of 1991.

Although he and his two brothers did not grow up on a farm, 22 year old Soquet has a strong background in Future Farmers of America, stemming from his lifelong interest in Natural Resources.

Four years of involvement in high school FFA led Soquet to the President's chair of that chapter for two consecutive years. In addition, his high school career juggled football, forensics, the social studies academic team, and a part time job.

Soquet, a junior, is a former WI state FFA officer, once representing 2000 FFA members. Hunting, fishing and all the recreational sports he can handle fill his spare time. Soquet is working on a double major—education and history, and a minor in political science.

Although Soquet doesn't have a long history of political involvement, his active interest in UWSP students and their concerns is realistic and sincere.

He says that, "Believing students need a clear voice to communicate their concerns," is what has motivated him to run for SGA President. "I believe I can be that voice, not only to the campus and administrators, but the community as well." Continued on page 8

SGA Presidential Candidate Randy Soquet and running mate Chris Grassl. (photo by Al Crouch)

Chris Grassl, who has considered Minocqua home for the past five years was born and raised in Chicago with his two brothers. This 24 year old who calls himself a "slightly non-traditional student on a traditional five year plan," led a busy high school career filled with football and a full time job. In addition, Walsh was a member of the Student Council, the National Honor Society, and was Illinois State Scholar.

Walsh claims his work with Peterson Tree Service in Minocqua is his biggest hobby, al

IN THE REAL WORLD
by Chris Steinitz

The presidential campaign is actually starting to get interesting. After Paul Tsongas ended his trek to the White House because of a dwindling campaign fund, Jerry Brown has stepped in and given Bill Clinton some real live competition on the Democratic ballot.

Jerry Brown came away with a stunning upset in Connecticut grabbing 36 percent of the votes away from Clinton and leaving him with only 55 percent of the votes. Even though Connecticut is not a hot-bed of Clinton supporters, his loss has highlighted the ever-growing doubts among Democrats about Clinton's character and electability.

Acquitted drug trafficker Manuel Noriega's wife was arrested for shoplifting $300 worth of buttons off of high fashion clothing, Tuesday in Miami Fl.

Felicitas Noriega, while stating that her husband's trial dismissed the incident as being blows out of proportion and refused to discuss it in detail.

"There was nothing. It's just rumors," responded Mrs. Noriega.

According to store officials, damages to the clothing were in excess of $1,200.

Saflok installed in Thomson Hall

by Pamela Kersten

A new electronic door lock system called "Saflok" was installed in Thomson Hall over spring break changing each resident's room key from a floppy lock to a system called "credit card" lock.

Thomson Hall was the only hall to receive the new locks and is being used as the "guinea pig" of the University. If the locks work well and don't present any major problems, the system will eventually be incorporated with the rest of the residence halls.

"I think that they are a waste of money," Brian Love, a resident of Thomson Hall stated. Many other residents shared his viewpoint.

Jeff Scanlan, also a resident of Thomson said, "I question whether our money was spent efficiently. Combination locks could have been a cheaper solution."

The cost to replace locks for Thomson Hall, the computer system, staff training, labor, and a supply of 5000 cards added up to $95,551. This cost also includes the replacement of locks on the outside doors of the other residence halls. The estimated cost to incorporate the other residence halls with the system will be $35,000 per hall.

Randy Alexander, Director of University Housing stated, "The system isn't that much more expensive than other options. The higher level of security and decreased cost down the road will balance out that amount. Right now we have to change all of the outside door locks over each break so that students can't get in. This gets quite expensive. With this new system, all we have to do is reprogram the computer."

The system will not cause a raise in housing costs. UWSP raised housing costs for the fall semester of 1992, 1.27%, the lowest in the state. Saflok will be paid for over a period of time using bonds that will run for a minimum of 20 years.

One advantage of Saflok is increased security. The "cards" when lost can simply be reprogrammed, therefore making them unusable. This will cut down on unauthorized people getting into the residence halls and hopefully cut down on thefts.

UWSP is the groundbreaking of the Saflok system in the UW system. "Many other Universities have talked about it, but we are the first ones to implement it in Wisconsin," stated Alexander.

UWSP students participate in 11th ann. Eagle Walk
by Michelle Neinast

A group of close to thirty UWSP students spent their spring break outdoors, like many of the rest of us may have, but for a very different reason. They were on the 11th annual Eagle Walk.

The walk takes place over 9 days during spring break each year and covers about 200 miles, from Stevens Point to the Eagle Valley/Nature Preserve in Glen Haven, WI.

This event is sponsored by the Environmental Council and was coordinated this year by Jennifer Pau. Anyone was welcome to participate, regardless of past experience, and weekend-long practice walks were arranged to help participants get into shape and break in their hiking boots.

Cindy Buyers, who completed the 7th Eagle Walk this year, helped start the event in 1982 along with B.L. Wellings. Wellings was a freshman at the time and had tried similar walks in high school.

Tim Gelhaus, who completed his 2nd walk this year, stated that "it's a group who to sponsor environmental awareness, and it's a challenge."

The students involved have what they consider to be a very important goal. Each participant needs to raise $200 in donations. This year, $4109 were raised in Eagle Valley doing research on bald eagles. Five thousand dollars went to the Wisconsin chapter Nature Conservancy. This $5000 amount was then matched by the state of Wisconsin.

This year's walk went from Stevens Point, through Wisconsin Rapids, Monroe Center, New Lisbon, Hillaboro, Richland Center, Blue River, Woodman, and Bloomington, to Eagle Valley.

Students started walking about 8 am, eating noon meals in cafes along the way and usually reaching that evening's destination around sunset. They stayed in churches, schools, and town halls.

Law enforcement methods in need of focus
Money and safety efforts wasted on petty offenses

by Sarah L. Newton
Editor-in-Chief

Someone's always complaining about authority. Surprisingly, this week it's me. It's not about faculty or administration, though. This time it's law enforcement.

I have a couple stories. One weekend before spring break, I was riding my bike home from the Communication Arts Building at approximately 1:30 a.m. I'd just rounded the corner to my apartment when I saw the reflection of flashing red and blue lights in the window across the street. I turned to see a police car approaching me from behind. Assuming he was either checking to see if I was drunk or just checking to see that I was making it home all right, I was surprised to hear him ask me for identification.

"I beg your pardon," I replied.

He repeated that he wanted to see my driver's license. Since I was burdened with a heavy book bag and we were only 25 yards from my driveway, I asked if it would be all right if we went to my parking lot. The officer complied, and as a special favor, left his beautiful lights flashing for all my neighbors to see.

On reaching my driveway, I gave the officer my license; he proceeded to scribble on a pink slip of paper. I felt like I was being punished by my 6th grade bus driver for writing on the seats.

"I would like my campus security following actual harm does;" it was issued a warning which required me to get a license and a light for my bike. According to the officer, I was also riding against traffic.

Fortunately for me there was no traffic that night—his was the only vehicle I encountered on the way home. Otherwise I might be much.

I was warned a richest which required me to get a license and a light for my bike. According to the officer, I was also riding against traffic.

What then if your surgeon tells you he had never before performed an operation? He has seen it done many times, and once while in medical school he cut the mold from a piece of bread. What would you do then?

Animal testing in the medical profession is essential for human survival. However, there is still much we can do to reduce animal suffering and death in the name of human progress. Immobilizing calves to make real tender, performing redundant tests, conducting tests for which we already know the outcome, sacrificing thousands instead of hundreds of animals for the sake of statistical confidence are all practices which contribute to needless suffering and death.

Working to reduce animal suffering and death is a noble cause which is not at odds with the survival of humanity. However, to totally eliminate it by prohibiting the use of animals entirely is dangerously foolish.

Consumer tested products rank above animal rights

by Larry Roberts
Contributor

Most animal rights activists share a common philosophical fallacy: all species are equally important. Because I am human, I believe that humans are the most precious of all species.

If I were an assassin—which some would provide strong argument for—I would believe assassines were more valuable than other animals. In the epic battle of survival, nothing is more important than the continued survival of your own species.

Therefore, using animals to test products for safety and experimenting on animals to test medical drugs and techniques are justifiable practices because they meet human needs.

Imagine a new shampoo is developed without animal testing. Would you try it yourself? What if someone just goo in your eyes and makes you go blind? A law suit will not regain your sight.

Would you volunteer to ingest food with a new sweetener? You might.

If we are to have new products, we must have animal testing. Human testing is the unavory alternative.

Imagine you contract cancer. The doctors tell you they have a new drug which may cure your cancer without an operation. This drug has performed well in their computer models, but it has never been tested on any-thing living. Would you have the operation instead?

Special circumstances are no excuse for violating bicycling laws. Point taken. I just wonder how many other horrendous crimes were going on in the hall that time it took this officer to issue my warning. I bet someone somewhere was jaywalking.

I must have been on a roll that week or something, because the next night I was also in the building late, but didn't have my bike. I'd received campus security escorts in the past, and home, you have to live on campus.

Oh, this right, first I have to pay $1200 per semester for two years. Then I'm allowed to move off campus, but since I'm not paying through the nose to live in the residence halls, I no longer have the right to safe transport home. What a system.

I am well aware that university and local law enforcement are not related in any way, nor are they in a conspiracy to create irrational rules. I would never suggest such a thing.

All I know is that if when I'm forced to walk home in the dark, I would like to know that my campus security and local law enforcement officers are following actual harm does; ensuring my safety rather than spending precious tax payer money and potentially leaving minutes on paddy, insignificant offenses.

POSTMASTER: Send change of address to Pointer, 104 CCC, UWSP, Stevens Point, WI 54482. The Pointer is written and edited by the Pointers which is comprised of ISBN students who are solely responsible for its editorial content and policy.
Environmental Ed bill needs attention

Dear Editor:

I am writing with regard to Environmental Education Legislation whose fate will be decided upon by the Governor within the next month. This legislation would be a very big step in the direction of positive environmental changes.

Assembly Bill 313 has already passed the Assembly and Senate. It provides for a professional staff member to coordinate potential business and company support for Environmental Education programs. A recent survey of Wisconsin manufacturers and chemical merchants identified nearly 300 businesses interested in supporting Environmental Education by providing funding, internships for teachers, and supporting educational programs. The bill will change the state supported environmental education matching grants program from an annual to a continuous appropriation.

Knowing that funds are available for only one year at a time prevents programmers from addressing important long term goals for fear that funding may be cut at the end of the year. The bill also includes a position on the Environmental Education Board of a newly appointed member who will represent non-formal education centers such as museums, zoos and nature preserves.

This bill is now in the hands of Governor Tommy Thompson who vetoed a similar bill last year. It's important that if you are in favor of these changes, you act quickly.

Please write the Governor asking him to sign Assembly Bill 313, or call the toll free hotline (1-800-362-9472) that will allow you to leave a message for the Governor.

This bill is an essential and beneficial step in the overall goal of improving Wisconsin's environmental education programs. Wisconsin has been the national leader in environmental education by enacting Assembly Bill 313, we can maintain our leadership position.

Campus Greens defend against marijuana rumors

Dear Editor:

I am writing out of concern about some things I've heard said regarding the Campus Greens recently.

Quite a few people suspect that marijuana is being smoked at our meetings, and are actively spreading this information. The story of these rumors is not clear, however, there seems to be some association with U.C. Information Desk employees.

I've been hearing about this problem for some weeks. Unfortunately, no one involved has made efforts to clarify the validity of the story. Members of the Greens find this issue to be absurd.

It's time for everyone to know exactly what goes on at Campus Greens meetings. At the start of each meeting, we take part in a practice called smudging—a Native American method of burning sage that entails the burning of cedar and sage. The resulting smell, similar to marijuana, is what began the pot rumors. At the conclusion of the Greens meeting this Tuesday night, a campus security officer and a U.C. building manager came to the meeting room to inquire if the meeting was over.

Satisfied with it's conclusion, they left. We found our visit, which was apparently due to a complaint, interesting in light of the smudging aroma and rumors.

The visiting building manager informed us later that the U.C. policy says—if something is suspected, the whole group will be talked with during the course of the meeting. Since our meeting was over by the time security arrived, we were not confronted.

Much wasted time and frustration could have been avoided had someone initially questioned our group about the smell emanating from our meeting.

I am afraid this is reflective of the stereotyping being placed on those with liberal views such as the Greens. We are not a bunch of pot smoking 60's wanna-be's.

The operation of our group has always been focused on open discussion and understanding how we can improve the quality of our group as well. If you have questions regarding the Greens and their activities, ask us or come to our meetings. We promise not to bite.

Tiata Barbieri
Campus Greens member

Hypocrisy, bias and Yellow press?

Dear Editor:

Is it the Pointer's goal to be a fair, unbiased source of information on the UWSP campus? If so, there is much work to be done. Just flip through an issue if you don't believe it. (March 12 is the best example.)

On page 3, there was a very clear editorial against the Swise suit issue. The Editor's stance against stereotyping of women as objects in the media was well taken.

However, the Pointer staff chose to accompany the article with a cartoon depicting readers of the issue as leering, backtooth pubeftressentals. Is it really fair to blast stereotyping, and then turn around and stereotype someone else?

A terrible show of sensationalism came in the same issue, in the profile of Dr. Bill Heitter. Next to the picture of Dr. Heitter was the boldface quote, "I was indeed forced by the committee, I hold no grudge."

From this quote, one would come to the conclusion that the meat of the article was about some scandal. But it wasn't. Until the last paragraph that the quote was printed in, a brief mention of last semester's harassment charges.

This brief quote was plucked out of the article, and made to seem as if it represented the content of what was written: what WAS written was an upbeat article containing many upbeat views on life.

Come on, Pointer! UWSP doesn't need this kind of hypocrisy, bias and "Yellow Press." Mark Woodruff

Employee speaks out against Nelson Renovation

Dear Editor:

I feel the need, as a concerned employee and taxpayer, to comment on the proposed renovation of Nelson Hall in the coming 1993-95 budget. I've been a university employee for ten years and have seen what I believe were numerous examples of waste when it came to remodeling projects on this campus; but the proposed project for Nelson Hall will surpass all of those projects.

Greg Diemer states, "It would make more sense to renovate than tear down." Who is he kidding?

3.2 million dollars is more than enough to tear down Nelson, haul away the demolished material and erect a modern, efficient replacement structure.

The current structure has numerous lab spaces, inadequate heating, ventilation and cooling, poor handicapped access, no loading dock facilities, poor storage, and general deterioration of the exterior.

Window walls and frames show evidence of rot, mortar is breaking down on areas of the exterior walls. Floors are not level, walls are not square or true. Plumbing is archaic, wiring meets codes, but does not provide service for modern applications.

In previous remodeling projects (which have already cost thousands of dollars) attempts have been made to upgrade the facility to today's needs, but the structure remains an inadequate first hazard (there are areas of double walls and ceilings which can conduct fire undetected).

A modern facility would fit into the present neighborhood. It would incorporate energy saving systems and be a better use of floor space. UWSP employees are to service and maintain. I am absolutely convinced that the modern three-story building with a basement would have more usable space than the present building.

Who cares about historical sentimentality when 8 million dollars of taxpayer money is at stake? It simply makes no sense.

There is clearly a need for office space on this campus. Let's address that need logically. Please don't throw good money after bad. We need fiscal responsibility more than ever, and we need less sentimentality.

UWSP basketball supports team

Dear Editor:

I would like to thank the UWSP basketball team for a memorable Spring Break. It was so exciting to watch one of our many outstanding teams compete in a national tournament. I was in awe at the number of Pointer fans who traveled to Kansas City. It was our players. There were over 300 of us, the largest group representing UWSP who were sitting in the stands anxiously waiting for our team to appear on the court.

As they emerged from the locker room, Kemper Arena was filled with our voices cheering them on as we were all up in all the excitement. Even in the second round, after our unfortunate loss, there was still a sense of pride for each and every player who played his best all year to get us to the point.

If tears were seen, they were fallen out of the sadness of a great season coming to an end. Thank you once again to all of the coaches for the hard work and dedication, but most of all to the players for allowing us to be part of such an experience.

Pointers pass title torch to Plattsburgh State
Finish 91-92 campaign with NCHA titles and 25-7-4

by Tom Weaver

Contributor

If one needed to sum up the 1991-92 Pointers hockey season in one word, a good word would be fantastic. For the fourth straight season, the UW-Stevens Point hockey team has provided Stevens Point with a team at the pinnacle of Division III hockey. How might a sign ask a reader from the 1992 Division III Final Four with a second place trophy caption? "It's pretty simple.

Most teams would kill for a chance to ever work their way to the final four, yet alone have a three-point lead with a second place trophy at the final four, yet alone have

We see that the Pointers split the two games against St. Thomas and won the mini-game to advance to the Final Four in Plattsburgh State, New York last weekend.

Pointers fall to Erskine in second round of NAIA tourney

End season with WSUC and District 14 titles and 27-2 record

by Mark Gillette

Sports Editor

Arguably the first NAIA Division I playoff game in Kansas City over Western Colorado State of the Heart Indians for Men's basketball last season, the game was not an easy one as they had to battle it out in overtime to win the game. Western Colorado State Mountaineers came, but Western Colorado State is on a different scale and was facing the number two team in the nation, which was televised nationally on ESPN.

Unfortunately their hopes were deflated in the second half of the game, the Mountaineers were not able to come back from a 53-48 deficit with 30.3 seconds remaining. The game was a key game for us down to the wire, not being able to score.

Jon Julius (File Photo)

"Justin Fechter scored the last four goals against Salem State of Massachusetts, while the Cardinals of Plattsburgh State defeated UW-Superior 8-5 in the other national semifinal contest.

The Pointers road to the title site was not as easy as they were pulled into overtime with a 2-1 advantage to begin the conference.

"We really turned things around and were able to take charge of the game," said Baldwin. "We had a bunch of sharks, once we smelled blood, we started to circle around and go in for the kill. Salem goal tender Mike Gregorio was pulled after the sight goal barrage in favor of Joe Bonvie for period number three."

Jeff Marshall promptly greeted the freshman net minders ten seconds into the period with a slap shot that whistled through the upper corner, giving the Pointers the 10-3 lead.

The Vikings kept things close thanks to Sandro Pendemus' hat trick, but the Pointers held on for our defense was out of sync. Their poor offensive performance was reflected in their 39.1% field goal percentage (21-54), including only 6-21 from three-point range (28.6%). The Pointers mounted a comeback in the final five minutes which saw them tie the score at 64 with a free throw on a Lesbian baseline jumper from Boario. The Flying Fleet's Joey Rice put them up 66-64 with 1:00 remaining.

A Pointers opener was called when 7:30 is 5-2 to the final play. "I wanted Boario to take the ball to the rack. I was hoping he would get fouled and I wanted to put the ball in my best free throw shooter's hands. When Boario got the ball Erskine sagged in the lane after our guys cleared it for him. He had no opportunity to go in. Instead, he fell back and took a shot that wasn't very good," said Parker.

Parker believed that the Pointers were not being able to capitalize late in the first half on an opportunity to build their lead into double figures was a key factor in the game.

There were times in the game when we made frantic plays. We should have a 15 to 20 point lead at the end of the first half, but we made silly-aside plays which kept our lead at only five. We just didn't drop the guillotine on them," Parker added.

The Flying Fleet, down 37-32 at halftime, scored the first eight points of the second half to take a 40-37 lead. "Erskine is a good basketball team. They were better than anybody we played all year long. They are a tremendously quick team," said Parker.

Mike Harrison (File Photo)

Doug 43-37 with 8:51 to play in the game. UWSP went on an 11-2 run to take a 48-44 lead, concluded in this sport was an Andy Boario three-pointer to put the Pointers up for good 46-44 with 6:03 left in the game.

Steve Fendry of the Mountaineers counted Boario's try with one of his own to close within one.

Justin Fechter scored the next four points, one of his own to close within one. Fechter added nine points, including a three-pointer with 2:17 to go, to help maintain the Mountaineers lead. He was fouled and made both free throws with 3:03 left.

Colorado called another timeout with 1:13 left. UWSP fouled Boario for his second, and Boario added a three-pointer with 9.6. He was fouled and made both free throws to advance the Pointers to the next night against Erskine.

Senior Jon Julius led all scorers with 16 points, Boario had 15 and Jack Lothian had 13 for the Pointers. Along with his 13 points, Lothian had 9 rebounds and five blocked shots. Fechter had a game-high 11 boards.

"Jack Lothian did a great job inside. We saw early that we needed to get him the ball and he did them things we need him to do," said Parker.

Western State was led by Mike Touchton with 14 points and 13 rebounds, 6 assists, 6 free throws with 3:03 left.

Steve Fendry of the Mountaineers counted Boario's try with one of his own to close within one.

Justin Fechter scored the next four points, one of his own to close within one. Fechter added nine points, including a three-pointer with 2:17 to go, to help maintain the Mountaineers lead. He was fouled and made both free throws with 3:03 left.

Colorado called another timeout with 1:13 left. UWSP fouled Boario for his second, and Boario added a three-pointer with 9.6. He was fouled and made both free throws to advance the Pointers to the next night against Erskine.

Senior Jon Julius led all scorers with 16 points, Boario had 15 and Jack Lothian had 13 for the Pointers. Along with his 13 points, Lothian had 9 rebounds and five blocked shots. Fechter had a game-high 11 boards.

"Jack Lothian did a great job inside. We saw early that we needed to get him the ball and he did them things we need him to do," said Parker.

Western State was led by Mike Touchton with 14 points and 13 rebounds, 6 assists, 6 free throws with 3:03 left.

The Pointers added another game to their school record winning streak with their 22nd win in a row.

Down 43-37 with 8:51 to play in the game. UWSP went on an 11-2 run to take a 48-44 lead, concluded in this sport was an Andy Boario three-pointer to put the Pointers up for good 46-44 with 6:03 left in the game.

Steve Fendry of the Mountaineers counted Boario's try with one of his own to close within one.

Justin Fechter scored the next four points, one of his own to close within one. Fechter added nine points, including a three-pointer with 2:17 to go, to help maintain the Mountaineers lead. He was fouled and made both free throws with 3:03 left.
Five Pointers place at track nationals in Point
by Mike McGill
Sports Writer
The UWSP Indoor Track team led by coaches Len Hill and Rick Witt, started its spring break a little later than most students as it hosted the 1992 NCAA Division III Indoor Track and Field Championships on Friday, March 13 and Saturday, March 14.

Overall, the women’s team finished in a five-way tie for 20th place with four points, while the men’s team ended up deadlocked with four other teams in 14th place with eight points.

Sophomore Dean Bryan took first place in the 400m at 48.79 in the second heat race. He followed that run with a 48.67 second effort in the final heat, besting the NHSI record.

Despite the team not placing in the final heat to place third in the division, senior John DeWitt was pleased. "Our qualifying is coming around," Otte said.

In the 2000m, junior Aimee Knitker took eighth place with a time of 7:55:09, while junior Suzy Jendrak ended up fifth place behind Knitker with a 17:52:01 time.

After the match, Coach Witt seemed relieved that the ordeal of hosting the nationals was over. "Our runners weren’t getting any attention—it was more administrating than training," Witt said.

Pointer baseball starts season with 7-5 record
by Brady Kiel
Contributor
The UWSP Pointer baseball team opened its season on a spring trip to Missouri last week.

The Division III Pointers faced a lineup of quality division II schools and held their own by compiling a 7-5 record. Coach Guy Ott was pleased with the team’s first outdoor contests.

The Pointers led off the week with a two game sweep of Southern Indiana on Tuesday.

Starters Pat Wolf and Chris Combs picked up victories and Kory Kueger saved. Rick Wagner slapped two doubles in the first contest and Don Radomski collected three RBIs in the second.

The College of the Ozarks then dealt the Pointers their first two losses. The Pointers responded by edging Hannibal-LaGrange and rolling to a 1-0 victory over Doomed.

Starters Pat Wolf and Chris Combs picked up victories and Kory Kueger saved. Rick Wagner slapped two doubles in the first contest and Don Radomski collected three RBIs in the second.

The College of the Ozarks then dealt the Pointers their first two losses. The Pointers responded by edging Hannibal-LaGrange and rolling to a 1-0 victory over Doomed.

South Dakota then beat UWSP 7-3, a home run and two RBIs from Matt Kohle.

Nine swimmers earn All-American honors
by Deb Fullmer
Contributor
UWSP women’s and men’s swim teams competed at their first NCAA championships at the RAC Natatorium in Buffalo, New York on March 12-14 and 19-21 respectively. The women placed 20th with 20 points and the men placed seventh with 144.5 points.

"We were a day and a half late arriving in Buffalo for the women due to the weather conditions which I feel were a factor in our swims. We swam alright but we didn’t have the times that we had at conference," Witt said.

We also began the meet with a disappointing swim as our 200 freestyle relay (Hubbard, Beier, Hahn, Pauoch) was disqualified. We kept our heads together though and came back strong," said Head Coach Red Blair.

Amy Hahn, Tracy Beier, Nan Warlin, Tiffany Hubbard, and Julie Pausch swam in Buffalo to represent the UWSP women’s team. All five of these women scored points and came home as All-Americans. "Nan Warlin is truly one of the premiere butterfliers in the country. She didn’t get the time she wanted in preliminaries to qualify for finals, but she came back and gave everything in the consolation heat of finals, putting her in ninth place with a time of 2:09.57. This time was, however, the sixth fastest in the meet," said Blair.

Thursday, the 400 medley relay (Pausch, Hubbard, Warlin, and Hahn) placed 20th with a time of 4:11.52.

Friday, the 200 medley relay (Pausch, Hubbard, Warlin, Hahn) placed 16th with a time of 1:55.85, and Nan Warlin placed 10th in the 100 butterfly (29.41).

Saturday, Nan Warlin placed ninth in the 200 butterfly (2:09.57), and the 400 freestyle relay (Hahn, Hubbard, Pausch, Beier) placed 16th with a time of 3:46.89.

Matt Boyce, Jerry Curtin, Christian Boyce, Juan Cabrera, Kevin Gelwicks, Brandon Koll, Tim Lehmann, Todd Neuried, Troy Sibbers, and Jay Stevens were representatives of the UWSP men’s swimming and diving team in Buffalo this year.

All of them came back as All-Americans as they performed excellently in their first NCAA level competition.

The men’s 200 freestyle relay (Lehmann, Cabrera, Curtin, Neuried) started the men off with an incredible fifth place finish with a time of 1:24.17.

Also on Thursday, Tim Lehmann placed 11th in the 50 freestyle (21.23), and the 400 medley relay (Sibbers, C. Boyce, Cabrera, Neuried) placed sixth with a time of 3:29.25.

Friday, the 200 medley relay of Sibbers, C. Boyce, Cabrera, and Lehmann placed 10th with a time of 1:34.63.

Juan Cabrera swam strongly to a second place finish in the 100 butterfly with a time of 49.80 missing first place by only .11 of a second.

Matt Boyce placed 11th in the 100 breaststroke (58.88) with Christian Boyce placing 15th (59.22).

Saturday, Juan Cabrera tied for fourth place in the 200 butterfly with a time of 1:52.56, Kevin Gelwicks placed 14th in the 200 breaststroke (2:10.57), with Christian Boyce placing fifth also in the 200 breaststroke with a time of 2:11.69.

The 400 freestyle relay of Lehmann, Cabrera, Curtin, and Neuried finished with a time of 3:12.24 to place fifth overall.

"Our divers performed very well at the national meet especially when you look at the caliber of people we dove against. We saw some very intense competition here as did the swimmers. Brandon and Jay kept their heads together throughout the meet which is a must to dive as well as they did," said Head Coach Scott Thoma.

In three meter competition, Brandon Koll placed 12th with 354.70 points and Jay Stevens placed 16th with 329.55 points. In the one meter, the team had Pat Wolff in second with 354.70 points and Jay Stevens placed 12th and Koll placed 16th.

"There is no one answer to why some swimmers or divers were better than others at this national meet. We swam fast, dove well, and did a nice job which to me is an incredible strong season," concluded Blair.

"We were able to hit the big things, but the little things that make the difference suffered a little bit. Despite all of the pressure, I think all of our kids performed well.

"Our hitters were no slams for sure but we wanted to hit on our pressure point and we did that," Ott said.

Matt Boyce said the winning margin against Mount St. Mary’s was 9-0.

"We’re proud of what we did but we want to improve," Matt Boyce said.

Meanwhile, the baseball team has started the season with a 7-5 record. The team is eagerly awaiting the beginning of the outdoor season. "A lot of the pressure is off now. We’re looking forward to a clean start."

of a dry campus.” He says this experience showed him, “what students can do when they put their minds to it.”

Throughout his college career leadership positions—wing representative, hall representative, and RHA facilitator of the Hall Presidents Council, Grassl has created a strong positive opinion of action. “I used to think ‘I’m just one student, I can’t change things’ but the anti-dry campus strategy proved to me that students do have power. I’ve been representing them ever since.”

Walsh from page 1

though he likes to hunt bear and coyote, also. Characteristically, Walsh’s academic goals are related to the work he loves so much. He is a junior majoring in urban forestry with a resource management minor.

Walsh doesn’t think his lack of Student Government experience (he has never held a position there) is a reflection of his actual level of student involvement.

As Baldwin Hall President for three and a half semesters, Walsh says he liked that he was given opportunities to change policies in order to help people. He tells a story of a Baldwin resident who lost an 18-page paper on a computer in the residence hall lab because the computers were shut off for closing.

“The next day we implemented a policy that kept the labs open 24 hours a day.”

Walsh, who says he is, “basically tired of paying more and getting less,” claims his reasons for running for office are different than those of most candidates. “My motivations aren’t really political, and the experience really won’t help me in my tree service career. Mostly, I look forward to dealing with and helping the students.”

Most of Walsh’s friends don’t think he’s quite the type to run for political office. Walsh says that perhaps in filling the “most influential role on campus in the way of helping students,” he hopes to “break the mold.”

Baseball from page 7

but their progress is great for this time of year.”

Otte also stated that Stevens Point will be bucking for the conference title this year. “Ohkosh is always tough and Whitewater has benefited with players from the defunct Madison team. But we have almost everyone back and they know they can play with these teams and win. Our chemistry is excellent!”

The Pointers open up their home season Friday, April 10th at 1:00 pm against their strong rival, UW-Oshkosh.

FOR PEOPLE WHO
THINK THERE’S MORE TO
LIFE THAN A PAYCHECK.

If you're a young man or woman looking at a humdrum future, there's a challenging alternative - the Army.

Not just the more than 200 skills to choose from, but the lifestyle. The chance to travel. To become fit and trim and overcome your mental and physical limits. To do things you didn’t think you could do. To be proud of yourself and your country.

And you get a pretty good paycheck, too.

Call: (715) 344-2356

ARMY. BE ALL YOU CAN BE.
Hockey
time record Naegelis' 1,649 , ending the Pointers strong-54 mark.
that the Pointers were whistled for coincidental penalties. The Pointers had just scored on Paul Caufield's powerplay goal, but got whistled for coincidental penalties at the 5:54 mark.
ning at 4:1-1. The five on three powerplay goal came with just 19 seconds remaining in the period and could have been a huge boost of energy for the Pointers, but instead it fuelled the fire of the Cardinals.
"That was a huge point in the game," said Harrison. "If we could have killed off those two penalties, it would have been a whole new game. It would have been a real shot in the arm for us," said Baldarotta.
Plattsburgh increased their lead to 5-1 on Larry Zinger's shorthanded goal at 7:11, but the Pointers were about to relinquish the title without a fight.
"It was a great season." said Grant McDonald, steamrolled through a few defenders and kicked the puck back to Marsan. Marsan beat Plattsburgh goaltender Mike Mondello to make the score 5-2 with 11 minutes left.
Things get even closer on Scott Krueger's shorthanded goal with 5:23 remaining, giving the Pointer faithful on hand a ray of hope.
Plattsburgh erased the Pointer ray of hope at the 17:31 mark on Harrison's goal, and Matt Portudio added an empty net goal to produce the final score of 7-3, ending the Pointers strong-90 mark.

Basketball

last year, and did everything we had to do to reach the finals. We left Stevens Point for Plattsburgh as winners and came back as winners. Everyone from the players to the coaches and managers and anyone who helped us out made this a fabulous experience. Without everyone's help, we couldn't have had the year we did," said Baldarotta.

WHY YOU SHOULD START PLANNING FOR RETIREMENT WITH YOUR EYES CLOSED.

For retirement to be the time of your life, you have to dream a little—about the things you've always wanted to do: travel, explore, start a business. Just imagine…

With a dream and a plan, you can make it happen. Your pension and Social Security should provide a good basic retirement income, but what about all those extras that make your dreams possible? You'll probably need some additional savings.

THE DREAM IS YOUR OWN. WE CAN HELP YOU WITH THE PLAN.

TIAA-CREF Supplemental Retirement Annuities (SRAs), tax-deferred annuities for people like you in education and research, are a good way to save for retirement and save on taxes now. SRAs are easy—you make contributions through your institution before your taxes are calculated, so you pay less tax now.

You pay no tax on your SRA contributions and earnings until you receive them as income. And saving regularly means your contributions and their earnings can add up quickly.

What else makes SRAs so special? A broad range of allocation choices, from the safety of TIAA to the investment accounts of CREF's variable annuity; no sales charges; a variety of ways to receive income, including annuities, payments over a fixed period, or cash. You may, also be able to borrow against your SRA accumulation before you retire.*

All this, plus the top investment management that has helped make TIAA-CREF the largest retirement system in the country. So start dreaming and planning for the time of your life. Because the sooner you start your SRA, the greater your savings and your retirement will be.

START PLANNING FOR THE TIME OF YOUR LIFE, TODAY.

For your free TIAA-CREF Supplemental Retirement Annuity Kit, send this coupon to TIAA-CREF, Dept. Q.T., 730 Third Avenue, New York, NY 10001. Or call 1 800 842-2733, Ext. 8016.

Danstage highlights campus talent students/faculty to display fancy footwork

A piece dedicated to the "enormous influence which African music and dance rhythms have had on American culture" will open the annual Danstage production at 8 p.m., Friday, April 3.

The program, choreographed by faculty and performed by students, will continue at the same time on April 4 and 9-11, at 7 p.m., Sunday, April 5 in the Jenkins Theatre of Fine Arts and Communication box office, (715) 346-4100.

Choreographed by Susan Gingras of the dance faculty, the opening number is conceived and created by Gingras, a specialist in liturgical dance, and Steven P. Sendzki, a local musician and 1986 UWSP dance graduate. Gingras says the piece evolved from a desire to bring American spirituals, tap and modern dance to the stage in a single work. It features vocalist Karen Horwitz, seven tap dancers and four modern dancers.

Second on the program is "Tight Squeeze," a humorous duet choreographed by Gael Stepanek to music by Richard Miler, with costumes by Madeline Higgins of the theatre arts faculty. Originally created in 1978, the piece "keeps an ongoing rhythmic and locomotor continuum."

The inspiration for Joan Kafes's "Muri: The Bringer of War and Venus: The Bringer of Peace," came from Gustav Holst's symphony "The Planets." During the rehearsal of the first movement, Sergeant Peter Linn, a music major, wanted to incorporate his military drills into the 10-member cast.

The motions were altered and incorporated into the choreography. The second movement features Laura LeGault, a first-grader at St. Joseph's School, as the "young Venus, whose presence restores peace to the community." The set is designed by Gary Olsen of theater arts and the costumes are by Higgins. The last half of the concert includes another work by Stepanek and two by James Moore. Stepanek's "Personas," set to music by Pittsburgh composer David Stock, was created within the Music and Dance Project at the American Dance Festival, Durham, N.C., in the summer of 1980. The dance explores "the illusion of merging shapes and extended time durations."

The costumes are by Martha Yoshida.

Nine dancers will help choreographer Moore salute Italian composer Gioacchino Rossini on the event of his 200th birthday. Born on Feb. 9, 1792, Rossini would actually have experienced his 50th celebration this year.

In honor of the joke played on the composer by both life and death, Moore has created a comic abstract work set to the overture from "The Italian Woman in Algiers." The dance recreates a situation whereby a choreographer has made some extensive changes in a piece just before curtain time.

The finale is Moore's adaption of Jerome Robbins' "N.Y. Export Opus Jazz," performed by the full company. The piece, originally choreographed for Gian Carlo Menotti's "Festival of Two Worlds" in Spoleto, Italy, was set to music composed by Robert Prince. A direct result of Robbins' work on "West Side Story," it depicts the antiestablishment American feelings of the youths of the fifties.

The Pointer Poll: What characteristics are you looking for in the next SGA president? (Compiled by Julie Aper and Al Crouch)

"I feel UWS's next president must be a student leader who is not afraid to be outspoken. We need someone who is able to raise awareness about the student's emotions about the current issues affecting them."

Name: Brady Kiel
Year: Junior
Major: Political Science
Hometown: Ashwaubenon

"A truely charismatic leader, that can actually get more than one or two percent of the student body involved in the important issues facing students in the UWS. Also, someone who can get the students more parking!"

Name: Hihn Phouybanhdyt
Year: Senior
Major: Psychology
Hometown: Waukesha

"I would like to see the next SGA president establish a more close knit student body. Being a member of several student organizations has made me realize the importance of interorg on campus because we are overlooking a lot of our resources. I hope the new president will be able to create programs through student government which will help us learn more about ourselves."

Name: Tobi Jacobi
Year: Freshman
Major: English/Education
Hometown: Wautoma

"I think the next SGA president should have an outgoing personality, a good academic standing, and be able to draw attention to the needs of the student body."

Name: Hihn Phouybanhdyt
Year: Senior
Major: Psychology
Hometown: Waukesha

"Final Analysis" flunks thriller test

by Dan Seeger
Contributor

The immense successes of "The Silence of the Lambs" and "Cape Fear" insists that 1991 will be remembered as the year of the thriller in movieland.

It also insured that 1992 will be the year of quickly-made, cheap spin-offs trying to capitalize on the prosperity of those releases. In fact the new year has already seen the release of "Final Instinct," a blundering knock-off of a movie trying to pass as an erotic thriller.

At least one film among the new and ever growing crop of thrillers actually held some promise, though. "Basic Instinct" from director Paul Verhoeven ("Total Recall" and "Robocop") promised to be a tense, steamy cop drama with plenty of twists and turns to keep the audience reeling. Unfortunately, the film is simply too convoluted to be effective storytelling.

Graduating students can now check their bids on the student directory online. To access it, students must log in and select "directory" from the menu on the left side of the page. The directory can be searched by name, major, or date of graduation. Each entry includes a photo, name, address, phone number, and email address. Students can also use the directory to look up potential roommates or employers. Just be sure to check your information for accuracy before submitting it to the alumni office.
Changes proposed for '92 gun deer season

Proposals to add a week to the Wisconsin deer hunting season would add opportunities for deer hunters and wildlife managers alike, according to Bill Ishmael, Department of Natural Resources deer, bear and furbearer ecologist.

Unseasonably mild winters over the past several years have maximized reproduction in the state's whitetail deer herd. Ishmael said this has produced record numbers of deer.

"One of the most obvious benefits is that a 16-day hunting season will give hunters more opportunity to hunt," said Ishmael. "It doesn't mean each hunter will have to hunt longer, or hunt the entire season—they certainly can if they want to. But it will give flexibility in allowing more hunters time to get out to hunt."

"Other states have found that hunter pressure tends to spread out with a longer season, decreasing the daily pressure and improving the quality of the hunt," he said.

Gun hunting harvests have averaged 347,000 deer in each of the past two seasons and new harvest records have been set it the last three consecutive years. Ishmael noted that under ideal conditions, harvests are very prolific and without harvest can double their numbers every two years.

"Another benefit of a longer season is to improve hunter/landowner relations by decreasing the impact of hunting space in a short period of time," Ishmael added.

The department is proposing a 16-day gun deer season with the traditional opening day on the weekend before Thanksgiving to start in 1992. In addition, the department is proposing a 16-day season with the season opening in mid-November for the 1993 gun deer season.

The tradition of having the Thanksgiving week within the season will be kept with each of the 16-day season formats proposed. A 16-day hunt format will add a week's weekend for hunters to be in the field. Students would potentially be able to hunt eight days (including the traditional Thanksgiving Thursday and Friday school closings) if they have to miss school during the week.

Work schedules would also potentially be disrupted less under a 16-day format, with workers able to plan leave-time for either the first or second week.

"Weather will not be as much of a limiting factor in achieving harvest goals with a 16-day season," Ishmael said. "Bad weather, like in 1991, during a short season can and will lower the harvest of the deer herd, which does not allow us to reach our antlerless harvest quota."

Hunting seasons are designed to manage the state's deer herd as well as provide hunting and other deer-related recreation.

Ishmael said that within the framework of social acceptance of deer numbers, harvests are designed to prevent habitat destruction and maintain the long-term health of the deer herd.

Whitetail deer populations, like populations are dynamic. Given the explosive nature of deer numbers, their populations can be greatly reduced by starvation during just one severe winter. The damage caused to the habitat is a much longer lived problem. A habitat stripped by famished whitetails can take years to recover.

"In a 16-day season with an earlier November opening, bow hunters would lose three season days over an eight-year period," Ishmael said. "A 16-day season with the traditional opening on the weekend prior to Thanksgiving would give bow hunters only a two-day conflict on the opening weekend of their late season."

With a 16-day season opening a week earlier than the traditional weekend before Thanksgiving, bow hunters would be allowed to hunt through the Thursday prior to the opening of the gun season. At present, the bow hunting season ends on the day the gun season starts.

With the growing whitetail deer herd, necessary high harvests are being compressed with a nine-day season framework. If deer harvesting goals are not met, deer could potentially starve during a severe winter or a large percentage of the herd might be depleted through over-browsing.

The quality of the hunt is also diminished by large numbers of hunters competing for limited hunting territory in many parts of the state.

"Several management needs and hunting-quality concerns can be answered with a 16-day hunting season format," Ishmael concluded.

Handicapped anglers need not miss out on the action of the upcoming walleye run. A fishing pier completed late last summer now provides wheelchair-access to a hot-spot below the DuBay dam. The pier is fully railed and is located on the HWY 10 side of the dam. (photo by Buck Jennings)

DNR wants input on all '92 rule changes

MADISON, W. — Wisconsin residents have an opportunity to vote on proposed fish, game and conservation rule modifications at the annual spring hearings held in each county on April 6.

Advisory questions from the Natural Resources Board, the Department of Natural Resources and the Wisconsin Conservation Congress will also be discussed and voted on. Department personnel will be at each hearing location to answer questions.

Some of the proposed rule modifications to be addressed include:

- Establishing a bobcat quota and permit system;
- Increasing bear population goals in northeast Wisconsin;
- Establishing a crow hunting season;
- Changing smallmouth bass fishing regulations in Lake Superior to allow only catch-and-release during May and early June;
- Establishing urban fishing regulations in southeast Wisconsin that would allow a year-round season and daily bag limits of one game fish and 10 panfish;
- Increasing the minimum size limits for rainbow trout (steelhead) on Lake Superior tributary streams from 12 to 26 inches;
- Closing the early trout season in southeast Wisconsin for three years beginning in 1993.

The hearings also provide a forum for the election of county delegates to the Wisconsin Conservation Congress. The congress serves as an advisory group to the Natural Resources Board.

Eligible candidates include any county resident who is not employed by the Department of Natural Resources or who is not a member of the Natural Resources Board.

UWSP considered for EPA Env. Ed. program

The Environmental Protection Agency is sending an evaluation team to UWSP in early April to examine a proposal to operate a new National Environmental Education Training Program here.

It was originally thought that EPA would be trimming from ten to three the number of schools being considered for the program, but several days ago a decision was announced that such eliminations would not take place and all ten of the finalists would be visited.

"I think our chances of getting this are probably 30 to 40 percent," said Rick Wilke, associate dean of the UWSP College of Natural Resources and coordinator of UWSP's proposal.

A final decision on the selection of a host institution for the center is expected sometime in May, Wilke added.

The associate dean has special insight into the matter because he is chair of a newly formed National Environmental Education Advisory Council. Federal legislation mandated formation of that 11-member group and also establishment of an environmental education program.

About 280 institutions and organizations submitted proposals. The number was trimmed to 80 in the first round.

Continued on page 15
Outdoors writing course at UWSP

Richard Behm, creator of numerous stories for the nation's leading hunting and fishing magazines, is using his publishing influence to teach a new course on outdoor writing at UWSP.

"Students were the impetus for this," he says of his reasons for developing the specialized offering in the UWSP Department of English.

A growing number of English majors have, in recent years, requested him to oversee independent study in the outdoor writing field.

"I was asked to do research on the outdoor writing field, and his proteges in prose represent a vast diversity of thought about the out-of-doors. Half of the approximately 20-member class is concerned foremost with environmental matters, he explains. The others are more traditional in their love of hunting and fishing.

"To surprise, however, there have been some lively class discussions from time to time between pro and anti hunting and fishing factions. "I want the creeps into the communication 'turf' writing through effective modes of environmental protection and management," Behm says. He's also interested in a project of translation for the popular audience.

Writing is approached from different perspectives. Class members are encouraged to test out-of-doors products and make comparisons, then write about their findings. Another exercise is to make a stab at using humor in outdoor writing. Short story writing is also pursued.

In the latter, Behm has broad experience. His articles have been published in Sports Illustrated, Sports Afield, Field & Stream, Gray's Sports Journal, Wisconsin Sportsman, Wisconsin Trails, Minnesota Sportsman, and Sporting Classics.

His fictionalized article, "Images of Autumn Past," appears in the current Peterson's 1992 Annual Hunting.

The January/February edition of Sporting Classics includes a feature piece, "I Was a Kid of the King," in which Behm reveals: "There was no doubt. Here I was at Lulu's Bun, Bait, and Tackle, staring right into the blue eyes of ol' Elvis himself. And not only was he alive and well, he was fixin' to go fly fishing."

Behm says he thinks there is a definite place for fiction in outdoor writing. He also contends that much more could be done in this field based on a writer's personal research, as opposed to constant reliance on personal experiences.

"The Me and Joe stories are, by and large, dead," the professor argues.

Behm, the outdoor philosopher, tells his students that when they write for others, they should consider that many people "go into the wilderness but do not become a part of it." In fact, how do we become in tune with certain kinds of harmonies and rhythms of life that are found there?

He also points out a paradox. While a growing number of people express a desire to be in the wilderness, many are retired by it. For them, reading about the out-of-doors may be satisfying their curiosity, he speculates.

Behm sees opportunities for outdoors writers in the growing number of outdoor topics and bookstore inventories. The successes of some of his former students are additional indicators.

Two young alumni who have done fine work in this field are Chris Dorsey from DeForest, Illinois and Dan Dietrich from Red Wing, Minnesota. Dorsey is now serving as feature editor of the Los Angeles-based Petersen's Hunting while Dietrich is editing North American Hunter in Minneapolis.

A special project Behm has for each of his students this semester is identifying outdoor magazines, closely examining the kinds of articles they publish, then composing the kinds of pieces they use.

Meanwhile, the professor, who tries to set time aside for writing each morning, doesn't limit his own work to out-of-doors topics. He's also interested in poetry and fiction, and some pedagogical articles about writing. In 1990, he won the annual award given by the National Writing Centers Association.

Invest in your future, adopt a tree

Members of the Society of American Foresters (SAF) will be planting trees for Earth Week. They would like your help.

Trees will be sold for $30 each, or 3 for $1. Trees can be purchased in the CNR concourse, Debot or the UC Concourses from 8-11 a.m. this week and next. They may also be bought through campus mail. (Mail to Society of American Foresters) Actual trees will not be received, but will be purchased and planted by members of the SAF.

Purchasers will be recognized in CNR display.

The money that is raised will also be used to fund the students' efforts to continue pulp cut class, and will be used to contribute to the National Convention of the SAF.

For further information, contact Vic Newhouser at 346-3110.

EPA Continued from page 14

of cuts and then to 10 in the next round of eliminations.

Finalists, besides UWSP, are Purdue, Ohio State, and the Universities of Michigan, Maryland, California at Davis, Tennessee, and Kansas, plus the National Geographic Society and the Alliance for Environmental Education, both in Washington, D.C.

Wilke, he believes UWSP's proposal will go far because of its own longstanding involvement in conservation/environmental education, the reputation of its faculty, and its proposed consortium to operate the program.

UWSP would draw on expertise and services of Rutgers University in New Jersey; the National Wildlife Federation, largest citizen conservation group in the world with four million active members; Southern Illinois University in Carbondale; Northern Illinois University in De Kalb; National Association of Conservation Districts, with staff in 3,000 counties in states across the United States; Project Wild and Project Learning Tree; the Wilderness Society; North American Association for Environmental Education; UW Extension; and the National Cooperative Extension Network.

Uncle Sam would provide $1.7 million toward the project annually, but in-kind contributions from the institutions in the consortium would push the value of the grant to $2.5 million.

Faculty of whichever institution wins the program will host teachers from all parts of the United States on their campus for periodic programs and workshops. Groups from the center also will be taking offers on the road, and educational materials will be developed and evaluated.

from page 10

with Stone even though she may be a murderer. He’s constantly changing his mind about whether or not she’s the killer. This plotline has been done before, and better, in films such as "Sea of Love" and "Jagged Edge", and comparisons to "Fatal Attraction" aren’t just because Michael Douglas stars in both. Just like that mid-80’s morality tale, "Basic Instinct" delivers the heavy-handed message that sex is dangerous. Additionally, the film tries so hard to keep the audience guessing on the identity of the killer and the true connection between characters that in the end it’s just plain confusing. The script by Joe Eszterhas raises more questions than it’s ready to answer and packs the film with so many false clues that it becomes hard to figure out which clues are actually real and what exactly they’re supposed to reveal. It takes more than bold sensuality and stylish photography to make an effective thriller. It takes a cogent, intelligent story, original ideas, and meaningful elements that "Basic Instinct" is sorely lacking.

"I don’t have any hard evidence, Connie — but my intuition tells me that Ed’s been cross-pollinating."

**THE FAR SIDE**

By GARY LARSON

"Science offers truth, it may not offer a solution."

Thomas from page 11

"Science offers truth, it may not offer a solution."

... explained Thomas. "We have found that educational opportunities about these topics are lacking for women. CNR faculty and members of sport clubs serve as instructors for the classes, which include hunting, fly fishing and canoeing."

Thomas is coordinating a special event for students, community members and communication professionals interested in environmental communication entitled “Walking the Tightrope of Environmental Journalism.” According to Thomas, effective communication abilities will be very important skills for natural resources students to have in future years. She believes that having a technical specialty will always be valuable but environmental professionals will now need to also apply communication skills in order to help make their communities better places to live.

"Communication is a two way street, and agencies need to listen to the public in order to apply the technical knowledge," stated Thomas. "Controversies such as the 16-day deer season are the result of ineffective communication. Although science offers truth, it may not offer a solution."
