Celebrating one hundred years of excellence

## Radford resigns

Audit reveals undocumented travel expenditures

By Gregory Vandenberg  
News Editor

UWSP administration faces more disheartening financial news amidst the resignation of UWSP Foundation executive director, Jim Radford.

The resignation came under recent investigations from independent auditors examining undocumented travel expenditures within the Foundation.

After thorough analysis of the information given by the auditors, the Foundation accepted Radford's resignation.

"It is anticipated that the undocumented expenditures will not result in a loss to the Foundation," said Don Kropidowski, president of the board of directors of the UWSP Foundation.

"There is still a question on if it (the money) was stolen, or if it

was an expense," said Kropidowski.

"I would expect to have a definite answer in the next two weeks," added Kropidowski.

With recent cuts in funding for education from the Federal and state governments, the Foundation money loss has concerned numerous students.

"Money is so scarce on campus right now, with tuition going up and the quality of education going down," said UWSP student Katherine Roberts.

Kropidowski assures students that there is no need for concern over the loss of funds to the Foundation.

"Arrangements are pending for full reimbursement of the undocumented expenditures plus interest and costs," said Kropidowski.

Bob Hanes, a retired stockbro-

ker and chair of the Foundation's finance committee, has agreed to fill the vacant director's duties during the next few months.

The Foundation and the university will soon launch a national search for a new full time executive director.

In order to prevent this type of occurrence in the future, the Foundation has made some changes in their accounting procedures.

"In the future, the Foundation's internal accountant will report directly to the executive committee rather than to the executive director," said Kropidowski.

The UWSP Foundation is an organization somewhat separate from the UWSP administration. It aids UWSP with scholarship and investment money for various university needs.

## Obey examines cuts

By Gregory Vandenberg  
News Editor

Secretary of Education Richard Riley and Representative David Obey visited the UWSP campus Wednesday, joining students in a roundtable discussion of the various educational cuts and policies recently put forth by Federal and state governments.

"I want to try and give students an opportunity to hear what is happening with student aid," said Obey.

According to Obey, Newt Gingrich's "contract on America" directly affects students around the country.

"This is a war on young people and seniors," said Obey.

With the recent 40 percent cut in Federal housing, Congress has sent a message to America, that a balanced budget is a necessity and a priority.

Education has been attacked by the Republicans according to Secretary of Education Riley. "Education makes up 2 percent of the Federal budget, but it received 10 percent of the recindary cuts," said Riley.

This is just one more roadblock for students who wish to further their education by going on to college.

According to Phil George of the Financial Aid Office at UWSP, the last six years have seen some dramatic changes in student costs.

"There has been an 8 percent drop in enrollment, a 30 percent increase in costs for students, a 15 percent drop in grants and a 119 percent increase in borrowing from students," said George.

Although Obey assured students that Pell grants are not in danger of being cut by the government, UWSP Chancellor Keith Sanders showed concern because, "Pell grants are the lifeline for many students."

This was the seventh meeting in the district for Obey, who will take the concerns and suggestions that he has received at the meetings, formulate a strategy, and present new ideas to the House of Representatives.

## Take back the night . . .

Students gathered at the Sundial in the heart of the UWSP campus to rally against sexual assault last Wednesday night.

## Stenz donates \$10,000

A Stevens Point native has contributed \$10,000 for the Hale Quandt Endowment Fund at UWSP.

Jerry Stenz, a retired businessman, made the gift to help support an annual \$500 scholarship recognizing outstanding students in the School of Health, Physical Education, Recreation and Athletics.

The fund began under the UWSP Foundation in 1968 to honor longtime coach Hale Quandt, athletic director at UWSP for more than 20 years.

"Jerry's generous gift assures that UWSP students for years to come will benefit from the scholarship named for this very special teacher and coach," according to Karen Engelhard of the Alumni Relations Office at UWSP.

Stenz is the former proprietor of the Pour Haus tavern and Stenz Furniture.

An alumnus of UWSP, he played football from 1948 to 1950, while Quandt was the coach on campus.

Stenz and Quandt became friends after his graduation, playing golf together and seeing each other at community events.

Quandt offered personal support to Stenz when he was getting started in business. Stenz feels his success in business was due, in part, to this help.

"He gave me the chance to get ahead, and now I am able to give something back in his name," said Stenz.

Stenz also assisted in the creation of the UWSP Athletic Hall

## Academy of Letters and Science awards Hoerman

A junior mathematics and physics major at UWSP has received a Barry M. Goldwater National Scholarship worth up to \$7,000 per year and has been recognized by the Academy of Letters and Science.

Brent Hoerman, 706 Sunset Drive, Antigo, was chosen to receive the Goldwater Award from a field of more than 1,300 outstanding mathematics, science and engineering students nominated by university faculty members from throughout the nation.

Biologist Sol Sepsenwol, UWSP faculty representative for the program, says this award is considered to be one of the

country's most prestigious college scholarships in science.

The competition is open to sophomores and juniors with grade point averages of 3.0 or higher.

The 285 Goldwater Scholars were selected on the basis of academic merit and research potential.

In addition, the academy at UWSP named Hoerman an outstanding continuing student. Each year the program commends about 25 students from the College of Letters and Science for high academic achievements.

The academy also honors UWSP faculty and individuals

UWSP student Bret Hoerman

from the community for civic contributions, intellectual and academic interests, professional achievements and support of liberal studies at UWSP.

Hoerman has earned highest honors and received several academic scholarships at UWSP. He has served as a physics tutor, grading assistant and research assistant.

A member of the Student Physics Society, he will participate in an internship this summer at Michigan State University. Upon graduation from UWSP, he plans to enter a graduate program in physics.

In his Goldwater Scholarship essay, Hoerman proposed a research project with fast ionic conductors, and a technology important to the development of new,

high-powered batteries for use in electric cars.

He is collaborating with other students on research in this area under the supervision of Robert Beeken of the UWSP physics faculty.

A graduate of Antigo Senior High School, Hoerman is the second UWSP student to receive the Goldwater Scholarship since the program's inception in 1987.

Two other outstanding UWSP students, Dale Trexel of Oregon and Jodi Matheson of Eden Prairie, Minnesota, both biology majors, were nominated for this year's award.

## UW-System acknowledges Elsenrath

Dennis Elsenrath, professor of psychology at UWSP, and the Department of Theatre and Dance have been nominated for UW System teaching awards, according to Howard Thoyre, provost and vice chancellor.

Elsenrath was nominated for his work in establishing Stevens Point as the "wellness capital of the world," and the theatre and dance department was nominated because of its "history of remarkable achievement," according to Thoyre.

Elsenrath was a cofounder of the Wellness Institute, which has become "the primary communication vehicle for health

and wellness professionals nationally and internationally," said Thoyre.

He has led many presentations, seminars, and workshops in Canada, Japan, and across the U.S., on topics related to wellness and health psychology.

"He is one of UWSP's most admired teachers, revered by colleagues and students alike," said Thoyre.

Reasons for the nomination of the theatre and dance department include active involvement of students in productions and "the symbiotic connections maintained between the classroom and

the stage for all students in the discipline," added Thoyre.

"Its superb reputation established the Stevens Point campus and community as a center of fine arts programming," he noted.

UWSP theatre productions have competed in the Regional American College Festival seven times, and three of the plays were finalists for performance in the National American College Theatre Festival in Washington, D.C.

In addition, many UWSP students have participated in the Irene Ryan acting competitions, regional design competitions, and dance festivals.

## IN THE NEWS

### WORLD

- Over 200,000 refugees returned to their native Rwanda Tuesday. It has been almost a year since the refugees fled their homes, and United Nations officials fear that further genocidal slaughter may occur upon their return.

- Protesters formed a human barricade in Germany earlier this week. The group joined together to prevent the disposal of spent nuclear fuel rods at a storage site.

### NATION

- A mail bomber who has attacked without warning for over 17 years, struck again. This time the murderer killed a forestry lobbyist in Sacramento, California.

- A labor-funded research group claims that the Federal budget deficit could be easily eliminated by reducing tax breaks that equal twice the amount spent on welfare.

- Judge Lance Ito tried to get the O.J. Simpson trial back on track after spending the last two days conversing with two disgruntled jurors.

### STATE

- A link to the Oklahoma City bombing has brought the FBI to Wisconsin. Suspect Timothy McVeigh had recently visited Wisconsin and had numerous contacts with residents. There is also speculation that Wisconsin houses numerous groups that are anti-tax and anti-legislation. McVeigh is thought to have had contact with such groups.

- Six men charged with killing a co-worker at James River Paper Corporation in Green Bay will face trial, a Brown County judge decided.

## Progressive Legacy welcomes former Governor

Robert Froehlke, Lee Sherman Dreyfus, Ruth LaRocque, Ed Garvey, and Douglas La Follette will be on campus to discuss "Maverick Candidates and Campaigns" Thursday, April 27, at UWSP.

The event is the 11th of 12 panel discussions in "The Progressive Legacy" series.

"The Progressive Legacy" explores Wisconsin politics and society from 1945 to the present and is open to the public free of charge.

The discussion will take place at 7:30 p.m. in the Laird Room of the UC.

It will focus on the tradition of the maverick candidate and campaign style in Wisconsin politics. For example, Robert M. La Follette Sr. campaigned as an uncommonly independent Republican, drawing upon his talent as a speaker to reach out directly to the people without relying on party insiders and machinery.

Froehlke will moderate the panel. He is the president and chief executive officer of IDS Mutual Fund Groups and chairman of Campaign Wisconsin at UW-Madison.

He is also the director for the Institute for Defense Analysis in Washington, D.C.

Froehlke was Secretary of the Army and also the assistant secretary for administration for the Department of Defense.

Dreyfus is the former governor of Wisconsin and served as

president/chancellor of UWSP.

He was an interim state superintendent of public instruction and currently spends most of his time speaking to groups across the country on a variety of topics.

LaRocque is the staff director for the Office of Senator Russ Feingold and was the campaign manager for Feingold for U.S. Senate from 1990 to 1992.

Garvey was a candidate for the U.S. Senate in 1986, and is currently a labor lawyer.

La Follette has been Secretary of State from 1982 to the present. He is invited, yet unconfirmed.

"The Progressive Legacy" desires to provoke discussion of the broad values and interests that have affected Wisconsin over fifty years of cultural, social, and economic change.

Panel discussions are held Thursday evenings, Feb. 2 - May 4, and include a question-and-answer period after each discussion.

## The POINTER POLL

How do feel about the way the media has handled the Oklahoma City bombing?

Kyle Downey, Junior  
Social Science Major

"I think they jumped to conclusions early, before they checked their facts. In a broad sense, it hurts things because people start blaming others, like the Arabs. To me, that is a form of racism."

Stephanie Brotski, Junior  
Communications Major

"They've covered it too much. They don't need to show pictures of dead kids. But it has helped to make us see how the government can improve to stop terrorism and get justice done."

Mike Runge, Junior  
History Major

"I feel in some respects they've overdone it. The media has blown it way out of proportion. The government should try and do more and the media should be less involved."

Tanya Beck, Junior  
Communications Major

"A lot of it has been appalling. We should mourn for the people and not for the gorey details. It was sad and we should leave it at that."

## UWSP students head to Madison

By Deanne Daffner  
CONTRIBUTOR

The Wisconsin Broadcasters Association held their annual student seminar and job fair this past Saturday.

Twenty-two students from UWSP attended this day long seminar at UW-Madison.

The students attended morning sessions in broadcast sales, broadcast news, television production, and radio programming.

After lunch, there was a panel discussion on "how to get your foot in the door."

Students were able to ask questions about resumes, interviews, and the experiences of people in the business.

The seminar concluded with a job fair in which students were able to meet with over thirty representatives from radio and television stations across the state.

Many students were able to find an inside edge on how to begin their job search, while many others found leads on internships and job opportunities.

## Instructors receive fellowships

Two mathematics and computing instructors at UWSP have been selected by the UW System as Wisconsin Teaching Fellows.

Mary Whalen, associate professor, and Min Deng, assistant professor, will each devote part of an academic year to intensive discussion and research on the topic of undergraduate teaching.

During their fellowship year, they will research a particular is-

sue or teaching strategy related to their discipline or student population.

All selected Fellows will convene in a two-week Summer Institute to discuss their research projects and present preliminary findings.

Whalen is interested in pursuing a project that deals with active learning strategies.

She teaches math and math education classes to pre-service and in-service teachers, and would like them to recognize the importance of using active learning strategies in their classrooms.

Deng will teach a service course in statistics to non-majors. The course will focus on topics of probability, statistics, and data analysis.

## Party member urges support for Assembly Bill 197

Dear Editor:

Assembly Bill 197 would partially reform restrictions on the freedoms of young adults by lowering the drinking age. Some opponents claim that all young adults deserve to lose those rights because a few of them might drink and drive and hurt someone.

Penalizing all to get at a few is just not fair. Opponents are focused on just one issue and obviously don't understand or don't care about the vast majority of people who can and do use alcohol responsibly.

They conveniently ignore many people who choose not to drink but want to socialize at places which serve it.

To libertarians, the choice is not between sober safe driving or not; it is between personal responsibility or government taking away the freedoms of adult citizens.

Unfortunately, we are talking about BIG Government here. Despite the trend to throw off many of those odious unfunded mandates imposed on state and local governments by Washington, some Wisconsin professional

politicians seem almost relieved to let federal bureaucrats dictate what laws will be enforced here.

As you probably know, the other reform opponents, including many legislators and the governor, are willing to permit federal bureaucrats to reject Wisconsin laws they don't like.

When I took American History, I learned that the authors of the Constitution debated whether the states or central government should have the most power. I was taught that the federal republic they came up with was a brilliant compromise.

They would surely be horrified if they could see what their hard work has been twisted into today.

The Libertarian Party of Wisconsin in no way condones irresponsible and unsafe driving. Drunk drivers should be punished. We strongly believe that people who don't harm others should be free to behave however they wish.

We urge everyone to ask both state and federal office holders to insist on implementation of the Tenth Amendment to the Constitution. ("The powers not del-

egated to the United States by the Constitution nor prohibited by it to the States, are reserved to the States respectively, or to the people.")

Urge your state representative to support AB 197. Ask your Congressman to support the bill in committee which would prevent states from being blackmailed by federal agencies.

James Maas  
Treasurer- Libertarian Party of Wisconsin

## Student asks others to take pride in their campus

Dear Editor:

The 25th anniversary of Earth Day has passed. The rain did not damp the spirits of people at the Eco-Tunes or Eco-Fair. It is to be hoped that people were stimulated to think about where they were 25 years ago.

Maybe some of us even thought about where we will be on the Golden Anniversary of Earth Day and what the condition of our ailing planet will be. I do not know where I was twenty-five years ago as a one year old toddler.

I was sheltered by youth and a child's innocence from the dilemmas that a generation we now call; "Age of Aquarius", "Hippies", and "Free Love" were demanding be on the national agenda. As many of you know this national sit in for the environment resulted from the idea of one person, Gaylord Nelson.

Today I do know where I am, obviously at UWSP. I was lured to campus three years ago by the renowned reputation of the College of Natural Resources. This May I will graduate with a degree in Resource Management, emphasis in environmental education and interpretation.

**My philosophy is that if you can purchase and then carry any object (from a candy bar to a Trojan), you can dispose of it properly.**

My interest in this field stemmed from many variables; among them the litter that plagued my hometown streets. Led by misconceptions that the Midwest would be wholesome and clean compared to the 'scary filthy' city of Washington, D.C., I excitedly came to UWSP the 'environmental campus.'

Our campus that we proudly boost as the 'environmental campus,' is smothered in litter. In the winter our laziness, apathy,

lack of concern, and ignorance are hidden by the whiteness of snow. Yet this false pureness evaporates as the temperature rises.

The blanket of snow is replaced with a quilt of cans, wrappers from fast food establishments, paper, batteries, clothing,

and the occasional condom. A person does not need and should not be a College of Natural Resources major to be concerned about our environment.

My philosophy is that if you can purchase and then carry any object (from a candy bar to a Trojan), you can dispose of it properly. This seems simple to me. However, to many people on this environmental campus, it is not.

When I bend over to grasp someone else's laziness I am

greeted with perplexed faces from the people who pass me. Shouldn't it be the opposite? We should be confused by the visual offensiveness on our campus. What is aesthetically more pleasing, a filled covered with litter or one of grass and dotting yellow heads of dandelions? The choice

onstrate to those who label us the selfish lazy "Generation X" that this conception is wrong.

We must show the community where we live nine months out of the year that we are responsible adults and this truly is the environmental campus. Gaylord Nelson, and other leaders have shown that we each make a difference.

Why don't you start today and pick up a piece of litter from our campus grounds or a can that was left behind in your classroom. The choice of having an American Dream for yourself and your children is within your grasp.

Drowning in litter,  
Lisa Welle

## College education worth the trouble

Dear Editor,

This letter is in response to Giovanna Sciarra's letter from 20 April, 1995. I take offense at several of your comments, especially the one regarding students "drawing from family savings and bank loans" to pay for "undereducation and underemployment."

I was born to a lower middle-class family in the 1970's. My parents never went to college, so it never occurred to them that their daughter might want to.

When it came time for me to apply to colleges, mortgages and other pertinent bills prevented my parents from being able to afford to send me to college. When I applied for financial aid, the government said my parents made "too much money," so my parents ended up having to take out a loan.

For the first two years of college I was unable to find a job, and ended up working at Debot for 10 hours a week, and tutoring for 3 hours a week—at minimum wage.

During my third and fourth years of college, I lived off-campus. I worked at a deli 25 hours a week (at minimum wage) and went to school, and I still didn't have enough money to pay for tuition. So I took out a loan to pay for school and the little money I couldn't save up from my paychecks for bills.

Through all of this, I attended classes, skipped a little more than I should have, but it never caused my grades to suffer. I am grateful to have had the opportunity to go to college and to have gotten decent grades, and a wonderful, fulfilling education.

Who encompasses the collective "we" you speak of that goofs off in electives classes and accuses students of being domineering? Please don't lump me into that stereotype, Ms. Sciarra, because I respect everyone's right to learn.

Yes, I said learn, not spit back information to the professor in order to get a passing grade because you're not allowed an

original thought of your own. Some professors (some, not all, because I don't judge entire groups of people based on the actions of a few) operate this way.

That frustration is what causes me to skip classes and complain about the system, because I feel like I'm banging my head against a brick wall. It is not for lack of a desire to learn, believe me.

You tell us not to "play someone's game," but at times, learning in college is a game—a game to see how accurately students can spout back lectures come midterm-time.

I'm sorry I'm not rich enough to pay up-front for my college education. But I'm sure you'll be happy to know that, come this November, I'll be repaying it for the next ten years, to the tune of \$11,000.

That's okay—it was worth it.

Sincerely,  
Lisa Frymark

# Downs speaks out about National Rifle Association

By Bill Downs  
CONTRIBUTOR

For years the National Rifle Association has been telling us that, "when guns are outlawed only outlaws will have guns."

It would seem that some of their members have decided they can't wait for the legislation to be passed.

The unbelievable horror of Oklahoma City should be a wake-up call for every American. We are under siege and a state of war exists between our government and the gun wielding extremists who cling to a distorted interpretation of the second amendment.

The NRA instills fear into people with talk of "Big Brother"

and a nation over-run with heavily armed criminals.

They claim that if the "right" to bear arms is taken away by the government, only drug dealers and criminals will have weapons.

Yet, their membership is quietly planning its own coup d'etat of the government and have openly declared that they will never surrender their guns.

So, if the NRA holds true to its promise that they will only surrender their weapons when

they are pulled from their dead hands, who are the criminals and who are the bad guys? Laws are made and passed to protect and serve "all the people."

While they twist the second amendment to fit their own agenda, NRA members have con-

veniently ignored one of the most important guarantees of the constitution. The "RIGHT TO VOTE."

Our founding father's provided for the peaceful overthrow of the government every four years.

But, the Neanderthal thinking of people who make statements and sport bumper stickers like those on the backs of NRA member vehicles reflect the same type of archaic ideals and values that led Timothy McVeigh to kill innocent children.

The problem for the NRA is that they have been losing the

battle in Washington, despite the tons of lobbyist money they throw around.

Most people in this country are realizing that to continue to allow everyone to keep a weapon, despite their background or mental health history, is not in the best interest of "all the people."

So called responsible gun owners are just as dangerous as criminals when they adopt philosophies that promote violence and the armed overthrow of the established government.

These "American Terrorists" aren't any different than the thugs who have been ravaging Bosnia.

If these terrorists are allowed to continue their self-righteous strategy, we won't have to turn on the six o'clock news to see the horrors of Bosnia, we will only have to look out our windows.

## Fear and anger spread throughout country

By Stephanie Sprangers  
EDITOR-IN-CHIEF

The blast from the Oklahoma City bomb was felt throughout the country last week.

Mothers and fathers cried for their children lost, and families grieved for their members with dreams that will never come true.

We've all seen the tragedy develop over the past week and felt the stinging pain that these families are experiencing.

The sad part of this story is that senseless violence like this has been happening around the world for some time now, and it took a bomb that injured and killed American children and families to make the people of America wake up and realize that this can happen to us.

Newsflash...we may live in America, but we aren't as safe as we think we are.

The scary part is that this horrific tragedy was caused by other Americans. Americans bombing Americans...that is something I thought, as a naive college student, I'd never hear.

Sympathy, fear, anger...these are many of the emotions I feel when I turn on CNN and see them digging through the rubble to find yet another victim, or when I see a mother weeping because her children have yet to be found.

The reality of the terror involved has been instilled into American minds and memories forever. If only we could have

stopped the bombing and saved the lives. If only we could have seen this coming.

The reality of the situation is, we as Americans never expected this to happen...not in Oklahoma City, not anywhere.

We've experienced the bombing of the World Trade Center in New York, but for some reason it didn't have such a severe effect on the people of America.

This is the Heartland...the center of our country, people do not lock their doors, children ride their bikes and couples walk their dogs.

President Clinton assures that the criminals will be punished to the full extent.

I agree that they should be given the death penalty, but is that going to make up for all of the shock and terror that has spread across the country in the past few days?

No...and maybe it shouldn't. Maybe this will teach us to cry and teach us to realize that we, as Americans, are not immune to the terrors of the "outside world."

Maybe the outside world is just waiting to hit another target. The outside world is no longer outside.

My heart goes out to all those suffering with grief due to this tragedy in Oklahoma City, with the names and faces behind the statistics and for the innocence lost for the country.

## Student speaks out against E-mail message

By Enid Chistiansen  
CONTRIBUTOR

In a recent news letter found on my e-mail, Thomas Moore, a net surfer brings up the importance of the "Communications Decency Act."

Basically this act accuses the government of trying to limit the "free flow of information" that the Internet provides by imposing fines on systems operators.

But if one reads into the nature of the bill more, you will see a different purpose and solution all together.

First of all, I don't consider being harassed and forced sexual messages as part of the free flow of information.

People every day (especially women) are subjected to humiliation and aggravation through the Internet via mail and chat fines, and this is what the government is aiming at.

Is this an infringement of one's First Amendment rights...that you should be free to flame and harass anyone without limit? I don't think so. Private mail is one thing, but this happens all the time on open net forums.

And even persistent, offensive private E-Mail (electronic mail) should be considered.

These are instances in which one's right to free speech infringes upon another's right to read acceptable material (to them) on the net.

With a system like the Internet, one person can communicate instantly with anyone else with a computer and a modem anywhere in the world. Such power is easily abused and often is.

Right now, the only regulations comes from the sysops (system operators) themselves, who often do no more than slap the hands of the offender.

The Internet is growing every day, and it may someday become the biggest change in human communication since the telephone. Should such a system go unregulated? I think not.

So how should the government deal with it? I see them having two choices.

Either the government can spend millions to hire its own watchdogs to try to monitor the net (mind you, they would only be responding to complaints and not actively seeking out offensive

material), or they can do what they have written.

The idea, by imposing fines upon the sysops is to make the local sysops responsible for the BBS (bulletin board system) he or she manages.

What do you think the sysops will do? If there are areas in their BBS that are questionable they will restrict access.

Otherwise, they will make sure all complaints are handled quickly and correctly before things get out of hand and the government (or judiciary) has to get involved.

I personally am on several BBS's around the world. Some in Iowa, Nebraska, Indiana, Illinois, North Carolina, and even in England, Australia, and the Netherlands.

On most of those systems, I am a RA (room aide) where I monitor the room's activities and make sure things run according to the administration of that particular BBS.

I have twitted several users from my rooms because of obscene posts, or harassing, or flaming other users in that room.

From what I have seen, most

of the administration of these BBS's regulate themselves in a very professional manner.

Granted there are a few boards that don't have that kind of responsibility, and the proverbial stuff hits the proverbial fan.

In other words, the threat of fines doesn't mean that sysop after sysop will be carted away.

It means the government wants the sysops to be careful and make sure the net isn't abused.

Sysops will twit (kick out) offenders much quicker than before, and users will be much more aware of the rules.

I believe this to be a much better solution than to have the government monitor everything by itself, which would be impossible.

Of course the bill is not perfect, and no bill is. But this bill will not create a deficiency of information...it will create responsibility.

There will always be people who cry "offense" at the slightest of things. Who would you rather answer the call: the government or the local sysop? You decide.

# CNR students study wolves

Dear Editor:

This is in response to Scott Van Natta's column on the Wolf recovery going on in Wisconsin. While very informative and refreshing to see, simply basing your numbers and talk on one source (Adrian Wydeven) gives people a sense that no one else was involved.

Failed to be mentioned were all of the students that have revolved their graduate studies around the Wolf.

Through the harsh winter conditions of 1993 (Tom Gehring and his wife Joleen) to the first graduate student on the project (Doug Shelley) to the next students that have suffered through a mild winter span (no or little snow) such as Dave Unger and Jackie Fraiar who are currently working upon their masters.

Knowing all of these students and the long hours, weeks and months spent under the tutelage of Dr. Eric Anderson. The least that could have been said was that they participated along with Bruce Kohn and Ron Shulz of the WDNR.

These are the people that did by far the majority of the research

expending their time and effort up and beyond simple job description work.

We should be sending everyone of them a letter of gratitude and thanks for without them, and DOT funding, the Wolf recovery would be fifteen years behind where it is now.

Simply use more sources in the future please, we have a wealth of knowledge to be gained not only from our professors and

instructors, but the students devoting their energies and time to bettering the environment in a POSITIVE way.

This is apparently not the first time that Mr. Wydeven has done this sort of thing, let us give credit where credit is due especially to the people that go unsung.

P.S. Long live Canis lupis

## Hartigan investigates effects of mercury on loons

### Study focuses on reproductive habits and nesting behaviors

By Scott Van Natta  
CONTRIBUTOR

A grant from the DNR to the College of Natural Resources will fund the study of loons on 80 lakes in Iron, Vilas, Oneida and Forest counties in northern Wisconsin.

The study will compare mercury exposure and reproductive success of loons.

The grant of \$15,000 per year for two years was received by Ron Crunkilton, a water resources professor and is being supervised by Evelyn Merrill, a wildlife professor.

Jerry Hartigan, a masters degree student, has been hired to complete the project and will be working with Mike Meyer, a state toxicologist with the DNR Bureau of Research.

Hartigan will be comparing the level of mercury in blood and feather samples, reproductive habits and nesting behavior of resident loons. Afterwards he will submit an annual report to the DNR.

The five year project, now in its fourth year, started up again in mid-April, when the loons returned to Wisconsin. It will continue through late August, when the chicks begin to fledge.

According to Hartigan, loons are the target of study because their reproductive success indicates the health of their environment. The results of the study will also give wildlife observers an indicator for mercury contamination.

The mercury that gets into lakes by way of atmospheric deposition, is thought to cause brain damage in loons, so that they do not take proper care of their eggs or young.

Due to the low pH of many northern lakes, mercury becomes easier to absorb. It is then bioaccumulated through the foodchain, where loons, at the top of the chain, receive large doses.

"We know that mercury is building up in fish. We're interested in finding out how much it affects wildlife that eat the fish," said Meyer.

Loon chicks seem to be the most affected since the parents feed only from the lake on which

were known to have a territorial pair of loons.

According to Hartigan, loons on lakes with very low pH (less than 5.5) seldom nest, while on low pH lakes (5.5 to 6.0) there is a high chick mortality rate. Loons on normal pH lakes (7.0) have normal productivity.

In addition, Hartigan has detected, on the most acidified lakes, a trend toward less mercury in birds, which may mean that they are eating less fish and more crayfish and other invertebrates.

Fewer nesting attempts and high chick mortality are leading to lower loon success on the most acidified lakes being studied.

Hartigan works with a six member capture team in two boats. "The loons are captured at night," said Hartigan. "Loon tapes draw the birds to the boat, then spotlights are shined on them to confuse them. They

are then scooped out of the water with musky nets."

To date, over 400 loons have been captured and banded.

"We have never had any injuries to the loons," said Hartigan.

The captured loons have blood samples taken and are tagged with four colored bands. Then, while making the circuit of 80 lakes, Hartigan checks to see if the birds have nested.

If so, the nests are checked for eggs, and again to see if the eggs have hatched. Abandoned eggs can be studied to see how much mercury has been passed from the adults to their offspring.

When chicks have been successfully hatched, they are banded. According to Hartigan, it is especially beneficial to study chicks because they would have received food from only one lake, possibly indicating food contamination on that specific lake.

Hartigan works out of a field research station at Eagle River, and also his own cabin on the Turtle-Flambeau Flowage.

The DNR draws additional support for the project from the Wisconsin Acid Deposition Research Council, the U.S. Fish and Wildlife Service, the North American Loon Fund, and the Sigurd Olson Environmental Institute.

For those who are concerned about a declining number of loons, "The loon population is doing fine," said Hartigan.

"We have determined that there is a reproduction problem. Whether it's due to habitat variables or mercury is what we want to find out," said Mike Meyer.

they live and do not carry fish from other lakes to feed their young.

The lakes being studied were chosen due to the fact that they

Workers check a fuel pump at the leak site of the Koch gas spill in Plover. The site is located on the former property of Brian and Anne Vogt. Over 92,000 gallons of fuel have been recovered since the spill last November.

## Kernen shares about fishing in the year 2010

By Lee Kernen

DIRECTOR OF DNR BUREAU OF FISHERIES MANAGEMENT

What will fishing be like in the year 2010? I'd like to make a few predictions based upon what I'm seeing across the nation and around the world.

Fishing will definitely be better in 15 years than it is today. Anglers will get more strikes, see more fish and generally catch bigger fish. Fishing seasons will be longer, offering more opportunity to be out on the water.

Although anglers will catch a lot more fish, bag limits will be lower, size limits will be higher, and people will be able to take fewer fish home to eat. Most technological discoveries will still be allowed—until some new invention goes too far: If someone develops a special bait that fish have to bite, it will be banned!

In order to increase the survival of fish caught and released, new innovations will minimize the harmful effects of handling fish. Barbless hooks will be required. Stainless steel hooks that

don't rust will be illegal. In fact, I'd guess that there will be some new hooks on the market by then that will rust away even quicker than our current steel hooks.

Rubberized mesh landing nets or other "soft" nets will be required to lessen the scale loss, and many anglers will use special long-nosed pliers to release the fish without ever taking it out of the water. On

many waters, only artificial lures will be legal, with single, barbless hooks.

The use of three rods and reels per person is something that will be reduced. Today in Alaska, for example, an angler is allowed the use of only one rod and reel. I think most states will follow their lead by 2010.

Many waters will have their own, special regulations, but the regulation pamphlet won't be as thick as the phone book. There will be categories of lakes and streams that have similar rules.

One new concept will certainly be expanded upon: trophy lakes and streams. These waters will have mostly catch-and-release rules, but my oh my what fish will live there. If you want to fish for 40-pound muskies or 20-inch smallmouth bass, there

those anglers who like to eat trout, hundreds of miles of streams, particularly in northern Wisconsin, will have a three- to five-fish bag limit.

In 2010 we will take more care to preserve self-sustaining populations of wild fish. Anglers will need to check their catch carefully for missing fins—which will indicate a hatchery fish—because on some waters there will be lower

limits on unmarked or wild fish. Some of the west coast states already use this technique and only allow harvest of hatchery produced fish.

Most lakes will remain open to gamefish harvest, but the limits will be more restrictive than today to accommodate the expected 300,000 more anglers and all the new advances that will be made in fishing tackle and techniques.

I'd guess bag limits might be combined for all gamefish at five fish per day, but only two of these could be of one species. For example, the limit might include two walleye per angler, one over and one under 15 inches or some combination like that.

Currently in Wisconsin the possession limit is twice the daily bag for most fish. The Province of Alberta already has eliminated this difference and made the bag and possession limits the same.

Look for many states to do the same.

Another Canadian province, Ontario, has a new approach that I think is right out of the future. Since 1994, Ontario has offered a Conservation License that costs half as much as a regular license.

The daily bag limits for these licenses are much lower, only two bass or walleyes, 10 crappies and no muskellunge.

This is a great way to accommodate more anglers without harming the resource, and I believe many states will follow suit.

Access to waters will be better by 2000, with rest rooms at almost all facilities. There will be more public fishing piers and all sorts of places where kids can fish. Sites and facilities will be accessible to all persons.

Shopping malls will have artificial but realistic streams full of rocks, logs and trout to catch—a vast improvement over the square tanks at sports shows that we see today. This will provide great entertainment for the children while the parents are shopping.

Fifteen years from now, out on Wisconsin's lakes and streams, little children will still squeal with delight when they catch a fish all by themselves. Wisconsin anglers will still enjoy a meal of golden, fried walleye filets that come from clean waters. The future for fishing is very bright, but as with everything else, there will be some changes.

**"Fishing will definitely be better in 15 years than it is today."**

Lee Kernen

will be several such lakes to go to. Of course, you'll have to put everything back. On these waters, video camcorders will be as much a part of the gear as your tackle box. By then they will probably fit in a tackle box!

Other lakes will be designated as panfish harvest lakes where anglers will be encouraged to take home fish to eat. Panfish limits will be anywhere from 5 to 50 fish per day, but anglers will have to measure the bigger ones, because there will be a lower bag limit on large crappies, bluegills and perch. Still, fishing will be excellent and those who want to fish to eat will be able to catch them.

Trout fishing will also improve markedly. There will be more streams and portions of streams designated as catch-and-release using artificial lures only. Anglers will be amazed at the numbers of 16- to 22-inch trout they will catch regularly. For

Thinking Naturally

By Anne Harrison  
Outdoors Editor

Spring may be here but my heart isn't in it. I don't have the time or energy to enjoy the freshness, the newness of nature.

My head is spinning from a never-ending string of exams. I am weary from an endless pile of disappointing grades and frustrating results. The glamour and glitz of the College of Natural Resources is fading in my mind. I am no longer excited about the stream of "knowledge" passing through one ear and out the other.

I long for classes where I can express myself and my talents. I have a true passion for nature, but the fire is dimmed under the haze of facts, facts and more facts. When will I learn how all of these facts relate to one another, and life in general?

I did not come to UWSP for a strictly technical education. I have hope for the future, and for the classes I have yet to take, but for now I am disillusioned with my natural resources education.

Memorization is growing so tiresome. What possible good can come from cramming facts into my head, one after another without any time or opportunity to process the information? Knowledge is not knowledge until it is applied.

Critical thinking is integral to a college education and facts should be processed to fit into a solid base of understanding about a field.

The CNR is known around the country as a premier school in natural resources education, preparing many students quite effectively for the professional world. This education is priceless, but as with any good thing, room for improvement exists.

Needed improvements are already being made in the curriculum of core forestry classes, incorporating more of the whole picture to help with the tedium of detail.

I have no doubt that this will increase understanding of technical material: it is the first step on the road to a brighter future.

## SAF springs into busy season

### Tree plantings and education highlight Arbor Day

By Anne Harrison

OUTDOORS EDITOR

With the arrival of Spring, the UWSP Society of American Foresters (SAF) is gearing up for a flurry of activity.

National Arbor Day will be celebrated by a tree care workshop on Saturday, April 29 sponsored by both SAF and the Student Society of Arboriculture (SSA).

The workshop will be held at the west end of the College of Natural Resources Building. A tree will be planted in the area.

Mayor Gary Wescott is the featured speaker, and Mickey Simmons, city forester, will be available to answer questions regarding city trees.

In addition, members of SSA and SAF will plant trees on campus and at Roosevelt Elementary School on Arbor Day.

Three trees are also scheduled to be planted at Madison Elementary school on Wednesday, May 8.

Madison Elementary is the subject of an education project conducted by SAF members. Stu-

dents are taught the importance of tree products using games and other activities.

Three third grade classes are the focus of the project. Each class will adopt a tree as their own.

Another educational opportunity offered by SAF is the Soren Erikson Game of Logging course held on Saturday, April 29.

"It's more advanced technology on felling, safety and maintenance for when you get into trickier situations," said Bill O'Brien, SAF president.

On Sunday, April 30, Iverson Park will be the site for the SAF Conclave, including a competition and picnic.

"It's like lumberjack olympics," said O'Brien. Teams compete in various activities including jack and jill sawing and log tossing.

Faculty and other student organizations have also been formally invited.

SAF members have also kept busy planting trees for Treehaven, private landowners and Assistant Dean Richard Wilke.

Over 12,000 red pines were planted on Wilke's property last Saturday.

SAF members are working to earn money to fund a trip to the 1995 National Convention in Maine.

### Plant Trees for America

The National Arbor Day Foundation

Ten free Colorado blue spruces, or other conifers selected to grow in your area will be given to each person who joins the Arbor Day Foundation.

Your trees will be shipped postpaid at the right time for planting in your area, February through May in the spring or October through mid-December in the fall. The six to twelve inch trees are guaranteed to grow, or they will be replaced free.

To become a member and to receive your free trees, send a \$10 membership contribution to Ten Blue Spruces, National Arbor Day Foundation, 100 Arbor Avenue, Nebraska City, NE 68410.

Join today, and plant your Trees for America!

Photo by University Graphics and Photography  
Andrea Turner and James Arrowood rehearse the performance of "Lincoln's Portrait".

## Special centennial performance to be presented by UWSP band

An 80-member band will perform several pieces written by American composers. The affirmative action director will narrate Aaron Copland's "Lincoln Portrait," and a faculty pianist will play the original version of "Rhapsody in Blue" during a special performance on Sunday, April 30 at UWSP.

Conductor James Arrowood of the UWSP music faculty has chosen "The American Way" as the title of the special centennial celebration featuring a large band made up of student members of the Wind Ensemble and the Concert Band, plus guest performers Andrea Turner and Michael Keller.

Admission to the 3 p.m. performance in Michelsen Hall of the Fine Arts Center will be \$3 for the public and \$1 for UWSP students.

Turner, assistant to the chancellor for affirmative action and equity, will narrate excerpts from Lincoln's speeches which Copland set to music 53 years ago at the beginning of World War II.

Originally commissioned by Andre Kostelanetz for the Cincinnati Symphony Orchestra, the piece "speaks to timeless issues such as the triumph of the human spirit, patriotism and social inequality," Arrowood says.

Keller and 20 band members will play the original version of George Gershwin's "Rhapsody in

Blue," written more than 70 years ago for the Paul Whiteman Jazz Orchestra.

Performed in 1924 by Whiteman's band with Gershwin at the piano, "the original work displays 'different colors' than the more familiar version performed by large symphonic orchestras," according to the conductor.

Also on the program are Samuel Barber's "Commando March," a rarely heard piece of World War II vintage, "Passacaglia," a piece based on the letters in Bach's name, and Four Dances from "West Side Story" by Leonard Bernstein.

## Three bands to participate in Ska Fest

UWSP students will get a taste of a unique kind of music. Live, this Friday at Tremors Dance Club the organization formerly known as UAB will be sponsoring Ska Fest. Bands participating in the concert are MU330, The Secret Cajun Band and Slapstick.

With origins as early as the 1960's, ska music is defined as a "healthy mix of many different musical styles having a hard, dance-oriented beat and often sociopolitical lyrics."

It has been called a "true musician's music" because it is

mainly instrumental, boasting a variety of horns, guitars and percussion.

Slapstick, an up and coming ska band from Chicago, will begin the night of ska at 9:00pm. The Secret Cajun Band will follow with music that's been described as "quirky, humorous and somewhat haphazard around the edges yet solid in the center."

They formed six years ago and since then have played at over 40 clubs with the bands such as The Urge, Weaker Youth Ensemble and The Toasters.

Headlining Ska Fest will be MU330, one of the fastest moving ska bands on the U.S. circuit. With a sound and attitude that make MU330 unique, their music is an unusual and entertaining blend that is fast-paced, humorous and hummable.

Band members describe their material as "get up and dance music." With a reggae-influenced beat, the music of MU330 will keep everyone off their seats.

Ska Fest will be held at Tremors on Friday, April 28. Cost is free until 9:00p.m., \$1 until 10:00 p.m. and \$2 after 10:00.

## UWSP music faculty to present recital

A recital featuring six faculty members will be presented on Wednesday, May 3, at 8 p.m. in Michelsen Concert Hall of the Fine Arts Center at UWSP.

Tenor William Lavis will sing throughout the program. Charles Goan, Michael Keller and Karen Horwitz will perform on piano. They will be assisted

by Paul Doebler on flute, and Lawrence Leviton on cello. All performers are members of the music faculty, except Horwitz, who is from the theatre and dance department.

The program will include two pieces by Richard Faith, former professor at the University of Arizona-Tucson. Lavis wrote his

doctoral dissertation on Faith's works while at the University of Cincinnati-College Conservatory of Music. Faith is now retired and lives in Bloomington, Ind.

Horwitz will be assisted by Leviton with "Ships" by Faith, and Keller will be assisted by

SEE FACULTY PAGE 13

## Out of Time

By Katey Roberts  
FEATURES EDITOR

Time management is something that college students hear a lot about these days. It is considered to be one of the keys to a successful college career. I was doing pretty well with that concept until this year. There just does not seem to be any time for anything anymore.

I have convinced myself that I work best under pressure. I hate being a procrastinator, I really do, but once you start doing it, it is really hard to stop, especially if it seems to work for you. I have been procrastinating more than I would like to admit these days. I don't even want to think about how many speeches and papers I have put off until the night before or morning of their due dates.

It wasn't always that way. My freshman and sophomore years I prided myself on my ability to be able to manage my time. It was a piece of cake. Of course I also had no life then. No, really, I did not have anything to worry about besides studying. Now, with a job, an internship and involvement in organizations, life has gotten a little crazy.

All of this mismanagement of time lends itself to major sleep deprivation. I try to tell myself that I can make up for this loss of sleep by taking naps during the day. I swear I have taken more naps in the past semester than I ever did throughout my entire childhood. I like to think of taking a nap as making a deposit into a sleep savings account. Right now I am way overdrawn.

I also play these little mind games with myself by setting the clock in my dorm room ahead by a good twenty minutes or so. Walking into my dorm room is like entering another time zone.

Sometimes I wish I could go back in time. As I think back to high school, I realize that I should have relaxed a little bit more and enjoyed those years. Now that I am getting closer to graduation from college (one more year!), I am starting to think the same things. I want to make the most of the time I have left here before it is too late. But first I think I will take a nap.

## What's Happening

### Theatre

The Central Wisconsin Area Community Theatre will present the drama, "Talley and Son" on May 12 and 13 at 8 p.m. and May 14 at 7 p.m. in the Sentry Theatre, 1800 Northpoint Drive, Stevens Point.

Tickets and Reservations can be made by calling the UWSP Box Office at 346-4100 or at the door one hour prior to the performance. Ticket prices are \$6 and \$6.50. Children under 12 \$5.

### Band

The University Band will perform at 8 p.m., Tuesday, May 2, at UWSP.

The band will perform "Days of Glory" by John Cacavas, "Russian Choral and Overture," based on Tchaikovsky's "Op. 39, No. 24" and Russian folk tunes, adapted and arranged by Merle Isaac, "March Baroque" by Johann Fischer and arranged by Philip Gordon; "Air" from "Suite No. 3 in D" by J.S. Bach and arranged by Ted Petersen; five American folk songs arranged by Elie Siegmeister; and "Suite in B Flat" by Gordon Jacob.

The performance in Michelsen Concert Hall of the Fine Arts Center is open to the public free of charge.

### Jugglers

UWSP is invited to catch some excitement with the Gentlemen Jugglers. The dangerously daring juggling troupe will perform Friday April 28 at 8:00 p.m. in the Encore.

The duo's members, John and Roberto, combine popular music, comedy and juggling for a show that is truly unique. Showing great technical merit in juggling, the Jugglers have been known to easily dodge pins, knives and torches, often while riding seven and ten foot unicycles.

The duo has performed at various fairs, throughout the U. S. and Canada, opening for acts such as Elvin Bishop and Conway Twitty. This year they appeared with Reba McEntire, on TNN's Statler Brother's show.

Cost for this event is \$2.00 with a UWSP i.d. or \$3.50 without. The event is sponsored by the organization formerly known as UAB.

### Recital

A recital featuring the UWSP Flute Ensemble and Clarinet Choir will be presented on Monday, May 1, at 8 p.m. at UWSP.

The performance in Michelsen Concert Hall of the Fine Arts Center is open to the public without charge.

The flute ensemble, directed by Paul Doeblner, will perform "Jesus, Priceless Treasure" by J.S. Bach and arranged by Ephoss; "O Holy Spirit" by Karg-Elert, also arranged by Ephoss; a flute octet; "Arrival of the Queen of Sheba" by Handel, arranged by Wye; and "Four Pieces" by Todd Malicoate.

The clarinet choir, directed by Andrea Splittberger-Rosen, will perform Early American spirituals by Cory Tamiam; "Suite Gothique" by L. Boellmann and arranged by Dale Caste; "Jesu, Joy of Man's Desiring" by J.S. Bach, arranged by Paul Yoder; "Divertimento I" by J. Haydn, translated by Robert Hinds; "Clarinet Poem" by Lucien Caihiet; and "Suite No. 1" by Vaclav Nelhybel.

In addition, Karla Rezutek and Laura Schroeder will perform "Grand Duet No. 1 for Clarinets" by Ernesto Cavallini, and Andrea Dupke, Karla Rezutek, Laura Schroeder, and Taneal Simonet will perform "Concerts for Four Clarinets" by G.P. Telemann.

## CHAPTER 11 CONTINUED

John looked down at the grey wolf. The red stained snow all around it told the story - it had bled to death. A steel-jawed trap clamped onto its left front leg was the cause.

"I thought these were illegal," Liz said as she helped John pry open the jaws.

"They are, but up here in the middle of nowhere, ... who's gonna know?"

They pushed the jaws apart until they were flat with the snow. Stepping on the trap, John reset the jaws. As he did so, Liz lifted the wolf's leg off of one of the jaws many half-inch teeth.

Then John grabbed a nearby stick and depressed the trap's pan, causing the jaws to spring together, snapping the stick in half.

"Poor guy. Look here ... he gnawed his paw off..." said Liz kneeling by the wolf.

"That's because he couldn't feel it. Everything below the jawline on the leg would go numb." Liz frowned and stood up.

A few minutes later, as they left the wolf, something occurred to John.

"Ya know, it's strange, but that wolf didn't die instantly. It probably took a couple days to bleed to death which means whoever owns these traps hasn't been out here in awhile."

"Why is that strange?"

"Well, most trappers check their trap lines at least once every twelve hours, sometimes more. So far, we've found five traps, three with a dead animal in them. Now if these traps were being checked every few hours, that wolf would still be alive. Something's wrong," John said with a concerned look on his face.

"Well, let's keep going. Maybe we can find something else out at the next trap," Liz said.

And sure enough, fifteen minutes later, it was Liz who made the discovery.

Walking about twenty yards ahead of John, she announced "There's something up here."

She waited for John to catch up, and together they walked forward. Up ahead, three coyotes were gathered around a dark object in the snow. John raised his rifle to fire a warning shot but before he could the coyotes scattered, allowing a clearer view of the object.

Even half covered with snow, John could make out what it was.

"That's a person..." He ran the last twenty yards and dropped to his knees next to the body.

The clothes in the stomach area had been chewed through as had the stomach itself.

Liz arrived and upon seeing the body, did an immediate about-face, covering her mouth with a hand.

"Oh my... it's the trapper, isn't it?"

"It would appear so..."

"Did he freeze to death or was he attacked by an animal?"

"Neither."

"What?"

"He was shot," John said as he folded the clothes over the chest of the dead man. "Three times in the chest ... and once in the forehead."

Liz let out a moan and continued to stand with her back to the body. She was looking at two coyotes sitting in the snow about thirty yards away.

John thought for a moment as he looked at the body, then slowly raised his head and gazed up the valley.

"Hey Liz, we need to be..."

"You stupid animals!" she shouted as she raised her gun.

"Liz don't..." He dove at her and tackled her, knocking the gun away.

"What did you do that for!?" she screamed.

"Liz, listen to me. Whoever shot and killed that man, might be close by, ... remember those Russian gunships we saw?"

"You mean..."

"Yeah, it's possible that Russians killed him."

## Student focuses on a film career

By Troy Lindloff  
CONTRIBUTOR

Lights...camera...action. The actors swing into motion with confidence, grace agility. Their every move captured in a tiny little lens controlled by a person who people hardly ever see in the spotlight. Not too many of us can name even one director/producer outside from Steven Spielberg or George Lucas.

But Matt Peters can. Peters, a third year UWSP student, aspires to become a director and producer of feature length films. Peters recalls to the seventh grade, "After I saw Back to the Future, I really wanted to make movies."

And he already proved that he can. In 1993, Peters went to Hollywood to accept the 1992 College Television Award from the Academy of Arts and Sciences (ATAS)

## UAB merges with Centers

To meet the changing needs and demographics of the student population at UWSP, the University Activities Board (UAB) will be reorganizing, effective July 1, 1995.

This reorganization will make the Activities Board a "department" of the University Centers providing programming and student leadership opportunities through the Center's Student Employment Program.

UAB, in conjunction with the University Centers, are making this reorganization to more effectively and efficiently provide a wide variety of programs for UWSP students and Central Wisconsin.

This reorganization is not an attempt to disempower students. It will provide a boost to the campus in the form of more stability, accountability and responsibility in programming events.

The reorganization will carry on traditions started by the Uni-

versity Activities Board (i.e. the Homecoming Celebration) and will continue to provide an opportunity for student volunteers to be involved with the development of programming and events.

While the decision to reorganize was not an easy one, the organization is confident that the new structure will provide the best event programming possible to the students of UWSP. There are many details to be worked through, including a new name, new structure, etc.

The University Activities Board looks forward to becoming a department of the Centers and looks forward to the continued support of UWSP.

Any questions or comments regarding the reorganization may be directed to Vicki Lutter in the University Activities Board office at x2412 or Greg Diekroeger in the Campus Activities Office at x4343.

## Dancestage production to promote past

To mark UWSP's centennial, James Moore of the dance faculty has created a series of works representing popular social dances over the past 100 years.

The pieces will be performed by 14 dancers throughout the program of the annual Dancestage production, May 5 through 7 and 11 through 13 in the Jenkins Theatre of the Fine Arts Center.

In addition to the interweaving of Moore's waltz, tango, Charleston, jitterbug, twist and hiphop throughout the concert.

Another program highlight will be the restaging of 'Field Work' a piece choreographed by Stevens Point native Debra Loewen, founder and artistic director of Wild Space Dance Company of Milwaukee.

Loewen recently served a five-day residency at UWSP. Set to music by Vivaldi, Emmy Lou Harris, Michael Nyman, the text of Michael Lesy's "Wisconsin Death Trip," and farm animal sounds, Loewen's work, danced by four women and three men, "builds meaning through networks of connections."

Faculty member Robin Moeller, a Labanotation specialist, has reconstructed two classic works, 'Soaring' by Ruth St. Denis and Doris Humphrey, and 'Brahms Waltzes' by Charles Weldman.

Created in 1920, 'Soaring' was notated by Jane

Marriett in 1980. It features a 20-by-20 foot scarf accompanied by five dancers. As an integral part of the work, the scarf becomes a wave, a flower unfolding or a stormy sky. It is set to a piece by Robert Schumann performed live by pianist John Strassberg.

Choreographed in 1967 by Weldman as a memorial to Humphrey, 'Brahms Waltzes' contains movement from both the Humphrey and Weldman dance techniques. Set to 'Waltzes, Op. 39' and performed by six dancers, it uses "delightful delay" as a choreographic device. The Labanotation score was written by K Wright Dunkley in 1973.

Faculty member Joan Karlen has choreographed "Skip," a contemporary jazz work using a skipping motif set to Christopher Rouse's 1976 percussion quintet.

UWSP's Mostly Percussion Ensemble will perform the work live. Karlen's second piece, "New Ballet" was inspired by Ernest Bloch's melodically rich concerto for orchestra and piano obligato. "The 10 dancers' sweeping, dynamic movements create a visual counterpoint to the score," Karlen says.

Three dance students, Heather Gillette of Wausau, Jill Lotzer of Wisconsin Rapids and Usa Schnabel of Marinette, have choreographed "The World Is Ours," directed by Susan Hugh Gingrasso of the dance faculty.

It is a tap trio using the Morse coded message received by the city of Stevens Point in 1894 informing the citizenry that the new normal school would be located there. The message read, in part, "the world is ours," which were the words used to create the Morse Code pattern of the dance, plus the numbers 1894-1994.

The idea was suggested by Professor Doug Henderson of psychology. Gingrasso was as-

## Two recitals to be held

The UWSP Department of Music will sponsor two recitals this weekend at Michelsen Recital Hall of the Fine Arts Center.

A recital by Mark Betters will be held on Friday, April 28th at 8 p.m. Then on the 29th, Toni Sherry will perform at 8 p.m.

A coloratura and lyric soprano, Sherry will be accompanied by Kathleen Kraulik on piano.

Sherry is an alumna of UWSP, where she was a student of Gretchen Darmand. She is working on her master's degree in vo-

cal performance at the University of Minnesota, where she is studying with artist/teacher Glenda Maurice.

Kraulik, also from Minnesota, teaches in the Minneapolis/St. Paul area.

Betters' recital features percussion. The senior recital is part of the requirements for the bachelor of music degree at UWSP.

Assisting Betters will be the UWSP Mostly Percussion Ensemble, the Mostly Saxophone Ensemble, the Jazz Combo, and pianist Tim Sautner.

# Drummy ready for NFL Point Softball beats Titans 20-2

UWSP football standout Brian Drummy may have an opportunity to go up against the likes of Bruce Smith, Sean Gilbert, and Cortez Kennedy.

The Pointers' offensive lineman was offered a free agent contract earlier this week with the New York Jets.

The 6'5" Drummy leaves for Hempstead, N.Y. this Thursday, where he will partake in a two-day minicamp.

"I'm pretty excited," said Drummy. "This is what I've been waiting for and working hard for."

Both the Jets and the New York Giants had recently visited

the UWSP campus to rate Drummy against the nation's best college football offensive linemen.

Unfortunately, both clubs failed to select Drummy this past weekend in the annual NFL draft.

But that won't mean much if Drummy is able outplay some of

the Jets' other young linemen, and the opportunity is there.

"I'm just hoping for a chance to show them (the Jets) what I can do," said Drummy. "Hopefully, everything will fall into place."

Drummy was named to the All-WSUC first team earlier in the year, as well as being the Pointers' Offensive Lineman of the Year.

By Troy Lindloff  
CONTRIBUTOR

Last week, the UWSP women's softball team faced UW-Platteville in a doubleheader, splitting a game apiece.

The Pointers nabbed the victory in the first game 7-3. The Pointers were led by strong pitching from Amy Steigerwald and Amy Prochaska. They held the Pioneers to only four hits.

Offensively, the game was quite stagnant until the sixth inning. The Pointers had scored the game's first run in the fifth, but in the sixth, both teams began to crank in the runs.

That's when UW-Platteville managed to knock in all three of their runs, but it was not enough. The Pointers hitting spree outlasted them, driving in a whopping five runs in the sixth inning to secure the victory.

Leading the way for the Pointers were Amy Schumacher, Kelli Harrns and Dena Zajdel, each with two hits. Zajdel came in big with three RBIs in four times at bat.

Amy Schumacher went two for three, improving her conference batting average to .500. Schumacher also added a home

run, giving her 9 on the year, which sets a new school season record.

The second game of the doubleheader was a heartbreaker for the Pointers, as their record fell to 17-12 overall. The game started out with the Pioneers on top 5-1 after the fourth inning. Then the Pointers rallied in the fifth and sixth innings to tie the game at five.

After a scoreless seventh, the game pushed into extra innings. An exciting ninth inning brought 3 more runs to each team. In the tenth and final inning, the Pioneers stung the Pointers by bringing in three runs to end the game.

Despite the loss, the best batting averages of the game belonged to UWSP's Schumacher (4 for 5) and Erin Buenzli (3 for 5).

On Monday the Pointer's travelled to Oshkosh, where they dominated the Titans. Stevens Point jumped to an early 3-0 lead in the first inning and was up 4-0 when the two teams entered the fifth inning.

That's when the Pointer's exploded for 16 runs, winning the game by a score of 20-2.

Amy Steigerwald walked away with the win and added

some punch offensively with four RBIs.

The Pointers' next action will take place in Whitewater when they participate in a tournament on Friday and Saturday.

## Pointers run away with Point Invite

By Matt Woodward  
CONTRIBUTOR

The Pointer men and women's track and field teams dominated the Stevens Point Invitational, held this past Saturday at Colman Track.

UWSP placed first in 19 events, including two multiple winners. The men's team easily outdistanced second-place finisher UW-Stout. The women's competition was a little closer, but UWSP still managed to prevail by beating UW Eau-Claire.

The men's team had an impressive eight first-place finishers. Reggie Nichols won two individual events and also shared a third victory in the 4x100 meter relay.

Other first-place finishers included: Terry Andes, 400 meter; Jeremie Johnson, 1,500 meter; Josh Tebo, 800 meter; and Dave Stankewicz in the javelin.

The women's team also had a number of victors, including Callie Kohl, who captured first-place finishes in the long jump and the triple jump.

Other Pointer women taking the gold were: Wendi Zak, 3,000 meter; Jamie Baars, 400 meter; Jen Klement, 100 meter hurdles; Christina Begman, shot put; Mandy Rasmussen, 400 meter

photo by Kris Wagner

Pointer Callie Kohl won both the triple jump and long jump events in Point's Invitational.

hurdles; Bonnie Holl, hammer throw; and Jenny Woyak in the heptathlon. The 4x400 meter relay team also added a win.

The Pointer track and field teams will be in action next on

May 5th and 6th, when they will host the conference championships at Colman Field. Competition starts at noon on Friday and 9 a.m. on Saturday.

Pointers sweep Platteville after tough Titan doubleheader

By Mike Beacom  
SPORTS EDITOR

The UWSP baseball team's outfielders got more of a running workout last Saturday, than both the men's and women's track teams put together.

UW-Oshkosh treated its doubleheader with Point, as if they were simply just taking an extended version of batting practice. The Titans touched home plate 46 times during both games, managing to knock thirteen balls out of the park in the shellacking.

Oshkosh's machine gun sounding offense gave the Pointers a headache all day long. But a couple of aspirin along with a good night's sleep was all it took to cure Stevens Point.

The Pointers traveled to Platteville on Sunday to take part in their second doubleheader of the weekend. Strong pitching, which had been absent the day before, was the key for Point as they took both games from the Pioneers.

"We got two pretty darn good pitching performances," said

Pointer skipper Guy Otte. "Things just worked out for us."

Righthander Aaron Parks was able to control the Platteville batters for seven innings, giving up just two earned runs on five hits, and improving his record to 5-0 on the year.

Sophomore first baseman Don Molitor provided the offense, going two for five with a homer and three RBI's, in the 9 to 4 victory.

In game two, the Pointers' bats came out smoking.

Seven runs in the first two innings, gave Stevens Point some security and they were able to finish up the weekend with an 11 to 4 win.

Catcher Jason Ippenson hit his first home run of the season and improved his Southern Division batting average to .438 by going 3 for 4.

Joe Einerson picked up the win, his first, going seven and a third innings.

Otte commented on his team's strengths and where they're headed this year.

"Our hitting has been a pleasant surprise. It's just a matter of

photo by Kris Wagner

Pointer Mike Strohmeyer slides in Point's Saturday series against UW-Oshkosh.

getting that pitching down, and I think we're going to be pretty tough."

The Pointers host UW-Whitewater this Friday. The opening pitch is scheduled for 1:00 p.m.

Krzykowski leads golfers

By Mike Beacom  
SPORTS EDITOR

The UWSP golf team outshot all three of their opponents this past Tuesday, when they took part in the Ridges Collegiate in Wisconsin Rapids.

The Pointers came into the clubhouse with an impressive team score of 322.

Mid-State Technical College took second with 348 team strokes.

Pointer golf coach Pete Kasson commented on Tuesday's outing.

"I'm very pleased with our performance. Our young men have done a fine job (this year)."

Stevens Point senior Rich Krzykowski took medalist honors, leading all golfers with a 77 on the par 72 course.

"I started out poorly, but I finished pretty strong," said Krzykowski.

Kasson also commented on Krzykowski, "He's played well for us for four years."

Matt Kamish finished the day with a 79 for Point, good enough to take second in the tournament.

Stevens Point will tee off again this Friday in Nekoosa.

## Film

CONTINUED FROM PAGE 11

his production of a music video. ATAS is the same organization that does the Emmy Awards. Peters received his award at the Beverly Hilton in Beverly Hills, where Tim Allen served as the emcee.

"When I first wrote the song, I wanted to enter the competition just for fun," said Peters. "Then some friends and I shot the video in Madison, and edited here at SVO."

Peters refused to take full credit for the project himself. He insisted upon thanking friends Bill Deering and Derek Dombrowski.

Since the first video, Peters has produced two others. However, he isn't content with music videos. He would rather direct and produce feature length films.

"You can make your way into the business by making music videos," says Peters, "but that's not the way I want to go."

Peters plans to make his own film and submit it to various national and international competitions. Who knows, maybe someday we will add Matt Peters to our list of the unsung heroes of movie entertainment.

# College Life: A Few Things To Know

**KNOW:** Which off-campus bookstore will buy back your used \$45 textbooks for more than 25¢ each.

**KNOW:** Which "30-minutes-or-it's-free" pizza place always takes exactly 31 minutes.

**KNOW:** which evil, quarter-eating laundromat machines to avoid.

**KNOW THE CODE,<sup>SM</sup>**  
IT ALWAYS COSTS LESS THAN 1-800-COLLECT.<sup>SM</sup>

Hey, on college campuses those "in the know" are the ones who rule. And it's not just about being smart in the classroom, it's about being wise with your wallet as well. So if you want a great low price on a collect call, just dial 1 800-CALL-ATT. It always costs less than 1-800-COLLECT. *Always.*

There are lots of tricky things for you to learn at college, but here's something that's easy: KNOW THE CODE, and save the person on the other end some serious money. You'll be glad you did.

dial 1 8 0 0
