Tuition may "hike" 7-8 percent
Back to basics budget will cost students more cash

The UW System Board of Regents passed a tuition increase of seven to eight percent last Thursday for the UW System.

The biennial request for 93-95 is deemed a "back-to-basics budget focused on undergraduate students and the special needs of the state," according to UW System President Katharine Lyall.

For UWSP students, this increase will approximately cost $120 more for tuition in 93-94, and $136 in 94-95.

While the tuition rises, financial aid in the form of grants decreases.

Wisconsin Higher Education Grants are set to increase only 3.1% next year and 2.6% in 1994. Pell Grants will also be cut, including a $100 cut in the maximum grant.

"This is forcing needy students to go even further into debt to stay in school," stated Brian Williams, academic affairs director for United Council of UW Student Governments, Inc. Student Government Association President David Kunze agrees with Williams. "The increasing cost of education is going to eliminate many qualified people from continuing their education," he said.

According to the budget, faculty salaries will increase by five percent.

A total of $119 million of the $209 million budget will be dedicated to faculty compensation, while only $35 million is dedicated to the improvement of undergraduate education for new programs.

This would include expenses like library automation, instructional technology, and improving academic advising.

"It is issues like this that bring the UW budget back to basics," Lyall commented.

She claims the budget is more "student oriented."

Kunze disagrees. "The budget isn't student orientated," he said. "It pits the faculty against the students since faculty compensation is dependent upon a tuition increase."

The remaining $55 million of the total is dedicated to cost-to-continue items like utilities and supplies.

Before final approval by the Governor next August, the suggested biennial budget will go through channels including the Department of Administration, the Senate, and the Assembly for additional changes and amendments.

"Students don't have to take this," Kunze explained. SGA will be organizing a postcard campaign in February where students can fill out cards that will be sent to state representatives to discourage the increase.

"We also encourage students to get their parents and family involved. Anyone can make a call or write a letter to let them know this increase isn't tolerable," he continued.

It isn't impossible to fight and stop the increase according to Vaughn Thompson, midwest field organizer for the United States Students Association. "This is forcing needy students to go even further into debt to stay in school," stated Brian Williams, academic affairs director for United Council of UW Student Governments, Inc.

Kunze hopes students at UWSP will do their part. "We can make a difference," he said.

Plan implemented for fast light replacement

by Adam Goodnature

The Student Government Association (SGA) has proposed a plan which may eliminate extended periods of darkness caused by burnt out exterior lights around campus.

"We tried to get the lighting changed within 24 hours, but because of the cost, we had to try for a more accessible period of time," stated David Kunze, President of SGA.

Campus safety is the main concern for the lighting situation being corrected, Kunze said. Three months of burnt out lights in any area around campus creates a greater chance for danger, he continued.

SGA tackles a lot of issues associated with campus safety, which prompted them to look into this somewhat overlooked concern.

"Campus safety is pretty much an issue for any student government association around the state," Kunze continued.

The lighting situation is centered only around campus for the time being, but SGA is trying to cooperate with the community and off-campus housing to insure safe lighting there as well.

If anybody is confronted with a problem with the lighting or if a burnt out light is spotted, contact maintenance or campus security.

Students are also encouraged to make sure the problem is corrected within the week long period proposed by SGA.

---

Cultural week hopes to spark awareness

The week of November 16-20, the Student Government and Residence Hall Associations will be co-sponsoring the first annual "Cultural Equality Week."

"Instead of offering individual programs throughout the year, stated Scott Zuecke, public relations director for SGA, "we've combined it all in one week."

Zuecke hopes to bring more attention to the importance of cultural acceptance and awareness.

Each day will spotlight a different aspect of cultural awareness.

All programs will be held in the University Center.

Monday is GENDER & SEXUAL ORIENTATION EQUALITY DAY.

Events will include a session on "Images of Men and Women from Media: Created Fantasies," presented by Judy Goldsmith, (special assistant to the Chancellor), from 10-11 a.m. in the Wright Lounge.

A panel discussion on the "State of the World" will also take place in the Wright Lounge from 8-10 p.m. to highlight Tuesday's NATURE EQUALITY DAY.

Wednesday's SPIRITUAL EQUALITY DAY features a presentation 11 a.m. - 12 p.m. by Andrea Seeley of Intervariety Life Christian Fellowship on "Being a Missionary in Albania."

It will be held in the Wisconsin Room.

An intercultural fashion show and a food fair provide an alternative forum for Thursday's RACIAL & ETHNIC EQUALITY DAY.

On Friday, CULTURAL EQUALITY DAY includes a cultural diversity dance that wraps up the week.

For additional event listings and times, students should look for various posters and banners around campus or stop by the events booth in the U.C. concerning cultural events.

"A lot of hard work has been put into the planning of these events," said Scott Zuecke, (SGA representative), from the Administration and Services department. Says Kunze, "We're looking forward to next week."

For more information contact SGA at 346-4037 or RHA at 346-2556.

SGA tackles a lot of issues...
Military endorses discrimination

Homosexuals are prohibited from enlisting!!!

by Kevin A. Thays
Editor-In-Chief

The United States military stands tall for its superlative, but sinks low when it comes to true equality. Homosexuals continue to be discriminated against with weak justification.

I know, the word “discrimina­tion” is just one way to speak of the brave people that fight for our country. Yet the hierarchy of the system places homosexuals in the lowest class possible. It barricades them from having a fair chance at serving to defend their own country.

When a person enlists in the military he or she is required to take various physical and intellec­tual tests in order to get accepted. These tests are conducted for legitimate reasons. They help to ensure that only healthy people are capable of performing the necessary tasks will be ad­mitted into the military.

But the story doesn’t end here. If we want to be in the military or even stand a chance at an ROTC scholarship, we must sign on the dotted line and verify that we are not homosexual, have never had sexual activity with someone of the same sex, and promise never to do so.

"...why in the hell do we need to reveal someone’s sexuality to have trust."

To this I say—come on...it’s 1992. This policy has been around for too long and needs to be abolished.

I understand that teamwork is extremely important in the military, especially in combat situations when trust is a must.

But why in the hell do we need to reveal someone’s sexuality to have trust? Homosexuality may be a touchy topic for some people, but what they don’t know won’t hurt them. Sexuality is a private matter!

I suppose that people could lie if they wanted to beat the system. They could sign the con­tract even if they are gay or lesbian. The point is, why should they have to?

Honesty serves as a founda­tion for trust. In order for homosexuals to have a fair chance at serving their country, they are forced to lie. What a system! It contradicts equality from every angle.

Whether someone is homosexual has no bearing on physical and mental strengths needed to adequately build a strong military in this country. A homosexual may be stronger both mentally and physically than a heterosexual or visa­ versa.

The fact that ROTC (and other military services) offer educa­tional scholarships only to heterosexuals is discrimination. Also, students at UWSP who openly are gay or lesbians can participate in the class as part of their minor, but they can’t join the actual ROTC program.

Our university preaches diver­sity by promoting equality and affirmative action. Maybe a lit­tle less endorsing of this homophobia would help us to be good for our word.

And may be part of the problem is that government pays the wages of the people on this campus who could actually have an impact on the situation —TALK ABOUT INFLUENCE.

It is time for the military to come out of the closet. There’s no room for dis­crimination!

Indians honored by mascot changes

by Lynne Omernik
Contributor

I was listening to the radio the other morning when the news came on. One of the topics touched on the idea that Indians were being discriminated against because schools choose to have them as mascots.

But isn’t it true that team member and spectators look up to their mascot as a symbol of strength and courage?

When I went to high school, we proudly called ourselves the Raiders. Our logo was a warrior Indian riding a horse. The year after I graduated, the Indians in the area felt that they were being discriminated against and wanted to get the mascot changed.

Not only did they want to change the high school mascot but also the university’s mascot.

The change fell through for the high school. However, the university changed their mascot from the Indians to the Eagles. They spent a lot of time and money to change the logos everywhere on campus, which seemed to please the Indians in the area. Now, three years later, the same topic has come up again.

Indians were used as mascots because they were strong, brave and stood for what they believed in, it was never to discriminate against them.

Teammates and spectators may use phrases such as “kill the Indians,” but it is only to get the athletes’ excitement and adrenaline pumped up and ready to play a good competi­tion.

The Indians should be proud that we look up to them. What would you rather graduate as, a worm or an Indian?

Tuition leaps again!

by Collin Lueck
Contributor

The freshly-approved seven to nine percent per year tuition hikes for the ’93-’95 school years are yet another step in a disturbing trend.

We seem to be slipping closer to a time when only the elite will be able to afford a college education.

Now that financial aid has be­come an endangered species, many of us are going to find our­selves severely in debt by the time that we finish school.

Actually we got off fairly cheap this time. At 9% per year, in the real world before any of this takes effect. But most of our tuition will be increasing by this takes effect. But most of what we will be paying more dearly than our brothers and sisters? What about our little ones or siblings? What about our children?

There is not a whole lot that we can do to keep our tuition from steadily climbing out of sight.

Democratic process gets majorly bashed for being victorious

Dear Editor,

I feel absolutely compelled to respond to the Pointer contribution of Lincoln Brunner. As an action liberal, I resent his remarks that my support of President-elect Bill Clinton was due to the "snake-oil he sold to millions on the campaign trail."

Mr. Brunner, in case you had not noticed (as I'm sure George Bush didn't either), Americans have decided to take a critical, long overdue look at the political process in action.

Fortunately, for intelligent "new junkies" like myself, there was an incredible forum in which to do so: CNN, C-Span, Headline News, and three free prime network channels, just to name a few.

There are arenas like Good Morning America, Arsenio Hall, or even MTV and for the tasters, and journalists, election information came from the channel we could pick up with rabbit ears and tin foil.

How fortunate we are, to be able to receive scrutiny or approval from a wide range of political analysts, commentators, and journalists.

Within many of our own lifetimes, the only forum for election information came from whatever 11 o'clock local news channel we could pick up with rabbit ears and tin foil.

In this election, all of America was able to see what George Bush was all about. Sadly, for both Bush and Quayle, America didn't like what it saw. I am committed to working for peace, social equality and justice, and I will support candidates committed to doing the same.

Right alongside me are millions of democrats, liberals, and even conservatives who share my views, and those are the people who pulled the lever that said CLINTON AND GORE.

THAT is the real story. Had George Bush won this election, would you still believe the American voters had their opinions spoon-fed to them by an overpaid desk jockey?

I can name my own Top Ten Reasons why I did not vote for George Bush, and his domestic and foreign policy stances are at the top of that list. Don't insult our commitment for progress by insulting our intelligence.

The same media that criticized Bush will also closely scrutinize Clinton's policies, and four years from now, if the American voter does not approve of them, Clinton can take responsibility and blame himself. Bush's mistake was to shirk responsibility and blame "the media."

Your responsibility, Mr. Brunner, is to stop insulting the supporters of the democratic political process because your undies are in a bundle over Bush's long-overdue crushing defeat. We all chose, and we chose wisely.

Michele K. Firkus

Police take heat

Dear Editor,

In these days of civil unrest in America, everyone has the finger pointed at them as the cause of our mounting problems.

Next to the President, the most national attention and attacks are towards our law enforcement officers.

In Wisconsin, the vendetta against police began last summer with the Dahmer case. However, the real spark was the Rodney King story, and then the ensuing "not guilty" verdict of the officers involved, that fueled the L.A. riots.

For too long, the actions of some police officers have been wrongly labeled the cause, not the effect of today's societal problems.

Granted, in any profession, there is the possibility of prejudice and wrongful action. However, the actions of few are not representative of all.

Every day thousands of law enforcement officers risk their lives for the sake of their job, which is to protect the people.

Just as their job title describes, they go out to enforce the laws that are set to protect us as well. It is the widely held belief, that to some college students, especially those under age 21, the police are the bad guys. These students think that because they are the one's busting the parties and fake id's, and then dealing out the tickets, the police are to blame.

However, we must remember they don't create the laws, those we elect do; they are just here to uphold it. If you disagree with a law or the lawmaker making it, you have the options to express yourself by pen or voice. Call or write your local official, or better yet, vote.

The problems in society came along way before law enforcement did, which is why there was and is a need for them. We can't use our police officers as scapegoats for the trouble in our society. We must show them the kind of respect we all deserve for doing our job well.

It is not our place to blame police officers for what is being done or not done. Instead, we should show them common courtesy by treating them as equals.

The next time you encounter a cop and thank him or her, or write a letter of appreciation to the Journal editor. Everybody needs encouragement for a job well done. Let's show police officers they're worth it.

Sunday exams, no way!

Dear Editor,

Often we forget about certain issues until they either get close at hand or hit home. This is undoubtedly the case I find myself in as first semester quickly comes to a close and final exams seem only a flash away.

The issue I am concerned with is the final exam schedule. I understand that this years calendar is screwed up and thus the reason why a normal Monday thru Friday exam week is out of the question.

We, as a university system, have scheduled Saturday exams before so that is not the problem. However, the difficulty I have is with scheduled exams of Sunday.

This is very poor planning on UWSP's part and totally inexcusable as far as I'm concerned.

Other UW campuses like Platville have prohibited Sunday exams and managed to map out an exam schedule that doesn't interfere with the one day of the week we should be guaranteed off.

RESERVE OFFICERS' TRAINING CORPS

THE SMARTEST COLLEGE COURSE YOU CAN TAKE

Look forward to the future with confidence. Enroll in Army ROTC, an elective that’s different from any other college course. ROTC offers hands-on leadership training. Training that gives you experience and helps build self-confidence, character and management skills. All the credentials employers look for.

ARMY ROTC is open to freshmen and sophomores without obligation and requires about 4 hours per week. It will put your life on a whole new course.

Be sure to include Military Science 102 and GPE 178 on your spring schedule.
We Introduced Our $2.99 Special To Celebrate Our Opening & You Asked For More. So, we're Proud To Introduce The Pointer Price Plunge!

10" One Topping Pizza  $3.99  each additional topping  .50
12" One Topping Pizza  $4.99  each additional topping  .60
14" One Topping Pizza  $5.99  each additional topping  .70
16" One Topping Pizza  $6.99  each additional topping  .80

No coupon necessary. Just ask for the POINTER PRICE PLUNGE. POINTER PRICE PLUNGE available at Stevens Point Pizza Pit location. Available for FREE, FAST & HOT DELIVERY, carry out or dine in. Limit 10 pizzas per purchase, per day. Prices do not include sales tax. Not valid with other coupons or specials. Offer expires 11/30/92.

Graduates offer sound advice

by Kristin McHugh

The countdown has begun. Like it or not, you will begin entering a job market flooded with people just like you.

"Two recent graduates of UWSP related their experiences in finding a job, and lent some advice to the students who will soon be entering the job market. Ron Wirtz, a 1991 graduate, is currently the editor of a weekly publication called The Mukwonago Chief. He began his job search during the last semester of his senior year.

"There was a lot more competition for jobs than I anticipated. I figured that my experience as an editor-in-chief at the Pointer would make finding a job fairly easy...but it wasn't."

While Wirtz values the education he received at UWSP, he feels that the curriculum does not place nearly enough importance on developing sharp writing and communication skills.

He also stressed the importance of getting hands-on experience in your chosen career field.

"Experience through internships or volunteer work not only shows an employer that you can do the work, but it also helps you make the connections for your job search," explained Wirtz.

Wirtz's job search continued six months after graduation. He took advantage of this time by helping to organize non-profit organizations designed to help the homeless in the Milwaukee area. Wirtz and four others managed to raise over $150,000 and gain valuable public relations skills, while networking with media professionals.

Jody Ott, also a 1991 graduate, is a news editor for Ink Incorporated. Ott did not begin her job search until after graduation. She explored several career options, including sales and restaurant management, before accepting her present position.

"My senior year was hectic and prevented me from actively pursuing a job the way I would have liked," said Ott. "It was important to me to find a job, but it was equally important to me that the job I would find be interesting."

"The pay is lower than I expected, but then again maybe I was expecting too much."

Students sing for success

"How to Succeed in Business without Really Trying," a satire on the methods and mores of Big Business, will open at 8 p.m., Friday, November 13th in the Jenkins Theatre at UWSP.

Directed and choreographed by James Moore, "How to Succeed" is the story of a young man who climbs to a position of great power, not by working hard but by following the simple rules in a book.

Along the way, the hero, J. Pierrepont Finch, encounters various roadblocks, such as the boss's nephew and other executives who are out to stop him, but he overcomes all obstacles on his way to triumph.

Created by composer-lyricists Frank Loesser and writer-director Abe Burrows, the musical opened on Broadway in 1961.

Moore says the song and dance numbers such as "Coffee Break," "A Secretary Is Not a Toy," and "I Believe in You" are an integral part of the plot of this "big Broadway musical."

Faculty member James Woodland will serve as musical director.

Kevin Barthel reveals the secrets to getting ahead in the musical, "How to Succeed in Business without Really Trying" (photo by Jeff Kлемan).

Tickets for the production, which continues at 8 p.m. through November 21st, except for a 7 p.m. performance on Sunday, November 15th and a blackout on Monday, November 16th, are available at the College of Fine Arts and Communication box office, 346-4100.

Admission is $10.50 for the public, $8.50 for senior citizens and faculty/staff and $5.50 for students. Box office hours are 11 a.m. to 4:30 p.m., Monday through Friday.
Movie paints picture of hope

Deeper truths found beneath the surface

by Dan Seeger

A strong, dark fishing line whips out over a briskly running stream, the line bending and cascading through the air in swooping patterns until it slams into the bustling river with a tiny, satisfying splash.

At the edge of the line, the patient fisherman is an intrepid young man, the angelic eyes of sight and hope that "a fish will rise."

Though this seems a simple scene, according to the new movie "A River Runs Through It," there are deeper truths to be found below the surface.

Based on the late Norman Maclean's highly autobiographical novella of the same name, "A River Runs Through It" is a poetic film that sets itself in early 20th century Montana.

Building on Maclean's reminiscences about life and his family, the film is about subtle concentration, soaking in the generous sunlight and hoping that "a fish will rise."

The river is a powerful force that comes to dominate the lives of these characters, though not in a fierce, troubling way. The river is about hope and purity, and the fact that the simplest wishes can sometimes be the most satisfying. The river is giving and loving. In the closing narration, the elder Maclean somberly admits, "I am haunted by waters."

After watching the lush film that precedes it, the statement makes an awful lot of sense.
Recycling advances

Second phase of program to start

Recycling will kick into high gear January 3, 1993, when Wisconsin law bans grass clippings, leaves, and tree and brush trimmings from state landfills and incinerators that burn without energy recovery.

Composting, chipping, land spreading and other methods that turn what was once regarded as waste into usable resources are expected to reduce landfill and incinerator wastes by 460,000 tons per year by 1995, according to estimates in a study of Wisconsin's municipal wastes in 1995, 42 percent in 2000.

"The study starts with 1990 because that was the year before Wisconsin State Law initiated the first of three bans on materials that may be accepted at landfills and certain incinerators," Cooper said. "That first ban applied to used motor oil, vehicles, batteries and major household appliances."

The second statewide ban is the one that begins in January, released by the Department of Natural Resources.

"That will be up from the 50,000 tons of yard and garden materials recovered in 1990 when Wisconsin citizens and businesses were recycling 17 percent (by weight) of the total volume of items that otherwise would have ended up in landfills and incinerators," says Kate Cooper, chief of the DNR's Waste Reduction and Recycling Section.

The report also predicts that the total recycling, including yard resource conservation and forestry, will divert from landfills and incineration 40 percent of the rate at which wastes and recyclables are generated is expected to increase faster than the rate of population growth."

Wisconsin's waste and recyclables each day in 1990.

"The rate at which wastes and recyclables is generated expected to increase faster than the rate of population growth."

The total volume of materials handled by municipal waste management and recycling systems statewide was 3,352,510 tons per year in 1990, and is projected at 3,432,700 tons in 1995, 3,551,800 tons in 2000.

"We'll use the Franklin statistics and projections as recycling parameters," said Cooper. "In the years ahead, we'll check back against them and know how far the state waste reduction and recycling effort has come and whether or not it's living up to its potential."

Meanwhile, she said, the study confirms the Department's expectations.

"The '90s will likely be remembered as the decade when Wisconsin citizens changed their 'throw-away habits," Cooper said.

Richard Wilke is the fifth person to receive the top award "for lifetime achievements" from the North American Association for Environmental Education.

The Associate Dean of the College of Natural Resources at UWSP was honored October 20 at the World Congress on Education and the Environment in Toronto.

Though he has won several prestigious citations from a variety of organizations concerned with environmental protection, he says the Walter E. Jeske Award "tops them all."

The sponsoring group, with 1,500 members, is the world's largest association of environmental education professionals. Wilke is a past president.

With his international involvement in his profession a great deal to do with his selection for the award.

He currently serves as a member of the North American Commission on Environmental Education Research and a consulting editor for the Journal of Environmental Education.

He has written several publications for the United Nations Educational, Scientific and Cultural Organization.

Also, he has led student groups on study tours in Central America, Europe, Australia and Asia.

Besides his teaching, Wilke has spoken at many state, national and international programs and conducted many pre-service training sessions for teachers.

He was appointed earlier this year by William Reilly, administrator of the Environmental Protection Agency to chair a newly created National Environmental Education Advisory Council.

In February, he was asked by the Council of State Governments to chair a committee to develop model environmental education legislation for states across the country.

Wilke, a native of Manitowoc, is an alumnus with two degrees from UWSP and a doctorate from Southern Illinois University.

His first professional assignment at UWSP came in the mid-1960's, when he became the first director of the Central Wisconsin Environmental Station near Nekoosa.

The study was conducted by Franklin Associates, Ltd., a Kansas engineering firm that specializes in evaluating waste generation and composition.

Other findings in the Franklin report include:

-- Each Wisconsin citizen generated about 3.8 pounds of wastes and recyclables each day in 1990.

-- The rate at which wastes and recyclables is generated is expected to increase faster than the rate of population growth.

-- The total volume of materials handled by municipal waste management and recycling systems statewide was 3,352,510 tons per year in 1990, and is projected at 3,432,700 tons in 1995, 3,551,800 tons in 2000.

"The third begins January 1, 1995 and applies to 11 types of recyclable materials, including newspapers, magazines and household containers made of plastic, glass and metal," Cooper said.

City or county laws may already require recycling of some or all of these products in certain areas of the state.

The study was conducted by Franklin Associates, Ltd., a Kansas engineering firm that specializes in evaluating waste generation and composition.

Design Supervisor of Milwaukew will be discussing "Landscaping Boundaries in an Urban Setting."

Society of American Foresters meets every Thursday at 5:00 p.m. in CNR 321.

UWSP Fire Crew meets every Thursday at 6:15 p.m. in CNR 321.

The National Park Service will be taking applications for seasonal employment in resource management, park ranger, and park interpreter positions on Tuesday and Wednesday, December 13 and 14 at the west end of the CNR. Applications are available in CNR 107 and appointments are necessary.

-- Each Wisconsin citizen generated about 3.8 pounds of wastes and recyclables each day in 1990.

-- The rate at which wastes and recyclables is generated is expected to increase faster than the rate of population growth.

-- The total volume of materials handled by municipal waste management and recycling systems statewide was 3,352,510 tons per year in 1990, and is projected at 3,432,700 tons in 1995, 3,551,800 tons in 2000.
The grouse saga goes on and on
The unknown grouse hunter bags the big one

I must apologize and confess to devoted grouse hunters in Wisconsin. I too was once a doubting grouse. But no more. This past noon. The sort of day that was Sunday afternoon's walk in the woods changed all that.

It was a dark and gloomy afternoon. The sort of day that was a cross between warm and cold. You couldn't be sure that the frost from your breath wasn't fog. It was strange, with odd currents of warm breeze mixing with chilly blasts of sudden wind, seemingly from nowhere. A few flakes of snow would fall, then soon turn to drizzle, then back to snow again.

I was visiting a good friend in a quiet corner of Portage County and wished that I could have been back in the farmhouse smoking my favorite pipe next to the cozy fire, perhaps poising my Bengalese Boomerang. But no, Lucky the Wonderdog and I went out for our usual bracing hike before dinner - almost a serious mistake.

His sudden bolting told me that he was either frightened or in pursuit of his favorite quarry, the Great North American Chipmunk. I thought little of this until, all of a sudden, I heard a strange, unknown species - a boomerang at the huge creature, a strange, unknown species. I instinctively flung the chair. I instinctively flung the chair. The bird gave out a cross between a screech and a knowsthe what I can only describe as a mutated Bengalese Boomerang (which looks a lot like the leg of an old chair). I instinctively flung the chair. My deadly aim did not fail to find its mark. The bird gave out a cross between a screech and a knowsthe what I can only describe as a mutated Bengalese Boomerang (which looks a lot like the leg of an old chair).

I quickly returned to the farmhouse and summoned my friend's two teenage boys, Barter and Rylothian. Then, we field dressed the bird and dragged it back to the farm. The boys and I were going to keep this quiet until we could further explore this mysterious terrain, but pride has gotten a hold of my judgement. I suspect that some grouse in the area have been mating with a strange, unknown species (perhaps the legendary frumious bandersnatch) or have mutated owing to goodness only knows what.

In either case, grouse hunting will never be the same. I suggest that caution be the byword for all future grouse hunters.

The Unknown Grouse Hunter

Northwestern College of Chiropractic
is accepting applications for its 1993 entering classes.

General requirements at time of entry include:
- Approx. 2-3 years of college in a life or health science degree program.
- A G.P.A. of 2.5 or above.
- A personal interest in a career as a primary care physician.

Northwestern offers:
- A professional school of 500 students with student faculty ratio of 12:1.
- A spacious 25 acre campus in suburban Minneapolis.
- Full accreditation by North Central Association of Colleges and Schools and the Council on Chiropractic Education.
- Full accreditation by North Central Association of Colleges and Schools and the Council on Chiropractic Education.

Call: 1-800-888-4777
Write: Director of Admissions

Hockey sticks it to 'em in New York

by Tom Weaver

Contributor

Rich Tece and Derek Marchand break for the puck during the Pointers' weekend competition in New York. The Pointers won the tournament by posting an 8-2 win over Hobart College, and a 9-3 win over the Rochester Institute of Technology.

Freshman Mike Zambon netted his first career goal at 10:07 of period two to give the Pointers a 4-1 lead to set up the tournament. The Statesman scored a pair of second period goals but, before the period was over, Todd Trett scored a short-handed goal, and Dave Dimirito added an extra strength tally to give the Pointers a 6-2 lead after two.

Jeff Marshall, Chad Zowin and Derek Marchand added third period goals, as did Hobart's Rob Mantrop, and the Pointers advanced to the tourney championship with the 9-3 win.

Dave Ketela made just 10 saves to pick up the Pointers first win of the season in goal.

"We were able to come out and establish our game early and that was important," said Baldarotta.

"Some of them swam a little better than we expected as a team, and only, win of the tournament. We played as a team, and everybody did their part to contribute," said Head Coach Sharron Steichen.

Against the tournament championship, the Pointers were not so lucky as they lost in 3 games to the dominating Pioneers 5-15, 11-15, and 7-15.

"Our offense really picked up. They tried to come back, but we denied them each time," said Stellwagon.

"Our defensemen played extremely well in both games, and in both offensive schemes that will dictate our success this season," said Baldarotta.

The Pointers started the weekend with a 5-0 win over Superior with defense against Superior with 16, 14, and 13 digs respectively.

"Our defense played well throughout the match with exceptional performances by Kristin, Dawnette and Jodi," said Stellwagon.

Earlier in the week on November 5th, volleyball competed in Milwaukee against Cardinal Stritch where they lost 7-15, 10-15, 3-15, 9-15. "We had a week off before this match and it showed. We struggled a lot trying to get our plays together and they moved the ball well," said Stellwagon.

Women's volleyball finished their season with an 8-24 overall record.

Swimmers perform well at season opener

by Mark Gillette

Contributor

Swimmers perform well at season opener as a team.

For the first time this year the swim and dive teams scored a 216-210 win over Hobart College in round one, and a 9-3 win over the host Tigers of RIT in the championship.

"It was very important for us to come out and play well in the RIT tournament," said Pointers' head coach Joe Baldarotta. "I think we did just that, we had a lot to prove by going out east and it was great to take home a couple of wins."

Al Bouschor scored the games first two goals seven minutes into the first period and the Pointers never looked back, coasting to the 9-3 win.

"We were able to come out and establish our game early and that was important," said Baldarotta. "Hobart was a good team and were able to take advantage of some opportunities. Overall we played very well for our first game."

Frank Cirone rounded out the first period scoring by swiping a wrist shot past Statesman goalie George Jordan who was stuck well out of the net to give the Pointers a 3-0 lead after one period.

Overall we played very well for our first game."

As a team and were able to take advantage of some opportunities. Overall we played very well for our first game."

Davis has some great skills and is extremely talented," said Baldarotta. "When you look at him and Dave Ketela, we have two very good goalies."

The Pointers dominated the ALL Tournament team, as Fletcher, Dimirito and Frank Cirone grabbed all Tournament Honors.

Todd Trett joined them as the Tournament MVP with two goals and three assists.

The Pointers will open their 1992-93 NCHA and WUSC schedules in their home opener at 7:30 p.m. this Friday at the Williet Arena. Saturday the Pointers will travel to Eau Claire for game two at 7:05 p.m. at the Hob's Ice Arena.

The Pointers will travel to Eau Claire to lead the Pointer men. Wilson four other Pointer firsts, including Dave Dimirito and Jared Marchand, break for the puck against the Pointers' weekend competition in New York. The Pointers won the tournament by posting an 8-2 win over Hobart College, and a 9-3 win over the Rochester Institute of Technology.

"I was very pleased with the tournament. We played as a team and everyone did their part to contribute," said Head Coach Sharron Steichen.

On November 6th and 7th, women's volleyball traveled to UW-Stout for the WWIAC Championships.

We controlled the whole game and played real well. The offense really picked up. They tried to come back, but we denied them each time," said Stellwagon.

"Our offense simply wasn't as effective as it was on Friday. Our games against Superior were close with a lot of back and forth play," said Stellwagon.

"We had a week off before this weekend competition in New York. The Pointers won the tournament by posting an 8-2 win over Hobart College, and a 9-3 win over the Rochester Institute of Technology.

"I was very pleased with the tournament. We played as a team and everyone did their part to contribute," said Head Coach Sharron Steichen.

Football crushes Eau Claire
by Lincoln Brunner

**Contributor**

The UWSP football team, led by a one-man wrecking machine named Tommy Henderson, won their fourth straight game on Saturday the 7th by torching the Crusaders 42-7. Henderson, a junior from Milwaukee, is the team's leading rushing threat and made a strong show for MVP with a stellar four-touchdown effort that included a 76-yard breakaway from scrimmage midway through the second quarter.

During their present winning tear, the Pointers have stripped their opponents of all dignity, beating them by an average of six touchdowns while allowing only one.

Eau Claire was actually winning at one point. They led off the first quarter with a 65-yard TD pass that capped off a five-minute drive.

Stevens Point charged right back three minutes later and tied the game with Henderson's first TD. As quickly as it had started, the Eau Claire Express disappeared to a dead stop.

After a surprising 35-13 upset of UW-Whitewater last Saturday, Eau Claire looked to be a threat to the recent Pointer winning streak. Stevens Point head coach John Michie made sure no surprises came up.

"I told the coaching staff and the players before the game, Eau Claire might have a team out there. Our kids executed well, through, and we had a good game defensively and offensively."

True to Michie's word, the Pointer defense did take an impressive showing, even if Eau Claire didn't seem to push them too hard to test them.

Freshman defensive back Clayt Birmingham recorded his first interception of the year, taking advantage of a disorganized Eau Claire offense that scraped together only two downs on the pass play.

Despite "limiting" Point quarterback Roger Hahti to 116 passing yards on the day, Eau Claire forgot about defending the run, which resulted in 376 rushing yards for Henderson and company.

Eau Claire produced an anemic 12 total yards rushing, nine of them coming in the first half.

What was the Pointer's biggest challenge this year had already been accomplished by another.

LaCrose clinched the WSC conference championship on Saturday by defeating the hopeless Whitewater team 13-3.

Michie mentioned the two losses to Whitewater and LaCrose that cost him the title were lost by a total of three points, and that he believes his team played to the best of their ability this year.

The Pointers can claim a tie for second place in the conference in the season finale at UW River Falls on Saturday, November 14th.

Purple beats gold in scrimmage

Longtime Milwaukee Brewers star Paul Molitor addressed the students of the University of Wisconsin-Stevens Point on Wednesday, November 11th.

Affectionately known as "Molly" and "The Ignitor", Molitor has been playing in Milwaukee for the last 15 seasons.

Within this time, he has made his mark around the country both on and off the field. His 395 hits were a World Series record in 1987, and the fifth longest in modern baseball history.

As a member of the 1982 World Series team, Molitor batted an impressive .355, and is the only player ever to receive five hits in a World Series game.

As well as Molitor has done in baseball, he will always remember the closeness within the Brewers organization.

Robyn Youst's 3,000th career hit was one such moment that will live with him forever.

He still has some impressive scoring, the gold squad provided the crowd with the lion's share of offensive flair.

New addition Donta Edwards, 6'2" forward, teamed up with familiar fixture Justin Freier for several big plays, not the least of which was Edwards' breakaway dunk in the first half.

Parker counted himself among the impressed Tuesday night.

"For this early in the season, the offense was pretty darn good. I'm kind of surprised because we spent the bulk of our time in practice on defense, however, we're going to have to do a better job defensively down the road..."

While there were a lot of things to keep the Quandt crowd cheering, turnovers (14 total between the teams) were a cause for Parker's concern.

"I think it's a matter of concentration right now," he said.

Despite going into this season without last year's "go-to" man Jon Julius, the Pointers are looking to make a strong defense of their 91-92 conference and District titles.

"Right now it looks like Platville, Whitewater, and Eau Claire will be the teams to beat... but we'll be in the thick of the conference." It's going to be an exciting season.

The Pointer men's basketball team plays their official season opener, was at St. Norbert College in De Pere on Tuesday, November 24th.

Molitor addresses students

When asked how he thought the offense would do a better job defensively down the road, he said.

"We're a little quicker, and certainly just as deep, so I think this is going to be a good team. What really matters is how we stack up against other teams in the league..."

While both teams showed some impressive scoring, the gold squad provided the crowd with the lion's share of offensive flair.

New addition Donta Edwards, 6'2" forward, teamed up with familiar fixture Justin Freier for several big plays, not the least of which was Edwards' breakaway dunk in the first half.

The Pointer men's basketball team plays their official season opener, was at St. Norbert College in De Pere on Tuesday, November 24th.

Paul's life, however, has not succumbed to many of these pressures.

"In his career, Molitor had his mark around the country both on and off the field. His 395 hits in his career, Molitor has been playing in Milwaukee for the last 15 seasons.

As he became more and more dependent, Molitor looked for other substances to produce equivalent effects.

Cocaine was the one thing that he found to be most satisfying."

During the late 1970's and early 80's, it was Christmas Eve, 1980, and Molitor was throwing a party for some friends. It was getting late, about two in the morning, when people started to leave.

"I became a regular party animal as they say," stated Molitor.

As he became more and more dependent, Molitor looked for other substances to produce equivalent effects.

Cocaine was the one thing that he found to be most satisfying."

Despite going into this season without last year's "go-to" man Jon Julius, the Pointers are looking to make a strong defense of their 91-92 conference and District titles.

Tuition
continued from page 3
These decisions lie in the hands of the Board of Regents and the state legislature.
Our only resource is to make an appeal to those who represent us in this supposedly democratic system of ours. Perhaps with a new administration in place we will see some of those changes that were promised. Perhaps.

Molitor
continued from page 13
was still alive.
This experience was enough for Molitor to realize that is was time he turned his life around.
Molitor attests to the fact that you can't win the race with cocaine. Molitor spends a great deal of his off-season time speaking about how people should strive for their dreams in a substance free way.
"I would like to see everyone have the opportunity to reach their ultimate abilities substance free," concluded Molitor.

Exams
continued from page 4
I personally feel that this Sunday exam scheduling could have been avoided and worked out another way. I'm sorry to see the University of Wisconsin-Stevens Point stooping to such low levels.
I think the word "pathetic" sums up the whole situation and I would hope that UWSP would never disappoint students and faculty with Sunday exams again.
Sharyl Ewing
UWSP Student

Ladies, the men of Seduction are coming to Wisconsin Rapids.
Seduction will be appearing at PEACHES at 9 pm on Thursday, November 19.

* 18 & older admitted
* $10,000 stage & light show
* A Mel Gibson look alike
* A playgirl centerfold
* A model featured in GQ magazine
* "One of the hottest male reviews in years" states the Times. "More than just a male review" says USA Today.
* Tickets $10 advance, $12 at the door. Available at PEACHES.
