Women "Take Back the Night"

By Gregory Vandenberg
News Editor

The sixth annual "Take Back the Night" march will be held Wednesday, April 26 at 5:00 p.m.

The events will begin at the sundial in the heart of the UWSP campus with various speakers, including Jane Grahm of the Family Crisis Center.

According to promoters, "Take Back the Night" gives students an opportunity to join together to stop the pain of rape.

A rain site has been scheduled in case weather does not cooperate. Quandt Gymnasium will be reserved in case of rain.

The march will be followed with a performance by the local alternative rock group "Push."

Admission is \$2 for the concert or free to all those who participate in the march.

"It is important that students realize this is a contemporary issue that must be addressed," said participant Shannon Milne.

"This issue affects everyone," added Milne, "not just those who have been assaulted."

Although numerous women's organizations are sponsoring the event, men are welcome, and urged to attend.

"Men can be assaulted as well, and even if they haven't, they need to be compassionate to those victims who have been assaulted," said Milne.

"Take Back the Night" is sponsored by the Stevens Point Area Women's Club, Student Government Association Gender Issues, Women's Resource Center and Women in Communications Inc.

State representatives set to hold budget hearings at UWSP

Representatives Bill Murat, Don Hasenohrl, and Marlin Schneider will hold a state budget hearing at UWSP on Tuesday, April 25. The 7 p.m. meeting in the Laird Room of the University Center is open to the public.

Legislators from surrounding districts have been invited and will attend as their schedules permit.

Formal testimony will be given by UWSP Chancellor Keith Sanders and other representatives of various units of the university. There will be ample time allotted for members of the audience to give testimony on the impact of Governor Tommy Thompson's proposed budget.

Earlier in the week, State Senate candidates Donna Rozar (Republican, Marshfield) and Kevin Shibilski (Democrat, Stevens Point) will meet at UWSP to debate current issues on Monday, April 24.

The public is encouraged to attend the debate, at 7 p.m. in the Alumni Room of the University Center.

Bill lowering drinking age gains support

By Sara Jane Lamberg
Contributor

In a vote of seven to three, Assembly Bill 197, which favors lowering the minimum drinking age to 19 in Wisconsin, passed in the State Affairs Assembly Committee.

The committee met at the UW-Madison Memorial Union Tuesday, allowing students to participate in a public hearing before the vote.

Many people spoke in favor of lowering the drinking age. One speaker opposed the bill, while another simply spoke to inform those of

both sides of the drinking age controversy.

More than 1,000 hearing slips, each registering one person from Wisconsin in favor of the bill, sat in the middle of the committee table.

Exactly 300 of the hearing slips came from students at UWSP. Less than 50 people registered against the bill, 17 of which came from the UWSP campus.

United Council, a state student lobbying and research organization, came to the hearing in favor of the bill.

United Council informed the Student Government Association (SGA) at UWSP of the hearing, but SGA decided the bill was not an issue they wanted to work on. However, some SGA senators did support the bill and registered numerous UWSP students for the hearing.

The next step for the bill is for it to go in front of the State Assembly in Madison, as early as the end of May. The lowering of the drinking age will only occur if the state does not lose its Federal highway funding.

10% Society "Puts Unity Back in Community"

The UWSP 10% Society at the University of Wisconsin Stevens Point will be sponsoring its 4th annual Lesbian, Gay, Bisexual Pride Week entitled "Putting Unity Back In Community," April 24 - April 28. Most events and activities will be held at the University Center and all are open to the public.

The week begins Monday, April 24 with Blue Jean Day. All student, faculty and staff are encouraged to wear blue jeans to show their support of lesbian, gay and bisexual rights.

Also, speaker Paul Wesselman from the University of Wisconsin Madison will present "Carpi Denim" a program which will take a look at and discuss the effects of Blue Jean Day on the campus. 8 P.M. University Center Communication Room.

Tuesday, April 25, Speaker Redoua Rodgers from Milwaukee will speak on "Hot" lesbian, gay and bisexual issues across the state/country. 8 P.M. University Center Alumni Room.

From Tuesday, April 25 thru Friday, April 28 An information booth will be set up in the University Center Concourse 10 A.M. till 3 P.M.. UWSP 10% Society members will be present to answer questions and present information on LGB issues. Free popcorn available Tuesday only.

Gay comedian Scott Silverman will perform at 7 P.M. in the University Center Encore on Wednesday, April 26. This event is sponsored by

SEE 10% SOCIETY PAGE 7

"Progressive Legacy" focuses on global business and labor

Paula Voos, Don Haldeman, Paul Hassett, David Newby, and Tommy Thompson will be on campus to discuss "Wisconsin Business and Labor in a Global Economy" Thursday, April 20, at UWSP. The event is the 10th of 12 panel discussions in "The Progressive Legacy" series.

"The Progressive Legacy" explores Wisconsin politics and society from 1945 to the present and is open to the public free of charge.

The discussion will take place at 7:30 p.m. in the Laird Room of the University Center. It will focus on how political leaders have had to respond to the changing global economy. Mergers, conglomerates and the growth of agribusiness are but a few of the changes taking place in the area of Wisconsin business and labor. A reception for both panel and audience members will follow the discussion.

Voos will moderate the panel. She is the director of the Industrial Relations Research Institute and professor of economics at UW-Madison. She received a doctorate in economics from Harvard in 1982. Voos has served on the Commission on the Future of Worker- Management Relations and the U.S. Departments of Labor and Commerce, which made recommendations for

change in employment and labor law.

Haldeman is the executive vice president and chief executive officer of the Rural Insurance Companies. He was a member of the Wisconsin Farm Bureau for 20 years. Currently, Haldeman serves on the Wisconsin Power and light board of directors and is a member of the board of visitors of the University of Wisconsin School of Veterinary Medicine.

Hassett served as president of the Wisconsin Manufacturers and Commerce organization from 1970 to 1986. He was the executive secretary to Governor Warren Knowles for six years. He is past chair of the Dunn County Republican Party, a member of the University of Wisconsin Board of Regents, and president of the State VTAE Systems.

Newby is president of the Wisconsin State AFL/CIO. Prior to that, he served eight years as secretary/treasurer, during which time he headed the legislative program. He led the AFL/CIO to revitalize a grass-roots action program and coordinated the State's AFL/CIO's legislative initiatives on plant closing, family and medical leave, minimum wage, health care, and health and safety.

Thompson has been governor of Wisconsin since 1987 and was

recently elected to his third term. His state career began in 1966, when he was elected to the Wisconsin state Assembly at the age of 24. Because of his effective leadership, Thompson has been the recipient of numerous awards for achievement, including the American Legislative Exchange Council's Thomas Jefferson Freedom Award, City and State Magazine's Most Valuable Public Official Award, and the Free Congress Foundation's Governance Award. He is scheduled to attend but has not confirmed.

"The Progressive Legacy" desires to provoke discussion of the broad values and interests that have affected Wisconsin over fifty years of economic, social, and cultural change. Panel discussions are held Thursday evenings, Feb. 2 through May 4, and include a question-and-answer period after each discussion.

The program is sponsored by the University of Wisconsin-Stevens Point and is funded by the Wisconsin Humanities Council serving on behalf of the National Endowment for the Humanities; the Academy of Letters and Science at UWSP; Broydick and Associates of Madison; Wausau Insurance; Wisconsin Public Service; the Evjue Foundation; and Herbert Kohl Charities Inc.

Campus Beat

Tuesday, April 4

-Officer spoke with an eighth victim of the tire slashing. This victim saw two possible suspects when he parked his car.

-Student reports the courtesy phone is missing from the lobby of Thompson Hall.

-Cars were vandalized in the far south corner of Lot Q, a sharp object was used to puncture the tire.

Friday, April 14

-A resident of Steiner Hall reported that a group of males, outside the front entrance, sounded like they were about to fight. They eventually dispersed.

Thursday, April 13

-Officer noticed two females loading cans in their car from the recycling shed. They were planning on recycling them at the Golden Goat and keeping the money.

-Person noticed two kids in Lot T "shooting" something off behind the snow bank, when officer arrived she found a coffee can that contained remnants of a smoke bomb.

Wednesday, April 12

-The AD from Smith Hall called to report a man vomiting and urinating on third floor.

Congressman Obey presents awards at UWSP

Congressman Dave Obey was at UWSP last Tuesday to present awards at the annual student employee awards banquet.

"I am pleased to be here tonight to honor these students who have worked hard to earn their way through school."

"When I went to college, I worked part-time installing floor covering and also held down a job in the work study program. I was

from a working family, and every dollar I could earn was precious, and allowed me to buy something more than Campbell's soup once in a while. I know how hard it is to work and go to school. Students who balance both deserve credit," said Obey.

The House Appropriations Committee said, "this country's top priority must be education. Our society doesn't guarantee

equality of outcomes. Most of what happen to people in their lives is determined by how hard they work and by the kind of breaks, they get in life. But our society does stand for equality of opportunity, and the key to that opportunity is education."

"People are expecting Congress to save money, and for the government to waste less and deliver more. But something is wrong with the values of congress-

sional leaders who think it is ok to cut student financial aid at the same time that they allowed 'truly needy' billionaires, like the heir to the Campbell's Soup fortune, to renounce their U.S. citizenship and to move to Switzerland and the Caribbean to avoid paying taxes to Uncle Sam. That will cost the Treasury \$1.5 billion."

"Those needy billionaires will still be able to keep their homes and their country club member-

ships, while walking away from their obligation to the country that made them rich. What is this country coming to when we allow billionaires to renounce their citizenship in order to avoid paying taxes like the rest of us?"

"Working families who are trying to get a piece of the American dream for their kids by sending them to school are being squeezed. They need some help, not more squeezing."

Parking Services sponsors Earth Week walk and run

Parking services at UWSP will be sponsoring a walk/bike to school day this Friday.

The reason for this sponsorship is in consideration for Earth Week.

There will be a walk/bike up to the booth in the sun dial. Prizes and coupons will be given out by Campus Cycle.

Parking services will also be handing out information on alternative ways to get to and from campus.

There will also be a representative from parking services working the booth to answer any questions people may have.

Workers spread bark chips to prepare the trails for students with "Spring Fever."

Car wash benefit set

On April 22 and 23, the Children First group for Professor Bullis' 373 class, will hold a car wash and brat sale to raise money for Big Brothers/Big Sisters.

The car wash will be on Saturday, April 22, at Kwik Trip next to the Holiday Inn. It is scheduled to start at 9 a.m. and will continue all day.

Appearances will be made by the Stevens Point Fire Department's fire truck and ambulance as well as the Stevens Point Police Department's police car. The cost for the car wash is \$3 a car.

The brat sale is scheduled to be held at Wal-Mart on Sunday, April 23, from 9 a.m. until 4 p.m. The cost is \$1 per brat.

The group chose to hold these events not only to raise money for the Big Brothers/Big Sisters organization, but also to raise awareness of the need for money and volunteers within the organization.

The group feels that the needs of children are very important, and by helping Big Brothers/Big Sisters now, they can make a difference in a child's life tomorrow.

"March for Parks" hopes to preserve bike trails

As Earth Day approaches, businesses, individuals and now city officials are signing their support to an event called the "March for Parks."

On Saturday, April 22nd, the "March for Parks" will be held at Stevens Point's Schmeeckle Reserve.

It is a national walk event sponsored by the National Parks and Conservation Association.

On Tuesday, April 4th, Stevens Point Mayor Gilbert Halverson signed and sealed a proclamation making April 22nd "March for Parks Day." It is also the 25th anniversary of Earth Day.

"This is just another example of how the people of Stevens Point support Schmeeckle Reserve and the Green Circle Trail," explained March co-coordinator Karin Hankwitz.

She is just one of five UWSP students who tackled this project for a class. Together they have secured hundreds of dollars in donations by local businesses, brought the "March for Parks"

activity into local schools, and arranged the actual event.

The "March for Parks," will raise funds to make some trails in Schmeeckle Reserve universally accessible, and educate trail users where mountain bikes are allowed.

A kiosk (a big four-sided sign) will integrate Reserve trails with the Green Circle Trail.

Come to Schmeeckle Reserve, at the trailhead at Michigan and Maria Avenues, between noon and 12:30 p.m. on Saturday, April 22nd.

Register, and make a donation if possible. Anyone making or exceeding the suggested donation of \$2 per person or \$7 per family will become eligible for prizes donated by local businesses.

Prizes will be awarded raffle-style, will include a dinner for two, three pairs of free rollerblade rentals, gift certificates, a sleeping bag, free sandwiches, and coupons.

Put your walking shoes to use! Hike the Lake Trail (one mile) or the Green Circle/Northpoint

Drive Loop (about three miles).

When you come back, enjoy free donated refreshments and see if your name was drawn to win a prize.

Organizers hope to see a crowd of about 200 people, including university students,

school children and families. They hope to raise \$2000.

"The event will take between 45 minutes and a couple hours, depending on how long you want to walk," said Hankwitz.

"Free parking, free prizes, and you help the community.

What better way to spend Earth Day?"

Everyone can make a big difference just by going for a walk on a nice, spring day!

If you'd like more information about the "March for Parks," call Hankwitz at 344-7184.

Parking, parking, parking...

Dear Editor,

After the past weeks of parking services blasting I feel I must add my own comments to the long list of problems with the ever-so-loved parking services.

Two weeks ago Sarah Weseloh wrote some rather true things about the staff at p.s. (I will not capitalize the parking services name or abbreviation anymore in this letter because they have not given me respect so I will not give them any.) I find that most of the staff just seems to look at you like "do you actually want me to help you?" It is like we are unimportant in their o' mighty eyes.

They should try to be a little more nice to us because the name parking services to me says to give a service to someone. How wrong that is. They would just as soon sneer or ticket you for being there.

Also, I hear the appealing policy has change now so you have to pay first and then appeal. Why do they need the money so quickly? Have the budget cuts hit them as hard as they hit the students? I doubt it. I thought we were innocent until proven guilty not vise versa.

I guess we will have none of those God given rights in the p.s. kingdom.

When I started school here way back say three years ago, a permit was around 45 dollars. The next year it went to around 47 dollars, and now I hear it has kept moving to almost fifty.

Boy, for fifty dollars myself and every other student should have our names painted in big yellow letters on our spots. But do we get this? No, we get those really neat digital parking meters.

That is something that I have always wanted. I don't care if it costs more, they are just neat to look at. What was wrong with the old turn the knob kind? I have seen very few out of order signs on the old kind in 10 years than I have seen on the new and improved meters in the past year.

If something has a digital reading it must need a power source of some kind. The old kind didn't need power and they did the job with very little cost in comparison to the new meters.

Which brings me to another point, the parking assignments. For example, why should a person living in Neale Hall have to

park way the hell over in lot Q, the vast wasteland.

I just loved walking a half-mile to and from my car my freshman year.

Also, commuters like Joe Campus should get to park in these better lots as their seniority grows. Why should they have to walk all the way from "Q" land every day.

What is it I hear that the students are only allowed to make only 3 or so call-ins per year or semester (I can't remember which).

This is very unsafe for students coming back from home late Sunday nights and who do not want to walk a long distances to their assigned lots through dark areas. I know there are escort services available for these situations, but it seems like a lot less of a hassle to park your car close to your dorm and call it in.

I guess simple things and parking services go together like oil and water. It seems p.s. is not only rude to students who pay their wage, but they like to compromise our safety with their lovely policies.

SEE PARKING PAGE 18

Pride Week begins

Dear Editor,

I would like to take this opportunity to inform your readership that April 24th marks the beginning of Lesbian/Gay/Bisexual Pride Week "Putting the Unity Back in Community" here at UWSP.

We at the 10% Society are extremely excited about our week of programming and encourage the students, faculty and staff to take advantage of the wide range of events being provided over the course of the week.

Most urgently, we would like to encourage participation in "Blue Jean Day" which will take place Monday, April 24th.

On this premier day of Pride Week, we seek to provide members of the UWSP community with the opportunity to wear blue jeans to show their support of Lesbian/Gay/Bisexual rights and equality.

Blue Jeans were chosen as a symbol due to their easy accessibility to individuals wishing to show support.

Over the four years that the 10% Society has existed on this campus, we have been extremely pleased with the support we have received, ranging from adminis-

tration, residence halls and other student organizations.

With "Blue Jean Day" we are seeking to provide people with an opportunity to display their support on a more visual level, thus making a powerful civil rights statement.

A follow-up presentation to Blue Jean Day will feature Paul Wesselman, coordinator of Residence Life at UW-Madison, who will speak on the effects of the social statement, on this campus and others, in a program entitled "Carpe Denim".

Any concerns one may have about "Blue Jean Day" should be brought to this program which will take place that evening in the Communication room in the UC at 8p.m.

Thank you for your support. I hope to see a denim revolution, so to speak, on Monday. Also, I encourage everyone to attend the variety of events which compose Pride Week '95.

Remember, one of the gay community's greatest allies is the secure heterosexual. Let's all work to put the unity back in community!

Trevor Ilk
10% Society President

Education continues to become more expensive beyond control

Dear Editor:

We see, year after year, that our college education is becoming more and more expensive, and there is nothing that politics and professors can do. I thought this over, however, and concluded that only students can seriously make our education worth what it costs.

One way is for all of us to go to classes well-prepared to make them our own by confronting the topics with enthusiasm; ready to maintain a dialogue among ourselves and with our professors,

who, otherwise, end up rehearsing their own experience and knowledge in monologues.

Here is how to do so:

Participate instead of just listening and taking in the material somebody else offers so we can tell it back to the teacher if requested.

Do not play someone else's game, but advance our own ideas and expose them to our professors, guidance, connections and improvement.

Assume responsibility for our creativity and negotiate among

values within the content, providing support for what we say from book's authority.

Study the assignments in all our courses and do not rely on our capability to grasp from others just as much as necessary to pass the immediate test. It does not take much effort to regurgitate information to pass exams at the last moment, it is not the purpose of education.

I am painfully aware of students literally paralyzed with fear of speaking in public. I have no easy solution for them, but I can

offer them the suggestion to share their feelings with the more talkative of us; we are unarmed and do not intend to attack classmates, but rather our subject matter. This is how we can make education less costly, by studying hard to finish our college promptly and with success.

The second way to reduce education costs is to promote the adaptation of a sophisticated, distance learning system. It would permit us to attend classes, sit

comfortably staring at TV sets, listening or napping and taking tests from machines when we are awake.

I must admit this is the easier way to reduce costs: fewer rooms, fewer classes and professors for many students will, undoubtedly, reduce the cost of education, but as for its quality it remains to the future to decide.

While waiting for this second system of information to take

SEE CONTROL PAGE 7

Student questions recycling

Dear Editor:

Each day everyone is inundated with having to make choices. One of the decisions we tackle regards whether we live an environmentally friendly lifestyle. The realm of decisions ranges from simply picking up a piece of litter to actively donating one's time, energy, and talents to causes/issues one is passionate about.

One of the decisions that we all make daily is to recycle. This is a very common action in our lives. Whether a person lives on campus or off, recycling is a part of our lives.

However, for the students who are residents of the Stevens Point community and must obey City recycling regulations, our efforts to help our planet may be in vain.

Have you ever pondered where the clear plastic bags filled with recyclables go after they are collected?

All recyclable materials are taken to the Portage County Recycling Facility.

At this location the materials are sorted and prepared to be sold to buyers of recyclable materials. Those expensive bags that you purchase are sent to a landfill. They are not recycled. Why? Because the City of Stevens Point believes that bags make collection easier; the sanitation engineers don't have to bend over as much.

Also, bags enable easy enforcement of regulations because they are clear. Another argument is that it is easier for the customer, because only one trip to the curb is necessary. If we are talking

ease, how convenient is the trip to purchase the bags?

An alternative means to collecting with bags would be to use bins. Bins can be reused. They are worth the extra trip to the curb to be picked up after collection, simply because they are reused each time you recycle.

Today each of has another choice to contemplate: bags versus bins. If you are attempting to live a green lifestyle, the selection is obvious: bins.

Go out today and purchase a bin(s) with lids to avoid spillage. More importantly contact your city representative and express your concern about the green lifestyle issue that affects our planet.

In favor of Bins,
Lisa Welle

Joe Campus attracts student attention

Dear Joe Campus,

Please insert foot in mouth! And while you're at it, why don't you pull your head out of your rear-end and try to comprehend yet another angle to the moral, ethical and seemingly personal debate surrounding parking on campus: NOBODY SAID LIFE IS FAIR!

One would think that by now we, as full grown adults (I truly hope you become one soon) should realize that life is not always fair, be we all have to play by the rules. It is our responsibility to understand and abide by the rules imposed on us, try to change them through proper judicial channels, or at least accept the consequences of ignoring them.

Now, unless you were raised or influenced by individuals who filled that small mind of yours with a bunch of liberal "psychobabble" and unrealistically rosy pictures of how life is, you just need to grow up!

Besides presenting a terribly written example of our educational dollars at work, you pointed your finger at many people unjustly, stated several unfounded claims, and made too many false accusations.

How can I say this? Let's just say that I've seen both sides and I've done my homework Joe! Therefore, I must set the record straight for your benefit and for Parking Services.

Here are some corrections to your uniformly unfounded claims, as well as, some answers to the pointless questions which you presented "for those who don't, can't, and won't abide the tyranny of Parking Services":

(1) Parking Services pays all of its officers, all of its vehicle costs, and gas charges with parking revenue.

(2) The Ford Ranger which you mentioned is shared between parking services, which uses it for parking enforcement and lot maintenance, and general services which uses it for hazardous waste and materials handling - both departments are charged individually for mileage and gas.

(3) Revenue from parking has paid for improvements such as new metered parking lots (lots F-West and X which costs .30/hour and does not require a Gold Card!), expanded or improved metered parking lots such as lots Y and F, and general parking lot maintenance which occurs during the summer months.

(4) The per hour fee of .30 in lot X has never risen since the opening of the lot in 1993.

(5) Student fees for parking in lots Q, J, P, T, W and G are \$49.90 annually (much more affordable than \$160.00 plus \$40.00 for a bus pass from lot 60 to campus at UW-Madison).

(6) Lot Q is not that big, and it doesn't take 20-minutes to walk across it unless one stops to complain every 2 minutes.

(7) Lot P and T are reserved for students with seniority (if you've been here 5 years you should be able to get into lot T Joe) and the rates are the same - \$49.90.

(8) Lot V is a staff lot only, and is not available for students with seniority or otherwise.

(9) Lot E which is a faculty/staff lot, currently accommodating 115 valid decal holders in the 120 space lot (not including the 6 disabled spaces available).

(10) Decals are to be positioned in the left rear window of the vehicle, not the bumper Joe, and the reason why Parking Services regulates whether it is placed correctly and fully attached is because there are some dishonest people who steal decals, find and use lost decals, or borrow ones they haven't paid for and tape them to their windows.

(11) The Stevens Point Police Department parking enforcement officer has no jurisdiction on our campus lots, so why even bring it up?

(12) The employees at Parking Services, while they may not be that well received, do perform real and very necessary jobs, ones which most individuals don't have the tolerance level or character to do.

Furthermore, in case you haven't noticed, the City of Stevens Point is not a "model" city design wise. There exist some very pertinent problems concerning off-street parking around campus that area residents would love to see resolved.

And it's true, there exist more functionally "utopian" alternatives for parking design and development on campus, however, these alternatives (a multi-level parking structure to name one) have been shot down for very good reason: they are too expensive.

If you or anyone you know can't afford .30/hour in lot X, forget about parking in a structure Joe. Therefore, the university has done the best with what it has. Indeed, I highly doubt any city

or university has ever been designed specifically around parking - student or otherwise.

This is all well and good, but how about the fact that life just isn't fair? Are there really too many rules and regulations which delve into our rights as citizens of the United States or as students here at UWSP?

Our country was built on principles Joe. And with those principles come with rules, regulations and standards. However cruel and unfair they may seem at times, they are the reason why you and I are able to state an opinion in the first place.

However, it seems you probably take that for granted too. It is a privilege to be a citizen of

SEE JOE PAGE 7

Consolidated Papers provides wetland

Dear Editor:

I don't know how many students are aware of the Consolidated Papers, Inc. (CPI) mitigated wetland near Rocky Run Road and West River Drive, about two miles southwest of downtown.

The wetland is relatively hidden from the road, with only a few large boulders to mark the path that leads down to the water. If you take the time to walk quietly down that path this spring (especially near dusk), you will be rewarded by what you discover.

Perhaps you will see mallards swooping in for the night, their

wings whistling in the shadows; you might hear the buzz and hum of insects, or a cool evening breeze playing a soft tune on last year's cattails, or even a splash as you startle a frog from its hiding place along the water's edge.... It is not a quiet place, but it is peaceful. It is a good feeling.

You might not know about this wetland, but somebody does.

Daylight reveals what the grayness of dusk temporarily hides. Twisted metal lies rusting in the shade. Plastic bags and cans become entangled in the cattails and drift across the water's surface like half-sunken

ships. The floating structures that were built by university students to encourage waterfowl to nest on the wetland have been riddled with bullet holes, the victims of someone's target practice session.

This is wrong. The wetland was created in 1988 by Consolidated Papers, Inc. to offset (or "mitigate") the loss of a "low-quality" wetland destroyed in the expansion of their Water Renewal Center. We should take advantage of the valuable community resource that CPI has provided by using it wisely.

So visit the Rocky Run Road wetland. Watch as new plants

and animals take up residence in a developing wetland, and take care to leave their home even better than when you found it.

It's easy: pick up trash, don't trample plants by walking or riding bikes over them, use the target range in Dewey Marsh, etc.

Wildlife-watchers, hunters, fishermen, hikers, all of us will benefit from your responsible actions.

Oh, and the mallards, insects, frogs and fish wouldn't mind, either.

Debbie White

Students say goodbye to former Pointer

Dear Editor:

When you turn 21 you finally see yourself as an adult with a whole world of possibilities awaiting you. You never think that you or anyone your age will not live past that greatly anticipated birthday.

It pains us to say that this past week we lost a fellow Pointer.

Gabe Miller blessed this campus for two years with his athletic capabilities on both the basketball and baseball teams. But it was his humor and love of life

that touched the lives of all who met him.

He transferred to Platteville to further his athletic career by being part of their National Championship basketball team this year, but in his heart he was and forever will be a Pointer.

He may only have lived to the age of 21, but he lived every minute of those years to the fullest.

He always had fun, and he made any moment you spent with him a moment to remember. We can honestly say that the

times we spent with Gabe Miller are and will remain some of our fondest college memories.

He liked to party, play practical jokes, and piss you off, but that is what makes him Gabe and that is why his friends love him.

He was named after an angel and in a sense that is what he is. He brightened up any moment with a joke or a song and now his presence lingers.

For those who knew him, they will understand what we have been saying about him and are

bound to be able to tell you a story of some ridiculous situation they experienced with him or something hilarious he said.

If there is an angel in heaven that can raise a little hell, you can be sure its Gabe Miller. That's the way he would want it, and that's why we love him and will miss him.

Thanks for the memories Gabe.

Love
Wilson, Shane, and Angel

the United States and an honor to be a student at a university.

Further, I don't think that Parking Services (as a business entity) or its employees have infringed on your rights or anyone else's for that matter. I'm not trying to imply that Parking Services never makes mistakes, or that valid complaints concerning some tickets received do not exist, but I am saying that they do not discriminate against anyone—everyone gets the same treatment.

Besides, it's a fairly simple concept (work with me on this one Joe): if there is a meter, plug it; if there is a sign that says "no parking", don't park; and if you don't understand the rest, pick up parking rules and regulations manual. It's all in there!

Lastly Joe, some have found that by approaching situations or individuals in a kind, intelligent, and mature manner rather than hastily and angrily, it is easier to get the helpful response sought.

Life is not always fair, we just have to learn to deal with it, and do what we can to improve it.

Meyer shares Earth Day message

By George Meyer

SECRETARY OF THE WISCONSIN DNR

When I started working for the Department in April, 1970, I recall the enthusiasm and concern people from widely different backgrounds showed about the environment.

A nation's entire consciousness changed, due in large part to Earth Day 1970 - an event that stimulated a remarkable quarter-century of environmental improvements at the local, state and national level.

In 1995, I'm struck by how much progress we have made in Wisconsin toward fulfilling the vision offered 25 years ago. We should be very proud of what we've accomplished together. Our water is cleaner, air freer of pollutants and land and wildlife more wisely managed.

Without the efforts of countless concerned citizens, conservation organizations, businesses and elected officials, these environmental successes could not have occurred.

We should not, however, be deceived into thinking our work is over. Wisconsin's current environmental problems are more complex and include:

- *polluted runoff from urban and rural areas spilling into waterways;

- *sediments laden with toxic chemicals that creep through the food chain;

- *habitat loss due to insensitive development;

- *harmful ground-level ozone levels in southeastern Wisconsin

- *urban sprawl and population pressures;

- *exotic species invasions that disrupt native plant and animal communities;

- *depletion of the Earth's stratospheric ozone layer, the greenhouse effect and other global threats to the Earth's health - and our own.

Problems like these require us to make resource decisions with

the integrity of the entire natural system in mind.

That's why new approaches are being used to address the environmental problems of today, including:

"In 1995, I'm struck by how much progress we have made in Wisconsin toward fulfilling the vision offered 25 years ago."

George Meyer

- *Ecosystem Management - This concept brings together air, water, land, plants, animals and people into a large interconnected unit: an ecosystem. The challenge for the next century will be to incorporate this approach into laws, organizations and everyday actions.

- *Geographic Information System (GIS) - This powerful computer system stores large amounts of environmental data in its memory. The computer can

bring together these various data sources graphically on accurate digital maps, showing how each set of information relates to another. We will be able to predict how decisions and choices will affect our environment using GIS to graphically portray potential impacts.

- *Global/Regional Partnerships - We've learned that the environment is a large, interconnected system that can remain healthy only if people throughout the world cooperate to make it so. We can start here in Wisconsin by working with

industry in cooperative environmental partnerships and by inviting citizens to find meaningful ways to protect the environment on their own or through joint projects with communities, government agencies, businesses and nonprofit groups.

The enthusiasm and energy I remember on the first Earth Day are still very much alive 25 years later in Wisconsin.

Because of our record and our commitment, we can have a major impact on solving global environmental problems and, with hard work and creativity, see our vision of a healthy global ecosystem become a reality in the years to come.

Koch leak estimates increase

By Scott Van Natta

CONTRIBUTOR

The leak that occurred in a pipeline belonging to Koch Industries last November 29th has now reached 92,000 gallons of fuel.

Last December, Koch originally stated that about 20,000 gal-

lons of the No. 2 fuel oil had leaked into the ground in the town of Plover. The estimate was later increased to 32,000, 40,000 and finally 48,000 gallons before the estimates stopped altogether.

The site of the leak is just west of Plover, and south of the Wisconsin River, in the subdivi-

sion of River Heights Estates, just off River Drive.

The actual spot of the leak within the subdivision occurred almost directly below the house belonging to Brian and Anne Vogt. The house is now vacant.

Decreasing property value and the view from nearly every window in the house were reason enough to pack up and leave.

The land directly behind and to the sides of the house has been completely stripped of vegetation and now has the appearance of a giant sandbox.

Interspersed around the area are a dozen or so large wooden boxes, covering pumping equipment. A large shed was also built to house the remediation machinery.

The Vogt's former property, a few hundred yards from the Wisconsin River, was the only one effected by the spill, which covered about an acre and a half according to Koch.

A neighboring resident proved Koch right, "Neither our drinking water or property have been affected in any way by the spill."

According to Kim Carraway, the Koch spokeswoman, no one knows how much fuel will eventually be pumped from the ground.

"It has cut back considerably," said Carraway, speaking of the 360 percent increase of fuel recovered since the first estimate.

The entire cleanup could take another 3 to 5 years.

Thinking Naturally

By Anne Harrison, Outdoors Editor

Waking up Saturday morning in the comfort of my own room at home, I almost forgot my commitment to hand out Easter boxes to poor neighborhoods in Milwaukee. It was so terribly tempting to crawl farther under the covers and listen to the chirping birds outside my window.

After living in the relative seclusion of Stevens Point for so long, I am tempted to forget the faces and sounds of the city. I am surrounded here by people like myself who long for the outdoors and love to escape from the hustle and bustle of civilization.

While I love the space and beauty of the wilder places, something about the city draws me back and creates a sense of excitement within me.

Perhaps this is why I volunteered my Saturday—even though my studies and activities revolve around our natural resources, I cannot ignore the people who struggle to make ends meet within their limited resources.

Classes teach us that the city is the root of all pollution, the den of environmental degradation. The city is not a desirable place to be. If we were to set all prejudices aside, however, we would see that thousands of needy people call the asphalt jungle home. We can play a part in bringing a piece of nature (and the peace of nature) to them.

Programs implemented by urban foresters, naturalists and others who work closely with people do wonders to improve the quality of the city environment. Planting trees, like delivering boxes of food, rewards both the giver and the receiver.

The most rewarding part of my day spent handing out Easter meals was seeing the look of pure gratitude on their faces. All the faces were so different but the appreciation shone through in their smiles and the tears in their eyes.

A little thoughtfulness goes a long way when helping people who know the rigors and disappointments of city-living. They live in a different wild, one filled with dangers and trials incomprehensible to those of us who steer clear of the city.

I hope one day to bring a small part of the nature I adore to the streets and front yards of those trapped in the concrete maze.

Splashes of green life can do wonders to invigorate and break up the harsh, grey urban landscape.

While I do not recommend moving to the city, I do suggest that people keep it in the back of their minds that those awful, horrible masses of concrete are home to thousands of faces, young and old.

Wolf recovery continues

By Scott Van Natta
CONTRIBUTOR

The number of timber wolves in Wisconsin continues to grow, and recently completed survey results indicate that the population may have reached a major milestone in the state's wolf recovery program.

"It appears we have over 80 wolves in the state this year," said Adrian Wydeven, the coordinator of the timber wolf recovery program for the DNR.

According to Wydeven, the goal of the state's wolf recovery plan is to establish a sustainable population of 80 wolves in the state by the year 2000.

During early European exploration and settlement (1634-1830), the population of wolves was thought to be about 3,000-5,000 animals.

However, during the next 130 years, the wolf population was greatly diminished and by 1960, wolves were considered to be extirpated - or no longer found in breeding populations - from the state.

The U.S. Fish and Wildlife Service listed the eastern timber wolf as an endangered species in 1974, and Wisconsin copied that action in 1975.

Under that protection, the remaining wolf population in northern Minnesota increased and individuals and small packs began moving into Wisconsin.

Wisconsin's wolf recovery plan was developed between 1985 and 1989. A goal of a minimum population of at least 80

wolves was set for the state. It appears the goal is within reaching distance.

"If the wolf population remains at 80 or more for the next three years, it is possible we may reach our goal two or three years early," said Wydeven.

If the wolf population were to remain above 80 for three consecutive years, the DNR would be able to propose that the species status in Wisconsin be upgraded from "endangered" to "threatened."

Recently compiled results of population surveys taken in northern Wisconsin indicate that as many as 18 or more packs consisting of 83 to 86 wolves now roam the state, compared to between 50 to 57 wolves in 1994.

"This is a major success for our program and indicates our efforts to educate people about wolves and their natural role in our state's ecosystem are paying off," said Wydeven.

According to Wydeven, encounters with humans are the leading cause of wolf deaths in Wisconsin.

"Of 12 wolves that have been found dead in Wisconsin since January 1994, seven have been killed on roads, including two recent deaths in west central Wisconsin," Wydeven said.

Wydeven also added that, many of the prime territories in northern Wisconsin are occupied by wolf packs.

The result is that younger wolves that head out on their

Fishery Society surveys lake

By Anne Harrison
OUTDOORS EDITOR

Braving the winds of a cold April weekend, 16 members of the UWSP Fisheries Society traveled to Lake Neshonoc near LaCrosse to conduct their third annual fish population survey.

Located in West Salem, Wisconsin, Lake Neshonoc is the object of a conservation and rejuvenation project to improve sport-fishing.

The project is a joint effort of the DNR, the Neshonoc Lake District and the Fisheries Society.

Interest in the project arose when Paul Ritter, a student from

UW-LaCrosse, did a graduate study on the lake in 1982.

Ritter's studies indicated that 80 percent of the biomass in the lake is carp. This year, however, society members netted only 8 carp, according to Renee Hahne, vice-president of the Fishery Society.

Participants in the weekend left Friday morning for Lake Neshonoc to set fyke nets. The nets were pulled on Saturday, producing northern, crappies, perch and carp.

Last year, the society was able to boom shock the lake to conduct their survey. Boom shocking involves using an electric current to temporarily stun fish

so they can be collected and surveyed.

According to Hahne, they were not able to boom shock this year due to the cold weather. "Total counts were low because we didn't boom shock," said Hahne. "It turned out to be more of a study of weights, scales and lengths."

The data collected keeps a consistent study for the Neshonoc Lake District. "They want to know if the lake is producing," said Hahne.

Eric Stark, president of the society, will write a report based on the data from the present and past years.

photo by Renee Hahne

Fisheries Society members spent a cold weekend at Lake Neshonoc netting and measuring fish for a survey.

Earth Week 1995 Poll

Students were asked: What do you think is the most important environmental issue facing us today?

"Population control, definitely."

Michele Sadauskas, junior

"I'd say the destruction of the habitat of the spotted owl."

Tom Dyer, freshman

"Probably the destruction of ecosystems. The politicians make compromises with logging companies."

Mildred Nenneman, freshman

"Pollution of the atmosphere, overall, air, water and land."

Kris Schaefer, sophomore

Distinguished lecturer speaks at UWSP

A woman, mother, and activist reads from her poetry

Sanchez has taught at San Francisco State University, the University of Pittsburgh, Rutgers University, Manhattan Community College, and Amherst College.

Since 1977, she has taught at Temple University, where she is the Laura H. Camell Professor of English.

Through the years, Sanchez has received many honors, including a fellowship from the National Endowment for the Arts, the American Book Award for poetry, the Pennsylvania Governor's

encouraging students and developing their talents.

While in central Wisconsin, Sanchez will devote some of her time to high school and college students.

On Friday, April 28, at 1 p.m., she will address high school students at the McMillan Library in Wisconsin Rapids.

A limited number of seats will be reserved for the general public. That evening at 7 p.m. at the Mission Coffee House in Stevens Point, Sanchez will listen to several UWSP students present their writing. The public is encouraged to attend.

The Distinguished Lecture Series provides individuals with unique opportunities for interdisciplinary thought and discourse on selected topics.

Guest speakers present public lectures, respond to audience questions, and are honored at public receptions.

The series is sponsored by the College of Fine Arts and Communication, the College of Letters and Science, the McMillan Library, and Poets and Writers Inc. of New York City.

For more information about Sanchez contact William Lawlor, Department of English, (715) 346-4334.

Sonia Sanchez, national and international lecturer on black culture and literature, women's liberation, peace, and racial justice, will speak on "A Woman, Mother, and Activist," at 7:30 p.m., Thursday, April 27, in the Founders Room of Old Main at UWSP.

Her presentation is the final event in the 1994-95 Distinguished Lecture Series in the Humanities: Reflections on Culture and Society.

Sanchez's lecture is open to the public free of charge.

Award for Excellence in the Humanities, and an honorary doctorate from Trinity College.

She is the author of 14 books, including "Homecoming, We a BaddDDD People," "Love Poems," and "Homegirls and Hand Grenades."

She serves as contributing editor to Black Scholar and the Journal of African Studies and has edited two anthologies.

Sanchez has been a major contributor to the development of black studies in the United States and has shown special interest in

Push holds CD release party at Tremors

Shamefaced, the highly anticipated follow-up album to PUSH's 1993 success, Breathe, will be released this Friday night at Tremors dance club.

PUSH incorporates flute and violin, as well as the mandolin, in a full-blown effort to capture the listeners' emotions on this energy laden second release.

Shamefaced tunes were written as a group effort and backup vocals were added, to create a fuller, more diverse sound, according to Pat Connaughty,

PUSH electric and acoustical guitarist.

With song titles like "Should Have Known Better," "Wasting," and "Just Like To Tell You," Shamefaced peaks the listeners' curiosity; and PUSH's Owen Sartori (vocals and acoustic guitar), Gina Jacquart (vocals and bass guitar), Pat Connaughty (electric and acoustic guitar), Nate Kielen (percussion) and Dave Thorsen (percussion) deliver.

The release of this new album, calls for the special guest appear-

ances of Angie Nienhais (violin) and Tom Janikowski (mandolin), as possible permanent additions to the band.

Expect the same emotional delivery by Sartori and Jacquart, as in past performances, and the 110% drive of all band members!

At the release party on Friday, every single song from Shamefaced, as well as Breathe classics will be played. The party begins at 8:45 p.m. at Tremors dance club. Brought to you by the Organization Formerly Known As UAB.

Creative writers present their work at the Mission

Four UWSP students will be featured at the Mission Coffee House on Friday, April 28, in a 7 p.m. program that will conclude with a presentation by nationally famous writer Sonia Sanchez.

The short presentations by the students honor the young writers for their success as creative writers in UWSP programs.

Natalie Eller, who will graduate in May a B.A. in English, was recognized last year for excellence as a poet in the UWSP English department's annual competition for writers.

Mary Mertz is a senior at UWSP majoring in English and minoring in writing and music. She is an outstanding writer of both poetry and prose.

She also plays flute and has performed with the UWSP Concert Band, Wind Ensemble, Orchestra Flute Choir, and Centennial Band.

Matt Gillis is the rhythm guitarist and vocalist in Fuzzdolly, a local band specializing in alternative music.

He graduated from UWSP in December with a degree in history. A performance artist, he is a founding member of the Gumshoe Troupe.

Amy Ballestad holds a B.S. in journalism and political science from UW-Oshkosh and a B.A. in English from UWSP, where she won the Mary Shumway Poetry Award last year.

She is the recipient of a Reader's Digest Foundation Grant and placed in the national William Randolph Hearst Competition in 1989.

She has worked as a freelance reporter and features writer for newspapers and news agencies, and she now works at the Hope Center, a shelter for the homeless in Stevens Point operated the Salvation Army.

The Cute Factor

By Katey Roberts
FEATURES EDITOR

Most of us do not seem to appreciate being called cute anymore. (Unless we happen to be part of one of those "happy couples" that I mentioned last week.)

Yes, it could be considered a complement—if you happen to be a puppy or a newborn baby, that is.

Most people that I know would much rather be referred to as hot or sexy, than cute. Beautiful and handsome are even acceptable alternatives.

The word cute just sounds too nice. Being nice is not a bad thing in itself, but there comes a point when you have heard it one too many times.

The Webster's dictionary defines cute as "attractive or pretty especially in a dainty or delicate way." Well, isn't that just special.

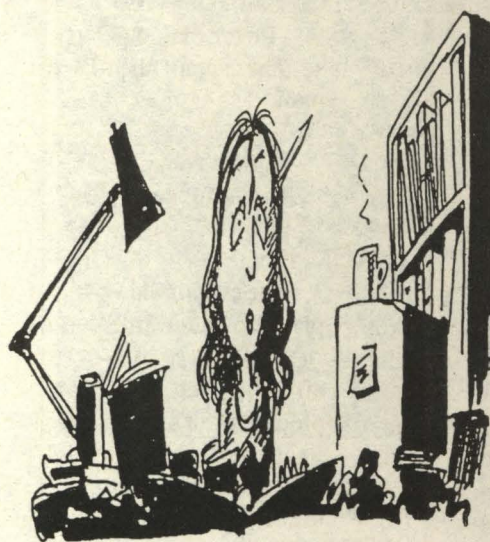

When I hear the word cute I think of Sandy from the movie Grease. I guess I have always been able to identify with the character. At least up until the point when she makes everyone's jaws drop and ask, "Who is that?" The cute, good girl has been transformed into a studette.

I guess what I am shooting for is that "wow" factor. When you're seen as being "cute", you don't tend to leave people speechless. Just once is all I ask.

I realize that a skintight black outfit and red high heels will not solve my cuteness dilemma. I couldn't do it anyway, it's not me. Plus tend to feel self-conscious in a body suit.

Who knows, maybe I am already a studette and I just don't know it.

Tell me about it, stud.

SECRETARY'S DAY IS WEDNESDAY, APRIL 26.

What's Happening

RALLY

Take Back the Night, the annual forum for sexual assault survivors, their supporters, and concerned individuals, will be held at 5 p.m., Wednesday, April 26, on the UWSP campus.

Participants will meet for the sixth annual rally at the Raymond E. Specht Forum (the sundial), between the Albertson LRC and the Fine Arts Center.

Members of the public are encouraged to join students in the educational forum.

FAIR

The Gesell Institute for the Study of Early Childhood at UWSP will host a scholastic book fair, Monday through Thursday, April 24 through 27.

Open without charge from 9 a.m.-3 p.m. in Room 106 of the CPS building on the UWSP campus, the reading event features the newest titles from more than 70 publishers.

Participating students, parents and teachers will have an opportunity to view the latest works for young readers by popular authors and illustrators. Most of the books to be sold at the fair are intended for preschoolers through second-graders.

Funds raised will be used for scholarship, enabling young children to attend the Gesell Institute.

LECTURE

UWSP will be able to "take a step" into the world of dance, when The Organization Formerly Known as UAB presents, "Dance -What's it all about?"

The program, an interactive lecture and demonstration about the vitality of dance will take place on Thursday, April 20 at 8 p.m. in the UC Encore.

Susan Gingrasso, a theater/dance professor will lecture. She will be assisted by UWSP dance students.

The event is a GIFT, Get In Free Tonight with a UWSP ID, \$1 without.

UAB and RHA members receive award

The 1995 National Association for Campus Activities (NACA) Wisconsin Regional Conference brought smiles to the UWSP delegation on April 6-9 in LaCrosse.

UWSP was honored for the second year in a row with the Outstanding Delegation of the Year Award.

Members from the 95-96 University Activities Board (UAB) and Residence Hall Association (RHA), traveled to the conference.

UAB advisor, Greg Diekroeger stated that this may be the first time that a delegation has won two years in a row.

To receive the award, NACA looks at performance prior to and during the conference.

This includes volunteering to help out, professionalism in the

exhibit halls and in talking with the agents.

NACA was established as a programming and networking system for campus activities groups throughout the country.

At NACA, campuses have the chance to book entertainment for the next school year. This includes bands, solo acts, comedians, hypnotists, and many other forms of entertainment.

At the national convention for NACA in Anaheim, CA., UWSP received a nomination for the NACA Association Choice Award.

Other awards that UWSP took home in LaCrosse were for Graphic Arts Competition. Award winners included the Melissa Etheridge window, and the Africa Trek and Alamo promotional posters.

UAB's own president for 1994-1995, Vicki Lutter was named Outstanding Student Volunteer for her service with the regional NACA.

In addition, UWSP staff members, Greg Diekroeger, Jenni Holsman, and Laura Ketchum were honored for the excellent presentations by earning the "Big Cheese" Award.

UAB and RHA members in attendance were Amy Kettner, Vicki Lutter, Matt Woodward, Steve Heizman, Jeff Pertzborn, Amy Chagnon, Owen Sartori, Kevin Boulter, Heather Sturm, Scott Pionke, Chris Fischer, Vicki Rathack, Lesley Benkoski, Brooke Dilling, Greg Diekroeger, Jenni Holsman, Laura Ketchum, Kim Spracklen, Jamie Kain, and Julie Zsido.

Area acoustic performer to play in Point

By Katey Roberts
FEATURES EDITOR

Shelley Rae Korntved is developing into one of Wisconsin's premier woman acoustic performers. She has been considered one of the undiscovered jewels of the north eastern part of the state.

Her voice has been described as possessing power, fullness and compassion.

The lyrics of Korntved's songs encompass aspects of her life and experiences.

She sings of the love of her children, the worlds social, political dilemma, relationships be-

tween men and women, love, dreams and aspirations.

Korntved has eighteen years of performance experience under her belt. She started to play guitar at the age of nine and began to write music and lyrics at ten.

In high school she was involved with choir and vocal competitions. She then became part of a basement band for awhile.

She also participated in a short-lived duo before she embarked on a solo career.

Currently, Korntved is a senior at UW-Green Bay seeking teaching certification with mi-

nors in History and Ethnic Studies. She would ultimately like to earn a living in the music and literary world.

"I believe that whether I'm a classroom teacher, a poet, or on stage I have a small responsibility to my audience to share with them a small part of myself," said Korntved.

She has performed for AIDS recognition and awareness banquets and Take Back the Night rallies. In the past, Korntved has opened shows for Tony Brown at Witz End.

This Thursday, Shelley Rae will be playing her own show at the Mission Coffee House.

The Crystal Ball of Reality

By Scott Van Natta
FICTION WRITER

CHAPTER ELEVEN

Kirov Borovich parked his rented 1993 Ford Tempo in the overnight parking lot. He stepped out, making sure nobody saw him and dropped the keys into a nearby gutter.

He strode toward Los Angeles International Airport, trying not to show the strain in his face that came from carrying a briefcase with thirty pounds of Composition C-4 explosive in it.

He spoke perfect English and if asked to, he could produce a driver's license describing him as Michael Longly, six foot two, with black hair and brown eyes, resident of Pasadena.

Nobody could have known that he had been a Russian Intelligence officer for 24 years. And that he was paying a debt to a former comrade.

The Colonel is truly nuts, thought Kirov. But I will help him anyway, I owe him that much.

He made his way through the airport until finally arriving at a bathroom. He entered and checked to make sure no one was in it. Three stories above the bathroom was the radio control tower.

Kirov gingerly placed the briefcase in the bottom of a garbage can, then covered it with paper towels.

He looked at his watch. *Twenty minutes.*

Ten minutes later, the former officer exited the airport with keys to a new rental car. At T-minus 2 minutes, Kirov turned onto Interstate-405 heading north, taking him past the airport.

At precisely 1:20 p.m., Pacific Standard Time, a digital clock within the briefcase triggered an electrical impulse. The impulse was directed through eight wires that were attached to blasting caps, mounted on the inside of the briefcase.

One thousandth of a second later, all eight blasting caps exploded simultaneously, creating

the shockwave necessary for detonating Composition Four.

The plastic bonded mixture of cyclonite, rubber, oil, and thermosetting plasticizer absorbed the shockwave and immediately

began to explode. The cyclonite molecule, also known as RDX, contains both the fuel and the oxygen needed to burn that fuel and the reaction quickly grew at an exponential rate.

The completely symmetrical explosion expanded outward for about 300 yards, blowing out the terminal's windows, and then its walls.

Two seconds after detonating, the blast erupted out the top of

the control tower, sending a fireball 300 yards into the sky.

The yield of the bomb had been ninety-five percent, and everything within 250 yards of the bathroom was flattened.

Kirov turned to look just as the control tower turned into a fireball.

A moment later, a 747 jet parked near the tower, blew up, igniting a fuel truck next to it and creating another enormous fireball.

A little added bonus, Kirov thought as he smiled to himself.

"Control, this is United Airlines Flight two-three-two, inbound from Chicago. Request permission to land, over."

"Flight two-three-two, this is L.A., you are clear to begin final approach on runway zero-seven, over."

"Roger that, Control - Ron? Is that you?"

The captain thought he recognized the voice of the flight controller.

"Yeah,...Bill?"

"Right on, buddy. How's it going?"

Bill banked the airplane to the left, then leveled out as the plane approached the runway.

"All right here. How was the flight?"

"A little bumpy, upper level winds were really fluctuating but no real problems. Talk to ya later, out."

"Roger that, out."

The captain turned to his copilot.

"Flaps?"

"Down."

"Landing gear?"

"Down."

"Ok..."

The captain slowly eased the plane down toward the runway.

Suddenly, off to the airplane's left, the airport exploded in a brilliant flash of light, catching the captain's eye. He turned to see the control tower disintegrate, then a moment later, a shockwave slammed into the jet.

Steiner Hall sponsors fund run Jazz violinist to perform concert at Sentry Theater

By Amy Chagnon
CONTRIBUTOR

The Steiner Hall Alcohol Awareness Fund Run, (SHAARF), will take place on Friday and Saturday, April 21 and 22, 1995.

SHAARF is in its 15th year and still going as strong as when it began in the spring of 1981.

Greg Beacom, Coordinator of the Fund Run said, "The Fund Run raises money for campus and community organizations that promote alcohol awareness."

The run is a 130 mile trek from the state capitol steps in Madison to Steiner Hall on the UWSP campus.

Pairs of two runners run for two miles each and hand off a baton along the way. Runners await their turn to run in a Lamers Bus.

A welcome back party will be waiting for the runners on Saturday afternoon. The scheduled

time for the runners to arrive in Point is around noon.

As in the past, alumni of the Fund Run and many UWSP dignitaries will be attending the party.

In SHAARF's 15th year, Wisconsin Rapids's Pepsi-Cola Bottling Co. and Lamers Bus Lines are cosponsors of the event.

SHAARF had been very successful this year in its fund-raising. Beacom stated that the annual auction coordinate by the Steiner Hall Headboard, the hall's government, raised almost \$600.00 this year, a new record.

In preparation for the auction, members of the headboard asked many Stevens Point businesses to donate merchandise for the event held on March 9th. Many of the businesses contacted were eager and willing to give to the cause.

In addition to the auction, a penny drop was held this past week. The hall was divided into floors and then the winning floor was divided into wings. The winner overall was Steiner Hall first floor west. The amounts for the penny drop have not yet been announced.

SHAARF participants hope to reach this year's goal of raising two thousand dollars.

Popular jazz violinist Randy Sabien joins the Central Wisconsin Symphony Orchestra for POPS Concerts on Saturday, April 29th at 8 p.m. and Sunday, April 30th at 7:30 p.m. in Sentry Theater under the direction of Associate Conductor, Dan Stewart.

The concerts are cosponsored by the ANR Pipeline Company, a subsidiary of the Coastal Corporation, with additional funding from the Wisconsin Arts Board.

Sabien will be joined on stage by the full orchestra, and UWSP Jazz faculty members Roger Braun, Drums; David Dunn, Bass; and Kurt Ellenberger, Piano for a selection of several of his original tunes including the "world premiere" of *Big Horn Balloon* from his "Sound of Fish Dreaming" recording.

Randy Sabien performs a mix of contemporary jazz, jazz standards, and original music that swings and stomps.

After only one semester, he was asked to establish a string department, which he chaired for three years.

He continues to be prominent in the field of education as a regu-

lar faculty member of the UW Summer Music Clinic, and is involved in several artist-in-residencies in schools and communities in the U.S., Canada and Austria.

The author of several articles for *Downbeat* magazine, Randy was the founder and editor of the *Jazz String Newsletter*, and has published arrangements for school jazz strings groups and orchestras.

As a performer, Sabien has appeared on PBS television's *Austin City Limits*, NPR's *A Prairie Home Companion*, and several major folk festivals.

He has shared the stage with jazz legends Lionel Hampton, Stephane Grappelli, Gary Burton, and folk artists Jim Post, Kate Wolf, and Greg Brown.

Concert tickets are available at the UWSP Arts and Athletics Ticket Office open 10a.m.-4:30p.m. Monday through Friday in the Quandt Fieldhouse on campus (346-4100).

Tickets are \$7-\$14.50 and students are \$5.50. Senior citizens and group rates (10 or more) are available. Any remaining tickets will be sold at the door.

It's a small world after all

Wolves

CONTINUED FROM PAGE 9

own are moving into more populated areas with greater densities of roads, where the likelihood that they could be hit by a vehicle rises significantly.

So while the recent reports of vehicle-wolf accidents may seem discouraging, it is actually a sign that the statewide population is growing, said Wydeven.

The recent surveys have also shown that wolves are currently occupying about 18 to 20 territories in the state, including two new territories in central Wisconsin near Black River Falls.

Most packs however, are concentrated in the densely wooded national, state and county forests.

As an integral part of the recovery plan, the DNR monitors the population by radio tracking 8 to 24 wolves a year and by conducting howling and winter track surveys.

Other key elements of the recovery plan include education, vaccination of wolves, cooperative management, protection of wolf habitat and providing legal protection for wolves.

Reality

"What the-"

The airplane was suddenly thrown sideways and the nose pitched toward the ground.

"Pull up! Pull up!" screamed the copilot.

But the plane was moving too fast and they were too close to the ground.

The front landing gear struck the runway hard, immediately snapping off, causing the nose of the aircraft to drop to the tarmac.

The captain fought to control the plane as it skidded toward the grass with the right side wing scraping the ground.

Bill could feel the left side of the aircraft began to rise up.

"Jim, raise the rear landing gear now!"

The copilot did just so and the plane dropped completely to the cement. Large flames shot out from under the belly of the plane as it skidded across the cement.

It finally slid onto the grass between runways, gouging a huge crater and leaving its trail burning before it came to a stop.

"What happened!?" a scared copilot asked.

"I'm not sure..." replied Bill as he turned to look back to where the control tower once stood.

"Oh my ... Ron ... he has three kids..."

"Reunion Day '95" set

Reunion Day '95 invitations were recently mailed to all alumni who graduated from or attended the University of Wisconsin-Stevens Point before 1950.

If you have not yet received an invitation, are part of that group, and are interested in more information about Reunion Day

'95, please call the Alumni Relations Office, (715) 346-3811.

Registration deadline is June 1, 1995.

Course is planned later in the day.

Please call the UWSP Alumni Relations Office for more information.

Pointer runners advance

Zak and Holl are provisional qualifiers

By Troy Lindloff
CONTRIBUTOR

While most students fled Stevens Point to return home for the Easter holiday, others gathered to do some running, jumping and heaving.

No, this wasn't an out of control house party, it was the annual Easter Bunny Invitational held for the men and women's track teams.

The event didn't score the individual teams. Rather, it is a chance for individuals to attempt to qualify for Nationals. In order to advance, the athletes needed to meet a set time limit, height, or distance.

Individuals can become provisional qualifiers, if their times and scores fit into a category just below the national qualifications, but good enough to be considered.

The women had two provisional qualifiers. Wendi Zak, who was named WWIAC track athlete of the week for her 37 minute, 23.96 second time in the

10,000 meter run and senior Bonnie Holl in the discuss.

First place finishers included Joan Thiel in the high jump, Jessica Drenzck in the 400 meter run, and Mandy Rasmussen in the 400 meter hurdles. Even though each won their respective event, none were able to qualify for the national competition.

Coach Len Hill was skeptical that the results may be a little skewed, "I think we could have done better had it not been for the weather."

But the weather didn't effect everyone. Dawn Leffel gave herself a birthday present by tossing a career-best in the discuss. "I perform better in colder weather," commented Leffel, "I was there mentally."

Second and third place finishers included; Brenda Suo, 100 hurdles, Callie Kohl, triple jump, Jenny Woyak, javelin, Carrie Pecover, javelin, Jamie Baars, 200 meter and Mia Sondrcal in the 10,000 meter run.

The men's team performed very well, despite not qualifying

anyone for the national competition, numerous individuals received first place finishes.

UWSP dominated the pole vault, with Robert Schmidt, Brian Keebone and Randy Dahlke wrapping up first, second and third place.

Other first place performers for the Pointer's included: Mike Wanta in the 400 meter run, Reggie Nichols in the 100 meter run and the triple jump, Parker Hansen in the 110 meter high hurdles, Craig Huelsman in the 200 meter and Dave Stankevicz in the javelin.

Nichols was also selected track athlete of the week for the WSUC.

UWSP also had 5 second place finishers.

They included: Ryan Pilgrim, hammer throw; Josh Tebo, 1,500 meter run; Jason Aguire, long jump; Brad Thill, 5,000 meter run and Kevin Stauber in the shot put.

The Pointer men and women's next meet is the Point Invitational on Saturday, April 22.

POINT BLANK

By Mike Beacom
SPORTS EDITOR

This past week, Joe Montana said good-bye to the game of football.

Fans nationwide wept, with the exception of myself, as they watched their Johnny Unitas of the 80's step aside.

Although I didn't get to see this historic event, being too busy trimming my toe nails, I hope the so-called "greatest quarterback of all time" made a strong point of thanking former 49er head coach Bill Walsh.

After all, he's the real reason for a lot of Montana's success.

I guess what I'm really getting at, is that the 49ers' offensive system made Montana and his interchangeable teammates?

Walsh created a system with so many options that if its general (Montana, Steve Young, or hell, even me) operates it correctly, the offense can't fail.

An offense that emphasizes the short pass to move the ball

slowly up the field, mixed in with a couple of draw plays and deep tosses, gave Walsh three title rings and his assistant George Siefert two.

And the system has caught on in Green Bay with Packer head coach Mike Holmgren and in Minnesota with Dennis Green, both former assistants to Walsh.

Its players (or puppets) are more intelligent than talented.

Jerry Rice is beyond a reasonable doubt the league's best receiver in San Francisco, because he understands the X's and O's in Walsh's playbook.

But if he had been drafted by the Jets or Browns, he'd be running his own car dealership right now.

I guess to put it bluntly, it's not too hard to become the all-time greatest quarterback, wide receiver, or any other position when you've got the all-time greatest coach and his plays to instruct you.

But unfortunately for Bill, the puppetmaster will always be overshadowed by his puppets.

Death of former athlete stuns UWSP

By Mike Beacom
SPORTS EDITOR

Tragic news struck WSUC basketball and both the UWSP and Platteville campuses with the death of Gabe Miller.

Miller, 21, was a member of UW-Platteville's Division III National Championship team this past season, as well as being on Point's 91-92 and 92-93 WSUC championship teams.

Gabe was also a pitcher for the Point baseball team.

It was last week Wednesday when Miller felt chest pains while playing flag football and was taken to a doctor.

The doctor was unable to detect the acute aortic dissection, which was later discovered during the autopsy.

Miller was picked up later that night by his mother and was headed home for Easter. It was during the ride to Plymouth when his condition started to worsen.

He was then rushed to Waupun Memorial Hospital, where he was pronounced dead

at 4:11 a.m. Thursday morning, April 13.

Pointer head basketball coach Bob Parker commented on his former player.

"Gabe was an integral member of our two championship teams," said Parker. "He was a very intelligent player."

Parker recruited Miller out of Plymouth, where he led his high school basketball team in scoring as a senior, taking them to state.

"He was a wonderful kid and a super athlete," added Parker. "He was a downright good person."

After his second season with Point, Miller chose to transfer to Platteville, where he pursued an education in social sciences.

According to Platteville head basketball coach Bo Ryan, "Gabe would have made a fine teacher."

Ryan went on to add that Miller was "extremely hard working" and was ready for his final year of college basketball.

"He was looking forward to next season."

Funeral services were held in Plymouth this past Tuesday.

Packers prepare for NFL draft

By Mike Beacom
SPORTS EDITOR

NFL scouts and executives have gathered together once again to take part in that special time of year known as draft week-end.

The Packers are heading into an offense dominated draft, with a strong surplus of offensive linemen.

But the Pack has needs on both sides of the ball.

Making the mistake of putting all their effort into trying to clone Sterling Sharpe in the offseason, has left Green Bay looking like a block of swiss cheese.

Holes all over the place, waiting to be filled.

Take for one, the position of cornerback.

I'm sorry, but although Lenny McGill and Doug Evans are up and coming prospects, they're not ready to deal with the likes of Jerry Rice and Michael Irvin.

Unfortunately, there really isn't a blue chip cornerback in this draft.

Notre Dame's Bobby Taylor and Michigan's Ty Law may be guaranteed first round selections, but they'll never be mentioned in the same breath with Rod Woodson and Deion Sanders as the league's top cover guys.

The running game can be helped, but only two of the available backs are worth spending a first pick on, Ki-Jana Carter and Tyrone Wheatley.

ESPN draft analyst Mel Kiper Jr. has hinted that the Pack may pick up Colorado running back Rashaan Salaam, but I feel this would be a costly mistake.

Salaam, last season's Heisman Trophy recipient, is similar to Edgar Bennett and doesn't appear to have the skills needed to turn the Packers ground attack around.

An offensive lineman couldn't hurt, but the quality ones will be gone before Packers' General Manager Ron Wolf can blink twice.

With Fred Strickland, Wayne Simmons, George Koonce and James Willis heading up a group

of pathetic linebackers, I'm sure one, if not a few will be selected during the seven rounds of the draft.

But where?

Washington State's Mark Fields heads up a weak linebacking crop, but he'll become a top ten selection.

Florida State's Derrick Brooks is attractive with his speed and athleticism, but a lack of size will push him into the second round, where the Packers don't own a pick.

That selection went to Miami to acquire Keith Jackson, which brings me to receivers.

With Jackson securing the tight end position, and Mark Ingram taking up one sideline, the idea of drafting another ball fetcher seems less important than other areas. But if the opportunity arises to draft 6'4" UCLA receiver J.J. Stokes, I'm hoping the Pack will be smart enough not to pass.

Stokes has amazing height that NFL scouts drool over, but a recent 40 yard dash time of more

photo by Kristen Himsel

Pointer softball is ready to start East Division play.

than 4.7 seconds has dropped his stock.

Three or four years from now, every NFL team that ends up passing on Stokes will regret it. Trust me.

Other things to watch for are Mark Brunell and Robert Brooks

wearing different jerseys next season, enabling the Pack to move up in the first round or pick up a second round pick.

And I might be stretching a little bit, but it wouldn't surprise me to see Edgar Bennett headed for San Francisco.

Previous Packer First Round Selections

1994 - Aaron Taylor (G)	1989 - Tony Mandarich (T)
1993 - Wayne Simmons (LB)	1988 - Sterling Sharpe (WR)
- George Teague (S)	1987 - Brent Fullwood (RB)
1992 - Terrell Buckley (CB)	1986 - Traded to San Diego for Mossy Cade (CB)
1991 - Vinnie Clark (CB)	1985 - Ken Ruetggers (T)
1990 - Tony Bennett (LB)	- Darrell Thompson (RB)

Baseball splits with Viterbo

By Joe Trawitzki
CONTRIBUTOR

The UWSP baseball team traveled to LaCrosse on Monday for a non-conference doubleheader with Viterbo College.

Stevens Point had just split a doubleheader on Saturday with Lakeland College, taking the first game impressively 17-2.

When the Pointers arrived, they found a Viterbo team eager to play baseball.

At the start of the first game, it looked as though the Pointers were going to dominate. They scored a run in each of the first three innings while keeping Viterbo runless.

The lead seemed safe going into the bottom of the fifth, but Viterbo started to come back, scoring two runs to make the score 3-2.

The Pointers answered their threat by bringing in two more of their own in the top of the sixth.

Pointer pitcher Jeremy Solin regained control of the game and the Pointers held Viterbo scoreless the last two innings, earning them a 5-2 win.

The Pointers were led offensively by Mike Strohmeyer and Rex Zemke. Each went 2 for 3 with one run batted in.

The pitching set the tone for the Pointers on defense. Solin went the distance for the Pointers giving up just five hits and no walks while striking out six.

As the Pointers went for the sweep, both offenses were brought to a halt.

The game became a classic extra-inning pitching battle. In the nine innings, both teams combined for just six hits, four by the Pointers and two by Viterbo.

The two starting pitchers, Joe Einerson for the Pointers and Dahlstrom for Viterbo, each turned in outstanding performances. Einerson went six innings giving up 1 hit no walks while striking out four. Dahlstrom went all nine innings giving up four hits, three walks, but struck out six.

In the end, it was Viterbo coming out with a 1-0 win.

Point's next action comes this Friday, as the Pointers travel to Platteville to open up Southern Division play.

CALVIN AND HOBBS

BY BILL WATTERSON

LET'S DRAW THE LINE AT THE UMBRELLA.

I GOT ANOTHER LETTER FROM MY PAST SELF. WHAT'S IT SAY?

DEAR FUTURE CALVIN, I WROTE THIS SEVERAL DAYS BEFORE YOU WILL RECEIVE IT. YOU'VE DONE THINGS I HAVEN'T DONE. YOU'VE SEEN THINGS I HAVEN'T SEEN. YOU KNOW THINGS I DON'T KNOW. YOU LUCKY DOG YOUR PAL CALVIN

SNIFF I FEEL SO SORRY FOR MYSELF TWO DAYS AGO. POOR HIM HE WASN'T YOU.

I HATE ALL THIS WIND! BOY, THIS IS UNPLEASANT! STUPID, MISERABLE WIND! WHAT LOUSY WEATHER! WHAT AN AWFUL DAY!

WELL IF YOU CAN'T CHANGE IT, WHAT'S THE POINT IN GRIPING ABOUT IT?

I'M NOT GOING TO LET A LITTLE WIND BE MORE ANNOYING THAN ME

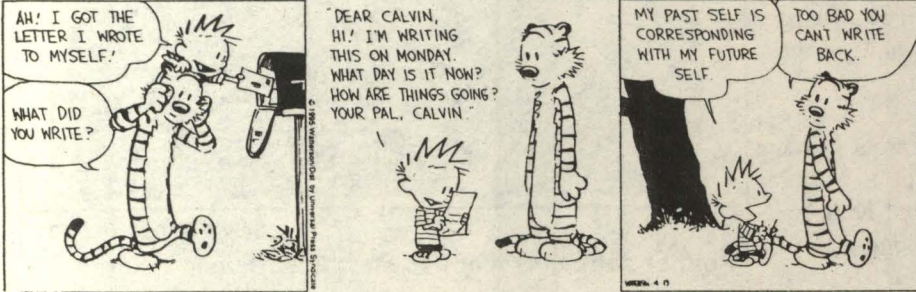

I THINK I SHOULD STAY HOME FROM SCHOOL. I'VE GOT A SORE THROAT, AN EAR ACHE, A STOMACH ACHE, I'M SEEING SPOTS, AND I'M DIZZY.

I'LL CALL THE DOCTOR.

HOLD ON. I THINK IT'S ALL CLEARING UP! YES, I THINK I'M BETTER NOW.

IT'S PRETTY HARD TO HIT THAT MAGIC NUMBER OF APPROPRIATELY VAGUE, MILDLY SERIOUS, BUT NOT QUITE WORRISOME SYMPTOMS.

AH! I GOT THE LETTER I WROTE TO MYSELF!

WHAT DID YOU WRITE?

DEAR CALVIN, HI! I'M WRITING THIS ON MONDAY. WHAT DAY IS IT NOW? HOW ARE THINGS GOING? YOUR PAL, CALVIN

MY PAST SELF IS CORRESPONDING WITH MY FUTURE SELF.

TOO BAD YOU CAN'T WRITE BACK.

WHAT A PRETTY SKY TODAY!

IT'S TOO BLUE. IT NEEDS SOME RED

RED?

JUST A LITTLE. RIGHT OVER THERE.

HANG ON.

THAT'S BETTER

WELL I'LL BE!

TIGHT CORNER

By Kal Rothfuss

KING AND GOD

ARIES (MARCH 21-APRIL 19)
Luncheon meat might lead to your fall from the graces in the faerie court.

TAURUS (APRIL 20-MAY 20)
The paperboy will get his tether tangled in and around the furnace, again.

GEMINI (MAY 21-JUNE 20)
I hate that whistling noise you make when you eat cheese.

CANCER (JUNE 21-JULY 22)
Crash a wedding reception with a friend and see who can bed the most bridesmaids; bride counts double points.

LEO (JULY 23-AUG. 22)
Your budding romance with a girl you meet in the computer lab is cut short when she screams at the sight of you and gouges a hole in your head with her deadly incisors.

VIRGO (AUG. 23-SEPT. 22)
At 5:45, a call was made to Campus Security reporting that a young man was exposing himself in one of the photography labs. No action taken.

LIBRA (SEPT. 23-OCT. 23)
A failed practical joke causes you to be buried alive.

SCORPIO (OCT. 24-NOV. 22)
A friendly woodland creature helps you discover the uses of your own spleen.

KIM

FOR THE POINTER BY SPARKY

SAGITTARIUS (NOV. 23-DEC. 21)
Your incessant, graphic demands for sex from a local horoscope writer are met with... well... incessant and graphic sex, I suppose.

CAPRICORN (DEC. 22-JAN. 19)
You start a new club on campus called, "Sons of Adam: We want our ribs back." It is rather successful.

AQUARIUS (JAN. 20-FEB. 19)
Your performance at a local party gains you the nickname, "Cheese Weasel".

PISCES (FEB. 20-MARCH 20)
You still smell like stink.

IF YOUR BIRTHDAY IS THIS WEEK
Your friends will spin you around until you vomit, saving you the trouble of going out drinking.

When asked why he writes for the *Pointer*, Pat Rothfuss responded by saying, "Well, they don't pay me anything; indeed, more often than not, they mock me and make me feel sad. Not to mention that they tie me to the chair and rub butter in my hair and Dianah hates my shirt, but so long as I have Cthrag Sarduis, my toothbrush that fell from the heavens, I know that I can make the ground swallow them up at any time. Bac-O's make everything better. Thank you." When asked what exactly he meant by any of that, Pat declined further comment.

Parking

CONTINUED FROM PAGE 4

One of the biggest reasons I moved off campus was because of these jerks and their policies. I can park my car 20 feet from my apartment for 5 dollars (not 50) for as long as I live here. I can get out of my car, walk 20 feet in a well lit area, and not have to worry if becomes a vandals play thing far away.

I realize the parking situation with out p.s. would be worse, but come on, our 50 dollars a year entitles us to some respect.

When Sarah said "parking services has painted a bad picture of themselves." She was right. Their rudeness to us has resulted in our strong dislike for them.

Wouldn't it be nice if next time when they bought new cars they got mopeds. Maybe if they had to brave the elements as much as we do they might begin to admire us for what we put up with rather than looking down their noses at us.

Perhaps Mr. Schlomo would get off his butt and actually find that the sticker is very close to the correct spot.

Remember p.s., if you want to change your image, start respecting us because respect is a two way street.

By the way, nice new pick-up, glad you like what we bought YOU.

Eternally pissed,
Jeremiah Johnson
