Summer school takes rap in budget cuts
Student Government poll reveals many concerns

by Goli Ferraro
Contributor

The Student Government Association and the University Planning Committee surveyed 973 UWSP students recently to seek input on the fate of the summer school program.

The survey asked students if they felt summer school should be continued and where the class concentration should be focused. Ninety-eight percent stated, "Yes, summer school is needed."

The number of courses and seats offered per class during the summer are being dropped drastically due to budget cuts. In order to make the cuts, students need to choose whether general degree requirements or major core classes are more important.

The results showed students need both GDR's and core classes during the summer session.

Chancellor Sanders forced to make decision in fate of English Language Institute

by Paul Matsuda
Staff Writer

A list of recommendations that would dramatically change the structure of the English Language Institute at UWSP has been forwarded to Chancellor Keith Sanders for action.

The English Language Institute Review Committee submitted the recommendations to Sanders urging him to either implement the committee's recommendations as stated or eliminate the program completely.

The recommendations include the plan to rename the program as "English for Foreign Students," and to place it under the direction of the English Department. The program is currently under the Division of Student Life.

The recommendations also state that the Foreign Student Office will "provide support for all foreign students on campus."

The office will have no supervisory or administrative capacity over EPS.

The Review Committee was appointed by Chancellor Keith Sanders to review the mission of ELI and to determine what service it ought to provide, the effectiveness of ELI activities, and where it should be housed.

The final decision will be made "within several weeks," said Sanders. "I'll try to keep an open mind for as long as I can," he said.

Steve Oden, Chair of the English Department, "failed to see any incentive for English (department) support for foreign students, according to the Committee.

John Jury, Committee member, said that English Department will not be able to "support the program financially."

"EPS is expected to be self-sustaining," said Justus Paul, Committee member and Dean of College of Letters and Science.

One student argues, "Many students depend on summer school to get through this institution. It amazes me how our tuition increases yearly, yet our options decrease."

According to statistics from the Records and Registration Office, juniors and seniors were the highest users in the summer program in 1992. Of the 2,480 available seats, 1,788 were filled in the 300-499 level classes.

From the comments on the survey some students are taking summer school to graduate so they don't have to be here beyond the four year term.

One senior stated, "I feel that summer sessions benefit many and it would be sad to see it disappear. I guess that will mean more of us will be on the six year plan instead of the four to five year plan."

The 1993 session will not be the last session to be cut. Until the current downsizing exercises are complete, summer school will continue to shrink.

University Housing decided early this week not to remove campus telephones from the residence hall rooms. Students will be given the choice to provide their own phone.

"We've reversed the decision," said Randy Alexander, Director of University Housing, referring to a previously implemented policy.

Housing had originally thought that removing campus phones and making it mandatory for students to provide their own, would be cheaper for students and reduce room fees costs.

After recently receiving information from the Telephone Support Office, Housing realized they were only paying for vandalism to the phones and that removing them wouldn't change the cost to students.

The Housing Office will be making a formal announcement concerning their decision before the end of the semester.

The Review Committee was appointed by Chancellor Keith Sanders to review the mission of EPS and to determine what service it ought to provide, the effectiveness of EPS activities, and where it should be housed.

"EPS is expected to be self-sustaining," said Justice Paul, Committee member and Dean of College of Letters and Science.

The existing ELI program has been self-sustaining.

Neil Lewis, Chair of the Review Committee, said the mission of EPS will be restricted to "serve the interest of the University and foreign students."

"ELI was not doing as good a job as it could have been," said Lewis. "There was not enough cooperation (with the academic programs)."

The International Affairs Committee voted 6 to 2 against the recommendation. That committee was concerned that the mission statement presented by the ELI Review Committee would cut enrollment by two-thirds.

The mission of EPS, as stated in the ELI Review Committee's recommendation, would be to "provide instruction, on the UWSP campus, in English Language skills primarily for foreign students who are attending or are likely to attend UWSP."

"The role of ELI is primarily to train students for college," said Paul. "It should have never been in Student Life."

Neither the English nor the Foreign Language Department could afford to start the program when they first proposed an English language program to Howard Thynn, Vice Chancellor for Academic Affairs.

SGA has recently expressed its support for EPS and has aired concerns about the Review Committee's recommendations.

Angela Moe, Vice President-elect of SGA and Tami Butts, SGA President were both concerned that the change would be detrimental to UWSP in terms of loss of cultural diversity.

The review was the program's first since its implementation in 1984.

THE RODNEY KING QUESTION

SPORTS

OFFICIAL '91-'92 WRAP-UP

CLE ME!!! RECYCLE ME!!! RECYCLE ME!!! RECYCLE ME!!! RECYCLE ME!!! RECYCLE ME!!!
IN THE REAL WORLD
by Pamela Kersten

USA's deadliest riot in 75 years erupted throughout Los Angeles following the acquisition of an autopsy photograph of the beating of motorist Rodney King. Damages from fires, looting, and gunfire have escalated to $550 million and is still climbing in the aftermath of the disaster.

Leaving 48 dead and 2,116 others injured, the riot has touched many lives around the nation.

Several University of Wisconsin campuses have joined in the protest by participating in organized rallies.

On the UW-Stevens Point campus students had to join the community to show their disappointment of the verdict.

Organized by St. Joseph's Church, a peaceful rally took place in front of the post office on Main St. Saturday afternoon. The crowd of approximately 100 contained only a handful of UWSP students.

Matt Boyce, a senior at UWSP, attended the rally. "I thought it was bogus. People just sat there holding signs most of the time," he stated.

The statement "Bush doesn't get it, the system doesn't work," was chanted while people walked up and down the sidewalk during a small portion of the hour long gathering.

"I don't think the campus showed enough support. I thought something would be organized on campus," Boyce continued.

Many students were disappointed they didn't attend the rally.

"I would have gone if I would have known about it. It wasn't publicized or announced enough," stated Michelle Nemes, a UWSP junior.

On the UW-Madison campus over 2000 students and community members attended a rally and march. The march started on campus in the library mall, a large open area outdoors next to Memorial Library, and concluded a mile later in front of the City County Building.

Various students and community members randomly addressed the crowd with their views and opinions while effigies of President Bush, Los Angeles Police Chief Daryl Gates and several members of the jury were burned in the crowd.

The protest was "very peaceful" and no arrests were made according to Jason Joyce, News Editor of the Badger Herald, a student publication.

The rally was organized on the spur of the moment and most students involved in the march passed them.

The budget proposal will be directed towards students in areas of resident hall renovations, upgrading of the computer labs, financial aid, and various small projects.

"The students and faculty have been excellent to work with in understanding the need to look at where resources can be expended," stated Diemer.

Increased budget to affect University employees

by Pamela Kersten

The budget for the 1992-93 school year will increase by approximately two million dollars according to Gregory Diemer, Assistant Chancellor of Business Affairs.

Although there is an increase, Diemer stated, many of the students at the University will be facing internal cuts.

"We're reallocate money to places of higher priority," stated Diemer. This "shifting of resources" will directly affect the jobs of some UWSP employees.

Several part-time employees and eight and a half full-time positions will be left vacant next year for budget reasons.

However, three quarters of the new budget will be dedicated to faculty salaries and benefits.

"We need to make faculty salaries competitive with other campus's so that they (professors) don't get hiried away," stated Diemer.

He believes that quality of instructors should be important to students and that keeping salaries competitive is the way to retain professors.

The other quarter of the new budget will be directed towards students in areas of resident hall renovations, upgrading of the computer labs, financial aid, and various small projects.

"The students and faculty should be important to students and that keeping salaries competitive is the way to retain professors."

The students, he explained, are almost always primary in the minds of faculty when dealing with the budget.

The final budget proposal will be completed by mid June and presented to the Board of Regents in July.

Staff Question!

What do want to be when you grow up?

Name: Pamela Kersten
Major: Communication
Staff Position: News Editor

"I dream of being a nightclub singer in a New Orleans bar I know about. If not that, then Editor in Chief for the Christian Science Monitor and give assignments to reporters like Dustin Hoffman and Robert Redford."
Closing of computing labs will raise problems for users

by Kevin Thays

Editor-elect

Students get frustrated with the overcrowding of computer labs at the end of every semester. The closing of CPS and CNR computing labs next semester will only amplify their undesirable experiences.

Budget cuts seem to be the main reason for closing these two labs. However, the choice to close the labs in order to save $15,000 to $20,000 in lab assistance will generate several other problems which may make the decision self-defeating.

The plan to transfer all computers from the CPS and CNR labs to other existing labs on campus means that one lab assistant will be dealing with the problems created from several more computers in one location. This makes it even harder for the poor lab assistants to offer undivided attention to students’ problems. The fact that new software is being added to the system will also call for more help. The result will be more breakdowns from lack of assistance which means higher repair costs.

Pointless proves to lack a point to the university

By Bill Downs

Guest Columnist

The other day as I was passing time between classes, I picked up what I thought was a copy of The Pointer. But after a closer examination, I realized what I really had was something called "The Pointless." Upon reading several articles and stories from this parody, I began asking myself a few questions.

First, why had someone gone to such trouble and expense to attack our campus newspaper when we could have just as easily have used The Pointer?

Secondly, who had written all these stories and satirical articles?

Thirdly, for what purpose had this project been undertaken? It was all too easy to blame our overcrowded labs, but it just didn't seem to be my fault.

The fourth question I asked myself was: Why had the lab assistants been so much more efficient during their extended hours? During those hours, the lab assistants were forced to work with each other to keep up with the overwhelming number of students using the labs.

Once again, the accessibility of the computers will be limited, defeating the initial intent of keeping them available.

It is also a fact that AT&T provides grants to keep our network in state-of-the-art condition. It is only going to be state-of-the-art if the labs are easier and more convenient to use than labs elsewhere. With overcrowding, that won't be the case.

Chickens jump out of the Pantry and onto the Quad in protest of the new menu items, including a new salad bar.

"I hope that this new menu will help to attract more students to the Pantry." said Chef Thompson.

Snippets of the menu include:

- Southwestern Salad
- Grilled Chicken Caesar
- Antipasto Platter

The new menu items are sure to please the hungry students of UWSP.
Gay pride week celebration at UWSP

Ignorance and lack of compassion run rampant

Dear Editor:

We are all aware that last week was gay pride week.

Unfortunately, some of us are not informed or open-minded enough about gay/bisexual issues to prevent infringement of their freedom of sexual preference.

I am not gay, but I could not help but feel angered, frustrated, and distressed as I walked the campus sidewalks, and encountered many cruel, slanderous, and prejudiced remarks.

It is upsetting to know that I live among such ignorant, compassionless persons who would thoughtlessly hurt others in a blatant display of prejudice. Voltaire said that "Prejudice is the reasoning of fools." -A very relevant statement for the situation at hand.

When will people come to understand that it's not a matter of categories, or personal choices? Straight or Gay, meat-eater or vegetarian, drug user/alcoholic consumer or "Straight-Edge,” WE ARE ALL PEOPLE, with dreams, aspirations, goals, and feelings. All which should be respected.

We are, after all [hopefully] here for the same reasons: To learn and grow.

Kitt Wery

Non-recyclable cups cause trouble at Benefest

Dear Editor:

Good music, food, beer - Benefest had the markings of a perfect Saturday. The well-organized event was enjoyed by all, and it benefited the environment.

Funds raised by Benefest were donated to the Nature Conservancy, an organization that buys and manages land for preservation.

The UAB tried to make the event as environmentally friendly as possible, however because the funding for Benefest comes mainly from private sponsors, UAB takes what is offered, and Miller Brewing Company, the beverage sponsor, offered #6 plastic cups.

Number six plastic is difficult to find a recycling market for, so it often ends up in the landfill.

Beer in aluminum cans was not practical because of the lack of space and problem of refrigeration for the quantity served.

Paper cups apparently were not available, which is too bad because although the same amount of waste would have been created, paper is more biodegradable than petroleum-based plastic, and trees are a renewable resource.

The war in Iraq proved once again that oil is not.

A possible solution would have been to use #5 plastic cups, which are recyclable on campus and in the city. These cups, used in promotions by pizza joints and fast-food places, can be found in almost every dorm room and college apartment.

The UAB did look into this possibility, but found it wasn't an option because of money and permutation time limitations.

An obvious solution to help cut down on the waste would have been to have consumers reuse their cups throughout the day. Some conscientious people did try this and had no problem doing so, as long as they stayed in the beer tent.

However, anyone who tried to leave the tent with an empty cup was prevented from doing so. If the cup was full, this would have made sense. It would be conceivable that someone might take a full cup out to serve a minor. However, there is a slim chance that anyone was taking an empty cup out of the tent to let some minor lick off the remaining drops of beer.

Drinkers were a wrist band which identified them as legal, and minors with empty cups would not have been served.

The best solution to this problem is for University (and city) officials to work on a plan to recycle #6 plastics and to consider alternatives to this hard-to-recycle material.

The amount of cups thrown away at Benefest was small compared to the amount of polystyrene, a #5 plastic, thrown away weekly on this campus.

Polystyrene, which contains ozone-damaging CFCs, seems to be the plastic of choice for University Food Services.

Maybe next year they will consider using #2 plastic cups (they're excellent promotion) or paper cups instead. Or maybe next year we'll be able to reuse and recycle, of find alternatives to #6 plastic on this campus.

Pointers close out season with 20-14 record

Only the second team in Pointer history to post a 20-win season

by Mike McGill

Sports Writer

The UWSP men’s baseball team, led by Head Coach Guy Otte, finished an exciting season on a down note, facing UW-Platteville, UW-Whitewater and UW-La Crosse at home this past weekend.

Platteville 6 Stevens Point 4

On Friday, the Pointers lost both games to Platteville. In game one, Stevens Point managed only four hits and fell 6-4.

Tim Glodosky had two hits including a double and he scored two runs. Rick Wagner singled and sacrificed, driving in two while Dave Schuett went hitless but still registered a run batted in. Matt Kohnle had Stevens Point’s other hit.

Losing pitcher Scott Soderberg (1-3) went 6 2/3 innings, giving up nine hits and five earned runs, walking none and striking out three.

Brian Quinvel finished off the game, allowing one hit and one walk in 1/3 of an inning.

Platteville 9 Stevens Point 3

Things didn’t change for the Pointers in game two, as Platteville took advantage of five walks given up by Kor Krueger in the top of the seventh inning, scoring five runs to put the game out of reach for Point, 9-3.

Offensively, Don Radomski cracked two hits, including a double and Russ Belling smashed his sixth home run of the year, a two-run shot in the fourth inning. Schuett added UWSP’s only other hit.

Dave Bohr, 1-1, registered the loss, pitching 5 2/3 innings, allowing three earned runs on seven hits, walking four and fanning two. Krueger, in 2/3 of an inning, gave up five earned runs on no hits.

Shawn Schultz threw the final 2 1/3 inning, allowing one hit and one walk.

Coach Otte believed that maybe the guys were a little overconfident coming into the doubleheader. “We had swept Platteville earlier in the week, so we might not have been as focused.”

Stevens Point 12 Whitewater 7

On Saturday, UWSP took to the University Field turf to battle Whitewater. After being down 6-1, the Pointers exploded for seven runs in the fourth inning and four runs in the fifth, finishing the game victorious 12-7.

The Pointers unloaded for 11 hits, including two from Glodosky (a triple and his first home run, two RBIs). Schuett blasted a two-run homer, his sixth, and Chris Peterson added a triple.

Softball team finish season 5-22

by Mike McGill

Sports Writer

The UWSP women’s softball team, under the guidance of head coach Sharon Stellwagen, traveled to La Crosse last Friday for a weekend tournament to close up the season.

Stevens Point 2 La Crosse 0

The Pointers, in their first game on Friday against UW-La Crosse, scored two runs in the top of the ninth inning to win the game 2-0.

Winning pitcher Amy Steigerwald pitched the whole game, shutting out La Crosse and striking out two. She allowed nine hits and three walks.

Shelly Daane and centerfielder Lisa Mortenson each batted in one run for UWSP Shortstop Tina Peters singled twice, and third baseman Jenny Steuerwald and first baseman Jodi Lindquist both batted safely.

Platteville Stevens Point 0

In their second game on Friday, the Pointers went head to head with Platteville and were shut out. Platteville scored all six of their runs in the first three innings. Steigerwald, the starting pitcher, was pulled in the third inning after giving up five runs.

Michelle Krueger replaced her and allowed one run on three hits the rest of the way.

UWSP was held to three singles, one apiece from Krueger, Peters and Mortenson.

River Falls 4 Stevens Point 0

The Pointers hoped to turn things back around for their final game on Saturday versus UW-River Falls, but they were shut out once again 4-0.

This time Stevens Point could only muster two hits, a single from Steuerwald and a double from Steigerwald, who pitched this game also.

Steigerwald finished with four earned runs on eight hits and a walk with no strikeouts.

The Pointers completed their season posting a 5-22 overall record. They came in fifth place out of nine teams at the conference tournament. Coach Stellwagen was unavailable for comment.

Track teams prepare for conference meet

by Brady Kiel

Contributor

The Stevens Point track and field team geared up for this weekend’s conference meet by turning in some impressive individual performances Saturday at the LaCrosse Classic.

There were plenty of high finishes by Pointer men and women.

Men’s Track and Field

On the men’s side, Dave Schauer won the fifth heat of the 100 meter prelims with a 10.84 time.

Bill Green placed third in the first heat only three-tenths of a second behind winner Bill Schroeder of UW-LaCrosse.

The men’s 110 meter high hurdles was an event of hot competition among UWSP athletes.

Todd Spacjak’s 15.93 first place sprint in the second heat was nine-hundredths of a second better than Pointer teammate Chad Robran in second place.

Pointer’s Chris Larson and Lyon Smith also placed first and second in the fourth heat, only four one-hundredths of a second apart.

continued on page 9

Staff Question!

What do you want to be when you grow up?

“I’d like to work for the Chicago Tribune, but if that doesn’t work I hope to make it on the cover of Fishing Weekly, whose editor will be the Pointer’s very own Buck Jennings. I have no desire for fishing, but with Buck’s inspiration, carp will turn out to be the love of my life.”

Terry Owens: "Mr Indispensable"

by Mark Gillette

Sports Editor

My sports section would have been nothing this year if it weren’t for the work of UWSP’s sports information director, Terry Owens.

Owens, 33, ending his second year in the position at Point, has provided the Pointer with statistics, pictures, and many other important information.

Before coming to Stevens Point, he was a sports information director at UW-Platteville for five years.

Owens earned his bachelor’s degree in business administration and accounting from Carthage College in Kenosha. He also holds a masters of sports science degree from the United States Academy.

His athletic publications have won six national awards in both the NCAA and CO-SIDA, including “Best in the Nation” honors.

Owens’ contributions to the Pointer are greatly appreciated. His assistance with my section whenever I needed it helped me a great deal. Thanks, Terry, for putting up with me and being patient with me this year!

Running for money

Tau Kappa Epsilon's Brian Bolier runs with horseshoe (significant symbol within the fraternity) in hand during last Saturday's 55 from mile trek Antigo to Stevens Point. The run raised approximately $500 so far for Special Olympics and the fraternity expects to make around $1000.

Intramural Softball Champs

Softball tourney champs: "Tiffy's Buttermilk Bisquits". Front row (from left to right): Dave, Craig, Jeff and Joe. Back row: Stacy, Scott, Feely, Kelly and Hoge

HOME-FREE NIGHT ON THE SQUARE!

"What is Home-Free," you may ask. The purpose of the Home-Free service is to keep drivers who are under the influence of alcohol off the roads, making travel safer for everyone in the community. This service is NOT a substitute for responsible drinking, but it does offer an alternative to those who do not have a designated driver.

It has been documented that 2/3 of the users of the Home-Free Service are college students. Now, how can you help this program continue? It's easy...

On THURSDAY, MAY 7, the following local establishments will be charging a $1.00 COVER CHARGE BETWEEN 8:00 PM - 12:00 MIDNIGHT that will be DONATED TO THE HOME-FREE PROGRAM...

Butter's
Buffy's
Grin and Beer It
The Friendly Bar
Joe's Bar
Top Hat
JL's Pub
Partner's Pub (Wednesday, May 6)

Anyone who donates this small charge will be eligible for some fantastic prizes that have been donated by local distributors! YOU MUST BE PRESENT TO WIN!

Also, you will only be charged ONECE throughout the night, but additional donations are always welcome!

This is YOUR CHANCE to help support a service that keeps YOU safe!

Pitcher Travis Rosenbaum, 4-3, went the distance and picked up the win despite allowing 12 hits, six earned runs and three walks while notching four strikeouts.
Whitewater 9
Stevens Point 5
In game two a three run seventh inning couldn't help the Pointers as they were defeated 9-5. Players with multiple hits were Radomski, who was 2-4 with his third home run of the season and three RBI's, Wagner, who was 2-2 with his fourth homer, and Belling, who was 3-2 with three runs scored.
Losing pitcher Rob Wolff gave up 11 hits, eight earned, runs and four walks over seven innings, firing six strikeouts in the process.
"After we rallied to win the first game, our guys were over the hump and bouncing back from Friday's games," Coach Otte stated.
"We accomplished a major goal. We won 20 games this year, which is only the second time in Pointer baseball history that it's been done." - Coach Otte

The Pointers wrapped up their season at home on Sunday against Eau Claire, with similar results to Friday's action. Eau Claire outscored Point 13-7 in game one, earning 10 earned runs off pitcher Pete Clark and two off Clark's reliever Schultz. The struggling Clark, 1-2, earned the loss. He hit three batters and gave up eight hits and five walks. He managed four strikeouts.

Schultz finished the game allowing four hits, walking one and striking out one.

The offense had a big game, but not big enough. Radomski helped his four and fifth home runs and Schuetz contributed his seventh and eighth, both players accounting for five RBI's. Belling, 2-3 with a double, and Krug, 3-3 with a double and a stolen base, also looked impressive.

Eau Claire 12
Stevens Point 11
In game two, Eau Claire emerged victorious once again 12-11, despite the hot bat of Krug, who had a triple and a RBI, Peterson, who was 2-2 with his third home run of the season along with three RBI's. Wagner added a double and a RBI and Boker chipped in with a triple and a RBI. Steve Bochat was 3-4 with his first home run, two RBI's and three runs scored, Kevin O'Brien had a double and a RBI, and Ben Smejkal a single and a RBI.
Quinnell, 2-1, pitched the entire game, allowing 11 hits, nine earned runs and three walks while fanning five.
All in all, the Pointers finished fourth in the third heat of the 110 meter high hurdles. The men's 4x100 relay team took fourth behind LaCrosse, Carleton and Stout with a time of 43.13 in the finals. Stevens Point sprinter Dean Bryan took second in the 400 meter finals. He finished a half second behind UW-LaCrosse's David Coates.
Pat McKenna took fourth in the first heat of the men's steeplechase. Jason Zuekel did the same in the second heat.
UWSP's 4x400 relay took third in the finals with a time of 3:21.54.

Women's Track and Field
The Pointer women were also impressive. Julie Greco took first in the third heat as well as the finals of the 100 meters. Amy Voigt edged UW-Oshkosh's Natalie Goesch for first place in the 800 meter finals.
Aimee Knitter took second place in the 3000 meter finals and Marnie Sullivan took fourth.
Point track will compete in the conference finals this Friday and Saturday at LaCrosse.

Gabe Miller, a freshman guard from Plymouth, Wisconsin, has been named to the Wisconsin State University Conference All-Freshmen Men's Basketball Team in a vote of the coaches.
Miller was the first guard off the bench throughout UWSP's banner 1991-92 season, spelling both point guard Andy Boario and shooting guard Mike Harrison in the backcourt.
Miller averaged three points per contest while scoring 87 points and playing in all 29 games.
He shot 48% from the floor and 77% from the free throw stripe. His most memorable freshman experience came at UW-River Falls during the WSC sprint run when he made 1-2 free throws with 2.3 seconds left to give the Pointers a 76-75 win.

Other members of the squad include Jeremy Nicolet (Ellevar Strum) of UW-Eau Claire, Ernie Penny (Whitefish Bay) of UW-Platteville, Steve Berchid (Rice Lake) of UW-Superior and Zak Alwin (Wausau) of UW-Stout.
The Pointers enjoyed one of the most successful seasons in their history in 91-92, going 27-2 including the WSAC and NAIA District 14 Championships and a trip to Kansas City for the NAIA Division I Tournament.
The no, two seed at nationals, UWSP advanced to the "Sweet 16."
**Pointer parodies of the past**

Lampoons look to historical issues

by Kelly Lecker

"The Pointless," a Pointer parody, raised eyebrows and more than a few questions as it took to the stands two weeks ago.

The newspaper made fun of many aspects of the university including Chancellor Keith Sanders and other UWSP administrators.

The issue raised some controversy, but papers challenging The Pointer and the university are nothing new at UWSP.

One of the first notable alternatives to The Pointer was "The Critique," published in 1955. This paper accepted all forms of creativity.

"We want to print your thoughts," wrote "Critique" editor Dick Goldsmith in the first edition. "We are not a news gather or literary review."

It was quiet after the last issue of "The Critique" until 1958, when The Pointer, pressured by the fact that it was a university-funded paper, wrote a startling letter in its November 20 issue.

We are obligated to our source of support, the school," The Pointer stated. "Naturally any material that degrades the school, faculty, or students will not appear in the paper."

Outraged students challenged "Counterpoint is our attempt to kick this university so it will kick society-hard."

The newspaper made fun of many university stand and even political papers challenging The Pointer, called "The Pointless," a Pointer parody, raised eyebrows and more than a few questions as it took to the stands two weeks ago.

"The sons of liberty, etc. This type of tradition in America and should therefore not react so drastically. What are they trying to prove? Killing innocent people just makes the situation worse for everyone."

"Definitely not. Although the outcome of the trial may be questionable, one outbreak of violence and looting won't solve anything! If anything it is driving L.A.'s economy more into debt with the billions of dollars worth of damage."

"I don't think it was justified because destroying their own neighborhood isn't doing anything for them. I think a peaceful protest would have been more appropriate."

"The violence in Los Angeles is typical of the violence first employed by the founders of democracy in the U.S., The Sons of Liberty, etc. This is a time-honored tradition in America and has been employed historically by any group compelled to force change (farmers, labor unions, even truck drivers). This type of violent upheaval is the American way."

"Definitely. Justice was not done for Rodney King. We all already knew this case would happen. But, we couldn't stop it. This is all of our faults. It's time to make a big change."

"I don't think any violence like what has happened in L.A. can ever be JUSTIFIED. Although the videotape indicates brutal violence the public really doesn't know the whole story and should therefore not react so drastically. What are they trying to prove? Killing innocent people just makes the situation worse for everyone."

Pointer parodies of the past
Lampoons look to historical issues

by Kelly Leeker
Contributor

"The Pointless," a parody, raised eyebrows more than a few questions took to the stands two years ago.

The newspaper made many aspects of university life, including Chancellor Sanders and other university administrators.

The issue raised questions, but papers claiming The Pointer at university are nothing unusual.

One of the first notable natives in "The Pointer Critique," published it. This paper accepted all writing and encouraged creativity.

"We want to print thoughts," wrote "Critique" editor Dick Goldsmith.

"All was quiet after issue of "The Critique"." was published.

This paper accepted all writing and encouraged creativity.

"We want to print thoughts," wrote "Critique" editor Dick Goldsmith.

"All was quiet after issue of "The Critique"." was published.

"Definitely not, though the outcome was unimpressive, one outburst of violence and I wouldn't solve anything it is L.A.'s economy into debt with the loss of dollars we've damaged."
Newton's law governs The Pointer

by Julie Apker

Features Editor

Sir Isaac Newton may have broken ground when he discovered the law of gravity, but it was nothing compared to what Sarah Newton has discovered as editor-in-chief of The Pointer.

"UWSP is not dedicated to educating students, but rather to maintaining appearances and preserving its reputation," stated Newton. "Any campus which pays tens of thousands of dollars to people who are here solely for athletics and not to teach doesn't have its priorities on education."

A senior communication major, Newton has served as head editor of the campus newspaper for the 1991-92 academic year. As a result of her role at the paper, she has been able to see a side of UWSP that most students never experience.

"One of the biggest issues this year was the numerous sexual harassment charges that were filed against members of the university," she said. "The attitude on the part of the administration is that they can put off the complaints until students who realize the full implications of the matter are gone."

According to Newton, student views are not taken into consideration when situations which directly concern them need to be changed. She believes that grade disparity and inconsistency on the part of professors requires "changes that service the students."

"Some professors don't give out A's, but others refuse to change exams they know students have copies of," Newton explained. "Grades are not achieved in the same manner regardless of the discipline."

As editor-in-chief, Newton has a lot of responsibilities. In addition to the various university departments, Newton has encountered a few controversies in her tenure. "I last fall, instigation of alteration out of the administration."

Newton believes that her responsibilities have provided solid work experiences which she hopes to carry into a full-time job after graduation next December. Overall, she thinks Newton is again in the director's chair and this time he reportedly has more creative control. Michael Keaton returns as the dark knight. The villainy is in the capable hands of Danny Devito (The Penguin) and Michelle Pfeiffer (an absolutely stunning Catwoman).

Early glimpses indicate a film that looks incredible. Older comedians will return for the sequel to the surprise hit "Honey, I Shrunken The Kids" and enlarge the family's new baby in the sequel with a potentially gruesome title, "Honey, I Blew Up The Kids."

"Summer movie season sizzles"

by Dan Seeger

Contributors

"Batman" will race through the streets of Gotham City, Mel Gibson and Danny Glover will remain for another "Lethal Weapon" and Rick Moranis will play a scientist whose latest experiment affects the size of his kid. The previous sentence could describe either the summer of 1989 or the summer that lies ahead.

This year Hollywood's busiest movie season will often bear a striking resemblance to the summer of three years ago when the industry was amazed by the shortlived hit movies. Sequels aren't unusual for summertime, and neither is the mix of the familiar and the unusual that will soon be at a theater near you. First out of the gate will be the third (and probably last) installment in the "Lethal Weapon" film franchise.

Danny Glover is only days away from retirement, Mel Gibson has a new love interest (Rene Russo, who's probably hoping for a better fate than Gibson's previous "Lethal Weapon" lady loves) and Joe Pesci makes a return appearance as the hilarious Leo Getz. Released on June 15, many are betting this will be the biggest earner of the summer.

Even more people are betting on the all-female comedy, "Honey, I Shrunk The Kids" hits threaten on June 19 and has some very impressive personnel.

Tim Burton is again in the studio this summer with "Sister Act," starring Whoopi Goldberg as a Las Vegas lounge singer who goes into hiding from the mob by disguising herself as a nun.

Three R's renew Point's resources

by Eric Meyer
Copy Editor

While most folks take their garbage out to be curb every week and happily forget about it, Karin Sieg and Sharon Simonis get paid to remind those same people of exactly what, and how much, they're tossing out each day.

It's all part of the job Sieg performs for Portage County and Simonis performs for the campus as recycling coordinator.

Sieg, who works for Intra-State Recycling in the County, claims that each one of us generates about three-four pounds of garbage per day.

"Between construction of these landfills and collecting the leachate, it is quite an expensive process," she says, "and most people still don't like to live next to landfills." Leachate is a groundwater contaminant produced from landfilling toxic refuse.

To reduce the amount of garbage sent to landfills, Sieg urges people to live by the three "R's": reduce, reuse and recycle.

"These are things that, more and more, we should be familiar with in our lives," she says.

According to Simonis, UWSP recycled 46.7 percent of the waste that it generated during the 1991 calendar year and about 58 percent of the waste it generated through the first four months of 1992.

UWSP is doing "fairly good" in its recycling effort according to Simonis. "As we go around campus though, we look in the dumpsters and we're still seeing a lot of recyclables that hit the trash containers rather than the recycling containers," she says.

In an attempt to make recycling easy for the campus community, Simonis says brown recycling containers have been placed around campus. "These are quite expensive so there aren't too many out there," she says.

Simonis says three to five gallon plastic recycling containers are available for students who want them for recycling.

The items recycled at UWSP include: aluminum, corrugated cardboard, paper, glass, nos. 1, 2 and 6 plastics, polystyrene, tin, waste metal, waste oil, ash, fabric, tires, car batteries, printer cartridges and yard waste.

Newton from page 11

that this year's Pointer staff has accomplished a professionally looking publication that even scraped papers such as "The Stevens Point Journal."

"A newspaper like The Pointer is an evolutionary process each year," Newton commented. "I hope next year's staff can maintain a strong news section and realize early on that sometimes you need to take things and people with a grain of salt."

This Newton's law, "is don't believe you can change everything. At times you just need to blow some people off," she summarized.

Recycle (rampage 13 was lc.

According to Sieg the recycling program in Portage County accepts fewer items than the program at UWSP because the markets are different. "The university is almost a separate community with respect to recycling," he says.

UWSP contracts with a Fort Howard paper company to take much of its recyclable cardboard and paper. The company could not handle the volume of recyclable paper that the county would generate, Sieg says.

Sieg hopes people will do some rethinking about some of the products that they buy that are only used once. "Try to get a second life out of products. Look for products that have a minimum amount of packaging and choose recyclable packaging where possible," he advises.

"Our environment is our home and if we destroy that then we're really damaging ourselves. We should be looking out for our future and the future of our families and their environment," Sieg explains.

"...a bit of tradition with a bit of trend"

Welcome Aboard and good luck to the new ship of fools!

Association for Community Tasks (A.C.T.)

thanks all of our volunteers who participated in:

Individual Volunteer Programs
Tutoring Programs
Community Group Projects
& Hunger Cleanup

Your commitment and dedication to volunteering has made A.C.T.'s 15th Anniversary its most successful year ever.

Here's looking at ya, ya bunch-a-dopes! Congratulations to Kevin Thays and his promising new staff. First semester will be a breeze - can't imagine why. Good luck and remember: Chill out!
Movies
from page 11
More hot flicks include: "Encino Man," featuring MTV halfwit Pauly Shore; "Honeysitter," which pairs Steve Martin and Goldie Hawn; and "Boomerang," which is Eddie Murphy's first film in two years.

Add to that" Far And Away," a period romance-drama starring Tom Cruise and Nicole Kidman and directed by Ron Howard. In addition, Clint Eastwood returns to the western genre in "The Unforgiven."

The summer is destined to have its fair share of flops and hits, but with such a mixed bag of features, it shouldn't be hard to find something with some amount of appeal when the weather gets a bit too warm.

Northern pike / UFO-space alien connection

by Buck Jennings
Outdoors Editor

Kevin and I had our sights set on some early spring northern pike fishing. We knew that the fish would be seeking warmer and places to begin spawning. A vast, grassy flat, the only warm water into a shallow dark-bottomed bay was just the ticket.

We knew that the fish would be spooky in such a shallow haunt, so we planned our assault from the marsh itself.

Kevin and I strapped on our waders and began the arduous journey through a sea of tawny saw grass. It was hard going but the prospects of large pike and unfiled water drove us onward. The marsh was vast, and roughly at its center we came upon two circular depressions in the grass.

In the corners of these depressions we found three circles, roughly 30" in diameter. They were formed from dead marsh grass, pressed down, and were radiating away from the center of the depression. The circles closely resembled the "crop circles" we had seen in UFO magazines.

"Come on, Kevin," I said, "We came here to fish, not to investigate the paranormal!"

We pressed onward and soon we found our way to the water line. Large floating rapalas were our choice lures. These baits can be fished slowly and in very shallow water. They also enter with a minimum disturbance.

We made several long casts and had one or two large water whiskey bolds behind our lures, indicating the presence of fish.

Then it happened. My polarized glasses revealed the shadowy form of a monster pike basking about 100 feet from the marsh line. The fish was definitely world record material.

The lunker sat in about a foot of water, and I would have to cast well beyond the fish to avoid spoinking it, and to bring my bait past with a natural presentation.

I bent my knees and leaned far backward, ready to give the big heavy-fo. I swept my seven foot rod aggressively forward. Suddenly I realized that the razor sharp treble hooks had back snapped and bitten into a dead weight behind me. I was so overzealous in my intent to cast far past that waiting pike, that I pulled the unfortunate hindrance clear over my head and out across the tea-colored water.

The snagged object cleared for ever our heads and afforded us a glimpse of the unknown weight.

It appeared to be an alien humanoid. Hindsight would have revealed that the being had been sneaking up on Kevin and I, apparently intent on seizure.

Its silver clad form cart-wheeled and piroueted through the air, hurling forward by my enthusiastic cast.

Despite this mishap, my "alien" bait landed right on target.

Kevin and I stared in disbelief as the bewildered extra-terrestrial floundered in the shallow water, trying at once to disgorge the hooks and stay afloat.

"That'll teach 'em to spoinking on us," Kevin stated. "You ain't kiddin'," I retorted.

The alien's pathetic struggles evidently mirrored that of a wounded bait fish; before our moistened eyes that monster northern rolled and bolted toward our would-be assailant.

The being was about two feet tall, and that 'gator inhabited him down to the steel leader.

I snapped out of my daze and set the hooks with all the strength I could muster.

The great fish exploded from the water and shook its head violently. It tried in vain to eject the fatal bait. Kevin and I caught only a brief glimpse of the pale gray alien lodged firmly in the pike's jagged jaw.

Tooth and nail we brawled with that northern and eventually the last of the pike's enervation drained away. I towed our trophy to shoreline; its submersive bulk now floated languidly in the shallow water.

The fish was clearly a new world record and Kevin and I stood awestruck at both the fish, and the events, that conspired to bring it to us.

Our silence was shattered by the sound of three flat black apache helicopters exploding into view above the surrounding tree lines.

A roar above the din of the chopper blades precluded the arrival of a matte black hoover and, instead, I saw the fish, our ticket to fame, fortune and tackle endorsements.

Attracting quick ruby throat to your garden

by Wendy Wagner Kraft
Staff Writer

Zigzagging about the Columbine is where you’ll find the tiny Ruby-throated hummingbird found in our area.

This little jewel-like bird returns to our area from its Central American winter range with the warming of our spring days.

"...be host to a few flying gems this summer."

The Ruby-throated is only a mere 3" in length and is embellished with an emerald back, pearl breast, and, of course, a ruby throat patch.

However, don’t mistake its pint size for lack of might; it is fearless at the feeder. If you would like to draw these little dynamos to your yard this summer you’ll need to purchase a nectar feeder. They can be bought at any retailer selling bird-related feeders. Don’t bother buying expensive commercial nectar - you can make it at home.

Here’s a simple recipe for hummingbird nectar from the Bird Watchers Digest book: "Enjoying Hummingbirds More."

1 part table sugar
4 parts water

Global warming. Destruction of the rain forests. Toxic waste. These aren’t the legacies we want from the “environment” President. U.S. President Bush to adorn the U.N. Earth Summit in Brazil in June. Right now, the United States is the only major industrial power refusing to do its part. Ask the President to stop America’s role as leading producer of greenhouse gases. Tell him to support the global treaty for reducing carbon dioxide emissions, but the expectation of toxic waste, and save the world’s rain forests. The President of the one nation who can effectively lead the struggle for our planet’s future.

NATIONAL WILDLIFE FEDERATION
527 N. Capitol St., N.W., Washington, D.C. 20001

[Note the White House zip code. In last week’s ad the zip was incorrect. Buck]
Trout guide available

Wisconsin's thousands of miles of inland trout streams are presently placed into various categories for management purposes by the Department of Natural Resources.

Class One -- High grade trout waters with conditions favorable for natural reproduction. Requires little or no stocking of hatchery fish.

Class Two -- Some native trout but not in sufficient numbers. Moderate to heavy stocking required to maintain good fishing.

Class Three -- Marginal trout habitat. Stocking legal trout necessary to provide trout fishing.

Information about the locations of these streams can be found in "Wisconsin Trout Waters." The book provides 65 detailed, two-color maps showing the Class One and Two sections of the streams. The surrounding territory with all roads, especially the county trunk highways and town roads, are provided on each map.

The trout fisherman can plan a trip using the maps and the accompanying trout species index. The angler can spend time in the streams instead of on needless driving.

The book has been updated, revised, and enlarged to 60 pages and is available by sending $12.95 to Wisconsin Trout Waters, Stock No. 913M, P.O. Box 5096, Madison 53705-0096. Separate from the maps is a list for all trout streams in the state, with notes as to species of trout, stream length and location.

Know your bass fishing regulations

This is a reminder to anglers in northern Wisconsin that the fishing season for smallmouth and largemouth bass is catch-and-release only, until June 21. The bass Northern Zone is the area north of a line bounded by highway 29, Green Bay, and highways 54, 27 and 70 (east to west). The bass season opens as usual on May 2 on inland waters in other areas of the state.

The minimum size limit for bass in the northern zone is 12 inches. The minimum size limit on other inland waters in the state is 14 inches.

Welcome continued from page 16

One of these will be an environmental column that has yet to be named. I will try to cover a current environmental issue each week, as well as conservation facts and tips to help "Save the Earth."

The other column would be a weekly article similar to the College of Natural Resources newsletter, but more in-depth. It will probably be entitled the "CNR Update" and will list coming activities, as well as cover important meetings, speakers, and events with news briefs. The format may be similar to the News section's column currently entitled "In The Real World."

Other topics will include features on outdoor sports, outdoor activities, and interesting people involved in the field of natural resources. News releases from the Department of Natural Resources and other organizations will also be used.

Anyone wishing to submit to the Outdoors section next year, or work as a staff writer, if eligible for work study, may contact the Pointer office by stopping in Room 104 of the Communication building or calling 2249. News releases from any CNR department or organization are always welcome.

Continued from page 16

"It's got to weigh 75 pounds," I told Kevin. I turned to display the fish to a black-clad soldier who had just trekked to the ground from the open bay of the shop hovering above us.

We were quickly surrounded by several of the soldier's armed comrades.

"Check out this fish," I said. "Can you jar-heads give us a lift to a tackle shop for a weigh-in?"

Before Kevin barely cleared those words from his mouth and I felt a sharp pain at the base of my skull. I must have blacked out.

Kevin and I awoke on a Wednesday. Three days after our fishing trip. We were clad from head to toe in full clown outfits. Gaily colored haggy pants, big shoes, grease paint and orange wigs. We were seated next to one another on a grayhound bus.

In Kevin's lap was a ragged pornographic magazine with the cover missing, and in my lap was a brown bagged, half-empty bottle of Thunderbird.

I took a draw from the bottle and handed it to Kevin. He drank. Not a word was spoken. We sat back, soaked up our surroundings, and began piecing together the events which had taken place.

Hampered by a hangover, and the nauseating sluggish movement of the bus, I stumbled big-footed through the narrow aisle to the driver.

I was embarrassed to ask such a question and he coldly scoldingly explained that the bus was bound from Roswell, New Mexico toward Baraboo, Wisconsin. He was given orders from an unknown higher-up to dump us off at Circus World museum there.

Kevin and I had been in clown make-up before, that we could take, but neither of us had ever been to Roswell New Mexico. We had both heard of hangar "19" and the government conspiracy to cover up a UFO crash and the possible presence of living aliens being concealed there.

We had also heard the rumors of underground alien catacombs and an earth-based alien landing sight there. But neither of us had taken it seriously.

"New Mexico," I said. "What were we doing in Roswell New Mexico?!"

"Forget that," snapped Kevin. "What happened to our fish?"

"And how 'bout that wacky alien character? What happened to him?" I replied.

"That fish was a world record," our ticket to fame, fortune and tackle endorsements. "We never determined exactly what had happened that day, nor on the two missing days that followed."

But both I and myself are undergoing hypotheses, and if time and money permit, we will go to the bottom of the UFO space alien and the monster northern pine.

Adios amoebas!

A Graduation Gift

1992 Ford Escort

$500

Towards The Purchase or Lease of Any New Ford Car or Truck

For The Graduate, $500 Cash, Plus Pre-Approved Credit From Ford Credit!

For the graduate with a bachelor's or advanced degree if you take new retail delivery between April 1, 1992 and December 31, 1992. Your local Ford Dealer will arrange $500 cash back from Ford Motor Company and pre-approved financing from Ford Credit. For those who purchase an eligible vehicle during the program period you can use cash towards the purchase or lease, or you can take it as cash. College program benefits are over and above consumer incentives except other Ford Private offers (e.g. First Time Buyers Program). To qualify for pre-approved credit, you must have verifiable employment beginning within 120 days of vehicle purchase. Your salary must be sufficient to cover living expenses as well as a car payment. A prior credit history isn't necessary, but if you have one it has to be satisfactory to Ford Credit.

Dum-Dum-It's been a spell since you heard his name—just wanna say, Sorry things aren't the same. I have been gone by quicker than the blink of an eye. I am grateful to you—and I know I will miss you too. -Pooh

Harlequin-We may not always dance the right way, but we've got the dance right now. I'm sorry for all of the difficulties, but summer is nearly here and should all work out. I want this to work, and I'll do my best. I love you. -Wolf.

To my unbelievably rich (want to go to dinner?) and equally penniless roommates…touchdown! Score! Hope no one's listening at the door. We did…say a thing did they? I'll try not to apologize when I leave. Wed. NO, I'm not emotional! I love you and I'll miss you tons! The Eisemans!

Sally-from Bryophylic spores top endless homeowners - I've learned so much from you! Thanks for more than three years of cynicism and smart remarks! —XXOO daughter say a thing dicJ down! Score! Hope no one's love you.

Eskimo? you and I'll miss you tons! The to sqawk to go to dinner?) and equally to work, and I

To my bestest Dude-to-be: Kites, purdy flowers, I I: I I, twerp. years of cynicism and smart remarks! - XXOO daughter say a thing dicJ down! Score! Hope no one's love you.

N/A Blow Job - I'm sure gonna miss you. All the laughs when serving food; Sticking toilet paper on our shoes to chase away the blues; even dressing alike-yikes, what a sight! Thanks for everything and more—am-reade remember when you jump to pull the card! - D.P.

HEY WORLD! I've got new hair and a new attitude! Come see the new me! —east Baldwin, ask for Todd.

To my big dog, I'm getting a scapillus in my you-know-where just thinking about La-Crosse. You know I...miss you something awful. Happy May 12. I love you, baby. Your petite flower.

Oui-Oui Big Dogs. That's it, another year scoped on the dial. This summer will be the best, frankie better start running. 10-14 rubber ducky, meow, meow, Gigi-Gigi-Booboo. - Pit Dog

Happy 21st Birthday Tweety Bird. Now you'll finally be able to go to McCoons this summer. It'll be great. Have one for us. Love, Jodi and John.

To my little KB- Thank god you waited for me. What would I have done without you? Miss me this summer while you're up in big bad Michigan and don't go finding any fish-girl who knows the difference between a bass and a walleye. I'm working on it, but you'll always be my favorite Bass. I adore you. Love, Shag.

To all my cronies (and you know who you are)! - YOU LOOK LIKE BIGHTAH! Everybody says their friends are the best, but AAAACHHHH! Who needs 'em? I swear to god, this summer will be the best of all. Chris might as well sign over the lease. Good luck to all of you (Barlene, it's abouttime), and God Bless. Love, Couch.

Happy 22nd Birthday Monster! Hope you have a special day on May 9th. I'll do my best(what's to make the night a special one. Love, Casya.

Over $1 billion dollars in financial aid not used in 1991. We can supply you with over 25 sources. Call 315-369 or write to Beneficial Services, 3105 Pleasant Avenue Waukesha, WI 53181 for an application

SKI AND WORK IN COLORADO NEXT YEAR! Crested Butte Mountain Resort is coming to do recruiting for our student employee program. $800 scholarship, $55/hr, a free UNLIMITED ski pass, housing… and MUCH more! Various positions are available.
