

Parker calls it quits

By Joshua Morby Contributor

National Association of Intercollegiate Athletics "Coach of the Year of 1992," Bob Parker,

s n e a k e r s Monday when he resigned as head basketball coach at UWSP. During the

hung up his

Bob Parker

nine years as head coach at UWSP he compiled a record of 158-84, winning over 65% of his games.

He won back-to-back WSUC and NAIA District 14 Championships in 1991-92 and 1992-93 earning NAIA National Coach of the Year and Wis.Basketball Coaches Association laurels in both 1991-92 and 1992-93, and the WSUC Coach of the Year award in 1991-92.

Before coming to UWSP in 1987 Parker coached at Valley City State University in North Dakota for three years. While coaching at UCSC he complied a 52-29 record taking his team to the NAIA District 12 Championship in his final season. He was named the NAIA District 12 Coach of the Year in 1987.

Parker's Legacy

•NAIA National Coach of the Year (1992)

•Two-time WSUC conference champion (1991-2, 1992-3)

•Over 200 collegiate wins

•Career winning percentage of .648

Prior to UCSC he coached for one season at Western Wisconsin Technical College, leading them to an 18-11 record and a state runnerup finish.

Parker's first head coaching position was at Arcadia High School, where he led the Raiders to a 123-71 record, including a pair of conference and regional crowns and a sectional runnerup finish.

Parker said, "I really need to step back and re-energize. There are many challenges for me outside of basketball, now I will have the opportunity to meet those challenges."

Parker had amassed his 200th win in college basketball earlier this year. He leaves university coaching with a career record of 210 wins and 114 losses.

Under no circumstances was Parker pressured to leave. In fact many fans, administrators, faculty members and players are surprised and saddened to see him go.

Acting UWSP Chancellor Howard Thoyre said, "Bob's won lost record speaks for itself. He's been a very successful coach here and I'm pleased about that. I'm more pleased, however, with the fact that Bob understood clearly that, at the NCAA Division 3 level, 'student' is what should be

Campus lifestyle endangers students AMA study states binge drinking commonplace in college

By Gregory Vandenberg

NEWS EDITOR Wisconsin campuses are well known for their wild weekend parties and beer drinking.

But a recent American Medical Association report states that young adult alcohol consumption continues to rise, resulting in an increase in potentially dangerous Five percent told researchers they drove drunk every time they drank while one in five stated they occasionaly drove drunk.

"A lot can happen when people are so intoxicated they can't even find their way home," said Deb Knippel, Prevention Specialist at Community Alcohol "Students who go to college drink more than those who go straight into the workforce," she said.

Although many students approach binge drinking as a temporary lifestyle typical on campuses across the nation, Knippel warns against any type of notion

that it is temporary.

Campus hit by tragedy Notorious U.S. Highway 10 claims life of UWSP student By Stephanie Brotski Cory EDITOR

"It's just a shame. I just couldn't walk away from it."

The infamous Highway 10 along with snow and icy conditions resulted in the death of a UWSP student returning from spring break early Monday morning.
 Tammy S. Feltz, a 22

Jackie Belke, Resident of Junction City

year-old sophomore, was returning to classes when she lost control of her car, crossed the centerline and collided with an oncoming semi-truck.

The Spencer, Wis. native, a student in the College of Professional Studies, was taken to St. Michael's Hospital in Stevens Point. She was then rushed to St. Joseph's Hospital in Marshfield where she died from massive head and chest injuries at 2:15 p.m.

The collision occurred at 8:14 a.m. about five miles west of Stevens Point, in front of the house of Jackie and John Belke, parents of UWSP student Heather Belke.

The Belkes heard a noise outside their home and rushed outside to see what it was. They found Feltz stuck inside her car unconscious.

SEE TRAGEDY PAGE 15

situations.

According to the report, 40 percent of adults aged 18 to 30 will consume enough alcohol to

impair mental and physical performance in an average day.

Further figures found in the study distress counselors and medical personnel throughout the AMA.

The study found 13 percent were involved in accidents while drunk. Fifteen percent said they consumed six or more drinks each night.

"No one plans on being an alcoholic, yet 10 percent of the population is." Deb Knippel, Prevention Specialist of CADAC, Inc.

and Drug Abuse Center, Inc. of Stevens Point (CADAC).

"You're putting yourself in danger when you binge drink," stated Knippel. "Especially if you have a family history of alcoholism."

Knippel expressed concern that it is accepted at college to drink excessive amounts and that peer pressure still exists at the college level. on being an alcoholic," stated Knippel. "Yet 10 percent of the population is."

Other dangers

arise when alcohol is consumed in massive amounts including risk of sexual activity, HIV, pregnancy, related accidents and date rape.

"In most studies I've seen," said Knippel, "one or both parties have consumed alcohol. Also, the best education given on HIV goes out the window when alcohol is involved."

Video conference examines UW-System

By Kate Roberts

FEATURES EDITOR

The UW-System, a model of public higher education, has recently had to face a number of challenges.

It is clear that some changes will need to be made in the near future. That is why students and residents were invited to testify at a public hearing sponsored by the Board of Regents of the UW-System on Monday.

The hearing was in the form of an interactive video conference between UW Green Bay, UW Oshkosh, and UWSP.

The UW-System Board of Regents was seeking feedback from both the campus and the commu-

nity on the recommendations they made dealing with cost, quality, and accessibility of a UW education

The hearing followed an eight-month study of the UW-System that was conducted by the regents with participation from faculty, staff, students, elected officials and the public.

The study entitled "The UW-System in the 21st Century," was focused on identifying ways to:

- Preserve and enhance access to quality.
- · Keep college affordable.
- Create new knowledge
- and foster professional and career development.

 Continue to restructure and improve the efficiency of the UW-System.

The recommendations are geared toward making more space available by shortening the amount of time it takes for students to get their degree.

One way they could do this is by offering undergraduate students an optional four-year graduation contract and encouraging students to take courses at lower cost, high quality UW Centers

The UW-System also hopes to limit annual resident undergraduate tuition to less than 10 percent. The Board wants to keep the cost of a college education affordable and would increase financial aid amounts as tuition increased.

Another suggestion was to increase out-of-state tuition revenue to help hold down costs for Wisconsin residents.

The UW-System also wants to preserve and enhance the quality of education while holding tuition down at the same time.

They would do this by asking

·According to a report from Common Cause, legislators who supported the recent repeal of semiautomatic regulations received 21 times more money in contributions from the National Rifle Association over the last decade. Rep. Toby Roth (R) of Wisconsin received \$32,300 from the NRA over the last decade according to the report. Roth was a main supporter of the repeal. The other five representatives from Wisconsin who supported the deregulation received money ranging from \$27,253 to \$9,900. The three legislators who voted against the repeal received no money from the NRA in the last decade.

•The U.S. Justice Department said Tuesday, they will poll Colorado residents to determine what is needed to obtain a death penalty decision in the trial of the Oklahoma City bombing. Colorado currently has five people on death row and has not executed anyone since 1967. Oklahoma has 136 on death row and executed three people last year.

Trivia contest swings into full gear

WWSP will be holding its 27th annual trivia contest recognized as the world's largest by the United States Trivia Association.

The contest will be held April 12, 13 and 14, with the theme "What a Long, Strange Trip It's Been" in reference to the late Jerry Garcia of the Grateful Dead.

The contest involves over 12,000 players on over 500 teams. Players are drawn to the Stevens Point area from across the country to partake in the 54 hour long contest.

The event is kicked off by a trivia movie, this Friday and Saturday at The Westwynn Rogers Cinema at midnight both nights.

This year's movie is "Georgia," and all seats are two dollars with doors opening at 11:15 p.m.

An all radio hits week is on 90 FM the week before and a parade a few hours preceding the opening question.

The format of the contest will follow the same path as years prior with eight questions asked every hour. Teams are given the length of two songs to phone in the answers to the question.

Teams are given only one attempt to answer each question. Questions explore areas such as entertainment, music, food, sports, history and many other facets to make the contest a unique challenge for its players.

This years contest will consist of 424 or so regular questions, 2 running questions and 3 music clip questions.

Running questions consist of players having to run around the community looking for information putting an extra challenge to the contest.

The music questions consist of extremely brief clips of music placed into a short compilations in which contestants are asked to decipher the songs included for points.

This year's music clip questions are to have a "new twist" according to trivia writer Jim Oliva.

The contest is written by two Stevens Point residents, Jim Oliva and Jon Eckendorf.

Oliva has been writing the contest for seventeen years now after taking the task off the 90 FM staff.

Oliva and Eckendorf spend all year thinking of ideas for questions and 4 months actually writing the 54 hour long contest.

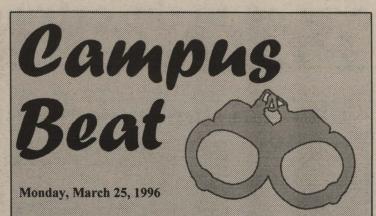

The 90 FM staff, consisting of mainly students from the uni-

versity, work in cooperation with Oliva and Eckendorf to make the whole weekend possible.

There are approximately 40 people, including students and members of the community, a hour volunteering to make trivia happen.

Oliva states "this years contest will be like a pearl in an oyster."

Registration for the contest will be held Monday through Thursday, April 8-11, 1996 from 3:00 p.m. to 7:00 p.m. and on SEE TRIVIA PAGE 15

Say no to the extra credit tax Student voices frustration SGA shows lack of dedication Students may pay triple tuition for extra credits

By David C. Stacy UNITED COUNCIL PRESIDENT

How would you like to pay triple tuition for taking more courses than the minimum required for your degree? What about paying three times as much if you double-major?

The UW-System Board of Regents is considering, as part of its 10-year strategic plan, an "Extra Credit Tax" which would punish students who exceed minimum credit requirements.

The UW-System 21st Century Study draft report includes a provision for "financial disincentive" to reduce the number of average credits to degree.

The disincentive most discussed is an Extra Credit Tax, which would charge triple tuition for in-state students once they reach 110% of the minimum number of credits required.

Why is the Extra Credit Tax a dumb idea?

First, we don't need one. The Regents believe that students are taking too many excess credits, thereby keeping other students out of those courses and reducing the total number of students with access to the UW-System.

However, there is no data showing that the UW- System has a problem.

In 1993, the national average for credits completed was 152, compared to the UW-System's average of 144 attempted.

Many degrees require far more than 120 or 124 credits. Although there may be a problem nationally, the UW-System is already far more efficient than its peers.

Second, there are many good reasons why students might take more than the minimum number of credits required for a degree.

In addition to double majors and additional minors, employers are demanding that graduates have other skills such as computer literacy, foreign language skills and management training.

Students who receive poor advising, take time off to work, or can't get into a course may take an unneeded course to maintain financial aid eligibility or keep health insurance benefits. These are legitimate reasons to accumulate excess credits.

If an Extra Credit Tax were implemented, it would limit educational opportunities and choices students would be less likely to double-major, get a minor, or take any additional classes which could enhance their education.

Third, an Extra Credit tax would be an administrative nightmare. How do you keep track of every different degree program's requirements, what programs a student is in and how much he\she should be charged?

Do we really want a bunch of bureaucrats spending time fighting out how to track, compile and bill students? or would we rather

have them spending time advising students and offering extra course sections?

After studying an Extra Credit Tax in Fall 1994, the UW-System Senior Vice-President for Academic Affairs, David J. Ward, rejected such an approach.

Instead, the UW-System Board of Regents has already approved a campus-by-campus plan to reduce credits to degree with positive incentives such as being implemented now.

Let's wait until 2001, when we can see how the current plan works.

The Regents are now taking public testimony on their draft 21st Century Study report. Students need to make their voices heard in opposition to an Extra Credit Tax. Please come out and testify.

Public hearings will be held between March 20 and April 12 around the state. Every four-year UW campus will have a hearing on campus, or will be teleconferenced into one. You can also etestimony: mail your TESTIMONY@ccmail.uwsa.edu.

We do not want the Board of Regents to choose as its theme for the 21st Century "Limiting Student Choices and Opportunities."

As the Regents look toward the 21st Century, it is important that their decisions do not destroy the quality education that Wisconsin has pledged to keep accessible.

Dear Editor:

I am writing this letter as a result of a number of concerns.

Approximately two weeks ago, I came to one of the senators, seeking assistance in solving an academic problem.

This senator instructed me to attend the weekly Student Government Association (SGA) meeting, where I could address my problem under Open Forum.

I attended the meeting and spoke before hand with Aaron Weier. He suggested to me, instead of addressing all SGA, to attend a Academic Affairs meeting.

I arrived at the Academic Affairs meeting on March 4, only to find that not enough people on the committee showed up.

I was turned away and told to come back next week, March 11. Planning on attending that meeting to voice my problem; I was informed that the meeting had been cancelled.

The only justification for this, the week before spring break. Once again I was turned away without assistance.

I would like to deeply thank those senators, who have been doing a great deal to help me. Your efforts are greatly appreciated.

Yet, these people cannot do all the jobs of SGA on their own.

The night I attended the SGA meeting, only NINE senators were in attendance. As I recall only two senators were in attendance for the Academic Affairs meeting.

I think that it is disturbing that a student at this University cannot utilize the assistance that SGA is suppose to provide. I know that all of you are students first and are busy, but commitments have been made.

The students of this university elect you to represent them. I do not feel that, this is being done properly. If a student makes a commitment to SGA, then that commitment must be kept.

It is not fair to the student body to be represented so poorly.

I am graduating in May, and this is the first time that I have had an issue that I needed the assistance of SGA.

The University System is very good at giving students the run around. Go here, call there. No one has any real answers. I came to SGA to find answers to my questions.

Instead, I just found that like all of the other university areas, SGA too, will give you the run around. How hard is it to find assistance on this campus?

It is truly a shame when a member of the student body cannot even find assistance from its peers.

Where does a person go to find the answers to questions no one wishes to address?

I have been told that it is odd that a student actually comes to SGA seeking assistance, instead of student funding. I really wonder why.

I came to SGA looking for assistance and only found a hassle. I appreciate you taking the time to read this letter. I can only hope that it will not anger SGA, but hopefully motivate it.

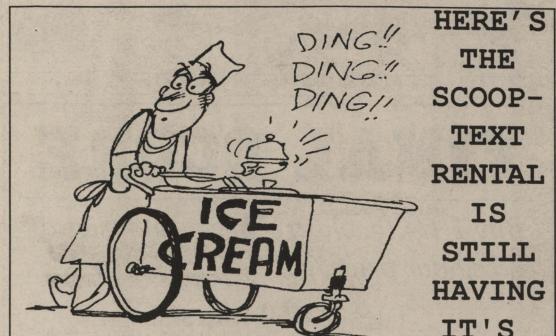

Students need your help! Try to remember, SGA is more then something to add to a resume, it is a commitment, not only to yourself, but to the student body.

Sincerely, Abbe Wendland

The President speaks on hot issues Oswald voices opinion to Board of Regents

Fellow Pointers:

Over break, I had the opportunity to present my thoughts and opinions to the UW-System Board of Regents as a representative of UWSP. Here are some of the things I relayed to the board members.

I wholeheartedly support incentives for reducing attempted credits to graduation. The clear majority of students in the UW-System are taking classes with one goal in mind: graduation.

Disincentives should not be used in a budget crunch; they will only lead to a decrease in morale for students, faculty, staff and administrators.

I am especially against any form of the "Extra Credit Tax." This idea is opposed by many students in the System.

Not only would this system require a massive tracking system to account for the 150,000 students in the System, it would require large amounts of UW staff time. The idea of an Extra Credit Tax has not been completely thought through.

Each individual campus should be given financial awards for helping their students graduate within a given time frame, for example four years.

In addition, I believe the Board should further consider measures to reduce attempted credits to degree by 3 percent by 2001.

This seems like a realistic goal if coupled with a strong academic advising policy.

We need strong academic advising with competent advisors that want to advise students.

There is nothing more disheartening to a student than to visit their academic advisor, because they have to, only to find the advisor too busy to take the necessary time to properly advise the student.

I know of many students, including myself, that have gone to their academic advisor, only to have him/her sign their sheet without even looking at what classes the student intends to This is one reason why students do not graduate in four years; we don't take the right classes with a goal of graduation in mind.

By having academic advisors which are properly trained to identify courses that satisfy multiple requirement areas, often called "golden bullet" courses, students could significantly reduce their time to degree, especially at four year, or 4.9 year institutions as the System average reports.

If institutions were given an incentive to allocate money to academic advising, for instance a potentially larger pool of money available to the campus for producing degree bearing individuals within a stated time frame, we would all benefit.

One major challenge I have as a student is the rising cost of higher education. Wisconsin has a long tradition of accessible and affordable education.

This education provides the state with a higher tax base, since we all know that the more money you make, the more taxes you ultimately pay. The education also provides jobs and boosts to our local and state economies.

To keep the cost of education at an affordable level we must limit annual resident undergraduate tuition increases to less than 10 percent, but more importantly, we must strive to increase financial aid availability at the same level that tuition increases.

All tuition increases must be predictable.

If students know that tuition will be going up in fall, it makes planning our work, or rather our spending schedules, much easier to plan in the summer months.

I fear that the days of being "just a full time student" are long gone. I would imagine that the vast majority of students hold a part time job while attending their classes.

If costs go up too much, more students will be working more hours that then are in the classroom and studying. I already know of several students that hours per week with the same course load, myself included.

The students that are not forced to work are most likely getting involved in the campus to make themselves more marketable for the future.

A sad scenario is when a student cannot get involved and take advantage of the many out of the classroom learning activities each campus offers because they have a work schedule that is not flexible enough.

The last concern is the issue of increasing staff costs. The Board of Regents must advocate that the state continue to provide funding to cover the continual increases in staff costs.

If these costs are passed onto students, the affordability of education in Wisconsin will be at risk. If these costs are expected to be absorbed by each institution, we will see an overall decrease in the quality of each institution.

I know that at Stevens Point we simply cannot afford to have our campus take on more costs while offering more services, with less money in the budget.

Until Next Week, Ray Oswald President, Student Government Association

Mind your own business

By Stephanie Sprangers

EDITOR IN CHIEF

When I was a child, my mom always used to tell me that "if I can't say anything nice, don't say anything at all." Moms are great for advice.

People love to get into other people's business. It is just a curiosity thing that I think every human being possesses. It's human nature I suppose.

Rumors are an evil thing. They can destroy a person with just one sweep. One good example of this destruction would be former presidential candidate Gary Hart, who was having an affair...according to the rumors. Rumors are started by people who do not have any clue of what they are talking about and they probably do not know the person they are gossiping about.

When I was in high school, I was forever guilty of starting rumors and taking an active part in the gossip circle that women have a tendency to form.

As I said, that was high school and I was really looking forward to getting to college and being my own person without the constant gossip.

Unfortunately, things were not as I had hoped they would be here

Fun in editor's future

By Stephanie Brotski COPY EDITOR

Whether you went somewhere warm and sunny or stayed in wintry Wisconsin, spring break was a much needed vacation for everyone on campus.

Since we have been in school for two months straight without a break of any kind, this was welcomed by most of us.

To all of those who went somewhere southern and warm, I am so jealous. At least you could have brought some sun back to Wisconsin with you.

From talking to those southbound friends of mine, I got quite an earful about their trip.

I heard everything from going on all-day booze cruises and getting sun poisoning to ending up in jail hours before a twentyfirst birthday.

Even with the bad experiences spring breakers might have had, believe me, you were much better off wherever you were because it was boring and cold around here.

During break, I had hoped to get things done that I have put off for the whole semester, like sending out resumes, and to just relax. Since the weather was terrible, it should have forced me to get my projects done, right? Wrong! The only thing that happened was the relaxing part.

Opinion

Unfortunately, spring break has come and gone, along with everyone's money and tans.

For some of us May graduates, myself included, spring break will just be another memory since most employers will not be giving out vacations freely during our first year working.

It is scary to think that in two months, I will have to actually work for an entire year without a break of any kind.

That is so depressing. I am already trying to make plans for a trip to Mexico next year for spring break, even though I will hopefully be employed full-time. Oh well, better late than never to have some fun in the sun.

take, or what impact those classes will have on the students academic path.

work a full time job in addition to taking 15 academic credits. I know many more students that work more than 25 or more

Attention

The Pointer is accepting applications for Editor in Chief for the 1996-97 school year. Extensive newspaper knowledge needed. Knowledge of Pagemaker 5.0 and Corel Draw a major plus.

Applications can be picked up in Room 104 of the Communication Arts Building and are due by 5 p.m. March 29. Questions: 346-2249. at good old UWSP. Rumors are constantly circulating about who is mad at who, who stole who's boyfriend, and many other stupid topics.

Every different circle of friends has something to say about one another.

Granted, this campus is quite small and everyone knows everyone, but what possesses people to talk about someone or something that they really do not know anything about?

In reality, by the time the story reaches the person it concerns, it is so distorted and blown-out-of proportion that it takes a decoder from a gum-ball machine to figure it out.

Many times I will hear something that involves me in some abstract way, and I choose to ignore it and not address the situation.

If I really don't care about what is going on, why should I waste my time dealing with a stupid situation? I could be out with my true friends having a great conversation.

I see gossiping and rumor mills as a major waste of time and brain power. SEE BUSINESS PAGE19 TYPESETTER Brittany Safranek Douglas A. Spring fish and wildlife rule hearings scheduled for April 8 DNR looks to modify trout season, deer season and length limits for walleye

Establishing a trial, catch-andrelease early trout season, allowing the state to modify deer seasons in farmland areas to control deer populations, and adopting a category system for walleye fishing are among the proposals that will be discussed and voted on at the 1996 Department of Natural Resources (DNR) Spring Fish and Wildlife Rules Hearings.

The annual hearings are held simultaneously in each of the state's 72 counties in conjunction with the Wisconsin Conservation Congress county meetings.

All hearings will be held April 8, beginning at 7 p.m and are open to the public.

"Questions identified as having statewide significance will be addressed first and then local rule changes will be discussed in the counties affected or in any county where someone in attendance brings it up for discussion and comments," explained Al Phelan, coordinator of hearings for the DNR.

Among the statewide questions being considered is one to establish a new early trout season that would run from 1997 through 1999 and include all inland streams statewide, excluding some sensitive waters and Great Lakes tributaries. The season would run from March 1 until the first Saturday in May with a daily bag limit of zero (catch and release).

Anglers would be required to use artificial lures and barbless hooks only.

"This question is in response to suggestion from the public to expand trout fishing opportunities while protecting the trout fishery," said Lee Kernen, director of fisherice management for

ies management for the DNR. The state had an early trout

season in eight southern counties for nearly 20 years.

The season was closed after the majority of people attending the 1994 spring rules hearings voted in favor of the closure.

"With the previous early trout season there were some concerns that fishing pressure was concentrated in those eight counties and that the trout in those streams were being overharvested," said Kernen.

The proposed season would protect trout through the catchand-release and barbless hooks requirements and eliminate fishing pressure problems by opening waters statewide. The early season would automatically end in three years without further action at future rules hearings.

Another proposed rule would allow the DNR to modify the deer seasons, deer registration and

"The proposal is aimed at improving the quality of walleye fishing by matching regulations to the characteristics of individual waters." Lee Kernen

> procedures for issuing permits for deer management units in some farmland regions where deer populations are well above established goals and where high deer numbers are causing agricultural damage and transportation safety problems.

"These large herds cause substantial crop damage and are a safety hazard for vehicles on roads and highways," said Tom Hauge, director of wildlife management for the DNR.

If the herd within a management unit cannot be controlled within the normal hunting season framework, the proposed rule would allow the DNR to do one or more of the following: increase length of seasons, increase the bag and possession limits, establish either-sex or antlerless-only deer seasons, or authorize and encourage, by issuing special permits, the harvest and donation of antlerless deer to charitable food distribution programs.

> Another major statewide rule proposal would establish a category system for fishing walleye, sauger and their hybrids. A state Wall-

> > eye Manage-

ment Committee made up of DNR biologists, wardens and many citizens representing walleye fishing interests developed a category system as part of a major revision of the state's walleye management plan.

"The proposal is aimed at improving the quality of walleye fishing by matching regulations to the characteristics of individual waters," said Kernen.

The following categories are being proposed to manage walleye waters:

-- No minimum length limit, but only one fish in the daily bag limit could be over 14 inches.

-- No minimum length limit, a 14 to 18-inch protected slot length limit, and only one fish over 18 inches. 15-inch minimum length limit.
18-inch minimum length limit, three daily bag limit.

Outdoors

Among the other rule changes that will be discussed and voted on at the hearings are proposals to:

-- Increase the minimum length for largemouth and smallmouth bass from 14 inches to 18 inches and reduce the daily bag limit from five to one daily on Lake Mendota, Dane County; Fox Lake, Dodge County; and Big Muskego Lake, including Bass Bay, Waukesha County;

-- Change the boundary between the northern pike zones from county lines to U.S. Highway 10;

-- Increase the minimum length limit for muskellunge on the Wisconsin-Minnesota boundary waters and connected waters in Douglas County from 36 to 40 inches.

The Wisconsin Conservation Congress will also present a number of advisory questions during the meeting, including: a proposal to give first-time hunters who successfully complete hunters' safety courses a hunters' choice tag, questions to determine the support for split waterfowl seasons and questions on whether the state should adopt a second early Canada goose subzone.

Last year's total boating accidents tie record for most ever in state

1995 tied the state record for highest number of accidents since 1967, when the state began keeping records, according to Bill Engfer, Department of Natural Resources (DNR) boating law administrator. On the other hand, he adds, fewer fatal accidents occurred than in any year on record.

State records show 15 persons died in Wisconsin boating accidents last year, as compared with 19 during the 1994 boating season. Also, 231 boating accidents were reported last year, up from 175 reported in 1994, tying the state record set in 1988.

"With fewer dollars to fund state and local boat patrols, we've been forced to target locations and time periods associated with the most serious boating accidents," Engfer says. "Almost without exception, that means targeting intoxicated operators."

Because federal safe boating funds, cut in 1992, have not been restored, Engfer says enforcement priorities this coming year will continue to reflect the shortfall. "Wardens and local enforcement officials always have the flexibility to respond to new problems that emerge on local waters.

But intoxicated boaters are the most deadly threat we've identified, and our bottom line is the need to save lives," Engfer says.

WE'LL ERASE YOUR COLLEGE LOAN.

If you're stuck with a student loan that's not in default, the Army might pay it off.

If you qualify, we'll reduce your debt—up to \$55,000. Payment is either ¹/₃ of the

and time periods the most seriou

debt or \$1,500 for each year of service, whichever is greater.

You'll also have training in a choice of skills and enough self-assurance to last you the rest of your life.

OUTDOORS EDITOR

Soon, all the snow will have melted, (well, for sure by the end of school) and millions of animals will begin to disrupt life for us humans.

Raccoons will ransack and pillage your garbage cans, rabbits will destroy your garden and flowerbeds, deer will attack your fields, coyotes will slaughter your sheep, woodpeckers will drill holes in the siding of your house and gophers will excavate your lawn.

Wow, you've got problems.

But just be glad that your problems are being caused by animals you can see and not a creature that is far worse than all previously mentioned animals.

I am speaking of a creature that is so incredibly devious that it has the ability, if it wants to, to reek carnage like nobody's business.

Hmmmm. Perhaps I'm being a bit vague. It's smaller than a mountain lion but larger than a field mouse and it has a mean streak a mile wide.

Of course, I am talking about the snipe.

The snipe was first discovered at about the time settlers were making their way across this country to settle --- before there were even highways!

As the story goes, two men were sitting at the front of a covered wagon, leading a wagon train along a dense forest trail when suddenly a dark shape dashed across the trail in front of them.

They immediately leaped off the moving wagon and followed the strange animal into the brush, muskets at the ready.

Of course, they found no trace of it.

About the ninth or tenth time this happened that day, the rest of the wagon train was beginning to have serious doubts as to the sanity of the two men, as were their wives, who were sitting in the back of the wagon.

Denise: "There go them two fools again. I reckon they be chasin after that dang imaginary creature they keep yappin about."

Emily: "Hey, watch who you're callin a fool. Your husband's the first one off the wagon every time."

Denise: "Yeah, but yours is the one who comes back every time and says, we just missed him honey."

Emily: "Well at least mine don't say, we'll get the little devil next time."

Fortunately for us, one of these beautiful women wrote the entire conversation down in her diary.

(By the way, it turns out that after the last line of dialogue, the following words appeared in parentheses: at least my husband don't smell like a dog. Ha Ha Ha.)

But back to the snipe, and the fact that it is quite the elusive creature. One reason for it being nearly impossible to see may be

Central Wisconsin Environmental Station receives service award for education

The Central Wisconsin Environmental Station (CWES) has received the Outstanding Service Award from the Wisconsin Association for Environmental Education (WAEE).

The WAEE Award is presented each year to an organization for "significant contributions to the field of environmental education (EE) having statewide, regional or national impact."

The award was presented at the annual meeting of WAEE in La Crosse.

The Environmental Station, located east of Stevens Point on Sunset Lake, is a year-round environmental education center operated by the College of Natural Resources at UWSP.

The center is directed by Joseph Passineau, associate professor of environmental education.

Since opening in 1975, the Environmental Station has gained national recognition as a model regional environmental education center for its services to schools, universities, teachers, and youth, civic and professional groups.

The station celebrated its 20th Anniversary this past fall with an open house and full day of educational activities, music, and alumni events.

Each year over 20,000 visitors take advantage of educational programs offered at the station.

As an early leader in the EE field, it was recognized by the Department of the Interior as a "National Environmental Study Area," the first center so designated in Wisconsin.

It has been recognized for its outstanding educational programs, curriculum development efforts, innovative research projects and service to schools, professional organizations and the public.

Students from more than 20 school districts participate in educational activities and lessons taught by UWSP graduate and undergraduate students enrolled in the college's "Practicum in Environmental Education" course.

Curriculum materials developed and used at the station are requested by other EE centers and schools from across the nation.

Each year visitors from throughout the world also come to investigate the stations programs which integrate university education, public and private school programs, outreach courses and summer camps.

During the summer months, CWES sponsors Natural Resource Careers Workshops for high school students, Nature Adventure Camps for 7-13 year old youths, Timbertop Nature Adventure Camp for students with learning disabilities, Wilderness Adventure trips and Elderhostel courses.

On weekends the station serves over 70 different youth and civic groups each year and offers workshops for teachers, resource professionals and the interested public.

The station is also used extensively by faculty, professional organizations, agencies and churches as a centrally located conference, retreat and meeting site.

In 1995 the station received one of only five grants to develop the Central Wisconsin Water Education Resource Center, providing educational workshops and a lending library of water testing equipment plus curriculum materials.

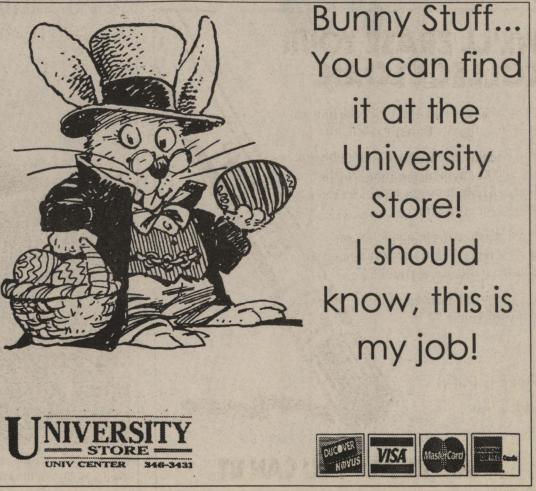

The center also coordinates activities with other organizations and agencies in the region interested in water education.

The station also serves as the headquarters for WAEE, providing assistance to the organization through administrative services and publicity.

Facilities include meeting rooms, a dining hall, a solar designed dormitory, log cabins for lodging, an outdoor amphitheater, waterfront and several miles of walking trails through over 300 acres of towering red and white pines, hardwoods, wetlands, lakes and fields.

"Every March since the Pleistocene, the geese have honked unity from China Sea to Siberian Steppe, from Euphrates To Volga, from Nine to Murmansk, from Lincolnshire to Spitsbergen." -- Aldo Leopold

FROM NEKOOSA TO VESPER...

the fact that it is the color of bark.

Now you may be thinking, if a snipe has never been seen, how do I know what color it is?

Well, back around 1702, an old-timer became the first and only human being to see the snipe.

Unfortunately, the man was mute and illiterate.

He did however draw a nice stick figure of the animal in the dirt, after which he walked over to a tree and tapped the bark.

Witnesses to the event apparently assumed, for reasons unknown to this day, that he was trying to show them the color of the animal.

It should also be noted that the witnesses watched the oldtimer leave and discovered that he stopped at every tree he approached to tap the bark.

Some say the man was crazy, some say he was looking for a new home, and some say he was just a tree tapper.

But whatever he may have been doing, his name will forever live in history.

You see, his name was Joe Snipe.

Upcoming spring event: Crane count

Celebrate the return of spring with some of the area's tallest and most vocal avian residents!

Over 3,000 volunteers in five states will spend the morning of April 20 on the lookout as part of the 22nd Midwest Sandhill Crane Count.

Sandhill Cranes, standing up to four feet tall and with a bugling call audible over a mile away, were considered rare and endangered in the Midwest as recently as 25 years ago.

The annual count, sponsored by the International

Crane Foundation, helps monitor the Sandhill's recovery and status.

In addition to the cranes, counters can enjoy the early morning activity of frogs, songbirds, waterfowl mammals and other wildlife.

Portage County participants are encouraged to attend one of the following organizational meetings: Tuesday and Wednesday, April 2 and 3 at 7:00 p.m.

The meeting will be held at the College of Natural Resources building on the UWSP campus in room 112.

At the meeting, participants will select survey sites and receive observation forms and instructions.

A narrated slide presentation depicts the cranes' life cycle, behavior and the relationship be-

tween cranes and their habitat.

> Sandhill Cranes were common in the upper Midwest in the mid-1800s, but declined rapidly after 1875 due to hunting, wetland loss and human disturbance.

By 1936, fewer than 25 pairs survived in Wisconsin and the species was considered rare in the region.

Since that time, hunting restrictions and the restoration and protection of

wetlands have allowed the Sandhill population to rebound, slowly at first, but with rapid growth through the 1980s.

Observations also indicate that the cranes have become more tolerant of human activity, adapting well to agricultural patterns.

In 1995, counters tallied over 12,000 cranes in Wisconsin and adjacent portions of Illinois, Michigan and Minnesota, the highest total in the survey's history

Based in Baraboo, Wisconsin, the International Crane Foundation works to preserve the world's 15 species of cranes and the ecosystems on which they depend.

Antlerless quota to change Gun season later. Nov. 23 to Dec. 1

"In setting these

tor in the severe

winter conditions

in portions of the

northern forest

region."

Bill Mytton

antlerless deer state wildlife officials would like hunters to harvest during the 1996 deer hunting seasons will remain high in southern Wisconsin but will be reduced in many northern areas due to severe winter conditions.

The Department of Natural Resources is rec-

ommending a statewide antlerless deer quota of 283,625 for 1996.

The DNR adjusts the quota for harvest of antlerless deer each year to keep deer populations at or near legally established

goals for each of 122 deer management units in the state.

Wildlife managers estimate Wisconsin's overwinter deer population exceeds 1.1 million.

"In setting these goals, we took extra care to factor in the severe winter conditions in portions of the northern forest region," says Bill Mytton, DNR deer and bear ecologist.

Wildlife managers held meetings around the state earlier this year with Conservation Congress delegates, county Land Conservation Committee members and others to gather information for setting antlerless quotas.

The reduced quotas in these areas also reflect the fact that the gun season will be held late in the

Goals for the number of year-November 23 through December 1.

> There is usually less rutting activity this late in the season, which generally reduces the buck kill, Mytton says.

> Wildlife managers in the northern forest region are conducting weekly inspections to monitor the

> > effects of the severe winter on the northern deer herd.

They will continue to monitor the herd through the winter to determine if winter severity exceeds current projections, Mytton says. In the southern

farmland region, deer populations are above their established population goals in all of their management units, resulting in increased antlerless quotas for those units.

"Population goals are based on the land's carrying capacity and public tolerance for deer," said Mytton. "In farmland deer units, crop damage and deer vehicle accident rates are major considerations."

Southern Wisconsin counties are continuing to report both high deer agricultural damage and deervehicle collision rates, which are additional indicators that deer population exceed established goals, Mytton notes.

There are nearly 40,000 cardeer collisions reported annually.

Wisconsin's wild turkeys survived the cold, snowy winter in good condition throughout most of their range, though there were some turkey deaths in northern areas of the state, according to state wildlife managers.

"The weather broke just in time this winter," said Dave Matheys, a Department of Natural Resources (DNR) wildlife manager at Viroqua.

Currently, wildlife managers from around the state report that large flocks of turkeys are moving around and feeding in open areas where snow has melted.

"The deep snow and severe cold did limit turkey movement for up to two weeks in most of the state, but we found very few turkey deaths due to starvation or exposure in southern and central Wisconsin," said Tom Howard, DNR wildlife biologist and state turkey specialist located in Dodgeville.

Wildlife managers in the northwestern portion of the state's wild turkey range report turkeys are surviving well in spite of the heavy snowpack and extreme cold.

However, some areas are experiencing turkey deaths due to extreme weather conditions.

"In the areas of Wisconsin where turkeys are at the fringe of their range, adverse winter weather will always result in some turkey deaths, but we know the turkey population can fairly quickly recover from the setbacks of a harsh winter," Howard said.

Barring any additional severe weather, turkey hunters should have a successful spring hunt, especially in southern Wisconsin.

However, hunters who have permits for Florence, Marinette, Oconto and northern Shawano counties (zones 31, 32, 36, and the north edges of 22 and 35) may have lower than normal success this spring due to reduced winter survival.

Amundson, DNR wildlife manager at Marinette, reports fewer turkeys are being seen moving about and using feeders than in previous years.

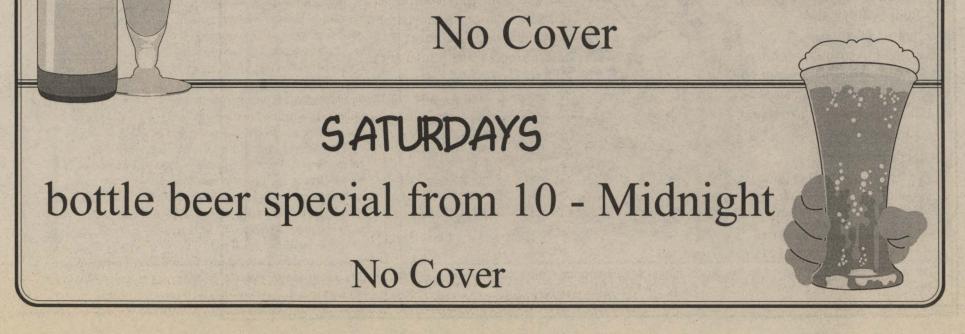

The spring turkey season is conducted in six 5-day periods beginning April 10.

Each period runs Wednesday through Sunday. The last period ends May 19.

The bag limit is one bearded turkey.

More than 86,000 hunters applied for a record 75,597 turkey permits for the Spring 1996 season.

Souls to haunt Quandt Poi Dog Pondering and The Gufs scheduled as special guests

"Oh, Virginia," Blessid Union of Souls will be performing Thursday, May 2, with special guests The Gufs and Poi Dog Pondering.

Blessid Union of Souls' songs and popularity have grown to enormous proportion. When their first song, "I Believe," hit the charts, it was the number one song in the nation for two weeks running. Since then their album *Home* has gone gold, with "Let Me Be The One," being a Top 10 hit in October of 1995.

The Gufs, who have recently signed with the record label Atlantic are making a repeat performance at UWSP. This local band hails from Milwaukee and has played at Summerfest and across the nation. With the success of their album *Collide*, their April CD release is sure to be a hit with their almost cult-like following of fans from Central Wisconsin.

Poi Dog Pondering's latest CD is *Pomegranate Seeds*. Poi Dog is as experienced as they come, with a CD and single history dating back to 1984.

Tickets go on sale, Friday at 8 a.m. at the UC Information Desk and the Arts and Athletic Box Office in the Quandt Fieldhouse Lobby. Advance tickets for the band package are \$11.50 for UWSP students and \$13.50 for the public. Tickets at the door are \$13.50 for students and \$15.50 for the public. The concert is brought to you by Centertainment Productions.

Seating is general admission at the Quandt Fieldhouse, no reserve seats.

Kilborne analyzes advertising and addiction

By Kate Roberts FEATURES EDITOR

When we see an ad on television or in a magazine we usually do not think much of it. Most of us consider ourselves to be, for the most part, unaffected by advertising. Little do we know that the ads that we seemingly dismiss

in our minds end up creating unconscious feelings of insecurity and anxiety.

Dr. Jean Kilborne, an internationally recog-

nized authority on media, addiction and gender issues, will be speaking on the UWSP campus on April 10 at 7:30 p.m. in Berg Gym. Admission to the lecture is free of charge.

Kilborne will give a multimedia presentation entitled "Deadly Persuasion: Advertising and Addiction," in which she examines the marketing of addictive substances and how it links to society's acceptance of the behavior. The program focuses on issues of tobacco and alcohol, in particular. The media critic is known for her energetic and humorous presentations that communicate many significant messages. She is not saying that smoking and drinking are bad, per se, but she is questioning who is controlling the minds of consumers.

Kilborne explains not only how advertisements glorify alco-

that depicted women in a stereotypical way and eventually created her first presentation from the information she had compiled. Now she delivers over 100 talks each year.

Features

Kilborne was recently featured in the New York Times Magazine as one of the three most popular speakers on college cam-

puses today. The three award winning films: "Killing Us Softly," "Calling the Shots," and "Pack of Lies," are all based on her lectures and slide presentations.

The Women's Resource Center is bringing Kilborne to the UWSP campus because they feel that she is a valuable part of the women's movement and can help educate others on how women are portrayed in society.

"The main reason we wanted to have Dr. Kilborne for a speaker is that alcohol and tobacco greatly affect college campuses." said Cate Irsfeld, of the Women's Resource Center. "The mass media plays a big role in all of our lives and she will help us to be able to see through some of the deceptions that advertising presents to us."

90FM'S PICKS OF THE WEEK

By Wayne Semmerling 90FM Station Manager

Josh Clayton Felt Inarticulate Nature Boy

Remember School of Fish? This is the lead singer, and he has put forth a very impressive solo cout, and some long awaited material, different from anything related to School of Fish.

More mature and developed than any School of Fish album ever was, and it really surprised me, I thought it would be basic rehash of that band's material. A very impressive leap forward for this artist.

Another highly recommended album.

Lush Lovelife

After spending several years creating music that seemed to bury the singing and lyrics they have come out with an album that has more "pop" quality to it, and understandable lyrics.

It is a subtle change that may open them up to many new fans, as evident in their new single, "Ladykillers." Real catchy, and a song that may give them some long deserved recognition in many new areas. It adds some variety to any album collection.

What a trip!

Excellent.

Barbara Cohen and Little Lizard Black Lake

One need not look far away from Wisconsin to find an excellent talent. Barbara Cohen and Little Lizard's latest release swims in emotion, with well developed songs that are both dark and brilliant.

A powerful female voice along with a knack for writing emotional songs, this album has a wonderful and enjoyable sound.

Excellent album, and the band will be playing the Mission Coffeehouse this Friday. Check it out!

We have all played the good girl or good boy role at sometime in our lives. For some it is a complete act, for others it is a sad reality. Actually it is not that bad, and, yes, I am speaking from experience.

I have to admit that on the whole, I am a good girl. Most of my life that is how people have perceived me anyway. It must be because I have that innocent look. The truth is though, looks can often be deceiving.

Life as a good girl can get to be awfully predictable and boring at times. The fun part comes in when you can surprise people by doing things that they would never expect you to do like....

- ~ Mudsliding behind the north Debot residence halls in the spring after it had rained for a week.
- ~ Dancing on speakers.
- ~ Wearing lipstick for no reason at all.

The UWSP Trippers traveled to the Appalachian Mountains for their spring break where they saw more than their share of snow. (Photo by Brad Riggs)

Being a good girl was helpful during my teenage years because I did not give my parents too much trouble. The downside was that they worried about me twice as much because I was supposedly so innocent. Everyone breaks a curfew or two when they are in high school, and I was no exception. Other parents would have thought I was out being mischieveous, but not my parents, they automatically thought something horrible happened to me. They would say, "It is just not like you to not call when you're going to be late."

Things have changed a little bit since then. Now, don't get me wrong, I am not exactly a good girl gone bad, but I am not living the life of a nun though either. A couple of summers ago my dad was talking about me with some of his friends. He showed them my senior picture and said, "That's when she used to be nice." That is actually more of a compliment than anything. I had started to question why I had to be home at a certain time and why I could not go certain places. Life was no longer easy for the parents, but it was a lot more fun for me.

WHAT'S HAPPENING

EXHIBITION

Art and design students are showing prints and drawings in "The WPA: A Program Revisited," and exhibition which runs through April 11 at the Agnes Jones Gallery in the College of Professional Studies building.

Students in three of Robert Erickson's classes were asked to answer the question, "If the Works Projects Administration was instituted by the federal government again under similar circumstances that existed in 1935, what would artists make images about?"

The gallery on the first floor of the College of Professional Studies building is open to the public from 10 a.m. to 4 p.m. Monday through Friday.

COURSE ADDITION

The Interior Architecture Program is adding a course to its department that will also satisfy the Humanities 1 and Non-Western general degree requirements. "Applied Design: A Cross Cultural Survey," will offer an approach to manufactured goods which compares and contrasts the design and use of everyday items in Western culture with their counterparts in a variety of Non-Western societies.

The course is a comprehensive look at the world of design which discusses the positive and negative views of the compare/contrast concept. Theories of life-style, design, symbolism and visual communication are treated.

The class explores material culture from a micro view to a global view of the home, the workplace and beyond. It will be taught at 12 p.m. on Tuesday, Thursday and Friday in room 116 of the CPS building.

ANTIQUE SHOW

The 18th Annual University Antique Show and Sale will feature a verbal appraisal clinic by Janet's Antiques of Madison.

Nearly 50 antique dealers will display and sell a variety of goods in the Quandt Gym at UWSP from 10 a.m. to 6 p.m. on Saturday, and from 1 a.m. to 4 p.m. on Sunday. The appraisals will cost \$4 per item for china, glass, and silver on Saturday plus furniture on Sunday. Mary Lou's Crystal and China Repair also will be present at the show.

Tickets are \$3 for adults, \$2 for students and 50 cents for children. Proceeds benefit the UWSP athletic department. People come from throughout the state to attend, says Virginia Buckaloo, coordinator of the event.

A balcony cafe will serve lunches and snacks during both days of the event.

COOKING CLASS

Healthy Choices, a five-session vegetarian cooking class, will be conducted in the Stevens Point area beginning Tues-

Feature Presentation Photo and article by Brad Riggs Dr. Fred Copes, Professor of Biology

Biology. We've all studied it even if we don't know it. Dr. Fred Copes gets this week's cheers. Dr. Copes teaches a variety of courses such as Ecology through Aquatic Culture, but Dr. Copes' hidden talent is his gentle introduction to biology for the generalist.

His main focus for his Biology 101 students is to--

1) Develop an interest for biology 2) Learn relevant facts to their life

Dr. Copes is an alumni of UWSP and

received two undergraduate bachelor degree in biology conservation and broad field science in 1961. From there he went to Waupaca and taught high school for three years.

In 1964, he went for his masters at North Dakota State University in biology. While there, he was asked to fill a one year instructor position to teach

botany and zoology. He ended up staying for three years.

In 1967, he felt it time to move cn and get his Ph.D., so he went to Wyoming and worked for a double Ph.D. in zoology-physiology and ecology of fishes. In 1970, his alma mater hired him to teach fisheries and biology classes.

While at UWSP, Dr. Copes has helped a lot of students. He has been the Tutor Coordinator for Life Sciences since 1980. He also has published works in The Polish Academy of Science and our own Museum of Natural History.

Dr. Copes enjoys working on research projects with students on the job, and all sorts of hunting and fishing off the job. Dr. Copes' biological magic shines when he tells his life stories about biology and you.

His advice to all us general biologists out there is to keep up with daily study and review.

Author's Note:

The Biology department has some nice things going on for campus as a whole. Shelly Jansky was elected chair for the department last semester, and they have seen the need for recycling teacher excellence.

Biology has started building a fresh set of excellent professors such as Jansky and Dr. Robert Bell who started teaching at UWSP five years ago.

University Writers seeks student submissions Barney Street sets students on the path to publication

By Brittany Safranek TYPESETTER

UWSP is giving writers, artists, and poets a chance to become recognized for their talents. The University Writers are encouraging students and community members to submit some of their writings or drawings to put in their campus literary magazine, Barney Street.

"It's a great opportunity to get published," said University Writers president, Monica Kamps. "Some grad schools make you submit work to get published before you are accepted. It can also be done just for the pride of having something others are going to read. It's a great way to get recognized by everyone."

at UWSP, is helping set up the advertising and he is also on the fiction/nonfiction editing board for Barney Street.

We're looking for stuff that's eye-catching, well-written, and clear." said Binkley. "Each editing board will meet as a group and pick the ones they like and then they will discuss each piece."

Submissions should be made as soon as possible since the magazine is only accepting appli-

John Binkley, who is a junior cations until April 1. The works should be sent to 018 of the LRC with a cover sheet including name, address, and phone num-

> Kamps added that University Writers are planning to have a big campaign when Barney Street comes out. She said that during the campaign the people who wrote for the magazine will have a chance to read some of their other writings in front of students.

day, April 2, from 7 p.m. to 8:30 p.m. at the Seventh-day Adventist church and school complex located in Whiting. Classes will continue each Tuesday evening in April.

Seminar participants will receive vegetarian cookbook entitled, "Choices," that provides not only recipes, but also a helpful how-to guide on questions many people have about eating vegetarian. Each evening attendees will hear concise, up-to-date presentations on topics such as: the health benefits of a vegetarian diet, the facts and fiction of eating vegetarian, how to control weight naturally, how to cook whole grains and legumes, how to use tofu and how to adapt your favorite meals.

Cost for the seminar is \$20 per person and \$25 per couple which covers the expense for all materials, food samples and handouts. Attendance is limited to the first 40 registrants. To register or receive further information call 345-1455.

Three committees consisting of poetry, art, and fiction/nonfiction will be reading and selecting their favorite writings or artwork to put into Barney Street.

"We enjoy the fresh styles; things that look unique, but we also like the traditional styles. We are pretty open to a lot of things." said Kamps.

"Each drawing artist's work should show vision of contrast. It should also look good in black and white, since that is the way it is going to look in the magazine," commented Kamps.

After seeing a man walk up to the car, peer in and walk away, Jackie ran to the car to aid Feltz.

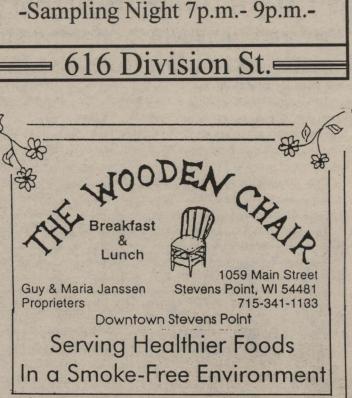

"I just couldn't walk away from it," said Belke. "We put a blanket around her to keep her warm and held her head up."

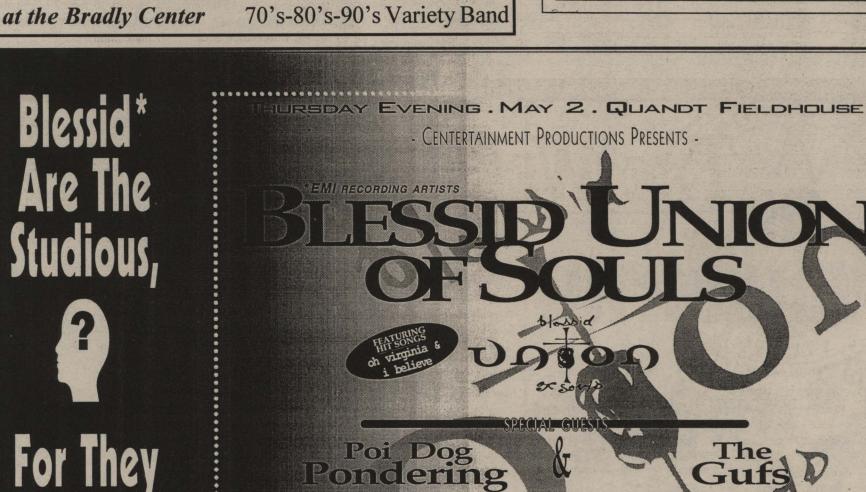

The death hit home for the Belkes, since their daughter travels that way often to get to campus. "It's just a shame," said Belke. "She was bettering herself (at college)."

The Portage County Sheriff Department stated the accident was weather-related and most likely due to the exceptionally

windy conditions. But they will never really know exactly how or why Feltz drifted across the yellow line.

Baseball team returns home riding wining streak

Stevens Point claims wins in final six outings of twelve game spring break trip

By Joe Trawitzki CONTRIBUTOR

Traditionally, students go on spring break to relax and have some fun. However, the UWSP

baseball team nearly missed getting any enjoyment out of their annual spring break trip to Fort Myers, Florida.

But the Pointers displayed character coming back to end the trip with a six game winning streak to finish 7-5.

The Pointers were impressive in their first game of the season. Chris Simonson made his debut by tossing a complete game 8-2

Softball looks impressive down south Defending WWIAC champs start season out 9-0

Upcoming Home Pointer Events

Softball -

April 10-Mt. Senario (3:00

April 17-Platteville (3:00 p.m.)

p.m.)

The UWSP women's softball team started its year virtually unchallenged.

The Pointers won all nine of their games over the spring break, spent in San Antonio, Texas. Stevens Point claimed wins over three clubs; Charleston College, Texas Wesleyan, and Trinity University.

Over the nine game stretch, Stevens Point's offense produced 142 runs, while the Pointer pitching staff and defense allowed only 16.

The only school to keep the score a respectable one was Texas Wesleyan.

They lost 4-2 and 6-2 to Point during a doubleheader on March 19.

Baseball

April 3-Cocordia (1:00 p.m.)

April 6-Edgewood (1:00 p.m.)

April 14-Marian (1:00 p.m.)

The Pointers were led over the break by Amy and Becky Prochaska and Kari Goddard on the mound, along with a handful of offensive contributors.

Freshman Becky Prochaska won four games for Point while Amy, a returning ace from last year's WWIAC championship season, claimed three victories

Goddard pitched towards wins in the other two. Senior Erin Buenzli went 10 for 15 and added 10 RBIs. Emily Keup and Kelli Harms knocked in 13 and 12 RBIs respectively to lead Point.

Point's next action is in La Crosse today, but weather will probably delay the doubleheader.

(11:00 a.m.)

(11:00 a.m.)

| victory over Ohio Wesleyan | u Uni |
|----------------------------|-------|
| versity. | |

Despite the promising start, the team started falling apart.

They lost the next five games of the trip. The first three loses were each decided by one run.

The team lost close games to Macalester College (6-5), Westfield State (10-9), and Kutztown University (8-7).

The streak continued with the Pointers getting shelled by Baldwin-Wallace (9-1) and Skidmore College (10-4).

"We started a little slow, but we didn't know what to expect with our young pitchers staff (six freshman). But they were not at fault for the losing streak. The whole team played poorly, it was really a group effort," head coach Guy Otte commented.

During the losing streak the team did not perform at any level. They committed 14 errors, were out hit 51-32, and out scored 43-26 during the five games.

The young pitchers quickly learned college baseball and the bats came to life.

The team recovered to make the trip a success and give fans a preview of what Pointer baseball will be like this season.

The team was facing another defeat being down 7-1 in the first game a doubleheader to Bethel College.

But the Pointers had enough losing. They came back to win 11-8

"Coming back from being down 7-1 was a real highlight of the trip. And then winning the next fives games put a great end to the trip. The trip could have been a lot worse, but the guys came back to make it a success. Hopefully it shows we will have a real competitive team this year," Otte said.

They never looked back.

They completed the sweep of the double header winning the night cap 9-5.

They finished the trip hammering Franklin Pierce College (5-1). Western Connecticut (13-8), Trinity College (9-4), and Middlebury College (7-4).

The winning streak proved the team has pitching talent and hitting talent.

Despite having no real pitching leader, the team displayed as a team they have plenty of talent.

Offensively the team was led by Gary Kostuchowski. Coming off of a record setting year, Kostuchowski picked up right where he left off. He is hitting .333 with 2 homers and 15 RBIs.

Currently the team continues to practice indoors waiting for the snow to melt in time for their home opener, a doubleheader against Concordia on April 3.

Tae Kwon Do a big hit on campus

By Brad Riggs PHOTO ASSISSTANT

- Track -

March 30-Coldman Invite

April 20-Stevens Point Invite

Tae Kwon Do (TKD) is Korean for The Art of Hand and Foot, and its roots go back to the 10th century B.C.

TKD has been used as a selfdefense technique in Korea for over 2,000 years.

Master Dwight Stevens said, "Tae Kwon Do allows you to use the minimum force necessary to get out of an aggressive situation."

Stevens, a 5th degree Black Belt and UWSP History Professor Terry Wick (4th degree) teach Tae Kwon Do for phy. ed. credit.

Within the past decade the number of Tae Kwon Do practitioners have grown rapidly, so

There is still a shortage of blood. We need your help!

Sign up booths are located in all the Academic Buildings and in the U.C.

Walk ins Welcome!

much so that it was inducted into the Summer Olympics.

Stevens has been teaching Tae Kwon Do for 15 years, and is one of three Wisconsin International Judges for Tae Kwon Do competition.

"Tae Kwon Do, as a sport, allows you to gain control of your body, increase physical stamina, as well as gives you the technique and confidence to protect yourself, " said Stevens.

Steven's students, Greg Dorn and Noah Zimmerman, were the instructors of the recent self defense course on Campus.

A UWSP Tae Kwon Do student prepares to punch during class. (Photo by Brad Riggs)

The TKD Club invites you to meet with them in the Wrestling Room on Fridays from 1 to 3 p.m., or UWSP has phy. ed. credits in Tae Kwon Do where students can learn Tae Kwon Do philosophy, get a good workout and learn about self-defense.

PAGE 17 MARCH 28, 1996

Men's track places first over break By Craig Olson Klement placed first in the 100 Jason Duellman in the javelin,

By Craig Olson CONTRIBUTOR

Members of the UWSP men's and women's track teams went on a spring break trip to Tennessee, competing on Saturday at Rhodes College in Memphis.

Extreme winds made conditions very poor but both teams did well.

Of the nine men's teams competing UWSP took first, outscoring second place Carthage 199 to 178.

With only six competitors the women's team placed third in the meet.

Brenda Felver won the long jump and the 100 meter dash, Jen

Klement placed first in the 100 meter hurdles and second in the 400 meter hurdles, Trishia Statton placed first in the high jump, Jen Woyak placed first in the javelin and second in the high jump and Missy Heiman won the triple jump.

Placing first for the men were Chris Krolick in the steeplechase, Rob Schmitt in the pole vault, Mike Warta in the 400, Brett Witt in the 800, Chad Johnson in the 5000, Chad Robran in the 110 and 400 hurdle events and the team of Robran, Witt, Warta and Craig Anderson in the 1600 relay. Joe Butler in the High Jump, Jason Brunner in the steeplechase, Matt Hayes in the 1500 and Craig Anderson in the 400 hurdles. Finishing third was Anderson

in the 110 hurdles, Travis Rogers in the triple jump and Chad Christensen in the 5000.

"We performed well despite traveling and the windy conditions," said assistant coach Tim Olson, "It was a great experience for everyone."

The team begins the outdoor season March 30 with the Pointer Coldman Invite however, due to poor weather conditions and the

SEE TRACK ON PAGE 19

Over the spring break, a few friends and I put together the \$45 plus it cost to get the MikeTyson-Frank Bruno fight via pay-perview.

I thought that this bout would be a much better fight than the previous two contests since "Iron Mike's" return. In fact I thought Bruno had a realistic chance against Tyson.

My money was well spent for the five-fight extravaganza. But the Tyson-Bruno fight had very little to do with my satisfaction.

The best fight of the night was not a battle between a pair of heavyweights, nor was it a fight between men. The best brawl was a six round scheduled bout between Christy "The Coal Miner's Daughter" Martin and Ireland's Deirdre Gogarty. Two women!

When my friends and I learned that the two were on the fight card, laughter broke out. But come fight time, nothing but "oohs" and "awes" could be heard. The two boxers beat the living hell out of each other. Something every boxing fan looks for in a fight.

While Bruno held onto Tyson for all three rounds of their match, Martin and Gogarty took solid punch after solid punch and kept coming back even stronger.

It was an Apollo Creede-Rocky Balboa type of fight where the biggest heart, not the longest reach is going to determine a winner. In the end, it was Martin.

In a time where women's college hoops is reaching new ground, it seems appropriate that women's contact sports start to get accepted.

If women's boxing can turn in more performances like the one Martin and Gogarty turned in, people will start to recognize that women can compete professionally in more than tennis and golf.

I know the next time Martin or Gogarty are given the chance to be a part of another Tyson undercard, I'll be eager to watch.

Second place finishers include Mike Hamilton in the long jump,

Nine represent Point at Nationals tourney

By Cory Wojtalewicz CONTRIBUTOR

The UWSP men's swimming and diving team sent nine members to the NCAA Division III National Meet last week.

This was the largest contingent that longtime head coach Red Blair has sent to the National Meet since the program went to NCAA Division III.

Representing the Pointers were Mark Weinhold who qualified in the 50, 100 and 200 free and the 100 back; Jesse Moen in the 50 and 100 free; John Stevens in the 100 and 200 breast and the 200 IM; and Don Guay, Jon Sherwood, Andy Matthias and Chris Foti, who qualified in the relays.

Weinhold won six Conference Champion medals (200 Free, 50 Free, 400 Free relay, 200 Medley Relay, 200 Free Relay, 400 Medley Relay) at the WSUC Championship Meet, hosted by UWSP the last weekend of February, while Moen won five (100 Free, 400 Free Relay, 200 Medley Relay, 200 Free Relay, 400 Medley Relay).

Stevens four (200 Breast, 100 Breast, 200 Medley Relay, 400 Medley Relay), Foti three (200 Fly, 200 Medley Relay, 400 Medley Relay), Guay two (400 Free Relay, 200 Free Relay), and Matthias one (400 Free Relay). The Pointers finished tenth last weekend at the National Meet.

Placing in the top ten for Point were the 200 Free Relay team of Moen, Guay, Sherwood Weinhold and (6th), Wollschlager in the 1M Dive (10th), 400 Medley Relay of Weinhold, Stevens, Foti and Moen (7th), 200 Medley Relay of Weinhold, Stevens, Foti and Moen (9th), Weinhold in the 100 Back (8th), Wollschlager in the 3M Dive (9th), and the 400 Free Relay of Moen, Foti, Matthias, and Weinhold (8th).

Stamper, Guay honored

UWSP wrestler Bret Stamper and swimmer Don Guay were recently named as two of the four WSUC scholar-athletes for the winter season.

Stamper, a junior from Shawano, earned a 3.62 grade point average as a social science major with a history minor.

Not only did Stamper put himself in distinguished academic company this past season, but also wrestled his way to a second straight WSUC title at the 150 pound class and finished third in the nation at the NCAA Division III Championships.

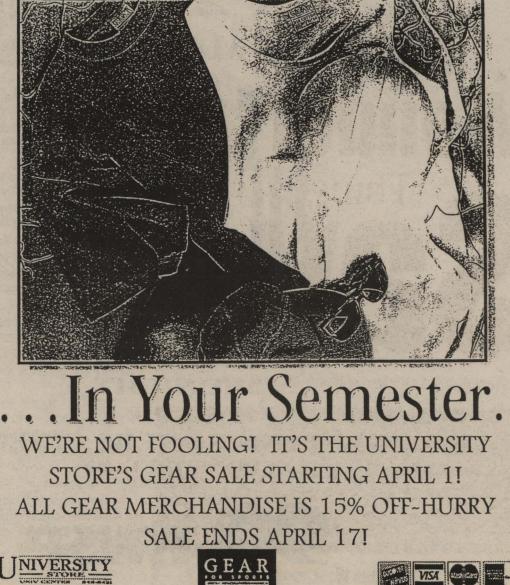

Guay, a paper science major and chemistry minor earned a 3.57 grade point average.

The senior from Appleton is a two-time captain and was named the Pointer Dogfish of the Year for both the 1994 and 1995 seasons.

Platteville's John Paulsen (basketball), and River Falls' Russ Johnson (hockey) were the other athletes awarded.

-Quote of the Week

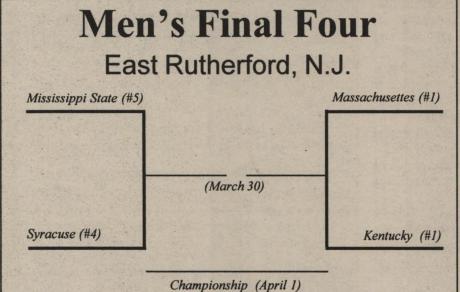

A Bright Spot...

Everyone's an expert when they're sitting on the couch. Everybody can guard Michael Jordan. Everyone can tackle Barry Sanders. You know what I mean? It amazes me.

-The Milwaukee Brewers' outfielder Greg Vaughn addressing those who critcized his below par year in 1995. -The Milwaukee Journal Sentinel PAGE 18 MARCH 28, 1996

Mississippi State turns a few heads en route to Final Four berth

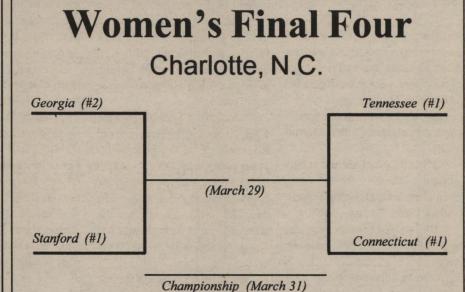

The Mississippi State Bulldogs are having one of the most impressive tournament showings in some time.

After knocking off previously number one ranked Kentucky to claim the Southeastern Conference tournament a few weeks back, the Bulldogs have since then gone on to beat a few other top programs to place themselves in the Final Four.

Mississippi State, the #5 seed in the Southeast bracket when the tournament opened, needed wins over both #1 seeded Connecticut and #2 Cincinnati to escape out of the bracket, and the Bulldogs looked impressive in both contests. Their opposition, Syracuse, has also used some big wins to earn a trip to East Rutherford, New Jersey. Hard fought wins over Georgia and Kansas enabled the Orangemen to keep their hopes alive.

The big matchup of the tournament is Kentucky and Massachusetts. This is the one everyone's been waiting for. The country's best two teams meet for the second time this year and this one will come down to the final minutes.

Kentucky will have their revenge on UMass, who won the two team's first match and will meet the Cinderella Bulldogs in the final.

1995 Final Four participants all find their way back in 1996

The time and setting has changed, but the names have remained the same.

Three of the tournament's #1 seeds (Connecticut, Tennessee, Stanford) and the Midwest's #2 seed Georgia are prepared to do battle this weekend in Charlotte, North Carolina.

Connecticut will meet Tennessee on Friday night, a rematch of last year's championship game.

That contest was won by Connecticut 70-64 with the help of Rebecca Lobo.

Lobo was the nation's 1995 player of the year.

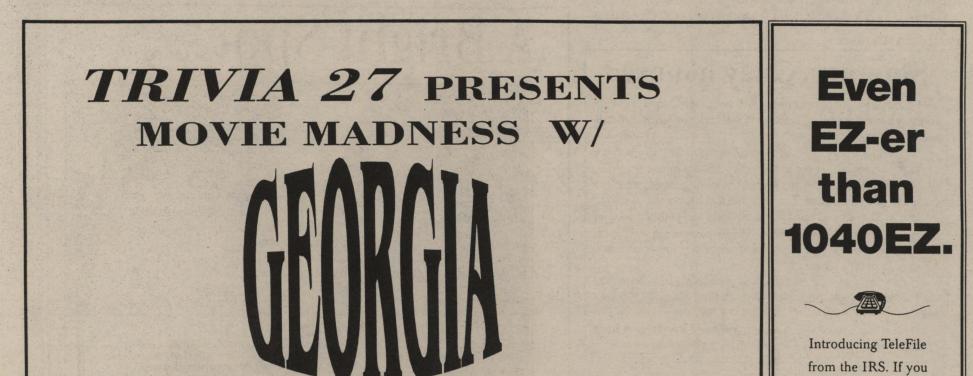

If Connecticut can manage a win over Tennessee and go on to defeat the winner of the other game, they would become the first back-to-back winner since Southern California won consecutive titles in 1983 and 1984.

Sports

Georgia is led by this year's player of the year, Saudia Roundtree.

Roundtree helped Georgia knock off the top team in the nation, Loisianna Teth. Their opponent, Stanford beat Auburn to advance.

Georgia should be able to beat Stanford and will face Connecticut in the final, where Connecticut will repeat as champs.

CHAPTER 16 (CONTINUED)

Commander Ellison eased the throttle forward, and the F-117A Stealth bomber rolled out of the hanger.

"Control, this is Ellison, over. Permission for takeoff requested."

"This is control. Permission granted. You are clear for takeoff. You are clear on mission orders, sir?"

"That I am, Chief."

"Very well, sir. Thirty minute countdown begins now. Good luck."

"Thanks. Ellison out."

The jet's engines roared, as Ellison held the plane in neutral. The two Pratt and Whitney J-58 engines could exert up to 40,000 pounds of thrust. Ellison held the engines in check until thrust reached 25,000 pounds, then released the clutch.

The Stealth screamed forward, reached 100 miles an hour in 1.3 seconds. Five seconds later, it was off the ground and climbing to its cruising altitude of 70,000 feet. As the Stealth climbed, Commander Ellison reviewed his mission orders.

He was to fly 30 miles south and assume a holding pattern at 75,000 feet for 20 minutes. After that, it was a routine flight 153 miles to the northwest at Mach 2.8, where he would put an end to OPERATION WHITEOUT.

As the Stealth took off, pilots at Fort Richardson and Fort Wainwright Army bases walked to their AH-64A Apache gunships and began preflight procedures.

The six gunships were to rendezvous at a spot 10 miles southeast of the cabin.

Captain Robby Isenthal climbed to the cockpit of his Apache, sitting on the tarmac at Fort Richardson. As mission commander, he was slightly nervous.

He turned toward his copilot, Dean Kipnuk, a native of Alaska. "You know, Dean, if this luna-

It was 6:30 in the morning, and Stadel Grubenwald and Sursee Degersheim had just entered the inner depths of the National Bank of Switzerland, in Geneva.

They were met immediately by one of President La Villette's personal aides, and she led them to another smaller room filled with computer terminals. A handsome man turned from a group in conversation, and she led them over to him.

"Gentlemen, this is President Riaz La Villette."

They both shook his hand.

"Pleased to meet you fellows," said the President. "Now, here's what's going to happen "

The quiet scratching sound made Larry turn his head. He had just put his jacket on and was about to walk out the door, when the needle began to move. "Hey, Maurice," he called.

He walked across the room to the seismograph and looked down at the needle.

Maurice walked back into the room. "What is -- "

Larry pointed down at the seismograph.

"Oh."

The needle was twitching back and forth, an eighth of an inch past the center line in both directions.

It lasted for twenty seconds.

"Just a tremor," said Maurice. "Just the same, I think we should stick around for a few minutes...see if anything else happens."

Fourteen miles beneath the earth's surface, things were getting tight. The Nenana plate wanted to slide up and over the Hogatza plate, but a ridge of granite prevented it from doing so. But not for long.

The granite developed a crack, and began to fracture apart. The small crack grew further into the rock, allowing the Nenana plate to slide upwards two inches. That caused a tremor that rippled up to the surface. Lasting twenty seconds.

The additional pressure

tic decides to detonate that bomb, we could be right in the middle. There's no way we could outrun that blast."

"Hey, man, ain't no way I'm going to let some idiot ruin my home. No way. I've fished in that valley before ... "

Robby smiled. "We've got the advantage. They don't know we're coming. As long as that bomb the Stealth drops, blows up, we'll be fine ... "

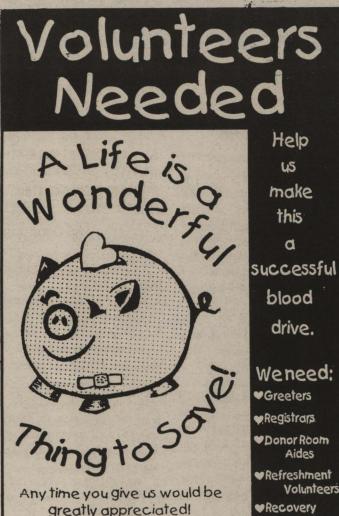

The two men held up their badges in front of the guard's face. "Okay," said the guard, and the CIA agents walked past.

caused the crack to crack to break the granite apart faster, until finally, the entire top half of the granite rock broke off the base. The Nenana plate with nothing to hold it back, slid upward three and a half feet.

Larry sat down with his cup of coffee and brought it to his lips. That's as far as it got. He eyes had focused on the seismograph. He slowly stood up and moved closer. "Maurice ... ' Maurice was reading a book. "Maurice!" "What?!"

Higgins to perform at UWSP

Guitarist and composer Colin Higgins will perform in a senior recital on Tuesday, April 2 at UWSP.

The 7:30 p.m. performance in Michelsen Hall of the Fine Arts Center is open without charge.

Higgins will be joined by student colleagues Dave Thorsen, drums, Jon Matelski, bass, Todd Gustafson, piano, and Matt Antoniewicz, trumpet and flugelhorn.

The program will include Sonny Rolhns "Airegin," Dave HoRand's "Oracle," Dave Brubeck's "In Your Own Sweet Way," Bradford Marsalis' "Mo Better Blues," and three of Higgins' compositions, "Perpetual Change," "In A Circular Motion," and "Have You Got A Turban."

Higgins, a graduate of Catholic Memorial High School, is a jazz major at UWSP.

o Wifler sets concert date

Clarinetist Matthew Wifler, a senior at UWSP will perform in a recital on Thursday, March 28.

The 7:30 p.m. performance in Michelsen Concert Hall of the Fine Arts Center is open to the public without charge.

Wifler will be joined by student colleagues Michael Barden and Brian Sharron on piano, Jon Matelski on bass, and Glen Peters on drums. The program will include "Three Preludes" by George Gershwin, arranged by James Cohn, Claude Debussy's "Premiere Rhapsodie," Richard Rodney Bennet's "Crosstalk," "Tico Tico" by Paquito D'Rivera, Rogers and Hart's "Bewitched, Bothered and Bewildered," and "Jig-a-jue" by Joshua Redman.

Wifler, is a graduate of Goodrich High School. He is a music education major at UWSP.

Music benefits fund

The Big Band Express will perform "A Salute to the Dorseys" from 7 to 11 p.m., Friday, March 29, at the Holidome and Convention Center.

The event will benefit UWSP's music department scholarship fund.

Tickets at the Holiday Inn, UWSP Arts and Athletics Ticket Office and at the door are \$10 for the public and \$5 for students.

Professor Robert Kase will direct the group and play the trumpet

Composed of faculty, student and alumni musicians, the Big Band Express will play Dorsey favorites for both listening and dancing. The program will include classics such as "Gettin' Sentimental Over You," "Opus One," "Song of India," and "I'll Never Smile Again."

The ensemble has been featured in previous summer fundraising programs at the Indian Crossing Casino at Waupaca's Chain CY Lakes.

Upcoming dates at the Holiday Inn will include Sunday, April 21, and Sunday, May 5, 2 to 6 p.m., "Dance Band Favorites" and "More of the Big Band Sounds."
