New policies change student parking habits

By John Larson
NEWS REPORTER

Recent changes to the UWSP parking policy have changed the way students park on campus. Rather than hearing complaints about there being no parking available, the Student Government Association (SGA) and UWSP Parking Services are hearing complaints from the student body about not being able to get the parking spots they want.

Recent changes to the Campus Parking Policy include raising the annual fee from $57 to $91.50 to offset the loss of auxiliary funds from statewide budget cuts that are needed to maintain parking facilities. Also new this year are the Hunting Parking passes that allow students to park their vehicles at Lots J, P, and Q at their discretion.

"We are receiving some complaints this year from students," said SGA President Nicholas Crawford, "and most of the complaints we are hearing are from those that are not able to park at the lot they wanted to."

Most of those that are unhappy with the change to the parking system have said that they have to leave for class much earlier to get the parking spots that they want.

"There have been some seniors who are unhappy about being forced to park in Lot Q as they did not get to other lots sooner," said Stephanie Lind, Student Life Issues Director for SGA, "and there has been some comments made in some classes."

SGA plans to send out a questionnaire to all students to get a feel about how they are adjusting to the new parking arrangements.

When contacted for comment, Parking Services issued a similar comment saying that, "the only complaints that we have received so far are from those that have been forced to park in Lot Q."

With the new multi-pass system, most students are content to move quickly into spots in Lot J, with Lot P being the preferred parking spot for those living in the Debulq Quad dorms, leaving the less desirable Lot Q for those that are not able to get to the other lots quick enough.

SGA and Parking Services have noted a drop in the parking waiting list, down to 160 names so far this semester, due in part to attempts not to oversell the available parking spaces and the increase in annual parking fees. Parking services also credits the drop in the waiting list to "a strong effort at Freshman Orientation to make parents and new students aware that we have a parking shortage," an effort that may have made some new students question if they really need a car to get around.

Intramural field renovation comes under fire

State agrees to university request to test soil quality

By Andrew Bloesser
NEWS EDITOR

For students making use of the intramural fields at UW-Stevens Point, the renovation project taking place this fall to eliminate drainage problems came as an answer to long-standing complaints.

"Up until it started to rain, the fields would be fine," said Mitch Langberg, a second-year UWSP student. "But if it rained, there was standing water that wouldn't go away. There would be patches of grass that would get washed out and the footing was horrible."

The $800,000 overhaul of the fields was designed to change that. But as the project continues, the UWSP Building and Grounds Department has raised questions over whether the quality of the soil used on the field will cause the drainage problems to subside.

A sample of the sand intended for use on the field, taken by the Building and Grounds office, revealed that it provided less than half of the necessary percolation, or allowance of rainwater to pass through the soil for drainage purposes.

"In my mind, this doesn't meet the qualifications," said Chris Brindley, the Building and Grounds Superintendent. "And that's the issue we're dealing with, with both the contractor and with state oversight."

Specifications called for six inch per hour percolation rate, which would allow students to use the field within one hour of receiving six inches of rain. An independent analysis of the soil, sought by the Building and Grounds Department and conducted by an undisclosed Kansas-based testing agency, indicated that the percolation rate of the soil used was approximately 2.5 inches per hour.

Student regent unaware of BOR meeting on raises

By David Cohen
ASSISTANT NEWS EDITOR

When the Board of Regents approved pay raises for 14 UW System administrators earlier this month, UW Student Regent Beth Richlen was uninformed of the teleconference.

A resolution drafted by the Associated Students of Madison in opposition to the raises includes a statement from Richlen stating, "I didn't even know [the BOR] were having a meeting over the phone and had no idea there was a meeting taking place."

The statement came during the aftermath of a statewide reaction among student leaders and state politicians who feel that this pay raise is ill-timed due to budget cuts, which have raised tuition.

Criticism also came from student leaders and lawmakers alike over the lack of publicity before the vote, conducted as an emergency meeting without all the Board members being included. The meeting was held two days before a regularly scheduled meeting and allowed for the vote to be done without being disclosed to the public.

It is believed that the Board of Regents made this decision in order to keep administrators who may leave the system due to frustration over the budget cuts.

Nicholas Crawford, the current president of UW-Stevens Point's Student Government Association, has expressed dissatisfaction about the negative publicity that the BOR's recent action has generated.

See Regent Unaware, page 2
Intramural field
from page 1

hour.

Brindley also added that because the sod used on athletic fields reduces the rate of percolation, an initial rate of 2.5 inches per hour could lead to the occurrence of the same "swamped" field conditions that spurred the renovation.

"These fields are supposed to be some of the best in the Midwest but that's not what we seem to be getting," said Nicholas Crawford, President of the Student Government Association, who noted that student fees will pay for the project.

Concerns from the Building and Grounds Office motivated university administrators to request that the state conduct its own sand sampling, while Crawford successfully lobbied to have payment on the fields halted until results can be confirmed, by an additional independent test if necessary.

If analysis indicates that inadequate sand has been applied to the fields, Crawford stated the university's next move would entail determining whether responsibility rests with contractor Dakota Intertek Corps. or with state oversight, under the supervision of Terry Cook of the Department of Administration.

A sample kept by the Building and Grounds office also indicated further disparities between the sand provided by Dakota Intertek Corps. and the sand called for under the specifications.

"If you look at the definition of sand, what we've been provided isn't sand," said Brindley, referring to the presence of gravel in the sand sample, which measured approximately one half inch in diameter.

According to the U.S. Department of Agriculture System for particle analysis, sand becomes gravel at 2 millimeters in diameter.

Regent unaware
from page 1

Crawford feels that the Board's manner of voting on this issue damages the UW System's credibility in the eyes of taxpayers and legislators, thus hindering fund-raising efforts.

"This kind of negative publicity only makes our jobs more difficult," said Crawford. "While I understand that higher wages would be attractive as we are seeking a replacement for our own chancellor, it also makes our UW System look less professional and ethical."

Other student governments across the state, such as those of UW-Madison and UW-Superior, are working to pass resolutions opposing the decision of the Board of Regents. Austin Evans, Chair of the Associated Students of Madison (ASM), distributed a copy of the resolution their organization has drafted to statewide student leaders.

Among numerous other complaints, the resolution states "this lack of notice to the public and individual Board members shows an utter disrespect to the citizens of Wisconsin and the students of the UW campuses."

The resolution also voices concerns that the UW System has ignored the needs of its students by prioritizing administrative costs over those of instruction and that the BOR's action has disappointed Gov. Jim Doyle and a number of other legislators.

UW System President Katharine Lyall and board President Toby Marchovich said in a press release on September 9 that they will seek recommendations from national search consultants before making any pay changes final.

Two arrested for Lot Q vandalism

On the case: Stevens Point police made two arrests in connection with the acts of vandalism committed in Lot Q and the surrounding area. No charges have yet been filed.

Two men were arrested this week by the Stevens Point Police Department in connection with the massive amount of vehicle damage which occurred on and around campus last weekend. The men, who have not been named, are ages 19 and 20 and are currently being held in the Portage County Jail on probation violations.

The 20 year old is a UWSP student. No formal charges have been filed as of yet and a court date has not been set. The men were arrested after a woman reported a man who matched the description of one of the wanted vandals. When police searched his home, they found clothing matching that of which the vandal was reported to have been wearing: a red-white-and-blue baseball cap and a basketball jersey.

The vandals kicked in the windshields and dented the hoods of 33 vehicles parked in lot Q. On neighboring streets, 15 additional cars were damaged. Following the damage, the University had offered a $2,500 reward for information leading to the vandals' arrest.

Parking Policy
from page 1

Students should also be aware that K-Mart is now towing vehicles parked on their lot overnight and ticketing some cars that are left on their lot for more than a few hours.

When reached for comment, management at K-Mart stated, "Our lot is only for the intended use of our customers."

Students should also be aware that the City of Stevens Point does offer overnight parking for $24 per month at Lot 2, the drawback being that the lot is located across the street from the CenterPoint Mall.

The location of this lot is not within convenient walking distance for most students and can be difficult to get to during the winter months.

Newswriters Wanted

No experience necessary.

No drug tests will be administered.

Literacy, however, is required.

If you can read this, call: 349-2249

ACTIVE OR INACTIVE?

For legal and practical reasons, student organizations need to be re-recognized each fall to maintain formal recognition status. To complete the re-recognition process, the following is required:

1 A list of current officers with addresses and phone numbers.
2 An Advisor Contract Form signed by your advisor(s) stating that he/she will advise your group (forms are available in the Student Involvement & Employment Office).
3 A completed Risk Assessment Questionnaire (to help protect organizations and advisors).
4 An updated copy of your constitution if outdated by three years. (NOTE: Constitutions need to be updated a minimum of once every three years.) In addition, if non-students are members of your organization a risk management statement needs to be added to your Constitution.
5 MANDATORY ATTENDANCE at ONE of two re-recognition meetings (PRESIDENTS or DESIGNEES) scheduled on Monday, September 22 and Tuesday, September 23 at 7PM in the Legacy Room of the University Center.
6 ADVISOR ATTENDANCE (if your advisor has not done so in the past) at ONE of several Risk Management sessions which will be offered through the Student Involvement and Employment Office.

Please register AS SOON AS POSSIBLE in the Student Involvement & Employment Office, lower level of the University Center. Groups not re-recognized will not be included in the Student Organization Directory and will not be able to use university services.

PLEASE VISIT THE STUDENT INVOLVEMENT & EMPLOYMENT OFFICE TO REMAIN ACTIVE!
Helm backs differential tuition

SGA vice-president voices skepticism about plan's necessity

By Andrew Bloesser
NEWS EDITOR

Interim Chancellor Virginia Helm appeared before the Student Government Association (SGA) last Thursday to promote an enduring goal of the university administration, establishing a differential tuition program at UW-Stevens Point.

"I think a differential tuition program is important if UWSP is to continue providing a premier education to our students," Helm told the student senate.

A differential tuition program, if approved and implemented, would increase residential tuition rates to provide additional funding for programs and services on campus.

A tuition increase of up to 5% had been discussed throughout the 2002-2003 academic year, however Helm broke from that trend in addressing the SGA, proposing a more gradual implementation of the program and suggesting an increase of $25 over the current cost of tuition for a semester, $4,151.50.

Dr. Jim Zach of Student Health Services at UW-Stevens Point stated that the organization has taken an active approach in working with Residential Living to inform students and parents about the disease, but emphasized that despite UWSP's status as the "Wellness Campus," it is still reasonable to assume that carriers of the bacteria may reside on campus where crowding is unavoidable and the spread of infection may occur.

"I think first and second year students living in residence halls and perhaps those who are socially "burning their candle on both ends"-while trying to ignore the middle, should give the vaccine consideration and decide what is best for themselves," said Dr. Zach.

Studies have shown that college students (18-24) especially freshman living in dorms, are at a slightly higher risk of contracting meningococcal meningitis. These risks have been linked to student behavior and lifestyle including binge drinking, patronizing bars, and smoking.

Carriers of meningitis transmit the air through coughing, sneezing or sharing saliva. The disease is commonly spread by sharing cigarettes or drinking glasses or through intimate contact such as kissing.

Meningococcal diseases are potentially life-threatening bacterial infections, commonly expressed as either meningococcal meningitis, an inflammation of the membranes surrounding the brain and spinal cord or meningococcemia, a presence of bacteria in the blood.

The disease is recognizable by symptoms including fever, severe headache, stiff neck, rash, nausea, vomiting; exhaustion, and may resemble the flu. There is an antibiotic available that can eliminate the carrier state and help prevent spread of the disease if it is contracted.

The disease has claimed the lives of two students at UW Eau Claire in the past three years.

"I will be giving serious thought as to how our office can work with the SGA," said Helm. "At least five other UW campuses have already passed a differential tuition plan. Let's not be the last.

Some members of the SGA have remained skeptical.

"Given the tuition increases students are already experiencing, I don't know if this is the best time to be considering differential tuition," said Renee Stieve, SGA vice-president.

Stieve also felt the university administration had overplayed the argument that UWSP needed a differential tuition program to remain competitive with other UW campuses, stating that the university benefited from keeping the cost of its education down.

The student senate will discuss a resolution that would allow an ad hoc committee a continued discussion to explore the feasibility of differential tuition at its weekly meeting this Thursday.

Meningitis a threat for campus residents

"I think a differential tuition program is important if UWSP is to continue providing a premier education to our students," Helm. "Let's not be the last."
Musings from Mirman

People who live in glass houses shouldn't throw stones. But what if they're egged?

By Dan Mirman

So check it out: street magician David Blaine is currently suspended 30 feet above the Thames River in London on a clear plastic box a little smaller than a dorm room. He plans to spend 44 days in the cage and Tuesday marked the ninth day of his feat.

Blaine will not eat during the endurance test and Blaine's suspended cage. The man who has pelted the glass with eggs, played drums at midnight and set his girlfriend on fire to himself.

Blaine should not need anyone defending his honor as he hangs helplessly 30 feet off the ground. While some see his stunts as pointless, I find what he does amazing. Not eating for 44 days blows my mind--Jesus left the desert after only 40. In Christ's defense, he was not supplied with water or a pillow.

David Blaine continues to push the envelope of what the human body can accomplish. His past accomplishments include burying himself alive in a glass coffin, encasing himself in a block of ice and most recently, standing on a platform 22 inches in diameter and 105 feet in the air for two days and two nights.

With reality television offering another season of Joe Millionaire, as well as more contestants willing to eat roaches for dollars, I applaud Blaine for embarking on a quest to challenge the will. And if people don't like it, they should keep their burgers to themselves.

"I don't want to pick on anyone who finds heckling amusing, but I assumed this behavior was remedied by grade school.

Blaine should not need anyone defending his honor as he hangs helplessly 30 feet off the ground. While some see his stunts as pointless, I find what he does amazing. Not eating for 44 days blows my mind--Jesus left the desert after only 40. In Christ's defense, he was not supplied with water or a pillow.

Howard Dean for president

Howard Dean appears to be the one political leader in this country who recognizes that there are two sides in the Palestinian/Israeli conflict.

Dean said last week at a rally in New Mexico that an "enormous number" of Israeli settlements must be removed to make progress in the Israeli-Palestinian conflict. "It's not our place to take sides," he said.

Dean's call for American policy to be "evenhanded" was met with thunderous indignation on both sides, he said.

Howard Dean deserves to be our next president.

Bush takes advantage of fear

As resonated over and over during his Sunday night Address on Iraq, the Bush Administration is going full speed ahead with its culture of fear.

With no obvious wind in his sails, Bush's floundering ship is mercilessly exploiting the tragedy of September 11 - and subsequently his family's festering feud with Saddam Hussein and lust for oil - to consolidate power and do to America what that dictator did to Iraq: smother democracy and act as though our hard-won civil liberties never existed.

I pray the American people see the Bush presidency for the ungracious fluke it is, reclaim our hope and faith in ourselves, demand our troops return home safe and sound, and steer us back into safer harbor.

Thanks but no thanks, Mr. Bush.

Kill, don’t expel, Yasir Arafat

The Jerusalem Post's editorial calling for killing--not expelling--Arafat is right on target, even if years too late.

Arafat has been a terrorist murderer for decades and deserves exactly the same fate as Bin Laden deserves.

While there has been no shortage of excuses and rationalizations to leave Arafat alone, the fact remains that no solution to the Palestinian-Israeli conflict is possible with Arafat alive. Exiling him would be a mockery of justice and would not stop him from inciting further terrorism against Israel.

Taking him out would not only advance the prospects for peace in the region but would show to every Palestinian terrorist that Israel means business and that the days of moral cowardice and appeasement towards its enemies are over; it would show that Israel will no longer cave in to "world opinion" or to pressure from American presidents.

It is a shame that the Sharon and Bush Administrations have still not decided to kill the murderer. As long as they remain oblivious to the need to carry out justice, the blood of innocent Israelis will not stop flowing.

David Holckberg
Ayn Rand Institute
Ferintosh coming to UWSP, Celtic Trio to perform on campus.

The traditional Scottish trio, "Ferintosh," will open the Performing Arts season at the University of Wisconsin-Stevens Point on Monday, Sept. 29. The concert of Celtic Baroque music begins in Michelsen Hall at 7:30 p.m.

Tickets can be purchased at the University Box Office, Room 103A in the University Center, by calling 715-346-4100 or 800-446-3700. Admission is $12 for the general public, $10 for senior citizens, $5 for youth and $3 for students with a UWSP ID. Tickets will be sold until the doors open.

Ferintosh is both a chamber and a folk ensemble performing vibrant renditions of music from the 17th, 18th and 19th centuries. The trio has performed in a range of settings from recital halls to folk clubs just as their predecessors would have played in royal courts as well as town halls. Both large and intimate audiences have responded enthusiastically to the warmth and brilliance of their music.

Members of Ferintosh include David Robertson on violin, Abby Newton on cello and Kim Greenberg on harp. Greenberg has gained a considerable reputation as a violinist able to bridge the "high" and "low" musical traditions of 18th century Scotland and Nova Scotia. His Cape Breton style of fiddling can be heard at folk festivals, concerts and dances across Canada and the U.S.

The traditional Scottish trio, Ferintosh, will present a master class from 9-11 a.m. on the performance day, which is free and open to the public.

Members of Ferintosh include David Robertson on violin, Abby Newton on cello and Kim Greenberg on Celtic harp. Greenberg has gained a considerable reputation as a violinist able to bridge the "high" and "low" musical traditions of 18th century Scotland and Nova Scotia. His Cape Breton style of fiddling can be heard at folk festivals, concerts and dances across Canada and the U.S.

How much do you know about UWSP?

By Ali Himle

1. How many residence halls does UWSP have?

Hair today, gone tomorrow

Why donating your hair to Locks of Love is a good thing
By Alli Himle

Locks of Love is a nonprofit organization designed to provide financially disadvantaged children suffering from long-term medical hair loss with hairpieces. The majority of children that are helped through Locks of Love have lost their hair to a medical condition called Alopecia areata, an autoimmune skin disease that currently has no cure. This often unpredictable disease affects 1.7 percent of the population overall, including more than 4.7 million people in the United States alone. A person’s own immune system attacks the body’s hair follicles, thus resulting in the arrest of hair growth. Alopecia areata affects both males and females of all ages and races. It is not a life-threatening disease, but it is, without a doubt, life-altering, with onset usually occurring in childhood.

locksoflove.org

Adults and children worldwide donate their ten inch or longer ponytails to Locks of Love. People of all ages and races, male and female, donate their hair. It is estimated that over 80 percent of ponytails received are from children. While boys are also assisted by the Locks of Love program, most children that are helped are girls. Girls typically want their hair in ponytails in length from 12-14 inches, requiring that donated ponytails be 14-16 inches in length, as two inches or more is used in the manufacturing process. Locks of Love asks for a minimum of ten inches for a donation. Donating your long locks to Locks of Love is a very self-rewarding experience. Giving something as simple as your unwanted hair to a deserving child says a great deal. It is an experience that is well worth the loss of a few inches, for hair that is cut will only grow back. Seeing the smiles on the faces of the children who have since receive the long locks that they have lost is more than words can describe.

For those interested in making a donation, The Hair Performers, located in Stevens Point at 56 Sunset Blvd., cut the hair of those making a 10-inch or longer donation for free. For more information about Locks of Love, please visit the Locks of Love homepage at www.locksoflove.org.

They imprisoned the Sundial
Random thoughts from a cranky student
By Geoff Fyle

Ah, the Sundial. It is one of the landmarks that symbolize our fair university. It is a place for students to relax or study and it is also one of our main lanes of travel from class to class. Not to mention, that it has been the place for the commencement ceremonies of generations of UWSP students. You would think it would always be here, wouldn’t you?

You naïve fool. Unless you are totally oblivious to your surroundings, you have probably noticed something terribly wrong these days with the Sundial. If you didn’t, your first clue came when you walked toward it and then found yourself knocked flat on your back with a bad headache. Apparently, while most of us were gone for the summer, a large fence was constructed around it, blocking it off from the outside world. I am surprised they haven’t added barbed wire and guard dogs around it as well. There is a surplus of both since the Berlin Wall fell.

Why is the Sundial under solitary confinement, you ask? Look over there, genius. It is the Fine Arts Center, currently undergoing its $26 million reconstruction effort. The effort is not expected to be finished until 2005. When it is over, the Sundial is not coming back.

Yes, our beloved symbol of UW-Stevens Point is being swept off campus. As if the road construction didn’t make it difficult enough to get around town, now simply walking around campus is a pain in the rear. Now we have to navigate through the CNR building to get around the fence. If you have a class in the Communications building that ends at 10:50 and your next one is in the CCC building, at 11:00, start wearing jogging shoes to class.

Then there is the little matter of commencement ceremonies. Like many of you, I had expected to have a little shaking moment at the Sundial when I graduate next May. Now with the Sundial under quarantine pending termination, that dream of mine is ashes. The graduating seniors will now have to have their graduations at the football field or some other place that holds none of the Sundial’s mystique. If they make like my high school graduation and hold it in the gym, I’m chucking a basketball at the speaker’s podium. And yes, of all things, is the whole rotten situation of tearing down one of the symbols of our school. The Sundial is one of the things that make the university what we are. Otherwise, why would they have put it on our registration packet covers? Destroying it just to make the Fine Arts Center a bit spiffier makes no sense. It is as if President Bush decided to knock over the Lincoln Memorial to build a ‘summer’ White House for the holidays. (Better rush that up. I don’t want to give that ninnody any ideas.)

I’m afraid, though, that there’s not much that can be done for our beloved Sundial. The construction will put the big disk on without complaint to its demise (being an inanimate object limits your ability to protest). So appreciate the Sundial while you can, even if you have to do it through a fence as though it were a caged animal.

In the meantime, I need to get a basketball just in case...
Pointers face week of extremes

By Joshua Schmidt
ASSISTANT SPORTS EDITOR

The Pointer women's soccer team had a busy week playing three matches in five days.

SOCCER

After a defensive battle and a scoreless tie last Wednesday the Pointers traveled to Platteville to take on the Pioneers in their WIAC opener. The rainy and overcast weather didn't dampen the Pointer offense as they scored seven second half goals to crush the Pioneers 16-0.

The defense also dominated as Platteville couldn't even manage one shot on goal. The offense was a balanced attack as Kelly Fink, Melissa Becker, Alyssa Sousa and Anna Van Stippen each had two goals apiece. Overall the Pointers outshot Platteville 19-0.

Stippen each had two goals apiece. Despite missing two of their top sons, the Pointer men placed third behind top-ranked Oshkosh and a familiar UWSP alumni squad.

On Sunday, the Pointers hosted the 16th ranked Macalester Scots. This was as good of a game as expected as two heavy weight teams duked it out for soccer supremacy. Barely ten minutes into the game, Macalester jumped onto the board first with a goal by the Scots Annie Burton assisted by Sarah Marsh. The Pointers responded with an unassisted Kelly Fink goal at the 23:49 mark to tie it at one. Near the end of the first half Andrea Oswald put the Pointers into the lead with Megan Frey getting the assist. The lead didn't last long, however, as Erla Petursdottir tied it up for the Scots just before halftime.

The second half was a defensive battle with neither team able to muster any points. Stevens Point did try to put the Scots away late in regulation by putting a few shots on goal but none managed to find the back of the net. The Scots away late in regulation by putting a few shots on goal but none managed to find the back of the net.

Women continue success at home

By Tony Bastien & Nick Cornette
SPORTS REPORTERS

Both the mens' and womens' cross country teams hosted the UWSP Invitational this past weekend at Lake Pacawa in Plover.

CROSS COUNTRY

The twelfth ranked UWSP women topped a formidable Oshkosh squad by a team score of 34-23, while the tenth ranked Pointer men placed third behind top-ranked Oshkosh and a familiar UWSP alumni squad.

Despite missing two of their top runners, Leah Herlache and Kara Vosters, the Lady Pointers still finished with six runners in the top ten. A 2-3-4 finish by Megan Craig, Jenna Mitche1, and Teresa Stanley led the way as the Pointers ran in a pack.

Coach Len Hill discussed how that was part of the game plan entering the meet. "That was our strategy on Saturday. Of all the teams I've ever coached, this is one where we can win within a pack."

Also playing a role in the teams' victory was freshman Ashley Earney with an eighth place finish.

"We had a skeleton crew out there this past weekend," explained Coach Rick Witt.

Top ranked Oshkosh had three finish in the first five and six of the top ten.

Freshman Mike Ormond finished tenth to lead the Pointers. Finishing just outside the top ten were junior Josh Kujawa and freshman Kyle Patoka, as the Pointers looked to gain experience for some of their young runners.

The newest polls were released late Tuesday night, and with their performances over the past two weeks, both the mens and womens squads

What are your plans after graduation? - Find a job in the Rockford/Northern Illinois area.

Do you plan on playing soccer after graduation? - I'm not sure if I'll play, but I would love to coach.

What is your favorite aspect of soccer? - The team aspect, and having 11 players work as one to get the job done.

What CD is in your stereo right now? U2 - Greatest Hits

If you could take anyone on a dream date, who would you go? - Andie

If you could be anyone for a day, who would you be, and where would you go? - I would love to be Mia Hamm... or our own #14 Kelly Fink

If you could be anyone for a day, who would you be, and where would you go? - Enjoy it, because the next thing you know is it's over.
Pointers roll over Thunder

Strong defense, opportunistic offense spark blow out victory
By Craig Mandli
SPORTS EDITOR

When it rains, it pours. This cliché couldn't hold truer for the Pointers as they beat up on the NAIA Tri-State Thunder to the tune of 63-0 this past weekend. After a slow start, the Pointers exploded for 28 points in the second quarter and never looked back.

"I think it was just a situation where everything went our way," said Pointer Head Coach John Miech. "We had a lot more team speed than they did, and when that happens, you have the opportunity for a big score like that."

The Pointers struck early as senior quarterback Scott Krause found freshman Cody Childs for a nine-yard touchdown pass on the Pointers' first drive as the Pointers led just 7-0 after one quarter. However, on the strength of three turnovers in the second quarter, the Pointers took control, turning a 3-0 lead into halftime. Cory Fliszakowski scored the first of his two touchdowns with an 11-yard score. Later in the quarter, Krause threw a 38-yard touchdown to junior wideout Kurt Kjelblock with 1:53 left in the half and a five-yard scoring run on the Pointers' next drive as the junior running back finished with a career-high 149 yards on 25 carries. Kjelblock caught four passes for 101 yards, marking his second straight 100-yard game in his only two career starts at wide receiver.

The Pointers strong defensive effort led the way as Tri-State made its deepest penetration into Pointer territory with under four minutes left in the game, advancing to the 40-yard line. Tri-State quickly fumbled them, with sophomore defensive tackle Wes Komowski returning the loose ball 54 yards for a touchdown to finish the scoring. The defense forced six turnovers, including four fumbles.

The Pointers have a bye this week as they prepare to face the Division I-AA Butler Bulldogs in next weekend's Spud Bowl. The Pointers played the Bulldogs strong throughout the game last year, but weren't able to overcome a 22-point third quarter put up by Butler.

"This is a timely and a good break," said Miech. "Butler is probably going to be our best opponent. They are Division I-A for a reason."

Point spikers take a step in the right direction

---

By Joshua Schmidt
ASSISTANT SPORTS EDITOR

The UWSP women's volleyball team traveled to Minneapolis, Minnesota to take part in the Hamline Invitational. The Pointers achieved mixed results, posting a 2-2 record.

The second match of the weekend went a little better for the Pointers as they took on the Pipers of Hamline University. The first game was a close one with Point falling 33-31. The second and third games, however didn't go as well for the Pointers as they succumbed to the Pipers 30-19 and 30-22 respectively. Leading the way for the Pointers was Jessica Parker with 11 kills and Nichole Stahovich with 7 kills. Kelli Rydeen also chipped in three aces.

The second match of the weekend went a little better for the Pointers as they took on the Kendall College Vikings. The first game was another hard fought thriller, but this time the Pointers ended up getting the upper hand with a 30-28 victory. The second game was more of the same as the Pointers cruised to a 30-19 win. In the third game the Vikings made their move as they stung the Pointers 30-27. The fourth game saw Kendall seize the momentum in the match as they spanked UWSP 30-21 to even the match at two games apiece. Point did recover nicely in the fifth game as they won 15-11 to take the match 3-2. Against Kendall scoring big for the Pointers were Karin Zellner and Molly Orte with 11 and 10 kills respectively. The team also served well with seven different players recording at least one ace.

The third match of the weekend featured UWSP taking on the Viterbo College V-Hawks. The Pointers were looking to keep up their momentum after an exciting win over Kendall. The Pointers did just that by sweeping the V-Hawks 30-23, 31-29 and 30-18. Melissa Weber got in on the action with 10 kills along with Jessica Parker and her 9 kills. Nichole Stahovich chipped in 5 aces to help the Pointer cause.

The final match of the weekend had the Pointers taking on Northwestern University of Minnesota. UWSP came into this game smokin', coming off two wins. Northwestern brought their streak to a screeching halt as they knocked off the Pointers in the first two games 30-21 and 30-26. The third game saw the Pointers storm back and win 30-26. Northwestern was just too much for the Pointers as they dropped game four 30-20. This match saw three Pointers reach double figures in kills with Nichole Stahovich and Melissa Weber notching 10 apiece and Jessica Parker racking up 14.

The weekend ended with the Pointers breaking even at 2-2. They go to 3-8 on the season. Next up, the Pointers make the trip to Platteville Wednesday night to take on the Pioneers in WIAC play.

**The Man's Take:**

By Craig Mandli  
SPORTS EDITOR

I'm not quite sure what ESPN was going for with their first venture into the already over-saturated hour-long drama genre, *Playmakers*. This show seems to nail most of the clichéd storylines, including drug use, spousal abuse, adultery and abuse of power. However, this show seems to be lacking in the one thing that could theoretically set it apart: actual sports.

While initially I found *Playmakers* to be entertaining, after a while it seemed like the stories seemed to run together. Maybe it's because they are trying to tie in too many different storylines at once.

For example, in Tuesday's episode, a veteran runningback was about to get his teams to leave him, the cocky rookie will now be starting over from page 8.

**Soccer**

by page 8

out shooting the Scots 5-0 over the last eight minutes, but Macalester goalie Lisa Bauer was flawless and forced the Pointers to leave, the cocky rookie will now be starting over from page 8.

The veteran later comes to find out that the team wants to push him, because the team wants to prove that it stands behind its players, stemming from a totally separate incident at a nightclub where the rookie's friend committed a murder, and the rookie lied to police about his whereabouts.

On top of all this, the Chris Spielman-like maniacal middle-linebacker gets in touch with his feminine side while sinking into the arms of his girlfriend, whom he has known for roughly six hours.

Trust me, that was as painful to write as it was for you to read. I'm still trying to fully integrate everything that happened into my mind. I think I was having nightmares from brain over-usage. That's it, it's Spengelbock before bed or bust. I need my mind nice and numb before bed.

I would like *Playmakers* more if it focused more on the sporting aspect of the show. I mean, it is on ESPN after all. By adding the drama to it, they made it just like every other hour-long drama on TV. I really can't take the ballisons from *Playmakers* from the ones on Fox's *The OC* or EN's *Nip/Tuck*.

Really, if I want to watch drama, I flip to the DVD player and pop in Nolte's. Really, if I want to watch drama, I flip to the DVD player and pop in Bruckheimer sports. I hope that they realize that I'm not the only one.

**The Way I See It...**

By Joshua Schmidt  
ASSISTANT SPORTS EDITOR

I needed a column idea for this week and was having hard time coming up with something. I do have a lot of sports-related clutter flitting around in my head so I grabbed the first item that fluttered with reach. The Bears. Yes ladies and gentlemen, I'm a fan of the Chicago Bears. I'm not, however, exactly proud of it, considering they might be the worst team in the league. Then I started thinking is there anyone else as bad as the Bears? Well, I came up with a couple teams that rival the Bears in ineptness. So here's my list of losers. A list of shame, a list of teams whose fans should start a support group to keep each other from leaping off these doomed bandwagons of futility and stay loyal to our hapless, hopeless teams.

**The Cincinnati Bengals**

Here's quite possibly the worst franchise in sports, except for maybe the L.A. Clippers. When I'm feeling especially bad about the Bears I just think "Hey, I could be a Bengals fan." This team hasn't been good since '86. You know, the year of the lousy shuffle and a Super Bowl highlighted by "the Catch II" and Tim Krumrie's horrifically broken leg. That's seventeen years of futility folks.

**The Arizona Cardinals**

When was the last time this team was competitive? I know they had that one 9-7, made the playoffs, and beat a Dallas team on the downside. But other than that, they've put the F in futility.

Remember when Bill Walsh said Jake Plummer could be the next Joe Montana? Not in Arizona. I thought their defense would turn it around this year. They were piling up huge sack numbers in the pre-season. Then reality set in and they gave up 42 to the Lions, that's right, the Detroit Lions.

**The Chicago Bears**

With the exception of that 13-3 season two years ago this team has done nothing for the better part of the last fifteen years. This year isn't looking any better. Who really thought Kordell Stewart was going to be the answer? This guy was second to Jake Plummer on the QB wish list. That should tell you something. I know the Bears do have Brian Urlacher, but that just means they'll win games this year instead of one.

**The Detroit Lions**

The Lions haven't been good since the Rodney Peete/Erik Kramer era and that's something considering they had one of the best running backs in NFL history in Barry Sanders. A back gains 2000 yards and you can't win six games. Not to mention they had Herman Moore. That shows you how horrible the QB situation was. It's been a two horse race between Detroit and Chicago for the title of NFC North-Central doormat of the decade.

**Cross Country**

by page 8

rose in the standings.

The men jumped one spot to number nine. Said Coach Witt on the jump, "It's nice for notoriety for the team and sport, but what does it do for the team's performance? Nothing."

The women had a much larger leap in the polls, jumping halfway up to the top going from 12th to 6th.

Looking ahead to this weekend, both squads travel to the Whitewater Invitational. Coach Hill is taking the men on the hunt the winningest Standing Points only their second loss in 46 regular season matches. The final score was Macalester 3, UWSP 2. The Scots move to 2-0-1.

O.E. = Overseas Experience.

Well, I hope you aren't getting bogged down with schoolwork just yet. Lord knows we're starting to get some good fall weather, and I'm sure the Lord is working on the fishing as I speak. I didn't get that big murky last weekend, so hopefully nobody else did.

On a different subject, I gotta tell you, this week I sat and talked a spell with my buddy Adam. This particular conversation involved the value of wife and walleye.

Well, if's a no-brainer for an old man like me that the walleye have most certainly taken the Christmas turkey.

I've been married to the old lady for sixty-eight years. Over this time, I've realized a couple of things. She makes a real good meatloaf and a decent rhubarb pie. She's kept me in line through my racoony fias, and gives me the space to keep raising hell. I haven't met a walleye that can dance a polka like her, or raise an honest family. And on a cold winter night, it's nice to cuddle up for some warmth. However, cuddling isn't necessary to catch a full stomach of walleye.

Not to mention the fact that I've never heard a walleye nag at me to go shovel the damn motor-car-drive out front. Yes it's true, I still love the old lady and she loves me, and we've had our ups and downs, and through all these years from electric power to artificial hips we've worked hard to make this marriage work, but for what it's worth, I sometimes wish that I'd married a walleye instead of Zowie, Zowie!

The bigger the walleye, the better. Not so with a wife. Grandma and I keep getting older, yet all those damn slippery walleye stay the same age. A wife and fish are hard on the pocketbook, while these walleyes only demand a few cheap minnows every couple days. Instead of being old, married and broke, I could've been old, rich and single. I still like to eat walleye for dinner at least once a week, and with the wife... well let's not even go there. Anyways, just think you youngsters should think about that before you all go and make a big mistake. Well, I better go hide grandma's reading specs...

My hot-air balloon crashed, and I'm lost in the wood, again

Cooking without cookware

By Adam M.T.H. Mella

So say your hot-air balloon pops and begins to drop over the vast Canadian wilderness. The balloon is all but destroyed because of the extreme velocity of the crash, but on the bright side, your tumbling happened to catch a fat male deer off guard, temporarily paralyzing it. You are short on supplies and rescue may take several days. What do you do?

First off, make ends with the stunned deer and collect your meager supplies from the wreck. Perhaps the wicker basket can still serve some useful purpose, even though it has been severely mangled. Way to go, Maverick.

Anyways, things aren't so bad after all. There happens to be a jagged rock nearby, and you are able to butcher the freshly killed male deer. Also, the repaired fuel tank had enough combustibles lingering to help jump-start a solid fire. Startinking the deer on a twig stripped off its' bark. Singe the edges over the open flames and then slow simmer the insides over the glowing embers. Good job, that's called a "kabob" in the civilized world.

At this time you might want to find some good heatin' stones (not wet explosive stones), to toss into the fire. While they're heatin' up, you can prepare a soup/steaming hole and a jerky post. You'll need bark, roots, wild vegetation and a section of the deer hide. Line the hole with the hide, fill with water as needed and add whatever other ingredients you can find. Lastly, complement the dish with some pre-cooked kabob meat, those hot stones and a full bark cover. Let simmer for an hour or so and you've got some tasty sauce, or use less water for a delicious steamed entree.

Before the rest of the meat spoils, dry it above the fire by building a simple wooden structure that keeps the meat above the smoke. This serves the dual purpose of curing and pest control as your meat sets for keeping. Jerky can be made by tearing the meat into thin strips prior to smoking.

Before night falls, discard the carcass far from camp, and build a shelter from the tattered remains of that shifty balloon. Keep a keen ear open for the bloodthirsty wolves, use your newfound knowledge and have faith in those heroic Mounties.
Portage County catfish basics

By Marty Seeger

As you know, the Wisconsin River has much to offer when it comes to fishing. The more popular game fish include walleye, smallmouth bass, musky and northern pike, but some may argue that catfish are most popular. This is especially true for residents who don’t have the convenience of a Wisconsin boat. Catfish, especially Channel cats, are also vulnerable after a good rain. They use this opportunity to feed on anything that might wash off the banks and into the river. Channel cats will bite on just about anything. That funky smell coming from your roommates closet could be catfish bait, but I wouldn’t count on it. “Stinky curry” has a light brown or yellow appearance. A flathead ed on West River Drive. You can find it by turning south just after the Wisconsin State record Channel cat was caught in 2001. While fishing in the Stevens Point area, I frequently asked if I intend on eating the fish that I catch. I never hesitate in answering yes to this question, but every answer seems to result in the patented eye roll, or raise of an eyebrow.

Now most of the people who asked this question were walking their dog, or just out for an evening stroll. They merely commented in curiosity and went on with their usual routine. I’m Okay with that, but on one occasion along the Wisconsin River, a lady informed me that she no longer fished the river because she was afraid of contamination. Although she listened to what I had to say, I don’t honestly believe that I convinced her of my argument. With this in mind I couldn’t help but think of how many people refuse to fish simply because of the fear of contamination.

Although this example seems a little extreme, it’s a real concern for some people. This concern probably began in the early seventies when the DNR began testing Wisconsin’s waters extensively. They found that some of the fish contained elevated levels of mercury and polychlorinated biphenyls (PCBs). Much of this was caused by pollution from industries, and the many paper mills that lined the river banks. This led to the Clean Water Act which was passed in 1972. Since then the waters of Wisconsin have bounced back significantly, but the concern for some is still very real.

Some bodies of water contain higher levels of mercury and PCBs than others. As a result, the DNR has been posting statewide consumption advice since 2001. These advisories are updated every six months and offer detailed information on the amount of fish you are able to consume. The guidelines enable you to enjoy a healthy amount of fish while reducing your exposure to such contaminants as mercury.

In order to receive information about these guidelines, you can simply go to the DNR website located at www.dnr.state.wi.us and enter “fish consumption advisory” in the search option. The information found on this site will help put any doubts you may have had at ease. Just know that the health benefits of eating fish are outstanding all throughout Wisconsin waters. Continue to eat fish in the state of Wisconsin; there is no greater reward than going home with a day’s catch.
A brief glimpse...

An intellectual breakdown of what's been on the idiot box.

ARTS & REVIEW EDITION

The new screen interfaces for NFL games on CBS, FOX, ESPN and ABC. I've got two major complaints: an overload of information on the screen and the tiny score updates on FOX.

Watching a football game nowadays is like tuning into CNN for news: you get the score, game clock, play clock, other stats and on some stations, a detailed description of each penalty as it's called.

Fall is traditionally a great time to tour. There's nothing quite like traveling from state to state, seeing the beautiful colors of fall, feeling the crisp weather and most importantly, enjoying the cool-down from the summer months.

This fall the bigger fish in the sea like Philish, moe., String Cheese Incident and The Disco Biscuits are surely skipping on the Midwest, although we'll be able to enjoy a few rare and first-time visits from newer and smaller bands.

Next week, Philadelphia based electronic quartet Brothers Past will make their first appearance in Wisconsin. They'll be at Thalia Joe's in Milwaukee on Thursday, Sept. 25 and in Madison (venue TBA) on Saturday, Sept. 27.

Tickets are dirt cheap for this tour, often not eclipsing the five dollar mark.

When the last time you could lay down a phat Abe Lincoln at the door, get a ticket and money back?

Many haven't even heard of Brothers Past, let alone any of their material.

Taking a page from the book of electronic and improvised music, they draw heavily from the genres of drum-and-bass, dub, house and techno. Their full throttle jams can get lengthy like that of most other jambands, but their innovativeness and newer electronic sound makes them all the more appealing.

Robert Randolph and the Family Band will also make a return to the stage after their initial gig here last spring. The Michael Stein jersey-wearing pedal-steel guitarist wonder known as Robert Randolph smokes, plain and simple. He has a way of captivating an entire audience with his deep, heart-felt tunes and blistering jams.

They'll be at The Rave in Milwaukee on Wednesday, Nov. 12 and at The Orpheum Theater in Madison on Thursday, Nov. 13, and will also play five other gigs throughout the Midwest, including Chicago, Iowa City, East Lansing, Urbana and DeKalb, in case you're looking for a road trip.

Until next time, who's got my heady-licious deemster tea, bruh?

Film review: Once Upon a Time in Mexico

By Geoff Fye

Assistant Features Editor

Long before Robert Rodriguez became everyone's favorite family director with the Spy Kids series, he was the blood-soaked-shoot-em-up auteur who crashed Hollywood with his $7,000 film debut El Mariachi. Now he returns to his roots with the messy but glorious epic Once Upon a Time in Mexico, the conclusion of the trilogy he began with El Mariachi and Desperado, with Antonio Banderas back as the vengeful El Mariachi.

Mexico is basically two stories, the first dealing with the events that occurred between Desperado and Mexico and the fate of El's beloved Carolina (Selma Hayek). The second takes place in the present, where the brooding, gun-slinging guitar player is sought out by Sands (Johnny Depp), a quirky, Machiavellian CIA agent. Seems a powerful Mexican drug lord (Willem Dafoe) is about to try to assassinate the Mexican president, and he's doing it with the help of Gen. Marquez (Gerardo Vigli), the man who ruined El's life.

Sands is out to stop the conspirators from accomplishing their goals, so he enlists the vengeful El for help. So El duets off his gun-filled guitar case and gathers his fellow mariachis (Marco Leonardi and Enrique Iglesias) for the mission. The situation is complicated by various other shady characters, including a corrupt Mexican narcotics officer (Eva Mendes), a vengeful ex-FBI agent (Reuben Blades) and a fugitive American (Mickey Rourke). All these schemes and counter-schemes come together in a bloody coup attempt where El Mariachi finally gets the chance to earn his revenge.

The messy plot of Mexico is a minor detail, as style is king here. Rodriguez owes a great debt to Sergio Leone's Westerns.

Like Leone, Rodriguez is less interested in a coherent story and more in the moment, in great set pieces and sensational images. Action fans will drool over the stylish gun battles, elaborate deaths and a body count that would make John Woo blush.

Favorite moment: a bloody firelight in a church between El Mariachi and drug cartel gunmen passes so an old woman can finish praying and leave.

Banderas slips effortlessly back into the role of El Mariachi, playing like Eastwood did, a character as much of an icon as a person, a Mexican man with no name. Hayek only appears in flashbacks, but makes the most of it and the rich supporting cast is a treat to behold. The cast ranges from the long MIA and sorely missed Rourke (whose devotion to his pet Chihuahua is hilarious) to pop star Iglesias (who surprisingly isn't much of a distraction). And there are great appearances from Rodriguez regulars Cheech Marin and Danny Trejo, whose performances are as comforting as Lee Van Cleef's and Strother Martin's were in Leone's Westerns.

With all respect to Banderas, however, the film is stolen by Depp, adding yet another gem to his gallery of bizarre and memorable characters. Depp's Sands is flamboyance personified, a man who shoots a cook who doesn't prepare his Mexican-style pork the way he likes it and doesn't let a little thing like having his eyes gouged out slow him down. With this and his Capt. Jack Sparrow in Pirates of the Caribbean, Depp is on a roll we hope he'll never get off. Let's hope Rodriguez never gets off his either.

Your College Survival Guide: Pat Rothfuss question

By Mel Rosenberg

I'm never really done a column all about me, because in all honesty, it seems a little Narcissistic even for a raving Egomaniac like myself. But hey, if you're interested, other people might be too. So, you ask for it, you get it.

Name: Patrick James Rothfuss
Description: Green eyes. Vaguely sausage-shaped. Furry.
Turn offs: Cauliflower. Mimes. Women that stab me in the eye.
Fears: Devil monkeys. People putting their fingers in my belly button.

Brief Biography: Pat Rothfuss sprung fully formed from Marge Rothfuss, his mother, in Madison Wisconsin. When he was only a week old, he was kidnapped by a group of carnal side-show freaks who had recently lost their feal boy. They returned Pat to his parents two weeks later with an apology, explaining that his incessant sharp-tongued back-sassing was driving away the crowds.

Pat grew to the height of a man in a mere three months and at the same time taught himself to read and write using only a shovel and a dead cat. He groked hard controlling him from outer space.

When the voices told him to, Pat left to attend college at UWSP. There he joined Slytherin house and had many wonderful adventures. One time he got into a bar fight wearing only a leather vest and a pair of furry pants. In retrospect, Pat recognizes a recurring pants theme to many of his adventures.

After graduating, Pat evolved into a being of pure light and energy. Then he went on to Grad School, where he evolved even further into being composed entirely of rage, bile, binder twine, and sweet, sweet, methadone.

Through all of this Pat has written the College Survival Guide for the Pointer because he likes to make people laugh.

Thanks for your letter, Bunny. For being this week's featured letter, you receive a five dollar gift certificate to GottaHavaJava. Remember kids, coffee's not just good, it's good for you. Have a college survival question? We here at the Rothfuss Consortium can help. Send a letter to proth@wsunix.wsu.edu and get the advice you so desperately need.

We here at the Rothfuss Consortium have been taking careful note of strange signs and portents as of late. Within the last two months we have witnessed many odd things: strange lights in the night sky; a rain of guinea pigs born singing with the voice of a small child and demanding their precious life-giving caffeine courses through my veins, lending me the vitality to answer letters like this one:

Heya Pat!

I've been reading your articles since about this time last year and I wanted to tell you how much I enjoy them. In fact, they are the main reason I'm excited to pick up the current issue of the Pointer each week.

Well, I've got nothing. I know, it's pathetic. I have the ole "too shy to ask the guy out" problem, but it's been done before. My only sob story is that my boss' dog ate my favorite pair of shoes last weekend, but that doesn't seem like College Survival material.

The only new question I came up with was: "Who is Pat Rothfuss?"

I realize it's not something essential to college survival but I don't think you've done it before. If so, I sure as hell don't remember ever reading it.

Original Bunny

Well Bunny, I've never really done a column all about me, because in all honesty, it seems a little Narcissistic even for a raving Egomaniac like myself. But hey, if you're interested, other people might be too. So, you ask for it, you get it.

Name: Patrick James Rothfuss
Description: Green eyes. Vaguely sausage-shaped. Furry.
Turn offs: Cauliflower. Mimes. Women that stab me in the eye.
Fears: Devil monkeys. People putting their fingers in my belly button.

Brief Biography: Pat Rothfuss sprung fully formed from Marge Rothfuss, his mother, in Madison Wisconsin. When he was only a week old, he was kidnapped by a group of carnal side-show freaks who had recently lost their feal boy. They returned Pat to his parents two weeks later with an apology, explaining that his incessant sharp-tongued back-sassing was driving away the crowds.

Pat grew to the height of a man in a mere three months and at the same time taught himself to read and right using only a shovel and a dead cat. He groked hard controlling him from outer space.

When the voices told him to, Pat left to attend college at UWSP. There he joined Slytherin house and had many wonderful adventures. One time he got into a bar fight wearing only a leather vest and a pair of furry pants. In retrospect, Pat recognizes a recurring pants theme to many of his adventures.

After graduating, Pat evolved into a being of pure light and energy. Then he went on to Grad School, where he evolved even further into being composed entirely of rage, bile, binder twine, and sweet, sweet, methadone.

After Grad School Pat joined forces with five plucky Japanese schoolgirls to form a giant robot that fights crime, rescues kittens, and makes hot meals of the elderly. [note: "of" is not a typo here]

Redpath and other leading folk musicians. She has appeared on National Public Radio's "Prairie Home Companion." Fiona Ritchie recently devoted an hour to Newton's accomplishments on the nationally syndicated broadcast. "The Thistle and Shamrock." Newton's solo CD, "Crossing to Scotland," has earned critical acclaim in the U.S. and abroad.

Robertson is one of the most sought-after traditional harpists and has toured the U.S., Canada and Europe as a soloist, and also leads workshops and retreats. She has recorded 20 albums, most recently "The Spiral Gate" and "Dance to Your Shadow" on the Narada label. She also has published 11 volumes of harp arrangements and three instructional videos.

The ensemble recorded a CD, "Castles, Kirts and Caves", at historic locations in Scotland. Their new CD, "Ferintosh", will be released this year.

Audience members should be aware that construction on the Fine Arts Center has closed some entrances to the building. Patrons should watch for signs indicating which entrances to use and allow extra time to find the correct entrance.

E.A.R.T.H.

Aware Residents Thinking Holistically, or E.A.R.T.H. E.A.R.T.H. is a special hall organization unique to Knutzen Hall. In the fall of 1998 Knutzen was given special designation as the Eco-Hall on the UWSP campus. E.A.R.T.H. was created to help fulfill the mission and meet resident's environmental needs. They provide additional programming and recreational activities that focus on sustainable living.

The students who join stay for a variety of reasons; including social interaction, environmental awareness, and care and concern for their surroundings. As one new member put it, "I plan on saving the world and this looked like a good place to start!" Involved students do not have to be a science major or the science major! Sign up or have a desire to learn and have fun.

If you would like to join in our efforts or simply see what we are all about you are invited to attend any meeting on Thursday 7pm in the basement of Knutzen Hall in the EARTH Room!

Meningitis
from page 3

To reduce the risk, students are advised to avoid frequent bar patronage, decrease binge drinking and stop smoking.

Indulge in healthy habits such as adequate sleep, good nutrition, and frequent hand washing.

Students can also receive meningitis vaccine, also called Menomune, provided by Health Services. The vaccine, which costs $61, is safe and adverse reactions are mild and infrequent, consisting of redness and pain at the site of injection. The duration of the vaccine's efficiency is roughly three to five years.
