Among events slated for the Centennial Homecoming at UWSP are the Centennial Homecoming Parade on Saturday, Oct. 1, and a Centennial Walk on Sunday, Oct. 2. In addition, this year’s football game will pit UWSP against UW-LaCrosse.

Several gatherings are slated for the night before Homecoming. In addition, a few men’s and women’s sports teams will compete in alumni events.

Former outstanding athletes will be honored with induction into the Athletic Hall of Fame. Athletic Director’s award and the Eddie Kotal, Jerry Baird and Hale Quandt scholarship awards will be presented.

The cost of the banquet and awards presentation is $18 for adults, and $9 for children 12 and under. Proceeding the banquet, there will be a Fifth Quarter Reception in the Lafollette Lounge in the University Center (UC) where refreshments will be served starting at 4:30 p.m. The festivities will continue on Sunday, Oct. 2, with a Centennial walk of the Green Circle. Students, staff, faculty, alumni and friends of UWSP will gather for the 10-mile walk at 9 a.m. in Iverson Park.

Steps for breakfast and lunch are planned along the route. All UWSP faculty, alumni and friends of UWSP will be honored at 11 a.m. in the Alumni Center. The Phi Sigma Epsilon/Alpha Sigma Alpha will host an alumnae brunch at noon in the UC Heritage Room.

Self-defense spray legal in Wisconsin

Olorgesic Capsicum (OC) available in the area to people over 18

Pepper spray will be legal in the state of Wisconsin starting October 1. Pepper spray, also known as Olorgesic Capsicum (OC), is a natural substance found in the oily resin of the cayenne pepper. When being prepared as a self-defense product, particles of the pepper are suspended in an alcohol or other solvent base under pressure in an aerosol container.

“Contact with OC particles in a sprayed mist incapacitates subjects by inducing an almost immediate burning sensation of the skin; but more importantly, a burning, tearing and swelling of the eyes. When the agent is inhaled, the respiratory tract is inflamed, resulting in a swelling of the mucous membrane lining the breathing passages, temporarily restricting breathing to short, shallow breaths,” according to the Open File, University Newsletter of UW-Milwaukee.

OC differs from mace in that the spray is immediately effective and it is difficult for most assailants to keep their eyes open after being sprayed with pepper spray.

"It will be illegal to sell OC to a minor." The Open File, UW-Milwaukee Newsletter

situation of self-defense. "Any person using OC to intentionally cause bodily harm and discomfort for any reason other than self-defense will be guilty of a Class A misdemeanor." "It will be illegal to sell OC to a minor." In Wisconsin the spray must be contained in a standard dispenser with a safety cap, not camouflage to look like something else. Although it is legal to carry pepper spray, it is still illegal to carry mace or tear gas.

Some benefits of pepper spray are that the physical effects of being sprayed may hinder aggressive behavior, and OC does not cause long term health risks. Some of the limitations of pepper spray are that no chemical is 100 percent effective.

"Over a period of time the pepper particles will settle to the bottom of the container, rendering the spray ineffective unless shaken before use, and spraying pepper spray in a room may effect everyone in the room. According to Don Burling, Director of Campus Security, all of the officers in his department have been trained and certified to carry the spray. The training included classroom and hands-on exercises. It also involved exposure to a full dose of OC in order to experience the debilitating effects of the agent.

Celebrating one hundred years of higher education UWSP

September 29, 1994
Helsinki, Finland—An Estonian ferry with 867 people aboard capsized in stormy weather off Finland’s coast early Wednesday. About 12 passengers were picked up Wednesday, but it was unclear what caused the accident.

Tongi, Bangladesh—Police fired rubber bullets at anti-government demonstrators who threw crude bombs and stones at trains Tuesday. At least 200 people were injured, including 20 police officers.

Cali, Columbia—A U.S. scientist was kidnapped over the weekend by leftist guerrillas at a roadblock set up near Cali. Thomas Hargrove, 50, from Rotan, Texas was working with the International Center of Tropical Agriculture.

Los Angeles—Three children lived off scraps of food in their apartment for up to three days, as their mother lied on the floor. Neighbors had been suspicious because of the loud volume of the TV and a foul smell coming from the apartment.

New York—A teenager is using Michael Jackson for $20 million, claiming he was hit by Jackson’s van as the star fled a crowd outside of a Brazilian toy factory.

Detroit—Civil Rights pioneer Rosa Parks testified against her alleged attacker on Tuesday. Parks was attacked in her Detroit home Aug. 30. Joseph Skipper, 28, has been ordered to stand trial on three counts of breaking and entering, armed robbery and one count of breaking and entering with intent to commit larceny.

Abrahamsen creates scholarship fund

The Jane Wright Abrahamsen and Martin Abrahamsen Scholarship Endowment has been established in the College of Professional Studies at UWSP. The $50,000 scholarship fund was created to honor the late Jane Wright Abrahamsen, by her husband Martin of Madison. She was a native of Mauston who taught home economics at high schools in Ithaca, WI, and Ironwood, MI. Martinis a Wittenberg native who is retired employee of the U.S. Dept. of Agriculture and the University of Maryland.

Jane received a three-year home economics degree in 1928 and a bachelor's degree in home economics education in 1933, both from the Stevens Point Normal School. She went on to receive her master's degree from UW-Madison in 1936. She was active in the Home Economics Club and women's basketball while at Stevens Point.

There will be two scholarships given, one in the School of Human Development and Nutritional Sciences, and one in the Division of Fashion and Interior Design. The awards will be given to outstanding freshmen who have proven leadership and involvement in civic activities. The scholarships may be continued if recipients maintain records of excellence while at the university.

The endowment was established with the UWSP Foundation with the assistance of Jean North of the College of Professional Studies.

Garcia accepts new position

A specialist in the field of education foundations has been named assistant vice chancellor for the multicultural affairs at UWSP.

Ricardo Garcia, former director of teacher education at the University of Idaho, has been named to two half-time appointments, as an administrator in charge of programs for culturally diverse high school and college students as a tenured member of the education faculty.

Garcia's area of expertise includes subjects such as history, philosophy, sociology, and psychology of education. His emphasis within the field has been on multicultural education.

In light of the demographic changes taking place in this country, with minority populations becoming the majority in many places and few teachers representing minority groups, Garcia believes future educators should be trained cross-culturally in order to be effective teachers in any classroom.

As an administrator at UWSP he will be in charge of Upward Bound, Pre-College Programs, the Multicultural Resource Center and the Native American Center, and many of his classes will have a strong multicultural basis.

Born and raised in Raton, NM, Garcia received a bachelor's degree from the New Mexico Highlands University in 1963. He became a high school English and American History teacher in Terra Amarilla, NM, where he met his wife Sharon (Kleist), a native of Mosinee. After moving to Wisconsin and teaching at a Waushara high school for two years, he began graduate school at the University of Denver, earning a master's degree in Education and an Ed.D. in curriculum and foundations of education.

He has taught at Kansas State University, University of Oklahoma, University of Utah, Eastern Montana College and the University of Idaho.

Garcia says he has devoted his professional and his personal lives to fostering mutual respect and human rights for all people. He is the author of the textbook, "Teaching in a Pluralistic Society: Concepts, Models and Strategies," published by Harper-Collins. A longtime member of Phi Delta Kappa, he has been a chapter president, chapter sponsor, and lecturer at many seminars throughout the country.

Garcia will be provided for those donating blood.

Red Cross travels to UWSP

By Vicki Strebel

The Red Cross blood drive kicks off this Tuesday in the Laird Room of UC, and organizers anticipate this will be one of the most successful campaigns in years.

"There is no risk in donating blood, and this gives students a chance to get involved and create a compassionate atmosphere here on the UWSP campus," said co-ordinator Vicki Strebel.

Students interested in donating blood can sign-up in any of the various academic buildings, including DeBot and the UC, but walk-ins are welcome.

The drive will be held Oct. 4 from 11 am to 5 pm, and Oct. 5th and 6th from 9 am to 3 pm.

Cookies, snacks, and juice will be provided for those donating blood.

Organizers are striving for a goal of 180 donors per day for the

For students the choice is clear-Tommy Thompson for 4 more years

To the Editor:

This November Wisconsin has the opportunity to elect for an unprecedented third term, the great Governor of the State of Wisconsin, Tommy Thompson. Like all of you, I am a student and am proud of the accomplishments our Governor has made for our State and our Universities.

Right now, Wisconsin has created over 380,000 jobs and is No. 1 in the nation in the creation of manufacturing jobs. More people are working today in Wisconsin that ever before. Available jobs is the core issue for students and Governor Thompson is working to help students out when they graduate.

It was just a joke, guys!

Dear Editor,

A college campus is a place were free speech thrives, right? After all, people come from all different cultures and have different ideas, therefore college is the perfect place to express these ideas, right? Well, that's what I thought, but my experiences this past week taught me otherwise. You see, I had a sign outside my door that said, "Of course I don't look as busy as the men, I did it right the first time." Obviously someone who thinks I'm a male-bashing feminist decided to rip my sign down. Come on!! It was just a joke! I'm not a male-basher, nor am I a feminist. I have lots of guy friends to prove it, but sometimes I like to put things outside my door just for the sake of getting attention and making people laugh (those with a sense of humor, anyway.)

It is okay not to agree with or even like everything you see on someone's door. After all, this is a free country. But please, this is college, we're suppose to be adults and respect other people's property. If there's a sign that really bothers you for whatever reason, talk to the owner first, don't just rip it off. Obviously if a sign is sexually or racially offensive it doesn't belong outside the door. Fortunately though, most signs are in good taste. This is a wonderful country because of its freedom, so let free speech thrive and leave the doorsigns alone.

Kris Cudnehoski

Metaphysical radio

S.O.S. to all parties interested in the full spectrum of metaphysical studies — reincarnation, UFOs past and future lives, clairvoyance, parapsychology, etc.

Every Sunday night from eleven to midnight, a radio talk show dealing with these themes is broadcast locally, the show actually lasts a full three hours, but currently WSPO is airing only the final hour. The management there is willing to air the full three-hour show if sufficient interest is reported to the station by letter or phone call to WSPO management.

Interested parties are urged to contact WSPO, my phone appeal is not sufficient to make the change. I have formally studied the ancient wisdoms for many years and find this program delightfully high quality.

Please feel free to contact me.

Ad bad: real mad, sad

Dear Editor:

We would like to express our disappointment in the University's enthusiasm to advertise the Centennial celebrations to the student body. Last Saturday night, we came across a really great band in parking lot X. The band Rocket from Minneapolis was here to help celebrate WSPO's 100th anniversary. Unfortunately, this fabulous outdoor concert lacked attendance. We believe that it was because of limited advertising on campus. This was a large misfortune to the students because it was the best Top 40 band we have ever seen. We hope that the University would bring back this band and advertise it better for more of the student population to enjoy.

Amy Chagnon and Jesse Crowe
We shouldn't be there
By Bill Downs

American blood was spilled on foreign soil this weekend. Many Americans are asking: Why? Why are we once again playing policeman for the rest of the world? Why does the United States appear to find it necessary to export its morality and ideals onto other nations?

The answer to these and the other questions about the turmoil that is indicative of the island nation of Haiti are not easily explained. The one thing that is easily explained is the ineptitude of the Commander in Chief of our armed forces.

If we had a president who had served in the military, and understood the seriousness of sending the sons and daughters of America's in harm's way, perhaps he would not be so quick to do so.

If we had a president who understood the concept of peace through strength maybe we would not appear to be susceptible to intimidation by leaders of countries with obviously inferior forces.

The one thing that stands ominous in this whole affair is the timing.

It would seem, by the sheer number of stones being tossed around about Haiti on Capitol Hill these days, that there are nothing but saints running this country.

Unfortunately, this so-called 'civilized' world of ours is sick with uncivilized brutes and petty tyrants for which the only cure seems to be a swift boot placed squarely assward. And I ask you, Who better to wear that boot than Uncle Sam?

Now, before you go off half cocked, I want you to know that I've heard that 'American blood spilled on foreign soil' complaint before, and I'm curious; Just what exactly is the difference between American blood and foreign blood? Is it that American blood is more valuable than the non-American kind? If so, what is the exchange rate? 200 to 1?

Let me begin by pointing out that politically, I am no Hawk. I find military intervention rather crude.

As for me, I offer not another stone, but a place to stand, out of harm's way, to speak, before any more of you are hit in the head by a rhetorical lob and struck dumb.

Let me begin by pointing out that politically, I am no Hawk. I find military intervention rather crude.

Unfortuately, this so-called 'civilized' world of ours is sick with uncivilized brutes and petty tyrants for which the only cure seems to be a swift boot placed squarely assward.

And I ask you, Who better to wear that boot than Uncle Sam?

Now, before you go off half cocked, I want you to know that I've heard that 'American blood spilled on foreign soil' complaint before, and I'm curious; Just what exactly is the difference between American blood and foreign blood? So, are you still going home on the weekends? **WHY?!**

You could be **hearing** one of the best concerts of the year.

You could be **touching** that comedian you once saw on MTV.

You might be **seeing** a block buster movie on a 150" screen for less than a rental.

You could be **tasting** some great refreshments.

You could be **smelling** clean air now that the UC is virtually smoke free!

So follow your sixth sense, and explore your senses with UAB...
Trees across Wisconsin are beginning to paint the forests in vivid autumn colors of golden yellows, rich reds, brilliant oranges and deep purples. “We are already seeing the leaves of trees that are stressed, or that grow in the lower-lying areas of northern Wisconsin turn brilliant fall colors,” says Trenten Marty, forest geneticist with the Department of Natural Resources Bureau of Forestry.

Marty says the colors come from three types of pigments—chlorophyll, carotenoids and anthocyanins—found in the leaves of trees, and that weather plays a role in the intensity and duration of colors.

Chlorophyll gives leaves their green color throughout the growing season and is present in the chloroplasts of the leaves. In the process called photosynthesis, chlorophyll takes the sun’s energy and produces simple sugars—the tree’s food—from water and carbon dioxide. During the summer, chlorophyll is continually produced and broken down within the leaf. Carotenoids are also present in the leaf chloroplasts, but because the chlorophyll predominates, they are not visible through the growing season.

Carotenoids are responsible for the yellow, oranges and brown fall colors in leaves. As fall approaches and the day length shortens, production of chlorophyll subsides, veins that transport sugars out of the leaf close, and sugars are trapped within the leaf.

“The length and intensity of the fall color season is really dependent on our late September and October weather.”
Trenten Marty

As the chlorophyll breaks down, the carotenoids reveal their yellow pigments. Anthocyanins develop in the early autumn when the excess sugars trapped within the leaf cells are exposed to bright light. These pigments are responsible for the intense reds and purple coloration in the leaves of certain species, like sugar maples in Wisconsin, Marty says. “The length and intensity of the fall color season is really dependent on our late September and October weather.”

We have the most brilliant and intense fall colors when we have a series of bright, sunshine-filled days and cool, but frost-free evenings.

These conditions cause sugars to be trapped in leaves, enhancing the production of anthocyanins in the leaves.

Marty says some of the best areas for viewing fall color in Wisconsin include the Bayfield Peninsula in northern Wisconsin; Rib Mountain and the Wausau area in central Wisconsin; Door County in eastern Wisconsin; Kettle Moraine State Forest in southeastern Wisconsin; the Wisconsin River Valley, Baraboo Hills and the driftless area of southwestern Wisconsin; and the Mississippi River Valley in western Wisconsin.

“it is extremely difficult to predict and to predict the peak fall color times in the state, as it varies slightly from year to year, depending on the weather conditions,” Marty says.

He adds that peak fall colors generally occur about the following times in Wisconsin: the last week of September and first week of October in the northern third of the state; early October to mid-October in central Wisconsin; and mid-to-late October in southern Wisconsin.

Indoor wall challenges climbers

By Peggy Kell

In May of this year, the Wausau Woodson YMCA opened a $27,000 project to promote the adventure sport of rock climbing.

“The Climbing Wall,” an indoor artificial rock face, offers those with a yearning for thrills the opportunity to learn and hone skills necessary to rock climb in a natural setting.

The project was brainstormed by seasoned climber David Ports and constructed by Vertical Concepts, a company based out of Bend, Oregon.

Measuring 20’x24’, the wall is constructed of fiberglass and aluminum, and features moveable foot and handholds to give diversity to its six different climbing “routes.”

These routes vary in difficulty from 5.0 for beginners, to 5.11 being the most difficult. To put this rating into perspective, the best climbers in the world today are doing ascents rated 5.14.

The grade 5. rating scale refers to “free climbing” without the aid of mechanical devices like those used in ice climbing.

Ropes or harnesses used in free climbs aren’t considered aids, since they are a safeguard only and not for upward propulsion during an ascent.

The wall is open to anyone ages eight and up and offers instruction, open sessions, and group climbs.

The YMCA employs 12 supervisors and two instructors who teach basic climbing and safety techniques, rope and knot craft, and Belay Skills Certification.

According to climbing enthusiast and wall supervisor Terry Rutlin, this facility is a great training vehicle for experienced climbers, and a safe place for beginners to get exposed to the sport. It’s also a good alternative to boredom during long Wisconsin winters.

Classes run from 6:30-9:00 p.m. on Mondays. Open climbing is held on Thursdays from 5:30-9:30 p.m. Fridays from 3:00-9:00 p.m., and Saturdays from 2:00-8:00 p.m. Reservations for group climbs can be made by calling the YMCA at (715) 845-2177.

Because this is a new project with a fairly high initial investment, the cost for non-YMCA members is $40 for instruction, or $8-12 for open climbing. For people who belong to any YMCA facility, the cost is a little easier to swallow; $25 for instruction, or $2-3 for open sessions.

To participate in open climbs, one must pass a knot tying test, which is free.

One appealing aspect of climbing at The Wall is that climbers don’t need to invest in equipment.

Ropes are provided and a climbing harness may be rented for $1. Shoes are a must, but tennis shoes will work well.

There is a competition for experienced climbers on December 3rd.

For more information, contact Dave Ports at 845-2177.
SAF members experience Alaska

By Anne Harrison

Treehaven offers moon fest

A special evening celebrating the autumn moon will be presented at Treehaven Field Station near Tomahawk.

Autumn Moon Festival takes place Saturday, October 15 at 6:30 p.m.

Activities include a harvest dinner, storytelling by the light of the moon, a naturalist program exploring the fascination of moon legends and lore, and music by Dave Dall.

Indoor accommodation will be available in case of inclement weather.

Treehaven, a multi-purpose facility of the College of Natural Resources, is located on 1,400 acres of woodland resting on a glacial ridge—ideal for moon observation.

It is located between Tomahawk and Rhinelander off county highway A.

The cost of the program is $15 per person. Reservations should be made by October 10 by calling 715-451-4106.

CHL drops puck Sunday

By Gregory Vandenberg

Contact:
The College Hockey League (CHL) begins play Sunday at the K.B. Willett Arena.
The season will run from October 2 through the end of the semester, and will resume after the semester break. The cost to play is $40 per semester, and jersey's will be provided with a $15 security deposit.
The league, which had been organized by UWSP students in the past, was restructured over the past year and will now be governed by Willett arena personnel.

"The CHL is open to any UWSP student, and it gives students a chance to meet people and play competitive hockey."
Rob VanDomelen

The College Hockey League (CHL) begins play Sunday at the K.B. Willett Arena.

"The CHL is open to any UWSP student, and it gives students a chance to meet people and play competitive hockey."
Rob VanDomelen

Games will consist of three 16 minute periods and are scheduled for Sunday and Monday nights after 10 p.m.

"The CHL's main objective is for the students to have fun."
VanDomelen added. "Anyone interested should call me at 341-8415." An information meeting for members is scheduled today at the K.B. Willett Arena.

Population level stirs controversy
By Amy Kluetz

Picture Cleveland. Population 506,000. That is the population growth (approximately 2-3% of the entire U.S. population) the U.S. experiences every year.

The entire world population grows by a quarter of a million each day. Indeed, there is an organization, Zero Population Growth (ZPG), which is dedicated to informing the public of the dangers that increased population has on the planet.

"Environmentalism is linked directly to ZPG," comments Rich Dubiel, Professor of Communications at UWSP and former Media Director of ZPG in Cincinnati.

He adds further, "Ecology... it all boils down to people."

Karen Kluetz, "I am a member of ZPG."

It has been around since the early 1970s; at the time milling around the streets were just a few of the opponents of ZPG. Dubiel was one of them. "Big businesses want to see more growth."

For this reason many of the corporations will fight against those attempting to curb the population, which, according to Dubiel, is at "the highest level since the 'Baby Boom.'"

Dubiel stated that, "Many right-wing leaders link ZPG with the 'Red Scare.'" These people would say there really isn't a problem because the United Nations doesn't know exact figures [of how much the world is expanding]."

"Ecology... it all boils down to the people." -Rich Dubiel

He also noted that those in the Reagan/Bush camp are not supporters of the ZPG growth ideals.

The Clinton Administration has enacted the President's Council on Sustainable Development, in support of ZPG.

Dubiel, according to Dubiel, this group advocates that the problem with people is not population, but socialism.

In the same scope, the Vatican feel that capitalism is the cause of problems (in the opinion of Dubiel).

"The problem is not the people; it's too much government involvement.

If it was 1760, population would be 4.5 million. It's not; technology has improved so much, Earth can support many more people."

Eddlem also stated, "Not all big businesses, such as Planned Parenthood and many tax-exempt foundations, are against ZPG."

The co-spokesman for the John Burch Society is William Grigg, another attendee at the UN International Conference on Population and Development in Cairo (Cairo Conference).

When he arrived from that conference, he reiterated to his colleague Eddlem that one of the speakers at the conference commented the U.S. has so many problems with population, because we have so much growth here.

He commented that when you can control procreation, you can control anything. This is the over-involvement of government that Eddlem spoke about. In interest, when you compare the amount of growth, you can determine the amount of misery... people are not the problem in overpopulated areas--growth is it.

There will be a local "post-Cairo" Conference in Wasau, on October 22.

"It will focus on the implementation of the strategies set forth at the once-in-a-decade UN Conference," states Megan Scott, spokesperson for the John Burch Society.

Cyclist addresses students
By Stephanie Daubner

Dan Buettner, a man known for many accomplishments, one being biking across Africa, will be in Stevens Point on October 4 at 8:00 p.m. in the Alumni Room.

This event is being sponsored by UAB and is free of charge. Campus Cycle will be donating prizes to be given away at the lecture.

During Buettner's visit to Stevens Point, he will talk about his adventures as he traveled 12,107 miles across the African tropical rainforest, one of the most densely populated areas in the world.

A view from over the hill
By Terry Kluck

I just noticed something. You know how people are always saying that time seems to go faster as you get older, that a year passes in what used to feel like a month, and a month passes in what used to feel like a week?

I'm sure you know what I mean. Just think back to those oh-so-long-ago summers that seemed to go on forever. Well, they're wrong, I've just found an exception to the rule.

While it's true that those huge blocks of time seem to fly by, a single day spent in the library with a two-year-old child on forever... especially if he's just gotten up from his nap and has the energy of 16 well-fed hummingbirds.

Now I know why, when my mother used to take me and my siblings out for the day, she'd every once in a while stop, roll her eyes heavenward and moan, "Oh yes, life is good, life is earnest, I think I'd like to jump in a furnace."

My mother also used to say she hoped I'd have children who acted just the way I did. While some might have taken that as a curse, I'd rather like to believe that she wanted me to grow up and have a few unruly children who would help me realize that just because everyone says something is true, it isn't necessarily so.

Sort of an "I want you to be a critical thinker" wish.

Thanks, Mom; it worked! I've had an incredible burst of rational thought and have designed a fool-proof guide for parents in the nineties: A TOTA LLY EXCELLENT HOW-TO GUIDE FOR BEING A TG COOL PARENT.

1) Do cartwheels in front of your child's friends. Sure, it may look a little bit weird, but it looks major cool.
2) Participate in their slumber parties. Light candles and burn
The Crystal Ball of Reality

By Scott Van Natta

Chapter One

The storm swept down the mountainside, its intense winds bending trees over and snapping branches like toothpicks. Snow swirled down the mountain slopes in mini tornadoes, placing snowflakes in rock crevices not even ants could find. The wind swept snow into huge piles of hardened ice crystals that wouldn't move until the spring thaw. In the midst of the storm, just below timberline, John Bennett covered under a rock ledge. It had been four days since he had stumbled upon the grizzly tracks. He was an experienced tracker, having followed wolf, moose, mountain goat, and cougar through rough Rocky Mountain terrain. He had tracked grizzly before in Canada, but never before had he seen tracks like these.

The tracks were nine and a half inches across, making it the biggest bear he had ever tracked. He followed the trail for two days without catching a glimpse of the animal. Then on the morning of the third day, after climbing to the top of a ridge, he saw the grizzly crossing over the next ridge. He swung his Remington 308 into firing position, and his scope read 700 yards, a ridiculous distance to try to hit anything. He squeezed off a round anyway, then watched the grizzly disappear from view.

Another day and a half of tracking led him to his spot under the rock ledge. The tracks had come almost without warning. Only a blast of cold air announced its arrival, followed by the blinding snow. John sat up against the rock with his knees drawn up to his chest. His rifle and backpack lay next to him, gathering snow that blew over the lip of jagged rock. He watched with great dismay as the grizzly tracks quickly filled with snow and vanished. Only the knowledge that the bear had been moving northwest for four days made him want to continue the chase.

John knew that the bear probably wouldn't stop for the storm, and with each passing moment the distance increased. Making a quick decision, he strapped on his pack, grabbed his rifle and stumbled out into the raging storm. Twenty-five miles northwest of John, a trapper named Eric Thomas was checking his trap line. He had lived in Alaska his whole life, and animal pelts were his sole income. The year had been slow; too many storms like this one kept animals in their homes.

As he approached the eighth trap in a series of 14, he was able to distinguish through the wind and snow a dark shape lying on the ground where the trap was located. After getting a little closer, he could see that it was a lynx. For Eric, a lynx pelt would bring in enough money to feed him for a month. As he walked up to the animal, he noticed it was still alive. He slung his rifle off his back and prepared to shoot the lynx when a movement off to his right caught his eye.

Entertainment Feature

There's something very eerie in your house... television. Well, admittedly it's not your T.V.; it's what's on it at 8 p.m. Fridays. What's on is "The X-Files," a government agency designated to research and carry out investigation of paranormal activity.

The show is definitely thought-provoking, as well as offering some of the finest writing for this new fall lineup. However, the concept of the episodes can be confusing to those without a hobby interest in the paranormal.

The scripts delve quite heavily into technical aspects.

CD Review
By Robin Warden

Consolidated's new album, "Business of Punishment", is exactly what I've come to expect from them:
angry, biting, cynical, and true. Unlike the majority of bands, this one refuses to sell out to the pop scene, in
stead, they continue to pump out their own brand of high-quality political rap/nuke/thrash fusion. Be warned, this
album is not for the faint of heart, it covers topics like violence, vegetarianism, pornography, the "pro-life" movement, and the emancipation of the oppressed. This isn't Mariah Carey. If you like music with a lot of bite and a real message, this is the album for you.

Void where prohibited. Not available in (10) states. Good only in United States and Puerto Rico. Mail to: Kodak, and enter on card. No redemption.
Somewhere along the line, Dick Bennett's life went, well, pleasantly wrong.

Bennett, the current UWGB basketball coach, knew early on that he wanted to make a career out of coaching basketball—but there was just one thing.

"I always wanted to coach basketball," he said in a recent interview, "but I never wanted to go beyond high school.

And for 11 years, Bennett stayed in the high school ranks, compiling an impressive 168-60 record while making pit-stops in West Bend, Mineral Point, Marion, New London, and Eau Claire Memorial.

But in 1976, Bennett decided to try his hand at college coaching and was named the head mens' basketball coach at UWSP, inheriting a hapless program that had seen better days.

In nine unforgettable years (1976-1985), Bennett resurrected the Pointers to a 174-79 record, and in doing so, built one of the strongest small college basketball programs in the country, proving to himself he could indeed coach at a higher level.

"I didn't know if I could do it," Bennett said. "The Pointers were in a near frenzy as chants of "DICK DICK, OPEN THE DOOR, LET THE POINTERS ON THE FLOOR" filled every inch of Quandt Fieldhouse prior to crucial conference matchups—especially against the arch-rival Blugolds.

Although Bennett fondly remembers many of those classic battles against Eau Claire, it was the game against West Virginia Wesleyan in the quarterfinals of the 1984 NAIA national championship he looks back on the most.

"We were playing the number one team in the country," he recalled. "They were really a juggernaut, and we played perhaps, the perfect game. We literally shut them down and just dominated them. It showed what we could do."

The Pointers beat the Bobcats, who were 32-2 at the time, 77-50 en route to a second-place finish in the national tournament, losing an overtime heartbreaker to Fort Hays State in the championship game, 48-46.

Of course, Bennett had the opportunity to coach some outstanding players at UWSP, but it's no secret that Terry Porter, "I'm very pleased," he said. "I got a chance to watch him grow and shape him. To see what you can do to someone who wants to learn was a genuine thrill.

While the Pointers had tremendous individual talent, Bennett made it clear that the secret behind their success was the 1984 NBA Portland Trail Blazers, at Point were critical to the success we've had at Green Bay."

And as Bennett enters his 30th year of coaching overall, the always humble Bennett laughs off any mention of the word "legends.

"I'm not," he said with a chuckle. "I've happened to have some success, but I've been connected with some good people. There have been guys that have done far better."

Women's kickers red-hot after weekend sweep

Wheaton College was no match for the Pointers, as Janie Probst and Jenna Dougherty stole the show. Probst, the second team All-Americans forward, and Dougherty, a dominant and versatile player with explosive quickness, combined for three goals and three assists en route to a 5-1 win.

"I didn't know if I could do it," Bennett said. "The Pointers were in a near frenzy as chants of "DICK DICK, OPEN THE DOOR, LET THE POINTERS ON THE FLOOR" filled every inch of Quandt Fieldhouse prior to crucial conference matchups—especially against the arch-rival Blugolds.

**Spikers suffer setback**

**Pointers slow down after strong start**

By Brett Christopherson

Slow starts can spell doom to a team that’s trying to turn the corner.

After starting its 1994 campaign on a quick note, the UWSP women’s volleyball team sputtered, dropping a pair of important League conference games to UW-Platteville and UW-Stout last Saturday at Platteville, before rebounding with a split against Marian College and Lawrence University at Berg Gym, Tuesday.

After watching the Pointer record drop to 10-7 over all and 0-2 in the WI WIAC, head coach Julie Johnson expressed disappointment and concern over her team’s performance—especially with their slow starts.

"We seem to dig ourselves in a hole," she said, "and we need to work on that. We get down early and it’s tough to come back."

Perhaps the biggest disappointment for Johnson was the fact the Pointers came out flat in their conference openers against Platteville and Stout.

"We played very inconsistently," she said. "In the Platteville game our intensity level just dropped as well as our confidence."

"I thought we played better against Stout, and I thought it was a good game," she added. "We hadn’t really seen a team as good as Stout, but I know we can compete with them."

The Pointers lost to the Pioneers (9-8, 1-1) 15-10, 11-15, 13-15, and 11-15, and to the Blue Devils (16-1, 2-0) 8-15, 13-15, and 8-15.

Stevens Point came back strong against Marian, sweeping the Sabres 15-10 and 15-5, before dropping a tough three-set match against Lawrence, 14-16, 15-8, and 12-15.

"We started out slow against Marian," Johnson said, "and Lawrence is a good, scrappy team. "Against Lawrence, out attack was strong, but they have a good defense and they’ll knock the ball right back at you if you’re not ready."

Johnson remains confident, however, that her team will rebound.

"We’re going to concentrate on starting out better," she said. "We’re on the right track and we believe we can do it."

The Pointers are back in action Saturday, travelling to Eau Claire to compete in the Eau Claire Tournament.

"We seem to dig ourselves in a hole, and we need to work on that."

**Julie Johnson**

---

**Harriers lose a step in Stout**

**Men finish third; women seventh**

In order to move forward, sometimes a step backwards is necessary.

After two straight successful meets, the UWSP men’s and women’s cross country teams struggled, as the men finished third overall while the women placed a disappointing seventh overall at the Stout Invitational last Saturday.

Despite the setback, men’s head coach Rick Witt looked at the meet as a learning experience.

"We made some mistakes," Witt said. "Our lack of experience showed, but we wanted to see where we are as a team."

Witt also used the meet to get a good look at the course his team will have to run at this weekend’s (Oct. 11) meet at the 50-yard line and line. They sure do now. Thanks to a 46-carry, 286 yard running performance by the talented Mickens, the Bulldogs ran past the Pointers Saturday, 28-16, in a non-conference game at Goerke Field.

The loss was the Pointers second straight, dropping them to 1-2 overall, while the NCAA Division IAA Bulldogs rose to 3-1.

It looked like the Pointers were going to have no trouble against Butler as running back Nate Harms crashed through the line from a yard out for an early 7-0 lead.

Unfortunately, that’s when Mickens decided to take the game into his own hands, scoring the first of his three touchdowns, as the speedy back bulldozed his way into the endzone from 4 yards out with 4:31 left in the opening half to tie the score at 7-7.

Stevens Point answered the Butler touchdown with a time-consuming 62-yard scoring drive which ended when Todd Passini nailed a 28-yard field goal to give the Pointers a 10-7 lead at the half.

Butler didn’t waste any time scoring in the third quarter as Mickens hit paydirt with a 15-yard run arond the right end to go up 14-10, while the Bulldog offense used their first possession of the second half to move the ball 80 yards.

The score remained the same until the middle of the fourth quarter when the Butler offense took advantage of a Pointer fumble, and the Bulldog’s Eric Ackman pushed his way into the endzone, a short time later, for a 5-yard touchdown run, increasing the Bulldogs lead to 23-10.

Stevens Point refused to give up, however, and climbed back in the game, 21-16, after quarterback Tom Fitzgerald fumbled wide receiver Tim O’Hare in the endzone for a 37-yard touchdown strike with 2:44 left in the game.

The Pointers tried an onside kick, but Butler recovered the ball at the 50-yard line and later scored another touchdown, a 30-yard jaunt by Mickens, to defeat Stevens Point, 28-16.

Fitzgerald completed 16 out of 31 passes for 183 yards and 1 touchdown, while Harms led the Pointer rushing attack, gaining 100 yards on 19 carries.

---

**Bulldogs tackle Pointer gridders**

If the UWSP football team didn’t know who Arnold Mickens was prior to their non-conference tilt with Butler University, they sure do now.

Thanks to a 46-carry, 286 yard rushing performance by the talented Mickens, the Bulldogs ran past the Pointers Saturday, 28-16, in a non-conference game at Goerke Field.

The loss was the Pointers second straight, dropping them to 1-2 overall, while the NCAA Division IAA Bulldogs rose to 3-1.

It looked like the Pointers were going to have no trouble against Butler as running back Nate Harms crashed through the line from a yard out for an early 7-0 lead.

Unfortunately, that’s when Mickens decided to take the game into his own hands, scoring the first of his three touchdowns, as the speedy back bulldozed his way into the endzone from 4 yards out with 4:31 left in the opening half to tie the score at 7-7.

Stevens Point answered the Butler touchdown with a time-consuming 62-yard scoring drive which ended when Todd Passini nailed a 28-yard field goal to give the Pointers a 10-7 lead at the half.

Butler didn’t waste any time scoring in the third quarter as Mickens hit paydirt with a 15-yard run arond the right end to go up 14-10, while the Bulldog offense used their first possession of the second half to move the ball 80 yards.

The score remained the same until the middle of the fourth quarter when the Butler offense took advantage of a Pointer fumble, and the Bulldog’s Eric Ackman pushed his way into the endzone, a short time later, for a 5-yard touchdown run, increasing the Bulldogs lead to 23-10.

Stevens Point refused to give up, however, and climbed back in the game, 21-16, after quarterback Tom Fitzgerald fumbled wide receiver Tim O’Hare in the endzone for a 37-yard touchdown strike with 2:44 left in the game.

The Pointers tried an onside kick, but Butler recovered the ball at the 50-yard line and later scored another touchdown, a 30-yard jaunt by Mickens, to defeat Stevens Point, 28-16.

Fitzgerald completed 16 out of 31 passes for 183 yards and 1 touchdown, while Harms led the Pointer rushing attack, gaining 100 yards on 19 carries.

Look, Hobbes, I cut a piece of cardboard to make a TV screen.

See, I just hold it up and it's like I'm on TV.

Now, your own show! Too bad I can't really force my way into millions of people's homes each day.

But on the other hand, no one in this home can turn me off!

So what's it like being on TV?

It's great!

Now that I'm on television, I'm different from everyone else! I'm famous! Important!

Since everyone knows me, everything I do now is newsworthy. I'm a cultural icon.

I think your antenna needs adjusting.

Watch, I'll use my prestige to endorse a product.

Hi, I'm Calvin. Eminent television personality. Here to tell you about new improved chocolate-flavored sugar bomb. I love em!

They're crunchy on the outside, creamy on the inside, and they don't have a single artificial ingredient. Or anything to get in the way of that rich, fuzzy taste. MM-MM.

Yes kids, you'll like it. It's so much you won't be able to sit still! Remember it's the cereal I get paid to recommend because I'm famous!

Hi, mom! I've got my own TV show!

That's nice!

Hi mom! I've got a Calvin! Amazing, great Calvin! Oh it's the one that you'd like to meet? He's the one who just can't be beat? He's a Calvin. LA DA DA DA.

Hi mom! I've got an idea for a sit-com called 'Father Knows Zilch.'

Thank you! Thank you! But what an audience! Thank you! Please! Ha! No, really. Sit down, thank you! Thank you!

I'm changing the channel.

Sorry, I'm on all the networks.

One day, Wilson, I'll be sitting at that desk.

What do you think? Am I fulfilling the desire to emasculate me and eat the cereal? I endorse? If not, I can parrot this every 20 minutes.

Don't you threaten me.

Where's your TV screen? My fall lineup got canceled.

Dad said one TV in the house was bad enough, and he preferred the one with the volume control.

Merry Christmas. I've got an idea for a sit-com called 'Father Knows Zilch.'

Everythings gotta have rules, rules, rules.

On monster refrigerators.

"Oh my gosh! You know what that is, Mooky? ... My dad had one when I was a kid!"
Museum Displays Dinosaurs

Dinosaurs abound in the newly completed exhibit at the Museum of Natural History located in the Learning Resources Center at the University of Wisconsin-Stevens Point. Edward Marks, the museum's curator of education, has brought together bits and pieces of dinosaur fossils which the museum has acquired over the years.

Admission to the museum is free. It is open Saturday from 9 a.m. to 5 p.m., Sunday from noon to 4 p.m.; Monday and Tuesday from 9 a.m. to 8 p.m.; and Wednesday, Thursday, and Friday from 9 a.m. to 4 p.m. University students are usually on hand to give tours and answer questions. Tours are available by calling (715) 346-2858.

The updated display has been improved with paintings, time lines, and explanations created by Marks. He was assisted in his improved give-a-museum the ability to provide in-formation included in the displays through phone conversations and through the mail.

"People of all ages will find themselves 'entertained and educated.'"

Freckmann, curator of the museum's herbarium, assisted in editing labels and helped with research and planning.

Lorah Marquardt, W322 N 7340 Redede, Hartland, is one of the museum's staff of six student managers and assistants. The students help maintain the museum in addition to giving talks for visitors. They gain experience in public speaking while informing visitors about the exhibits, Marks states. This gives the museum the ability to provide instruction on many levels, he says.

Aspiring paleontologists will find many fossils to examine. Among the fossils are casts of Allosaurus, Coelophysis bauri, and Nannosaurus rex. Children and adults may press their own fingers to the fossilized dinosaur bones. Many of the fossils were researched under the supervision of Bjork, who left UW-SP in the late 1970s. He is currently director of the Museum of Geology at the South Dakota School of Mines and Technology in Rapid City. Bjork helped verify much of the information included in the displays through phone conversations and through the mail.

Among others, Purchases of fossils were made using revenues from the museum's gift shop. Donations to the museum helped to purchase chase fixtures and equipment to complete the display. Many of the fossils were researched under the supervision of Bjork, who left UW-SP in the late 1970s. He is currently director of the Museum of Geology at the South Dakota School of Mines and Technology in Rapid City.

Bjork helped verify much of the information included in the displays through phone conversations and through the mail.
